Subject: Phase I Environmental Site Assessment
650 and 700 Pacific Coast Highway
El Segundo, California 90245
AEI Project No. 422548

Dear Jacob Yi:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (949) 752-9300 or kbachrach@aeiconsultants.com.

Sincerely,

Ken Bachrach
Vice President
AEI Consultants

PROJECT SUMMARY

650 and 700 Pacific Coast Highway, El Segundo, Los Angeles County, California 90245
AEI Project No. 422548

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Thorofare Capital, Inc. to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 650 and 700 Pacific Coast Highway, El Segundo, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	650 and 700 Pacific Coast Highway, El Segundo, Los Angeles County, California 90245 Note: the site address is also identified as 650 and 700 N Sepulveda Blvd
Property ID (APN or Block/Lot)	650 PCH – 4138006010; 4138006031 700 PCH - 4138006005
Location	East side of Pacific Coast Highway (Sepulveda Boulevard)
Property Type	Mixed-Use (Office, Retail, and/or Multifamily)
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	5.81/Los Angeles County Assessor
Number of Buildings	2
Building Construction Date(s)/Source	1957 and 1962/Los Angeles County Assessor
Building Square Footage (SF)/Source	200220/Client provided
Number of Floors/Stories	1 and 8
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	Boeing
Current On-site Operations/Use	Office, circuit board assembly/manufacturing, research and development, laboratory, administrative and maintenance activities
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	RCRA NonGen / NLR, HAZNET (listed four times), CA HWTS (listed four times), CA CERS HAZ WASTE, CA CERS TANKS, CA CERS, ICIS, FINDS (listed three times), ECHO (listed twice), CA AST, CA ENVIROSTOR, SEMS-ARCHIVE, CA SWEEPS UST, CA LOS ANGELES CO. HMS

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1896 - 1927	Undeveloped land	Previous report
1928 - 1947	Agricultural and fallow land	Aerial photographs

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1953	Agricultural land with small agricultural structure	Aerial photographs
1957 and 1962	Current site improvements were constructed for commercial and industrial use	Agency records
1963 - 1999	Current site improvements used for commercial and industrial use.	Aerial photographs, Agency records, City directories, Interviews, Site observations
2000 - 2007	Current site improvements - Unknown occupancy	Aerial photographs, Agency records, City directories, Interviews, Site observations
2008 - present	Current site improvements used for commercial and industrial use.	Aerial photographs, Agency records, City directories, Interviews, Site observations

Based on a review of historical sources, the subject property was developed for agricultural use from at least 1928 until at least 1938. From at least 1947 until at least 1953, the subject property appeared undeveloped. Construction of the current site improvements began at the 700 North Sepulveda Boulevard address in 1955 with additional improvements at 700 in 1957. The office structure at 650 North Sepulveda Boulevard was constructed in 1962. Tenants noted at the 700 North Sepulveda Boulevard address include: Pharmaceutical Co. (1958); The Rabin Company/Pharmapak Drug Company (1960); Rabin Winters Corporation (1962-1967); Rabin Winters Division of Brunswig Drug/Bergan Brunswick (1966-1974); BBC Laboratories, Norton Products/Tannehill Pharmaceuticals (1971); Devlin Pharmaceuticals Inc. (1974-1981); Hughes Aircraft Company (1982-1999) and The Boeing Company (2008-Present). Tenants at the 650 North Sepulveda Boulevard address include: Aerospace Center (1962-1966); Computer Science Corporation (CSC) (1969-1976); Howard Hughes / Hughes Corporation / Hughes Aircraft Company (1982-1999) and The Boeing Company (2008-Present).

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Multi-tenant commercial (740 North Sepulveda Boulevard) Multi-tenant Commercial (1910 East Maple Avenue)	None identified RCRA NonGen / NLR (listed twice), CA CERS HAZ WASTE, CA HAZNET, CA CERS, CA HWTS
East	Equinix (1920 East Maple Avenue) Vanderland (607 Lairport Street) Hagemeyer (1921 East Mariposa Avenue)	CA LUST, CA HIST CORTESE, CA CERS CA SWEEPS UST, CA LOS ANGELES CO. HMS, CA UST CA SWEEPS UST, CA CERS HAZ WASTE, CA NPDES, CA CIWQS, CA CERS, CA UST, RCRA NonGen / NLR

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
South	Multi-tenant Strip Mall (600-630 North Sepulveda Boulevard)	RCRA NonGen / NLR, FINDS (listed twice), ECHO (listed twice), CA DRYCLEANERS (listed three times), EDR Hist Cleaner, RCRA-SQG, EDR Hist Auto, CA UST
West	Carl's Junior (639 North Sepulveda Boulevard) Commercial property and parking lot (703 North Sepulveda Boulevard) Parking lot (739 North Sepulveda Boulevard)	None identified None identified None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- Based on a review of historical sources, eight 1,000-gallon underground storage tanks (USTs) were located on the subject property from 1958 until 1985. The USTs were constructed of concrete and reportedly contained gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. The USTs were reportedly associated with the manufacturing of lighter fluid and pharmaceuticals. The exact location of the USTs was not identified. However, according to historical sources, the USTs appear to have been likely located in the northeast portion of the property. AEI identified a building permit for removal of the USTs dated May 21, 1982. Remarks on the permit indicate "Remove 8 underground tanks, fill and compact void, resurface. After the removal of the tanks, the void will be filled with clean sand compacted to 90% of ASTM standards and supervised by Western Laboratories". AEI also identified an application for closure of Hazardous Materials Underground Storage dated November 6, 1985 indicating that permanent concrete 15-year-old 1,000-gallon tank(s) containing oil & grease, sulfides, organic acids, copper and zinc. A Phase II performed by Ramboll Environ in May of 2016 indicated that sampling was performed in the suspected location of the former USTs (northeastern portion of the site). It should be noted that the previous Phase II did not include sampling at an area identified as the former gasoline pump, which was located further west of the former USTs. The soil vapor samples were collected at depths ranging from 10.5 to 12 feet bgs; as such shallow soil vapor conditions do not appear to have been assessed. Due to soil conditions, GPR penetration was 3 feet or less. The closed USTs may have been installed at depths exceeding 5 feet. Although the USTs were scheduled to be removed and backfilled with sand, based on the results of the previous Phase II (borings included concrete and asphalt), the concrete USTs may have been closed in place and/or remnants of the concrete remain

in the subsurface. Analytical results at the time revealed concentrations of constituents of concern (petroleum hydrocarbons, volatile organic compounds, metals) in soil and soil vapor below the ESLs in effect at the time. ESLs have changed in CA since 2016. Soil vapor concentrations detected at the time are above the current commercial/ industrial ESLs (from 2019) for benzene and ethylbenzene. The detected concentrations of benzene and ethylbenzene above the current commercial/industrial ESLs represents a REC.

- Based on the review of historical sources, the subject property was equipped with a concrete clarifier. The clarifier was located at the subject property addressed as 700 North Sepulveda Boulevard from at least 1966 until at least 1985. The clarifier was reportedly installed by Bergin Brunswick and used during the manufacturing of pharmaceuticals. Samples received by IT Corporation on October 16, 1985 performed on six samples of clarifier sludge submitted by Hughes Aircraft Space and Communications were analyzed and found to contain high levels of Tetrachloroethylene. Tetrachloroethylene concentrations of 2,000 micrograms per liter (µg/L) were recorded in Comp. 1&2 and 700 µg/L were recorded in Comp. 3&4. During the course of this assessment, AEI identified correspondence from the County of Los Angeles, Department of Public Works indicating that the clarifier was filled in place on October 29, 1985. The exact location of the clarifier was not identified, however, based on a review of historical permits, the clarifier was identified to be located in the "rear end of building - 700 N. Sepulveda" (which is expected to be the eastern exterior area of the 700 building). The previous Phase II conducted in 2016 (discussed in Section 6.3), did not include sampling on the eastern exterior area of the 700 building and only included a limited geophysical survey of this area. Based on the lack of location identification, the lack of testing of the clarifier during the Phase II and the levels of Tetrachloroethylene identified in the clarifier sludge samples, the former clarifier represents a REC.

- Due to the reported security-sensitive nature of operations within the subject property buildings, limited access was provided to the interiors of the buildings. Although not observed, during the site reconnaissance, AEI was informed by Mr. Paul Summers that laboratories at the 700 North Sepulveda Boulevard building engage in the manufacturing/assembly of circuit boards. Circuit board manufacturing operations typically utilize chlorinated solvents for board cleaning and surface preparation. Mr. Summers admitted the use of hazardous substances in the laboratories, however, a list of hazardous substances was not provided. AEI was not permitted to observe any laboratories or hazardous material storage areas. According to a review of DTSC HWTS records, Boeing generated various hazardous wastes including halogenated solvents. Based on the duration of on-site operations (approximately 12 years with Boeing), the assembly of circuit boards at the subject property represents a REC.

- Hughes Aircraft Co SCG at the address 690 N Sepulveda Boulevard was listed in the Statewide Environmental Evaluation and Planning System (SWEEPS UST) database. The underground storage tank listing was updated and maintained by the State Water Resources Control Board in the early 1990's. The listing is no longer updated or maintained. No information regarding the number of USTs, content, capacity or status is available in this database. This listing is also associated with a permit associated with the Los Angeles County Department of Public Works (Facility Id: 010427-010342). AEI contacted the LACDPW for additional information regarding this UST listing, however, a response is pending. It is unclear if this UST listing is associated with the former USTs located at 700 N Sepulveda Boulevard. The 690 N Sepulveda Boulevard has been historically associated with the 650 building, and as such, this listing may pertain to a UST associated with this building. The lack of information on this UST is considered a data gap. The potential presence of a UST associated with the 650 building and the lack of supporting documentation represents a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site. The entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial/light industrial purposes and thus no further action related to the former agricultural use of the subject property is warranted at this time.
- The regulatory database indicates the presence of a dry cleaner using PERC at the adjacent site to the south of the subject property from at least 1995 until at least 2014. Based on the proximity of this site to the subject property, the potential exists that,

if a release of chlorinated solvents occurred at this site, the subsurface of the subject property may have also been impacted. This site may pose a threat for vapor-phase contaminant migration to the subject property if a release has occurred. However, no releases have been attributed to this site at this time. If the the User of this report desire a greater degree of certainty regarding the potential for vapor-phase contamination to the subject property, further investigation would be required.

- Due to the age of the subject property buildings, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.
- Due to the age of the subject property buildings, there is a potential that LBP is present. During the site reconnaissance, damaged painted surfaces were observed in throughout the interior and exterior of the subject property buildings. Based on the potential presence of LBP, AEI recommends the property owner implement an O&M Plan which stipulates that the assessment, repair and maintenance of damaged painted surfaces be performed to protect the health and safety of the building occupants. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

Conclusions, Opinions, and Recommendations

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 650 and 700 Pacific Coast Highway, El Segundo, Los Angeles County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Phase II Subsurface Investigation and Geophysical Survey
- Review of pending agency records for the UST listed at 690 North Sepulveda Boulevard

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 650 and 700 Pacific Coast Highway, El Segundo, Los Angeles County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the reported security-sensitive nature of operations within the subject property buildings, limited access was provided to the interiors of the buildings. AEI was allowed access to the elevator equipment room, electrical rooms, janitorial maintenance rooms and hallways. According to Mr. Paul Summers, the subject property assembles circuit boards. Mr. Summers admitted the use of hazardous substances in the laboratories, however, a list of hazardous substances was not provided. AEI was not permitted to observe any laboratories or hazardous material storage areas. This limitation is significant and may alter the overall findings of this assessment and there is a potential that features of concern may be present that were not observed by AEI during the site inspection.
- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- Records from the Los Angeles County Public Works regarding the UST listing under 690 N Sepulveda Boulevard is pending.
- On May 18, 2020, AEI contacted the Los Angeles County Public Health Investigations via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems. As of the date of this report, LACPHI has not responded to this request.
- On May 18, 2020, AEI contacted the El Segundo Building Department via online records request for information on the subject property in order to identify historical tenants, features of concern and property use. As of the date of this report, ESBD has not responded to this request.

- On May 18, 2020, AEI contacted the El Segundo Planning Department via online records request for information on the subject property in order to identify AULs associated with the subject property. As of the date of this report, ESPD has not responded to this request.
- AEI requested documentation from DTSC-Cypress for information about the subject property and records that were referenced in the completed activities page of the Envirostor listing for Devlin Pharmaceuticals and was informed by Jone Barrio, Regional Records Coordinator, that no records were available for review. On May 28, 2020, Jone Barrio forwarded the records request to the DTSC Chatsworth office in an attempt to locate any records for the subject property.
- Due to the presence of stored products and miscellaneous features within the buildings, direct visual observation of some of the floor and wall areas of the buildings was not possible. Additionally, due to the presence of parked vehicles or other miscellaneous features, isolated portions of exterior ground areas were not available for direct visual observation. Features may be present that were not observed during AEI's site inspection.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	Historical sources were not obtained at five-year intervals dating back to first developed use. AEI was not able to track the history of the subject property between the years 2000 and 2007 as none of the historical sources utilized as part of this assessment covered this time period. In 1999, the subject property was occupied by Hughes Aircraft and used for aerospace offices. From 2008 to present, the subject property was occupied by Boeing and used for aerospace offices and circuit board assembly. Thus, it is assumed that during this time period the subject property would have been office, if not office and light manufacturing. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous reports, interviews

1.6.2 Significant Data Gaps

The following significant data gaps were identified during the course of this assessment:

Significant Data Gap	During the course of this assessment, location of historic subsurface features was not definitively identified. The lack of location of these features represents a significant data gap.
Information/Sources Consulted	Aerial photographs, agency records, previous reports, interviews

Significant Data Gap	Limited access to the property and limited agency records at the time of this report issuance represents a significant data gap.
Information/Sources Consulted	Aerial photographs, agency records, previous reports, interviews

1.7 Reliance

This report is for the use and benefit of, and may be relied upon by, Thorofare Asset Based Lending REIT Fund V, LLC and any of their respective affiliates, agents and advisors., the initial and subsequent holders from time to time of any debt (or any portion thereof) and/or debt securities secured, directly and indirectly, by the property which is the subject of this report, by any participation interest in any such debt (or any portion thereof), and indenture trustee, servicer or other agent acting on behalf of such holders of such debt (or any portion thereof) and/or debt securities; any rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns. In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or any portion thereof) and or debt securities.

This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by Thorofare Capital, Inc. on May 15, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	650 and 700 Pacific Coast Highway, El Segundo, Los Angeles County, California 90245 Note: the site address is also identified as 650 and 700 N Sepulveda Blvd
Property ID (APN or Block/Lot)	650 PCH – 4138006010; 4138006031 700 PCH - 4138006005
Location	East side of Pacific Coast Highway (Sepulveda Boulevard)
Property Type	Mixed-Use (Office, Retail, and/or Multifamily)
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	5.81/Los Angeles County Assessor
Number of Buildings	2
Building Construction Date(s)/Source	1957 and 1962/Los Angeles County Assessor
Building Square Footage (SF)/Source	200220/Client provided
Number of Floors/Stories	1 and 8
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	Boeing
Current On-site Operations/Use	Office, circuit board assembly/manufacturing, research and development, laboratory, administrative and maintenance activities
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	RCRA NonGen / NLR, HAZNET (listed four times), CA HWTS (listed four times), CA CERS HAZ WASTE, CA CERS TANKS, CA CERS, ICIS, FINDS (listed three times), ECHO (listed twice), CA AST, CA ENVIROSTOR, SEMS-ARCHIVE, CA SWEEPS UST, CA LOS ANGELES CO. HMS

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	El Segundo Water Division
Sewage Disposal/Treatment	City of El Segundo

Utility source/system information listed in the table above is provided by Mr. Paul Summers, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a commercial, retail, industrial and residential mixed use area of El Segundo, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Multi-tenant commercial (740 North Sepulveda Boulevard) Multi-tenant Commercial (1910 East Maple Avenue)	None identified RCRA NonGen / NLR (listed twice), CA CERS HAZ WASTE, CA HAZNET, CA CERS, CA HWTS
East	Equinix (1920 East Maple Avenue) Vanderland (607 Lairport Street) Hagemeyer (1921 East Mariposa Avenue)	CA LUST, CA HIST CORTESE, CA CERS CA SWEEPS UST, CA LOS ANGELES CO. HMS, CA UST CA SWEEPS UST, CA CERS HAZ WASTE, CA NPDES, CA CIWQS, CA CERS, CA UST, RCRA NonGen / NLR
South	Multi-tenant Strip Mall (600-630 North Sepulveda Boulevard)	RCRA NonGen / NLR, FINDS (listed twice), ECHO (listed twice), CA DRYCLEANERS (listed three times), EDR Hist Cleaner, RCRA-SQG, EDR Hist Auto, CA UST
West	Carl's Junior (639 North Sepulveda Boulevard) Commercial property and parking lot (703 North Sepulveda Boulevard) Parking lot (739 North Sepulveda Boulevard)	None identified None identified None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 Physical Setting

Geologic Unit: Description/Source	According to the United States Department of Agriculture's Report and General Soil Map for Los Angeles County, the area surrounding the subject property is underlain by soils of the Delhi Association from the Cenozoic era / USGS and United States Department of the Interior
Soil Series: Description/Source	Delhi soils are over 60 inches deep, are somewhat excessively drained, and have rapid hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet. The soils consist of coarse sand, loamy sand, silt loam, sandy loam, gravelly sand and clay. / USDA Soil Survey
Groundwater Flow Direction/Source	West / Case Closure Package (CCP) for Equinix Communications 1920 East Maple Avenue (adjacent on the east of the subject property)
Estimated Depth to Groundwater/ Source	90 feet bgs / CCP

Surface waters on the subject property or adjoining sites	None
Additional notes	According to FEMA Flood Insurance Rate Map (FIRM) No. 06037C1770F, dated September 26, 2008, the subject property is located in Zone X designated as an area outside the 100 and 500-year flood zones and the flood potential for the subject property is minimal.

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1896 - 1927	Undeveloped land	Previous report
1928 - 1947	Agricultural and fallow land	Aerial photographs
1953	Agricultural land with small agricultural structure	Aerial photographs
1957 and 1962	Current site improvements were constructed for commercial and industrial use	Agency records
1963 - 1999	Current site improvements used for commercial and industrial use.	Aerial photographs, Agency records, City directories, Interviews, Site observations
2000 - 2007	Current site improvements - Unknown occupancy	Aerial photographs, Agency records, City directories, Interviews, Site observations
2008 - present	Current site improvements used for commercial and industrial use.	Aerial photographs, Agency records, City directories, Interviews, Site observations

Based on a review of historical sources, the subject property was developed for agricultural use from at least 1928 until at least 1938. From at least 1947 until at least 1953, the subject property appeared undeveloped. Construction of the current site improvements began at the 700 North Sepulveda Boulevard address in 1955 with additional improvements at 700 in 1957. The office structure at 650 North Sepulveda Boulevard was constructed in 1962. Tenants noted at the 700 North Sepulveda Boulevard address include: Pharmaceutical Co. (1958); The Rabin Company/Pharmapak Drug Company (1960); Rabin Winters Corporation (1962-1967); Rabin Winters Division of Brunswig Drug/Bergan Brunswick (1966-1974); BBC Laboratories, Norton Products/Tannehill Pharmaceuticals (1971); Devlin Pharmaceuticals Inc. (1974-1981); Hughes Aircraft Company (1982-1999) and The Boeing Company (2008-Present). Tenants at the 650 North Sepulveda Boulevard address include: Aerospace Center (1962-1966); Computer Science Corporation (CSC) (1969-1976); Howard Hughes / Hughes Corporation / Hughes Aircraft Company (1982-1999) and The Boeing Company (2008-Present).

The following historical addresses were associated with the subject property: 650, 690 and 700 North Sepulveda Boulevard. These addresses were also researched as part of this assessment when applicable and/or reasonably ascertainable.

Based on a review of historical sources, eight 1,000-gallon underground storage tanks (USTs) were located on the subject property from 1958 until 1985. The USTs were constructed of concrete and reportedly contained gasoline, sulfides, organic acids, copper, zinc, mineral oils,

alcohols, and solvents. The USTs were reportedly associated with the manufacturing of lighter fluid and pharmaceuticals. The exact location of the USTs was not identified. However, according to historical sources, the USTs appear to have been likely located in the northeast portion of the property. AEI identified a building permit for removal of the USTs dated May 21, 1982. Remarks on the permit indicate "Remove 8 underground tanks, fill and compact void, resurface. After the removal of the tanks, the void will be filled with clean sand compacted to 90% of ASTM standards and supervised by Western Laboratories". AEI also identified an application for closure of Hazardous Materials Underground Storage dated November 6, 1985 indicating that permanent concrete 15-year-old 1,000-gallon tank(s) containing oil & grease, sulfides, organic acids, copper and zinc. A Phase II performed by Ramboll Environ in May of 2016 indicated that sampling was performed in the suspected location of the former USTs (northeastern portion of the site). It should be noted that the previous Phase II did not include sampling at an area identified as the former gasoline pump, which was located further west of the former USTs. The soil vapor samples were collected at depths ranging from 10.5 to 12 feet bgs; as such shallow soil vapor conditions do not appear to have been assessed. Due to soil conditions, GPR penetration was 3 feet or less. The closed USTs may have been installed at depths exceeding 5 feet. Although the USTs were scheduled to be removed and backfilled with sand, based on the results of the previous Phase II (borings included concrete and asphalt), the concrete USTs may have been closed in place and/or remnants of the concrete remain in the subsurface. Analytical results at the time revealed concentrations of constituents of concern (petroleum hydrocarbons, volatile organic compounds, metals) in soil and soil vapor below the ESLs in effect at the time. ESLs have changed in CA since 2016. Soil vapor concentrations detected at the time are above the current commercial/industrial ESLs (from 2019) for benzene and ethylbenzene. The detected concentrations of benzene and ethylbenzene above the current commercial/industrial ESLs represents a REC.

Based on the review of historical sources, the subject property was equipped with a concrete clarifier. The clarifier was located at the subject property addressed as 700 North Sepulveda Boulevard from at least 1966 until at least 1985. The clarifier was reportedly installed by Bergin Brunswick and used during the manufacturing of pharmaceuticals. Samples received by IT Corporation on October 16, 1985 performed on six samples of clarifier sludge submitted by Hughes Aircraft Space and Communications were analyzed and found to contain high levels of Tetrachloroethylene. Tetrachloroethylene concentrations of 2,000 micrograms per liter (µg/L) were recorded in Comp. 1&2 and 700 µg/L were recorded in Comp. 3&4. During the course of this assessment, AEI identified correspondence from the County of Los Angeles, Department of Public Works indicating that the clarifier was filled in place on October 29, 1985. The exact location of the clarifier was not identified, however, based on a review of historical permits, the clarifier was identified to be located in the "rear end of building - 700 N. Sepulveda" (which is expected to be the eastern exterior area of the 700 building). The previous Phase II conducted in 2016 (discussed in Section 6.3), did not include sampling on the eastern exterior area of the 700 building and only included a limited geophysical survey of this area. Based on the lack of location identification, the lack of testing of the clarifier during the Phase II and the levels of Tetrachloroethylene identified in the clarifier sludge samples, the former clarifier represents a REC.

If available, copies of historical sources are provided in Appendix D.

3.1 Aerial Photographs

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR - 1045033 collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1923	Agricultural land	NORTH: Agricultural land EAST: Agricultural land SOUTH: Agricultural land WEST: Roadway followed by: Agricultural land and associated agricultural/residential structures
1928	The subject property appears as agricultural land with agricultural/residential structures along at the northwest and southwest corners of the site	NORTH: Agricultural land with additional residential/agricultural structures EAST: No significant change is noted SOUTH: No significant change is noted WEST: No significant change is noted
1938, 1947	Agricultural / fallow land (cleared land and/or earth moving is apparent in 1938)	NORTH: Agricultural fallow land EAST: Agricultural fallow land SOUTH: Agricultural fallow land with a small structure WEST: Roadway followed by: agricultural land with agricultural/residential structures and one commercial structure
1953	Agricultural / fallow land with a small agricultural structure and what appears to be an unpaved roadway	NORTH: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: Roadway followed by: residential and commercial structures with agricultural and fallow land
1963	The subject property appears developed with the current site improvements	NORTH: Partially developed with the current commercial structures EAST: Developed with the current commercial structures SOUTH: Commercial structure WEST: Roadway followed by: Commercial structures and associated parking
1977, 1979, 1981, 1989, 1994	No significant change is noted	NORTH: Current commercial structures EAST: No significant change is noted SOUTH: No significant change is noted WEST: Roadway followed by: Commercial structures and associated parking
2002, 2005, 2009, 2012, 2016	No significant change is noted	NORTH: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: Roadway followed by: current commercial structures and associated parking areas

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR - 1045033. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR - 1045033. Directories were reviewed in approximate five-year increments from 1920 to 2015. The first listing for the subject property appeared in 1962. The following table summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Year(s)	Address - Occupant Listed
1920 - 1961 (non-inclusive)	No listing
1962	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - Brucemore Inc Rabin Winters Corp 700 North Sepulveda Boulevard - John David Drug Company - Rabin Winters Corporation
1963	No listing
1964	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry (includes Aerospace Printing Center) 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - John David Drug Company - Rabin Winters Corporation 700 North Sepulveda Boulevard - Pharmapak Drug Company
1965, 1966	No listing
1967	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry (includes Aerospace Printing Center) 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - Brucemore Inc Rabin Winters Corp

Year(s)	Address - Occupant Listed
	700 North Sepulveda Boulevard - John David Drug Company - Rabin Winters Corporation 700 North Sepulveda Boulevard - Rabin Winters Corp
1969	No listing
1970	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - Rabin Winters Division of Brunswig Drug
1971	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - BBC Laboratories 700 North Sepulveda Boulevard - Norton Products 700 North Sepulveda Boulevard - Tannehill Pharmaceuticals
1972	No listing
1975	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - Devlin Pharmaceuticals, Inc.
1976	No listing
1980	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - Devlin Pharmaceuticals, Inc.
1981	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 690 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry 700 North Sepulveda Boulevard - Devlin Pharmaceuticals, Inc.
1985	650 North Sepulveda Boulevard - Multiple office tenants in manufacturing and aerospace industry
1986, 1990, 1991, 1992, 1994, 1995, 1996, 1999, 2000	No listing
2001	650 North Sepulveda Boulevard - XXXX

Year(s)	Address - Occupant Listed
	690 North Sepulveda Boulevard - XXXX 700 North Sepulveda Boulevard - XXXX
2003, 2004, 2006, 2009, 2015	No listing

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

Based on a review of city directories, the subject property appears to have been occupied by various manufacturing tenants from at least 1962 to 1985; refer to Section 3.0 for additional information.

3.4 Historical Topographic Maps

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Public Health Investigations (LACPHI)	May 18, 2020	Email	NA	Response pending, refer to Section 1.5

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
El Segundo Fire Department (ESFD)	May 18, 2020	Email	Ms. Liz Lydic, Management Analyst	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
1994	PacTel Cellular	Hazardous Materials Disclosure Information and Business Emergency Plan	Sulfuric Acid in batteries
1998 - 1999	Airtouch Cellular	Chemical inventory	Battery Electrolyte for Cell Tower
1994 - 1999	Hughes Space And Communications	Chemical Inventory	Potassium Hydroxide, Tolyltriazole, Sodium Polyacrylate, 1-Hydroxyethylidine-1, 1-Diphophonic Acid
2000	Boeing Satellite Systems	Facility Information	Hazardous Material Inventory
2000	Boeing Satellite Systems	Notice to Comply	Minor violations due for repair by 12/8/2000
2001 - 2005	Verizon Wireless	Chemical Disclosure Inventory and permitting	Battery Electrolyte for Cell Tower and Diesel Fuel for backup generator
2002 - 2004	Verizon Wireless	Emergency and Hazardous Chemical Inventory	Sulfuric acid in batteries in battery room
2003	Boeing Satellite Systems	Hazardous Waste and Hazardous Materials Management Regulatory Program	Permit and business plan
2006	Boeing Building S-30	Inspection Report	No significant Violations
2009	Boeing Building S-37	Inspection Report	No significant Violations

Based on a review of documents provided by the El Segundo Fire Department, no releases or violations were identified for the subject property.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
El Segundo Building Department (ESBD)	May 18, 2020	Online records Request	NA	Response pending, refer to Section 1.5

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1961	Aerospace Center	Building permit for 7-story building with rooftop helistop
1964	Aerospace Center	Building permit for partitions
1965	Computer Science Corporation	Building permit for HVAC
1969	Computer Science Corporation	Building permit - remodel office
1972	Aerospace Center (Computer Science Corporation)	Building permit for storage vault
1976	CSC	Building permit for a 1500-gallon water tank
1982	Bruce Rabin	Building permit for removal of 8 underground storage tanks, fill and compact void and resurface
1985	Hughes Aircraft	Plumbing permit
1983	Chevron USA, Inc.	Building permit for equipment storage and mobile phone
1984	Howard Hughes	Certificate of Occupancy - commercial facility
1984	Howard Corporation	Permit to install fire sprinklers
1986	Hughes Aircraft	Permit for warehouse renovation
1990	Hughes Aircraft	Permit to install fire sprinkler heads
1999	Hughes Aircraft	Permit to resurface parking lot

Based on a review of documents obtained from the ESBD, the subject property was equipped with 8 underground storage tanks. Based on the historical information reviewed, eight 1,000-gallon USTs were located on the subject property from 1958 until 1985. The USTs were of concrete construction, and reportedly contained gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. No information pertaining to the exact location was available during the course of this assessment, although they were described as being located "north of the building, near receiving" in a memo dated November 12, 1985. A building permit dated May 21, 1982, was issued for the removal of 8 underground storage tanks, fill and compact the void and resurface under the supervision of Western Laboratories. The tanks were permitted for removal, however, no record of proper closure under regulatory oversight was identified. Further, no records regarding these USTs was identified on-file with the El Segundo Fire Department (ESFD). Refer to Sections 3.0, 5.1, and 6.3 for further discussion.

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
El Segundo Planning Department (ESPD)	May 18, 2020	Online records Request	NA	Response pending, refer to Section 1.5

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Assessor's Office	May 18, 2020	Website	N/A	Information obtained is discussed below

Records Summary

APN	650 PCH – 4138006010; 4138006031 700 PCH - 4138006005
Acreage	5.81 acres
Construction Date	1957 and 1962
Building Square Footage	200220 square feet
Current Owner	Not provided

The Boeing Company	2016	Asbestos Containing Waste	1.61
The Boeing Company	2018	Aqueous solutions (2 < PH < 12.5) with organic resideues < 10%	0.02

Based on a review of documents available from the DTSC, records indicate the disposal of multiple waste streams, including halogenated solvents. Environmental concerns associated with the generation of hazardous waste at the subject property from at least 1994 to at least 2018 are discussed in detail in Sections 3.0 and 5.1.

CA DTSC Envirostor

The subject property was identified in the CA DTSC Envirostor database as a "historical" site and in the SEMS-ARCHIVE database as an archived site. These listings do not appear to pertain to a release case; they appear to pertain to questionnaires and assessments of the property to determine if waste streams generated at the property were considered a significant threat to the environment. No records were identified in the EnviroStor database, however, a search of the listed facility ID indicated a discovery date of April 3, 1980 identified by an industrial waste survey questionnaire. On December 1, 1985, a preliminary assessment report indicated that 8 USTs were used by Rabins for the production of lighter fluid, Devlin manufactured pharmaceuticals and vitamins, Bergen manufactured pharmaceuticals and Hughes stored office equipment. The preliminary assessment also indicated that a Clarifier was closed on October 29, 1985. On December 8, 1994, Calsites validation program confirmed NFA for the DTSC. Additional Correspondence dated March 22, 2018 for administrative file review and reduction activity was noted. AEI requested documentation from DTSC-Cypress and was informed by Jone Barrio, Regional Records Coordinator. No records were available for review. On May 28, 2020, Jone Barrio forwarded our records request to the DTSC Chatsworth office in an attempt to locate any records for the subject property. A response is pending. According to a review of documents provided in previous reports, these listings appear to pertain to the closure of the USTs and clarifier discussed in Section 3.0.

South Coast Air Quality Management District

Date	Occupant	Document Type	Document Notes/Violations
1978	Devlin Pharmaceuticals, Inc.	Permit to Operate	Oven, Industrial heating and engineering
1980	Devlin Pharmaceuticals, Inc.	Permit to Operate	Oven, Industrial heating and engineering drying photochemically reactive solvents
1981	Devlin Pharmaceuticals, Inc.	Facility Equipment List	Oven drying permits granted pharmaceutical blending application denied
1985	Computer Sciences Corp	Facility Equipment List	No equipment listed
1989	Hughes Aircraft Company	Permit to Operate	Boiler, Rite watertube type
2004	The Boeing Company	Facility Equipment List	Permits to operate boilers, emergency generator and rule 1415 plan notifications
2004	Verizon Wireless	Notice to Comply	Post copy of permit
2008	Boeing Satellite Systems, Inc.	Rule 1415 Registration Form	Use and storage of Refrigerant in cooling towers
2010	Boeing Satellite Systems, Inc.	Rule 1415 Registration Form	Use and storage of Refrigerant in cooling towers
2012	Boeing Satellite Systems, Inc.	Rule 1415 Registration Form	Use and storage of Refrigerant in cooling towers
2013	Boeing Satellite Systems, Inc.	Permit to operate	Emergency electrical generator
2014	The Boeing Company	Rule 1415 Registration Form	Use and storage of Refrigerant in cooling towers
2016	The Boeing Company	Rule 1415 Registration Form	Use and storage of Refrigerant in cooling towers

2018	The Boeing Company	Rule 1415 Registration Form	Use and storage of Refrigerant in cooling towers
2020	The Boeing Company	Facility Equipment List	Rule 1415 plan notifications

Environmental concerns associated with the drying of photochemically reactive solvents and the use of an emergency generator at the subject property are discussed in detail in Sections 3.0, 5.1 and 7.1.

Los Angeles County Sanitation District

Date	Occupant	Document Type	Document Notes/Violations
1977	Computer Sciences Corporation	Permit for Industrial Wastewater Discharge	Discharge from cooling towers into sanitary sewer system
2002	Boeing Aircraft	Letter from Los Angeles County Sanitation District	Void of discharge permit 5815, company is exempt

Based on a review of documents provided by Los Angeles County Sanitation Department, the subject property has discharged overflow from cooling tower operations to the sanitary sewer. No record of unauthorized releases and no record of increased chromium levels were reported. In 2002, the site was exempted from permitting requirements for these features.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
Geologic Energy Management Division The California Geologic Energy Management Division (CalGEM)	May 18, 2020	CalGEM Map	Information obtained is discussed below

According to a review of the CalGEM map, an oil well and the El Segundo oil field is located approximately 500 feet to the south of the subject property. According to a review of aerial photographs, no evidence of oil wells or oil well development activities (such as oil well development pits/ponds) were identified on the subject property. An additional issue of concern with oil wells is the potential emission of methane and hydrogen sulfide gases. These gases can migrate through geologic materials and/or through pathways such as old oil wells, and fissures and fractures in underlying geologic formations. The emitted gases have the potential to accumulate within building interiors, adversely affecting human health. If the subject property is redeveloped, groundbreaking activities are conducted, and/or land use changes are planned, a methane assessment may be deemed warranted at that time.

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	May 18, 2020	NPMS Public Map Viewer	Information obtained is discussed below

According to information obtained from the NPMS Public Map Viewer, several underground hazardous pipelines are located along Pacific Coast Highway. No stressed vegetation was observed near the pipeline during AEI's reconnaissance and subject property staff reported no known environmental concerns associated with the pipelines. Releases from the pipelines (other than those caused by a third party) would be the responsibility of the operator. Based on this information, and the lack of a documented release identified in the regulatory database, no further action regarding the pipelines is warranted at this time.

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Facility Name	The Boeing Company, Aero Space Center, Southern California Edison - Customer Location, Hughes Space and Communications, The Boeing Company - S37, El Segundo, Boeing Satellite Systems - S38, Devlin Pharmaceuticals, Inc., Hughes Aircraft Company SCG
Address	650 - 700 North Sepulveda Boulevard, 650 North Sepulveda Boulevard, 650 North Pacific Coast Highway S37, 700 North Sepulveda Boulevard, 690 North Sepulveda Boulevard
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	RCRA NonGen / NLR, HAZNET (listed four times), CA HWTS (listed four times), CA CERS HAZ WASTE, CA CERS TANKS, CA CERS, ICIS, FINDS (listed three times), ECHO (listed twice), CA AST, CA ENVIROSTOR, SEMS-ARCHIVE, CA SWEEPS UST, CA LOS ANGELES CO. HMS
Comments	This site was identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) NonGen/NLR database. This database includes sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste. No violations were noted in this database. This site is listed four times in the Facility and Manifest Data (HAZNET) and HWTS databases. Data is extracted from copies of manifests received by the DTSC. Complete listing of reported waste disposed of from this site is listed in section 4.6. This site is listed in the CERS-HAZ database. This database is a list of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials. This site is listed as a Hazardous Waste Generator. No further information was available in this database. This site is listed in the CERS-Tank database. This is a list of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the

	Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials. This site is listed as an aboveground petroleum Storage Tank site. No further information was available in this database. This site is listed in the CERS database. The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. The site was listed as a Chemical Storage Facility. Violations were noted for Failure to complete and electronically submit a site map with all required content, Failure to include in the SPCC Plan a prediction of direction and total quantity of oil potentially discharged from the facility as a result of each type of major equipment failure. No further information was available in this database. This site is listed in the Integrated Compliance Information System (ICIS) database. The ICIS database, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit. Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring. This site is listed as a FINDS site three times and an ECHO site twice in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. This site is listed in the Aboveground Storage Tank (AST) database. No information regarding number of ASTs, content, capacity or status is available in this database. This site is identified as an Envirostor site on the regulatory database. The Envirostor database is maintained by the Department of Toxic Substances Control (DTSC) and identifies sites that have known contamination or sites for which further investigation is warranted. The status of the site is listed as "No further Action" as of December 8, 1994. The Division responsible for this site was listed as Cleanup Cypress. AEI requested documentation from DTSC-Cypress and was informed by Jone Barrio, Regional Records Coordinator. No records were available. Information obtained from the ENVIROSTOR database are discussed in Section 4.6. This site is listed in the Superfund Enterprise Management System Archive database. This database tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015.

	EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be a potential NPL site. According to a review of documents provided in previous reports, this listing appears to pertain to the closure of the USTs and clarifier discussed in Section 3.0. Hughes Aircraft Co SCG at the address 690 N Sepulveda Boulevard was listed in the Statewide Environmental Evaluation and Planning System (SWEEPS UST) database. The underground storage tank listing was updated and maintained by the State Water Resources Control Board in the early 1990's. The listing is no longer updated or maintained. No information regarding the number of USTs, content, capacity or status is available in this database. This listing is also associated with a permit associated with the Los Angeles County Department of Public Works (Facility Id: 010427-010342). AEI contacted the LACDPW for additional information regarding this UST listing, however, a response is pending. It is unclear if this UST listing is associated with the former USTs located at 700 N Sepulveda Boulevard. The 690 N Sepulveda Boulevard has been historically associated with the 650 building, and as such, this listing may pertain to a UST associated with this building. The lack of information on this UST is considered a data gap. The potential presence of a UST associated with the 650 building and the lack of supporting documentation represents a REC. This site was listed in the LOS ANGELES CO. HMS database. This database lists industrial waste and UST sites listed with the Los Angeles County Department of Public Works. The site is listed as Open. No further information was available in this database. Refer to Sections 3.0, 5.1, and 6.3 for further discussion.

Facility Name	LAX Photo Lab
Address	630 North Sepulveda Boulevard
Distance & Direction	Adjoining to the South
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NonGen/NLR, FINDS, ECHO
Comments	This site was identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) NonGen/NLR database. This database includes sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste. No violations were noted in this database.

	This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Based on the nature of this listing and lack of violations, it is not expected to represent a significant environmental concern. Based on the non-release nature of the listing, the nature of occupancy and the inferred direction of groundwater flow, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Tri-Cleaners
Address	630 North Sepulveda Boulevard, #11A
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	CA DRYCLEANERS (listed three times), EDR Hist Cleaner, RCRA-SQG, FINDS, ECHO
Comments	This site is listed three times in the CA DRYCLEANERS database. This database lists drycleaner related facilities that have EPA ID numbers. This site is listed in the EDR Hist Cleaners database. EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. This site is identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) Small Quantity Generators (SQGs) site. No Violations were noted in this database. This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. The regulatory database indicates the presence of a dry cleaner using PERC at the adjacent site to the south of the subject property from at least 1995 until at least 2014. Based on the proximity of this site to the subject property, the potential exists that, if a release of chlorinated solvents occurred at this site, the subsurface of the subject property may have also been impacted. This site may pose a threat for vapor-phase contaminant migration to the subject property if a release has occurred. However, no releases have been attributed to this site at this time. If the the User of this report desire a greater degree of certainty regarding the potential for vapor-phase contamination to the subject property, further investigation would be required. Based on the lack of a documented release, the review of additional regulatory agency files for this site was not deemed necessary.

Facility Name	Equinix Operating Center
Address	1920 East Maple Avenue
Distance & Direction	Adjoining to the east

Hydrologic Position	Up-gradient
Databases Listed	CA AST, CA CERS HAZ WASTE, CA CERS TANKS, CA CERS, CA LUST, CA CERS, CA UST, RCRA NonGen / NLR, RCRA-SQG, CA HIST UST, FINDS, ECHO
Comments	This site is listed in the Aboveground Storage Tank (AST) database. No information regarding the number of tanks, installation dates or contents was provided in this database. The database does indicate a total of 33,000 gallons. This site is listed in the CERS-HAZ database. This database is a list of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials. This site is listed as a Hazardous Waste Generator. No further information was available in this database. This site is listed in the CERS-Tank database. This is a list of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials. This site is listed as an Aboveground Storage Tank site. No further information was available in this database. This site is listed twice in the CERS database. The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. This site is listed as a Chemical Storage Facility. Violations were noted for Failure to retain a copy of the permit to operate at the facility, Hazardous Waste Generator Program - Administration/Documentation - general, Failure to accumulate universal waste for one year or less, Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit, Failure to send a legible copy of each hazardous waste manifest, Failure to label or mark each individual or container, Failure of the universal waste handler to transfer universal waste to another universal waste handler, or appropriate destination facility, Failure to use a DTSC registered hazardous waste transporter, APSA Program - Operations/ Maintenance - General, Failure to meet container management requirements. Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO), Failure to properly label hazardous waste accumulation containers, Failure of the functional line leak detector (LLD) to monitor at least hourly with the capability of detecting a release of 3.0 gallons, Failure to have an approved UST Monitoring Plan, Failure to maintain a list of employees trained by the designated operator, Failure to send hazardous waste offsite for treatment, Failure to inspect hazardous waste storage areas at least weekly. The site has returned to compliance. No further information was available in this database.

	This site is listed in the Underground Storage Tank (UST) database. The site is listed with two listed storage tanks. No further information was available in this database. This site was identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) NonGen/NLR database. This database includes sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste. No violations were noted in this database. This site is identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) Small Quantity Generators (SQGs) site. No Violations were noted in this database. This site is listed in the Historical Underground Storage Tank (HIST UST) database with three underground storage tanks. Tank 001, installed in 1981, is a 12,000 gallon tank used for unleaded fuel. Tank 002, installed in 1981, is a 12,000 gallon tank used for regular fuel. Tank 003, installed in 1981, is a 12,000 gallon tank used for unleaded fuel. No further information was available in this database. This property is listed as a FINDS and ECHO site in association with the above RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. The adjacent site to the east is occupied by Equinix Communications. The site has been operated as an active data storage center facility since 2005. The site includes 11 generators, two 30,000-gallon diesel USTs and associated underground piping. Each generator also contains a 3,000-gallon belly tank for local storage. During underground piping replacement and upgrades, possible contamination from a previous diesel fuel spill was identified (RB Case #: R-10916A). 63 Tons of contaminated soil was excavated and removed from the site. On April 24, 2018 the Los Angeles County Regional Quality Control Board issued a Closure/No Further Action letter for the completion of the site investigation and corrective action at the site. AEI reviewed regulatory closure documentation and based on the available documents, no elevated concentrations of constituents were identified in the closest soil samples to the subject property at the time of closure. Based on these findings, the listings are not expected to represent a significant environmental concern. Based on the closure under regulatory oversight of the soils only case, the depth of groundwater and the No further action status, this site is not expected to represent a significant environmental concern. Based on the factors discussed above, the review of additional regulatory agency files for this site was not deemed necessary, and these listings are not expected to represent a significant environmental concern.

Facility Name	Hughes Aircraft - EDSG
Address	1920 Maple Street East
Distance & Direction	Adjoining to the East

Hydrologic Position	Up-gradient
Databases Listed	CA LUST, CA HIST CORTESE, CA CERS, CA SWEEPS UST, CA LOS ANGELES CO. HMS
Comments	This site is listed in the Leaking Underground Storage Tank (LUST) database. The status of this site is "Case Closed". The case was reported as a soils only case and was closed as of September 18, 1996. It should be noted that additional sampling was conducted at this site during UST upgrades (see LUST case discussion above). Based on a review of historical building permits for the subject property, it appears that the USTs were located in the same area for both LUST cases. Although documents were not provided on GeoTracker for this release, based on the more recent sampling conducted in conjunction with the more recent LUST case for this site (RB Case #: R-10916A), a review of additional agency records does not appear warranted. This site is listed in the HIST CORTESE database. Sites in this database are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS) and the Department of Toxic Substances Control (CALSITES). This listing is no longer updated by the state agency. No further information was provided in the database. This site is listed in the CERS database. The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. The site was listed as a Leaking Underground Storage Tank Cleanup Site. This site is listed in the Statewide Environmental Evaluation and Planning System (SWEEPS UST) database. The underground storage tank listing was updated and maintained by the State Water Resources Control Board in the early 1990's. The listing is no longer updated or maintained. The database indicates an active site with at least 3 USTs. No further information was available in this database. This site was listed in the LOS ANGELES CO. HMS database. This database lists industrial waste and UST sites listed with the Los Angeles County Department of Public Works. Dates were not available for permitting or closures listed. Based on the closure under regulatory oversight of the soils only case, the depth of groundwater, and regulatory status, these listings are not expected to represent a significant environmental concern. Based on the factors discussed above, the review of additional regulatory agency files for this site was not deemed necessary.

Facility Name	Exodus Communications
Address	1920 East Maple Avenue
Distance & Direction	Adjoining to the East
Hydrologic Position	Up-gradient

Databases Listed	RCRA-SQG
Comments	This site is identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) Small Quantity Generators (SQGs) site. No Violations were noted in this database. Based on the non-release nature of the listing, the nature of occupancy and the depth of groundwater, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	A100 US, LLC-LAX 51
Address	1920 East Maple Avenue
Distance & Direction	Adjoining to the east
Hydrologic Position	Up-gradient
Databases Listed	RCRA-VSQG
Comments	This site is identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) Very Small Quantity Generators (VSQGs) site, Formerly Conditionally Exempt Small Quantity Generators . No Violations were noted in this database. Based on the non-release nature of the listing, the nature of occupancy and the depth of groundwater, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Hughes
Address	1921 Mariposa Avenue
Distance & Direction	Adjoining to the east
Hydrologic Position	Up-gradient
Databases Listed	CA SWEEPS UST
Comments	This site is listed in the Statewide Environmental Evaluation and Planning System (SWEEPS UST) database. The underground storage tank listing was updated and maintained by the State Water Resources Control Board in the early 1990's. The listing is no longer updated or maintained. Two tanks were listed at this active site. No information regarding content, capacity or status is available in this database. Based on the non-release nature of the listing, the nature of occupancy and the depth of groundwater, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	XPO Logistics Supply Chain
Address	1921 East Mariposa Avenue
Distance & Direction	Adjoining to the east

Hydrologic Position	Up-gradient
Databases Listed	CA CERS HAZ WASTE, CA NPDES, CA CIWQS, CA CERS
Comments	This site is listed in the CERS-HAZ database. This database is a list of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials. This site is listed as a Hazardous Waste Generator. No further information was available in this database. This site is listed in the National Pollutant Discharge Elimination System (NPDES) database. No violations were reported in the NPDES database. This site is listed in the California Integrated Water Quality System (CIWQS) database. The CIWQS is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections and manage violations and enforcement activities. No enforcement actions or violations over the last 5 years were noted in this database. This site is listed in the CERS database. The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. The site is listed as an Industrial Facility Storm Water. and Chemical Storage facility. A violation for Business Plan Program - Administration/Documentation - General and Failure to inspect hazardous waste storage areas at least weekly. The site has returned to compliance. Based on the non-release nature of the listing, the nature of occupancy and the depth of groundwater, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Raytheon Systems Company, Raytheon
Address	1917-1921 East Mariposa Avenue
Distance & Direction	Adjoining to the east
Hydrologic Position	Up-gradient
Databases Listed	CA UST, RCRA NonGen / NLR
Comments	This site is listed in the Underground Storage Tank (UST) database. The database indicates that two tanks were removed with the permanent facility closure. No further information was available in this database.

	This site was identified in the regulatory database as a Resource Conservation and Recovery Act (RCRA) NonGen/NLR database. This database includes sites which generate, transport, store, treat, and/or dispose of hazardous waste as defined by the RCRA. Non-Generators do not presently generate hazardous waste. No violations were noted in this database. Based on the non-release nature of the listing, the nature of occupancy and the depth of groundwater, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Hughes Aircraft Company
Address	607 Lairport Street
Distance & Direction	Adjoining to the east
Hydrologic Position	Up-gradient
Databases Listed	CA SWEEPS UST, CA LOS ANGELES CO. HMS
Comments	This site is listed in the Statewide Environmental Evaluation and Planning System (SWEEPS UST) database. The underground storage tank listing was updated and maintained by the State Water Resources Control Board in the early 1990's. The listing is no longer updated or maintained. No information regarding number of USTs, content, capacity or status is available in this database. This site was listed in the LOS ANGELES CO. HMS database. This database lists industrial waste and UST sites listed with the Los Angeles County Department of Public Works. Dates were not available for permitting or closures listed. Based on the non-release nature of the listing, the nature of occupancy and the depth of groundwater, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Popklin Realty
Address	607 Lairport Street
Distance & Direction	Adjoining to the east
Hydrologic Position	Up-gradient
Databases Listed	CA UST
Comments	This site is listed in the Underground Storage Tank (UST) database. No information regarding the number of tanks, installation dates, capacities or contents was provided in this database. Based on the non-release nature of the listing, the nature of occupancy and the depth of groundwater, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Leonards International Distrs

Address	600 North Sepulveda Boulevard
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	EDR Hist Auto
Comments	This site is listed in the EDR Hist Auto database. Small-scale auto repair operations are performed on this adjacent property. The database indicates the presence of a gasoline service station from at least 1978 until at least 1983. No further information was available in this database. Based on the non-release nature of the listing, the nature of occupancy and the depth and inferred direction of groundwater flow, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Segundo Associates
Address	600 North Sepulveda Boulevard
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	CA UST
Comments	This site is listed in the Underground Storage Tank (UST) database. No information regarding the number of tanks, installation dates, capacities or contents was provided in this database. Based on the non-release nature of the listing, the nature of occupancy and the depth and inferred direction of groundwater flow, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	ESALON.COM LLC
Address	1910 E MAPLE AVE
Distance & Direction	Adjoining to the north
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NonGen / NLR, CA CERS HAZ WASTE, CA HAZNET, CA CERS, CA HWTS
Comments	This site is listed for hazardous waste generation. Based on the non-release nature of the listings and the depth and inferred direction of groundwater flow, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	UNOCAL #5866
Address	603 SEPULVEDA BLVD N
Distance & Direction	260 feet to the south-southwest
Hydrologic Position	Cross-gradient

Databases Listed	CA LUST, CA HIST CORTESE, CA CERS, CA UST, CA HIST UST, CA HAZNET, CA HWTS, CA SWEEPS UST, CA HIST UST, EDR Hist Auto, CA CERS TANKS
Comments	A closed release was identified at this site. The release obtained closure on 7/12/1996 and no groundwater impacts were reported. Based on the depth to groundwater, lack of reported groundwater impacts, distance, regulatory status, and gradient, this site is not expected to represent a significant environmental concern to the subject property at this time. Additional listings: This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

Facility Name	BOB'S UNION 76, UNOCAL #4613
Address	770 N. SEPULVEDA BLV
Distance & Direction	190 feet to the north
Hydrologic Position	Cross-gradient
Databases Listed	CA UST, CA LUST, CA SWEEPS UST, CA LOS ANGELES CO. HMS, CA CERS, CA CERS HAZ WASTE, CA HIST UST, CA CERS TANKS, RCRA NonGen / NLR, CA HIST UST, CA UST, EDR Hist Auto
Comments	A closed release was identified at this site. The release obtained closure on 2/6/1997. Based on the depth to groundwater, distance, regulatory status, and gradient, this site is not expected to represent a significant environmental concern to the subject property at this time. Additional listings: This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

Facility Name	MOTTA SHELL SERVICE, CIRCLE K STORE #2709, MOBIL OIL CO
Address	763 and 765 N SEPULVEDA BLVD
Distance & Direction	190 feet to the north-northwest
Hydrologic Position	Cross-gradient
Databases Listed	CA HIST UST, EDR Hist Auto, CA CERS HAZ WASTE, CA CERS TANKS, CA HAZNET, CA CERS, CA HWTS, RCRA NonGen / NLR, CA UST, CA SWEEPS UST, CA LOS ANGELES CO. HMS
Comments	This site is a gas station. No releases have been identified. Based on the depth to groundwater, distance, lack of a documented release, and gradient, this site is not expected to represent a significant environmental concern to the subject property at this time.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Potential vapor migration concerns for the subject property are discussed in Section 3.0.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Not provided	NA	N/A	NA	Contact information not provided; refer to Section 1.5
Key Site Manager	Mr. Paul Summers	May 26, 2020	In Person	2008	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No

6.1.2 Past Owners, Operators, and Occupants

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).	Information not provided

Question	Response / Comment
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI during this assessment. A summary of this information follows:

*Phase I Environmental Site Assessment (*Boeing Building II, 700 North Sepulveda Boulevard, El Segundo, California 92045*)*, prepared by Partner Engineering and Science (September 18, 2015)

This report describes the subject property generally consistent with current conditions.

- Based on the historical information reviewed, Partner found that eight 1,000-gallon underground storage tanks (USTs) were located on the subject property (700 North Sepulveda portion) from 1958 until 1985. The USTs were of concrete construction, and reportedly contained gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. No information pertaining to the exact location was available during the course of this assessment, although they were described being located "north of the building, near receiving" in a memo dated November 12, 1985. According to a document issued by the Los Angeles County Department of Public Works (LACDPW) to Hughes Aircraft on October 29, 1985, the USTs were filled in place. In a document dated July 12, 1990, the USTs were described as "removed…without regulatory oversight and their integrity was unknown." Further, no records were identified on-file with the El Segundo Fire Department (ESFD) and the LACDPW, and no information regarding this facility was provided by subject property management. In addition, according to the Department of Toxic Substances Control (DTSC) records reviewed, the subject property was equipped with a concrete clarifier between 1966 and 1985. The exact location of

the clarifier has not been identified but the clarifier was reportedly abandoned with the regulatory oversight of the LACDPW. At that time, six sludge samples were collected from the clarifier and analyzed for SVOCs. Laboratory results indicated no potential for air contamination. As a result, the LACDPW issued a statement indicating the clarifier was in compliance to Hughes Aircraft on October 29, 1985. A dry inspection was reportedly conducted for the clarifier on November 12, 1985, which did not identify leaks and indicated no problems were observed. Although no obvious evidence of leaks was identified within the clarifier, the potential exists for small quantities of materials within the clarifier to have been released over time which may have impacted soil and/ or groundwater surrounding the clarifier. In addition, Partner has not been provided with or identified documentation pertaining to subsurface conditions surrounding the clarifier at the time of closure, and the subject property appears to have been granted no further action (NFA) status in 1994.

- Based on the inadequate information regarding the disposition of the USTs at this facility and lack of regulatory oversight regarding the UST closure, as well as the lack of subsurface investigation documentation pertaining to closure of the clarifier, the potential exists for releases of hazardous substances and/or petroleum products to have impacted soil and/or groundwater at the subject property. The historical USTs and clarifier at the subject property represent a recognized environmental condition.

Based on their assessment, Partner recommended a limited subsurface investigation should be conducted in order to determine the presence or absence of soil and/or groundwater contamination due to the historical use of USTs and a clarifier on the subject property.

*Phase I Environmental Site Assessment (*Boeing Buildings, 650 North Sepulveda Boulevard, El Segundo, California 92045*)*, prepared by Partner Engineering and Science (September 18, 2015)

This report describes the subject property generally consistent with current conditions.

- Partner did not identify any recognized environmental conditions during the course of this assessment.
- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.
- Partner did not identify any historical recognized environmental conditions during the course of this assessment.
- Environmental issues for ACM and LBP were identified.

Note: Partner presumed that the UST listing for 690 was associated with the USTs at the 700 Building.

No further investigation was recommended.

Phase II Subsurface Investigation (700 North Sepulveda Boulevard, El Segundo, California 92045), prepared by Ramboll Environ (May 13, 2016)

- Based on the REC identified in Partner's 2015 PHI ESA (discussed above), a Phase II subsurface investigation was recommended to identify any potential impact of contamination/releases of hazardous substances. On May 13, 2016, a subsurface investigation was conducted in the area of the former USTs and clarifier. Based on the results of their geophysical survey, Ramblin Environ (RE) advanced 6 soil borings in the parking lot north to the northeast of the 700 building. Analytical results revealed low concentrations of constituents (petroleum hydrocarbons, volatile organic compounds, metals) detected in soil and soil vapor with the exception of arsenic in soils. Arsenic concentrations in the soils at the subject property ranged from 3.6 to 4.3 milligrams per kilogram (mg/kg). Although these concentrations exceed both residential and commercial land use limits, studies have shown that an upper-bound background concentration of 12 mg/kg of arsenic was found at school sites in Los Angeles County. Soil borings performed at the site also detected concrete or asphalt-like materials within the upper approximately 12 feet. Ramboll opined that these materials made up some of the backfill material. It should be noted that the USTs were reportedly concrete. The remaining concentrations detected in the area of the site investigated were well below the residential screening levels, the most restrictive applicable screening levels; are consistent with a no further action status for the site; are not indicative of any release or condition which has adversely impacted the environmental integrity of the site, which would require additional investigation, monitoring, or remediation or reporting to any governmental agency; are not indicative of conditions which would require special handling in connection with the redevelopment of the site. Therefore, RE concluded that no further investigation, monitoring, or remediation is recommended or warranted.

It should be noted that ESL levels were changed in January 2019. At the time of this assessment, soil vapor samples taken were below California ESLs, however, they are above the current commercial/industrial ESLs (from 2019) for benzene and ethylbenzene.

Since the soil vapor concentrations are above the current ESLs, this represents a REC.

*Phase I Environmental Site Assessment (*Commercial Site 650 and 700 North Sepulveda Boulevard, El Segundo, California 92045*)*, prepared by Partner Engineering and Science (November 26, 2019)

This report describes the subject property generally consistent with current conditions.

- Partner did not identify any recognized environmental conditions during the course of this assessment.
- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.
- Partner did not identify any historical recognized environmental conditions during the course of this assessment.
- Partner identified an environmental issue based on Partner's 2015 Phase I ESA, eight 1,000-gallon underground storage tanks (USTs) were located on the subject property (700 North Sepulveda portion) from 1958 until 1985. The USTs were of concrete construction, and reportedly contained gasoline, sulfides, organic acids, copper, zinc,

mineral oils, alcohols, and solvents. No information pertaining to the exact location or status of the tanks was found during Partner's assessment. Partner also reported that the subject property was equipped with a concrete clarifier between 1966 and 1985. The exact location of the clarifier has not been identified but the clarifier was reportedly abandoned with the regulatory oversight of the Los Angeles County Department of Public Works (LACDPW). Documentation pertaining to subsurface conditions surrounding the clarifier at the time of closure was not found during Partner's assessment. Based on the findings of Partner's 2015 report, a Phase II subsurface investigation was conducted in May 2016 to address potential hazardous substance impacts from the former USTs and clarifier. Analytical results revealed low concentrations of constituents of concern (petroleum hydrocarbons, volatile organic compounds, metals) in soil and soil vapor. The concentrations detected were well below the residential screening levels, the most restrictive applicable screening levels. Based on the analytical results, the presence of the former USTs and clarifier do not represent a significant environmental concern.

- Environmental issues were also identified for ACM and LBP were identified.

No further investigation was recommended. It should be noted that the report did not discuss the change to the current California ESLs since the Phase II report was issued. The report did not address the lack of sampling in likely area of the clarifier (eastern exterior of the 700 building).

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	May 26, 2020
AEI Site Assessor(s)	Jeffrey L. McNeil
Property Escort(s)/ Relationship(s) to Property	Mr. Paul Summers, TI Manager
Units/Areas Observed	Due to the reported security-sensitive nature of operations within the subject property buildings, limited access was provided to the interiors of the buildings. AEI was allowed access to the elevator equipment room, electrical rooms, janitorial maintenance rooms and hallways. According to Mr. Paul Summers, the subject property assembles circuit boards. Mr. Summers admitted the use of hazardous substances in the laboratories, however a list of hazardous substances was not provided. AEI was not permitted to observe any laboratories or hazardous material storage areas. This limitation is significant and may alter the overall findings of this assessment and there is a potential that features of concern may be present that were not observed by AEI during the site inspection.
Area(s) not accessed and reason(s)	See above Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	None

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use	✔	
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	✔	✔
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✔	
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other	✔	

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use

Due to the reported security-sensitive nature of operations within the subject property buildings, limited access was provided to the interiors of the buildings. Although not observed, during the site reconnaissance, AEI was informed by Mr. Paul Summers that laboratories at the 700 North Sepulveda Boulevard building engage in the manufacturing/assembly of circuit boards. Circuit board manufacturing operations typically utilize chlorinated solvents for board cleaning and surface preparation. Mr. Summers admitted the use of hazardous substances in the laboratories, however, a list of hazardous substances was not provided. AEI was not permitted to observe any laboratories or hazardous material storage areas. According to a review of DTSC HWTS records, Boeing generated various hazardous wastes including halogenated solvents. Based on the duration of on-site operations (approximately 12 years with Boeing), the assembly of circuit boards at the subject property represents a REC.

7.1.2 Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

AST(s)

Size (gallons)	Contents	Installation Date	AST Condition	Location	Construction/ Secondary Containment	Product Piping	Staining/ Spills
~200-gallons	Diesel	2013	Unknown	North exterior side of building	Double-walled	Aboveground	None

The subject property is equipped with an emergency generator. Approximately 200 gallons of diesel fuel are contained within the generator equipment. No evidence of leaks or spills was observed at the base of the generator. Based on the good condition of the equipment, the presence of the emergency generator and associated diesel fuel is not expected to represent a significant environmental concern.

7.1.3 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pad-Mounted	1	Southern California Edison	Unknown	No	No
Pad-Mounted	3	Subject property	Unknown	No	No
Subsurface	1	Southern California Edison	Unknown	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Due to the sub-grade nature of one of the transformers, AEI was unable to observe the condition of the equipment.

Elevators

The subject property is equipped with three traction elevators. Two operate between the first floor and eighth floor and one runs from the first floor to the penthouse. Geared traction elevators are driven by alternating current (AC) or direct current (DC) electric motors. During AEI's site reconnaissance, the electrical and mechanical equipment for the traction elevators was observed at the rooftop equipment room. Based on the absence of hydraulic fluid used in association with the mechanical equipment of the elevators, the presence of these elevators is not expected to represent a significant environmental concern.

7.1.4 Drains, Sumps, and Clarifiers

Three storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.1.5 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.1.6 OTHER

Cleaning supplies and detergents are stored in janitorial closets in the subject property buildings. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 ABOVEGROUND/UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTS/USTS)

The adjoining site to the east was observed to be occupied by a data center. Based on the nature of use, USTs and ASTs as well as other hazardous substances are likely stored on the site. This site was identified in the regulatory database and is further discussed in Section 5.1.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. During the site reconnaissance, damaged painted surfaces were observed throughout the interior and exterior of the subject property buildings. Based on the potential presence of LBP, AEI recommends the property owner implement an O&M Plan which stipulates that the assessment, repair and maintenance of damaged painted surfaces be performed to protect the health and safety of the building occupants. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property buildings to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a

given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/16/2019 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/16/2019 has revealed that there are 4 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 02/13/2020 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 25 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 7 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 16 CA UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 01/27/2020 has revealed that there are 4 CA VCP sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 20 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk

Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
TRI-CLEANERS	630 N SEPULVEDA BLVD	SW 0 - 1/8 (0.019 mi.)	C16	85
TRI-CLEANERS	630 SEPULVEDA BLVD	SSW 0 - 1/8 (0.054 mi.)	C47	183
TRI-CLEANERS	630 SEPULVEDA	SSW 0 - 1/8 (0.054 mi.)	C48	184

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 8 records.

Site Name	Database(s)
SOUTHERN CALIFORNIA DISPOSAL	CA SWF/LF, CA LOS ANGELES CO LF METHANE
ULTA BEAUTY #1580 (EL SEGUNDO)	CA CERS HAZ WASTE
NORDSTROM INC. 162	CA CERS HAZ WASTE
CITY OF EL SEGUNDO	CA LUST, CA HIST CORTESE

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No

THE BOEING CO (Continued) **1001967613**

Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency: 2001-01-03 00:00:00.0
Site name: THE BOEING CO
Classification: Not a generator, verified

Date form received by agency: 2000-10-16 00:00:00.0
Site name: BOEING SATELLITE SYSTEMS INC
Classification: Small Quantity Generator

Hazardous Waste Summary:

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D008
. Waste name: LEAD

. Waste code: D011
. Waste name: SILVER

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

THE BOEING CO (Continued) **1001967613**

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Year: 2011
Gepaid: CAR000071167
TSD EPA ID: CAD060897063
CA Waste Code: 134 - Aqueous solution with total organic residues less than 10 percent

THE BOEING CO (Continued) **S113174902**

Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.125

Environmental Interest/Information System:

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002875327

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of

CIRCLE K STORE #2709416 (Continued) **S113800508**

	flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 03/12/2019. Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Overfill Prevention equipment consists of audible and visual alarm with flow restriction (ball floats). During routine overfill prevention equipment testing, the flow restrictors failed the test per ICC Certified Technicians Test Report (test date 2/7/19). Facility shall repair overfill prevention system to meet overfill prevention equipment requirements by replacing flow restrictors with regulatory compliant overfill prevention equipment.

Violation Description:	Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills.
Violation Notes:	Returned to compliance on 01/30/2019. Owner/Operator did not operate UST system to prevent spills and/or overfills. Facility has two types of overfill prevention systems: flow restrictors (ball floats) and audible & visual/automatic tank gauge (ATG). All ATGs passed overfill prevention inspection but ball floats were not inspected. ATG for 91 Octane UST was set to alarm above 90% of tank capacity at beginning of inspection but was corrected to alarm at or below 90% of tank capacity during inspection. Facility needs to have ball floats inspected. Facility shall have overfill prevention inspection completed on ball floats. ESFD shall witness overfill prevention inspection on ball floats. Submit verification to ESFD.

Violations:

Site ID:	384457
Site Name:	Airport 5 Star
Violation Date:	04-02-2018
Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes:	Returned to compliance on 04/06/2018. The 91 octane fill bucket failed the annual spill bucket test. Install or repair spill bucket so that it is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and is resistant to galvanic corrosion. Submit verification.

Citation:	22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description:	Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes:	Returned to compliance on 12/13/2017. Contact the DTSC to make necessary corrections to the manifests and submit a copy to the CUPA.
Violation Division:	El Segundo City Fire Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	28549
Site Name:	Equinix LLC
Violation Date:	11-01-2017
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 12/13/2017. Dispose of hazardous waste and submit a copy of the manifest to the CUPA.
Violation Division:	El Segundo City Fire Department

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 163509
Site Name: trio manufacturing
Violation Date: 11-16-2017
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 01/20/2018. The facility was storing used oil for more than 180 days in November of 2016 and June of 2017. This violation was also documented in the December 3, 2012 inspection. Trio Manufacturing is a small quantity generator and is allowed to store hazardous waste for 180 days. The facility shall ensure that hazardous waste is not stored for more than 180 days.
Violation Division: El Segundo City Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 163509
Site Name: trio manufacturing
Violation Date: 11-16-2017
Citation: HSC 6.5 25201.5(c) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.5(c)
Violation Description: Failure of the generator treating hazardous wastes to comply with the requirements of the conditional exemption applicable to the treatment process.
Violation Notes: Returned to compliance on 01/20/2018. The hazardous waste in the treatment unit has been there for over one year per the label on the unit. No treatment has been conducted within the last year. The facility has not been treating waste within the 180 days allowed to store the waste before treating it. Please provide documentation on the treating of this waste.

Site Name: trio manufacturing
Violation Date: 11-16-2017
Citation: HSC 6.5 25250.7 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.7
Violation Description: Failure to prevent intentional contamination of used oil with other hazardous waste other than minimal amounts of vehicle fuel.
Violation Notes: Returned to compliance on 01/20/2018. The facility had been adding the spent mineral spirits to the used oil The facility shall not contaminate the used oils with spent cleaning solvents from the parts washer.
Violation Division: El Segundo City Fire Department
Violation Program: HW

TRIO MANUFACTURING INC (Continued) **S113114614**

Violation Source:	CERS
Site ID:	163509
Site Name:	trio manufacturing
Violation Date:	11-16-2017
Citation:	40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Returned to compliance on 01/20/2018. The waste storage area did not have any emergency response equipment including a fire extinguisher. The facility shall provide the Hazardous Waste Storage Area with the materials needed in the event of an emergency. Please provide documentation of the materials that have been added to the area.

Violation Date:	12-03-2012
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes:	Returned to compliance on 07/16/2013. AEO issued in July for the failure to comply with requirement.
Violation Division:	El Segundo City Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	163509
Site Name:	trio manufacturing
Violation Date:	11-16-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 02/02/2018. The facility is polishing high grade metals and allowing the waste to blow outside the building. This material shall be collected and tested to determine the waste status of the material. The facility shall run a CAM-17 TTLC for toxic metals using a State Certified Laboratory on the polishing dust from metal polishing. Please send a copy of the test results to the ESFD.

Violation Date: 11-16-2017
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 01/15/2018. The facility has not provided training to the employees to the point where they understand what the requirements are. Rafael de La Brana had received training for hazardous waste management, but did not understand the material in the class. George Zamora was not aware of the requirements for the hazardous wastes that were being generated at the site. The facility shall provide training to employees who handle hazardous waste such that they understand the requirements and can properly handle the Waste. The facility is a SQG and shall have adequate training for the employees who are managing hazardous waste. Please provide documentation of the training to the ESFD.

TRIO MANUFACTURING INC (Continued) **S113114614**

Citation:	HSC 6.5 25189.5(a),25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a),25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to HSC 6.5.
Violation Notes:	Returned to compliance on 01/20/2018. In April of 2015, Trio Mfg. disposed of 5 yards of EDM filters to an Arizona TSDF for proper management. The facility has not disposed of any filters since that date and there was not filters being stored at the time of the inspection. George Zamora was not aware what happened to the filters, possible municipal trash. The facility shall properly manage the used EDM filters as a hazardous waste. The sludge in the filters is a hazardous waste for copper. The facility shall not add waste solvents to the used oil and manage the waste separately.

Violation Date:	11-16-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/20/2018. The facility did not have the labels filled out with the required information and accumulation dates. This applies to the containers for the used oil and the waste solids. Submit a statement to the CUPA demonstrating that the containers have been properly labeled.
Violation Division:	El Segundo City Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	163509
Site Name:	trio manufacturing
Violation Date:	11-16-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 01/20/2018. The facility was missing the final copy for 5 manifests that were shipped in 2015 and 2016. The facility shall keep the final copy signed by the TSDF for all shipments of hazardous waste. Provide documentation for all missing manifests to the ESFD.

Violation Source:	CERS
Site ID:	163509
Site Name:	trio manufacturing
Violation Date:	11-16-2017
Citation:	HSC 6.5 25201.5(d)(5) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.5(d)(5)
Violation Description:	Failure to prepare, implement, and maintain onsite, for three years at the facility, a treatment system inspection program and log of inspections conducted.
Violation Notes:	Returned to compliance on 01/20/2018. The facility ad not records for the past three years. Begin maintaining records for scheduling and logging inspections for the hazardous waste treatment system and ensure that they are kept onsite for three years. Submit copies of these records and inspections to the CUPA.

L A X AUTOBODY (Continued) **S113057373**

Violation Date:	01-15-2019
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 01/29/2019. Failure of the Owner/Operator to comply with one or more satellite accumulation requirements. Facility is exceeding the 55-gallon limit per waste stream of satellite accumulation for the bondo process. The facility currently holds 3 x 55-gallon drums of hazardous waste bondo dust/debris. Ensure that all hazardous wastes being accumulated pursuant to satellite accumulation meet all applicable requirements and submit documentation of compliance to the CUPA. Facility shall limit hazardous waste satellite accumulation not to exceed a single 55-gallon amount per waste stream.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	Yes
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 321
. Waste name: Sewage sludge

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: K061
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM THE PRIMARY PRODUCTION OF STEEL IN ELECTRIC FURNACES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001

LG NANOH2O (Continued) **1015740053**

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 86926

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 5

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 40

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 65728

FINDS:
Registry ID: 110002651906
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002651906

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name:	RALPHS GROCERY #645
Address:	500 N. SEPULVEDA BLVD.
City,State,Zip:	EL SEGUNDO, CA 90245
Site ID:	146329
CERS ID:	10159971
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	146329
Site Name:	Ralphs Grocery #645
Violation Date:	01-29-2019
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 03/10/2019. The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan or failure to document and maintain training records for a minimum of three years. Training records could not be located during inspection. Facility shall provide copies of annual training records to CUPA.

Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	146329
Site Name:	Ralphs Grocery #645
Violation Date:	01-29-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 02/05/2019. The business failed to complete and electronically submit a site map with all required content including: hazardous materials/waste storage areas. Current site map

RALPHS GROCERY #645 (Continued) **S113466417**

depicts hazardous materials in the "Produce Prep" room but this room did not have any hazardous materials during inspection. Complete and electronically submit a site map with all required content. Facility shall update site map and remove hazardous materials symbol from "Produce Prep" room.

Violation Division: El Segundo City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 146329
Site Name: Ralphs Grocery #645
Violation Date: 01-29-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/29/2019. 5 gallon container of Hazardous Waste Off-spec medicine located in the Pharmacy was observed without a hazardous waste label. Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: El Segundo City Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 146329
Site Name: Ralphs Grocery #645
Violation Date: 01-29-2019
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 01/29/2019. A signed copy from the Treatment Storage Disposal Facility (TSDF) of the Uniform Hazardous Waste Manifests were not available at the time of inspection for the following manifests: 019620393JJK, 019623934JJK,018858287JJK, 019620379JJK, and 018858286JJK. Locate a signed copy from the TSDF of all manifests and submit copies to the CUPA for the following manifests: 019620393JJK, 019623934JJK,018858287JJK, 019620379JJK, and 018858286JJK. Facility was able to print out copies of signed manifests the end of inspection and copies were reviewed by CUPA. No further action required at this time.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

TELEDYNE CONTROLS LLC (Continued) **1000241004**

discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-18-2016
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Staff visited and inspected the site in response to a NOT. The company filed NOT because it changed the name from Teledyne Controls Inc. to Teledyne Controls LLC. The former NEC ID number was 4 19NEC001291. Staff met at the site with Mr. Vu Nguyen, Environmental Health and Safety/ Manufacturing Engineer, (310)765-9436. He permitted the inspection and to take photos during the inspection. Also, he accompanied staff during the site inspection. The company assembles electronic parts at the building . The parts are manufactured outside and delivered to this building for assembling and shipping to

TELEDYNE CONTROLS LLC (Continued) **S106832778**

customers. All the industrial activities are conducted indoors. Outside the building was located only a large empty nitrogen tank and part of a cardboard compactor. The company was very clean and organized. Staff believe that the NEC is appropriate in this case. Photos from the site are attached.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003

. Waste code: D018
. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P012
. Waste name: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	1107
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	141821
Waste code:	D003
Waste name:	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs):	8132
Waste code:	D006
Waste name:	CADMIUM
Amount (Lbs):	1028
Waste code:	D007
Waste name:	CHROMIUM
Amount (Lbs):	2088
Waste code:	D008
Waste name:	LEAD
Amount (Lbs):	49159
Waste code:	D011
Waste name:	SILVER
Amount (Lbs):	10402
Waste code:	F001
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

THE BOEING COMPANY (Continued) **1000240982**

Amount (Lbs): 118

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 20778

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135

THE BOEING COMPANY (Continued) **1000240982**

. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF

THE BOEING COMPANY (Continued) **1000240982**

ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P012
. Waste name: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U012
. Waste name: ANILINE (I,T) (OR) BENZENAMINE (I,T)

. Waste code: U041
. Waste name: EPICHLOROHYDRIN (OR) OXIRANE, (CHLOROMETHYL)-

. Waste code: U079
. Waste name: 1,2-DICHLOROETHYLENE (OR) ETHENE, 1,2-DICHLORO-,(E)-

. Waste code: U112
. Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

. Waste code: U133
. Waste name: HYDRAZINE (R,T)

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

THE BOEING COMPANY (Continued) **1000240982**

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1107

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 141821

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 8132

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 1028

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2088

Waste code: D008
Waste name: LEAD
Amount (Lbs): 49159

Waste code: D011
Waste name: SILVER
Amount (Lbs): 10402

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 118

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

THE BOEING COMPANY (Continued) **1000240982**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 20778

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

CERS ID: 10206970
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 160608
Site Name: The Boeing Company - S15
Violation Date: 02-23-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 03/23/2017. Failure to store hazardous waste in a manner that protects from a release. The plating process line had drag-out liquid collecting on the containment floor. The facility is not meeting the DTSC's guideline for wet floor management at plating facilities. Any spills in the plating area shall be removed by the end of each shift. The facility shall follow the wet floor guidance document. The document can be found at www.dtsc.ca.gov.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 09/24/1996
Comments: Preliminary Assessment completed under U.S. EPA grant. Site is no further assessment for U.S. EPA. However, DTSC requires a Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/25/1995
Comments: The Department received a hazardous substace release report. The site had a waste leak from a plating line and acidic aqueous waste left metal contamination in the soil. Due to evidence of contamination, the Department recommends a PEA. The Department notified the RP that a PEA be conducted.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RADIANT SERVICES (Continued) **S108217730**

Alias Type: Project Code (Site Code)
Alias Name: 19130119
Alias Type: Envirostor ID Number

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 12/01/2004
Comments: DTSC reviewed historical documents and recommended soil gas sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 12/29/2004
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 02/14/2005
Comments: Based on data, DTSC recommended additional sampling to determine the extent of the contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement Termination Notification
Completed Date: 04/04/2006
Comments: Proponent requested that Voluntary Cleanup Agreement be terminated. DTSC terminated VCA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/04/2017
Comments: The Summary Report details soil vapor extraction and post-remediation sampling activities without DTSC oversight. Due to the concentrations that continue to remain at the site, DTSC recommends additional sampling of affected media and evaluation of remedial options.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 08/10/2018
Comments: DTSC conditionally approved work plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 06/25/2019
Comments: DTSC reviewed the Report and recommends groundwater monitoring to assess the need for remediation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 10/08/2004
Comments: The VCA was signed for determining if previous removal activities

RADIANT SERVICES (Continued) **S108217730**

were adequate.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 09/22/2017
Comments: VCA fully executed for former Radiant Services site in El Segundo

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 12/30/2019
Comments: Not reported

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 241
. Waste name: Tank bottom waste

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P065
. Waste name: FULMINIC ACID, MERCURY(2+) SALT (R,T) (OR) MERCURY FULMINATE (R,T)

. Waste code: P074
. Waste name: NICKEL CYANIDE (OR) NICKEL CYANIDE NI(CN)2

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: P120
. Waste name: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

. Waste code: P122
. Waste name: ZINC PHOSPHIDE ZN3P2, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 10% (R,T)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U003
. Waste name: ACETONITRILE (I,T)

. Waste code: U019
. Waste name: BENZENE (I,T)

. Waste code: U031
. Waste name: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

. Waste code: U035
. Waste name: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

. Waste code: U056
. Waste name: BENZENE, HEXAHYDRO- (I) (OR) CYCLOHEXANE (I)

. Waste code: U057
. Waste name: CYCLOHEXANONE (I)

. Waste code: U069
. Waste name: 1,2-BENZENEDICARBOXYLIC ACID, DIBUTYL ESTER (OR) DIBUTYL PHTHALATE

. Waste code: U080
. Waste name: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

. Waste code: U115
. Waste name: ETHYLENE OXIDE (I,T) (OR) OXIRANE (I,T)

. Waste code: U122
. Waste name: FORMALDEHYDE

. Waste code: U125
. Waste name: 2-FURANCARBOXALDEHYDE (I) (OR) FURFURAL (I)

. Waste code: U133
. Waste name: HYDRAZINE (R,T)

. Waste code: U134
. Waste name: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

. Waste code: U140
. Waste name: 1-PROPANOL, 2-METHYL- (I,T) (OR) ISOBUTYL ALCOHOL (I,T)

. Waste code: U144
. Waste name: ACETIC ACID, LEAD(2+) SALT (OR) LEAD ACETATE

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U159
. Waste name: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

. Waste code: U161
. Waste name: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

. Waste code: U162
. Waste name: 2-PROPENOIC ACID, 2-METHYL-, METHYL ESTER (I,T) (OR) METHYL METHACRYLATE (I,T)

. Waste code: U163
. Waste name: GUANIDINE, N-METHYL-N'-NITRO-N-NITROSO- (OR) MNNG

. Waste code: U165
. Waste name: NAPHTHALENE

. Waste code: U166
. Waste name: 1,4-NAPHTHALENEDIONE (OR) 1,4-NAPHTHOQUINONE

. Waste code: U169
. Waste name: BENZENE, NITRO- (OR) NITROBENZENE (I,T)

. Waste code: U188
. Waste name: PHENOL

. Waste code: U196
. Waste name: PYRIDINE

. Waste code: U211
. Waste name: CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-

. Waste code: U213
. Waste name: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

. Waste code: U216
. Waste name: THALLIUM CHLORIDE TLCL (OR) THALLIUM(I) CHLORIDE

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

. Waste code: U226
. Waste name: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

. Waste code: U228
. Waste name: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

. Waste code: U238
. Waste name: CARBAMIC ACID, ETHYL ESTER (OR) ETHYL CARBAMATE (URETHANE)

. Waste code: U239

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 10280

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 4410

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 1996

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2964

Waste code: D008
Waste name: LEAD

Handler Activities Summary:

U.S. importer of hazardous waste: No

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: E
Accumulated waste on-site: No
Generated waste on-site: Yes

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Thermostats
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Lamps
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 241
. Waste name: Tank bottom waste

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: Laboratory waste chemicals

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 731
. Waste name: Liquids with polychlorinated biphenyls > 50 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792

. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D015
. Waste name: TOXAPHENE (C10 H10 CL8, TECHNICAL CHLORINATED CAMPHENE, 67-69 PERCENT CHLORINE)

. Waste code: D018
. Waste name: BENZENE

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D027
. Waste name: 1,4-DICHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P065
. Waste name: FULMINIC ACID, MERCURY(2+) SALT (R,T) (OR) MERCURY FULMINATE (R,T)

. Waste code: P074
. Waste name: NICKEL CYANIDE (OR) NICKEL CYANIDE NI(CN)2

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: P120
. Waste name: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

. Waste code: P122
. Waste name: ZINC PHOSPHIDE ZN3P2, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 10% (R,T)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U003
. Waste name: ACETONITRILE (I,T)

. Waste code: U019
. Waste name: BENZENE (I,T)

. Waste code: U031
. Waste name: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

. Waste code: U035
. Waste name: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

. Waste code: U226
. Waste name: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

. Waste code: U228
. Waste name: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

. Waste code: U238
. Waste name: CARBAMIC ACID, ETHYL ESTER (OR) ETHYL CARBAMATE (URETHANE)

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 10280

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

Amount (Lbs): 4410

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 1996

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2964

Waste code: D008
Waste name: LEAD

Completed Document Type:	Correspondence
Completed Date:	08/01/2013
Comments:	On August 1, 2013, DTSC informed the District that DTSC oversight costs exceeded the SCA cost estimate, listed activities causing the

201 N. DOUGLAS PROPERTY (Continued) **S108200735**

exceedance, and provided a revised cost estimate.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 01/24/2013
Comments: On January 24,2013, DTSC notified the District that the Environmental Oversight Agreement cost estimate has been exceeded and provided an anticipated approximate cost for the PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Responsible Agency Review
Completed Date: 09/06/2013
Comments: On September 6, 2013, DTSC signed the CEQA Notice of Determination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pre-HARP Form
Completed Date: 08/13/2013
Comments: On 08/13/2013, Pre-HARP was signed by the IH & Supervisor.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 09/09/2013
Comments: Via emails since August 1, 2013, DTSC received responses regarding information related to cultural resources for this project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 08/20/2014
Comments: On August 20, 2014, DTSC provided a cost estimate of DTSC oversight activities for July 1, 2014 through June 30, 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 08/20/2014
Comments: On August 20, 2014, DTSC received the SCA Amendment which was fully executed on June 26, 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/11/2015
Comments: Annual cost estimate completed, emailed and mailed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 11/06/2012
Comments: On November 6, 2012, DTSC conducted a PEA Scoping Meeting with the Wiseburn School District; in addition, representatives for the current propety owner and potential future property owner were in attendance. DTSC received a total of 13 documents/reports (electronic

201 N. DOUGLAS PROPERTY (Continued) **S108200735**

format) of existing Site data/information (1996 to 2012). The District indicated it will provide DTSC a letter indicating that the Existing Data will be considered as a PEA Equivalent Report and submit a PEA Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/16/2013
Comments: DTSC determined that a response action, to include methane mitigation through the removal action workplan process, is required for the Site.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 11/27/2012
Comments: On November 27, 2012, DTSC conditionally approved the PEA Workplan provided specific comments be implemented and/or addressed during PEA fieldwork and in the PEA Report.

CA BOND EXP. PLAN:

Reponsible Party:	FEDERAL FACILITY SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The Department will either enter into an interagency agreement with the Department of Defense or will issue an order. The Department has budgeted $15,000 for oversight/monitoring costs. DHS will seek 100 percent cost recovery for its direct costs plus staff costs and overhead related to the project. The Department of Defense is expected to fund all remedial investigation and cleanup activities.
Site Description:	The Fort McArthur site is a former nike missile base located in the White's Point area of San Pedro. The Army transferred the site to the Air Force for housing and the Air Force transferred part of the site to the City of Los Angeles for a park. Thesite is located at 25th Street and Western Avenue in San Pedro.
Hazardous Waste Desc:	Ninety-six acres of the original 561-acre complex remain under Air Force control. The remaining properties were disposed of as surplus. An initial assessment study was performed on the active ninety-six acres of Fort McArthur. Nine acres of potential contamination were identified. Only two areas are recommended by the Air Force for further site characterization. Released wastes include pesticides and battery acids.
Threat To Public Health & Env:	Residues of hazardous wastes in the soil are the only identified environmental threat. Ground water is intruded by seawater and is unsuitable at this time for use as a drinking water supply. There is no known exposure at this time.
Site Activity Status:	The installation restoration program (IRP) has been initiated at this base. Currently, the program is in the operations/remedial action phase of the mitigation process.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 271
. Waste name: Organic monomer waste (includes unreacted resins)

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D021
. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 58750

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6660

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 231640

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 297248

Waste code: D011
Waste name: SILVER
Amount (Lbs): 40685

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 286725

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 35260

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 264240

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 264240

Waste code: F019
Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.
Amount (Lbs): 3098

Classification: Not a generator, verified

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB’s

. Waste code: 271
. Waste name: Organic monomer waste (includes unreacted resins)

. Waste code: 331

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D021

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

Amount (Lbs): 58750

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6660

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 231640

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 297248

Waste code: D011
Waste name: SILVER
Amount (Lbs): 40685

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 286725

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 35260

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 264240

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 264240

Waste code: F019
Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Agency Type:	Private
SIC Code:	3721
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/30/2020

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020
Date Data Arrived at EDR: 02/05/2020

Next Scheduled EDR Contact: 07/13/2020
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/30/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019
Date Data Arrived at EDR: 12/16/2019

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/16/2019

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

422548
650 AND 700 PACIFIC COAST HIGHWAY
EL SEGUNDO, CA 90245

TARGET PROPERTY COORDINATES

Latitude (North):	33.92505 - 33° 55' 30.18''
Longitude (West):	118.395374 - 118° 23' 43.35''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	371019.4
UTM Y (Meters):	3754528.2
Elevation:	118 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640438 VENICE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

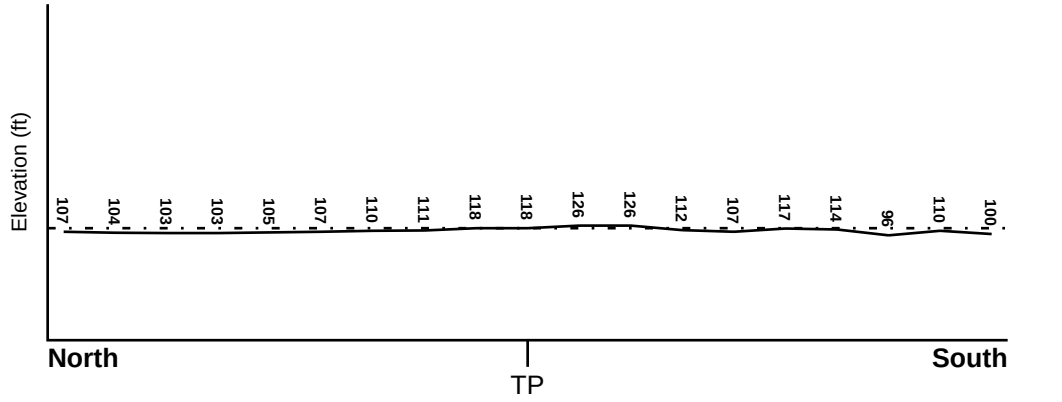
TOPOGRAPHIC INFORMATION

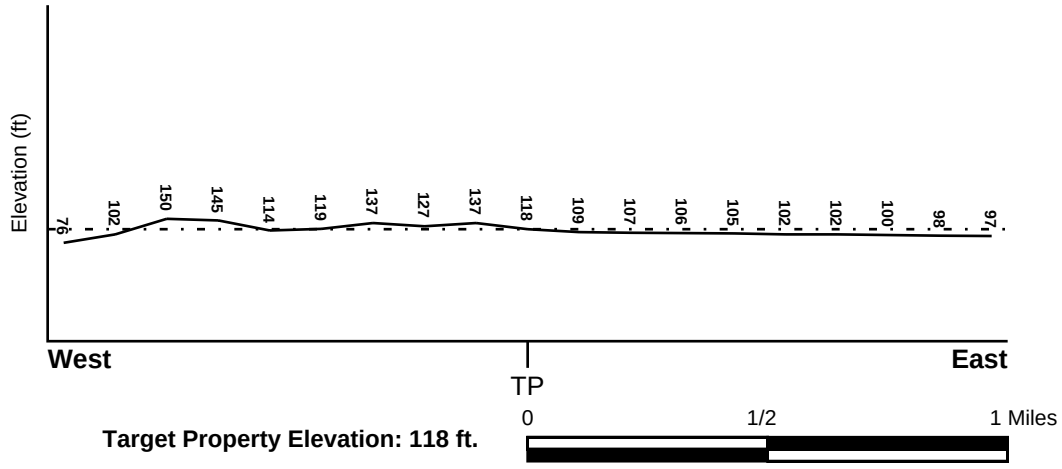
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





0 1/2 1 Miles

Target Property Elevation: 118 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1770F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1760F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	International Rectifier
Site EPA ID Number:	CAD076208313
Groundwater Flow Direction:	West
Inferred Depth to Water:	80 feet.
Hydraulic Connection:	Aquifers underlying the site are interconnected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	DELHI
Soil Surface Texture:	sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	10 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
2	10 inches	30 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
3	30 inches	50 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
4	50 inches	70 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand
clay

Surficial Soil Types: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand

clay

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay loam
sandy clay

Deeper Soil Types: coarse sand
silty clay loam
gravelly - fine sandy loam
stratified
gravelly - sandy loam
weathered bedrock
clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 24DD-4811-87AD

PO # 225961

Project 422548

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 24DD-4811-87AD

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

No Records Found

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

PUBLIC RECORDS REQUEST FORM

ATTENTION REQUESTOR: To fulfill your request for records, please fill out this form completely, and identify specifically the type of records you are requesting. Requests must reasonably describe identifiable records prepared, owned, used, or retained by the Sanitation Districts.

REQUESTOR INFORMATION

Name:	Jeffrey L. McNeil	Date:	
Company:	AEI Consultants		
Mailing Address:	9445 Derby Drive		
City:	Jurupa Valley	State: California	Zip Code: 92509
Phone Number:	949-241-2999	Fax Number (optional):	
Email Address (recommended):	jmcneil@compass-rms.com		

REQUESTED RECORDS

Please clearly describe each requested record or document
*(use additional copies of this form, as necessary)**

All records pertaining to Industrial Wastewater Discharge permits for the property located at: 650, 690 and 700 North Sepulveda Boulevard, El Segundo, California 90245, Also Know as 650, 690 and 700 Pacific Coast Highway, El Segundo, California 90245		
Time Period of Document Requested	From: 1/1/1849	To: Present

Time Period of Document Requested	From:	To:

Time Period of Document Requested	From:	To:

* *Requests that are not specific and focused will be returned for more information. If requested, the Sanitation Districts will assist you in making focused and effective requests for identifiable records. The Sanitation Districts will not create new documents or records in response to a request.*

or Operator: BOEING SATELLITE SYSTEMS INC
P O BOX 92919 , ATTN: KIMBERLY BALCERZAK
LOS ANGELES, CA 90009-2919

Equipment Location: 650 N SEPULVEDA BLVD, EL SEGUNDO, CA 90245-3419

Equipment Description :

INTERNAL COMBUSTION ENGINE, CATERPILLAR, 12 CYLINDER, TURBOCHARGED/AFTERCOOLED, MODEL C-32, 1502 BHP, DIESEL FUELED, DRIVING AN EMERGENCY ELECTRICAL GENERATOR.

Conditions :.

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. A NON-RESETTABLE TOTALIZING TIMER SHALL BE INSTALLED AND MAINTAINED TO INDICATE THE ENGINE ELAPSED OPERATING TIME.

4. THIS ENGINE SHALL NOT OPERATE MORE THAN 200 HOURS IN ANY ONE YEAR, WHICH INCLUDES NO MORE THAN 50 HOURS IN ANY ONE YEAR FOR MAINTENANCE AND TESTING PURPOSES.

5. AN ENGINE OPERATING LOG OF ENGINE OPERATIONS SHALL BE KEPT AND MAINTAINED DOCUMENTING THE TOTAL TIME THE ENGINE IS OPERATED EACH MONTH AND THE SPECIFIC REASON FOR OPERATION SUCH AS:

   A. EMERGENCY USE
   B. MAINTENANCE AND TESTING
   C. OTHER (BE SPECIFIC)

   IN ADDITION, FOR EACH TIME THE ENGINE IS MANUALLY STARTED, THE LOG SHALL INCLUDE THE DATE OF ENGINE OPERATION, THE SPECIFIC REASON FOR OPERATION, AND THE TOTALIZING HOUR METER READING (IN HOURS AND TENTHS OF HOURS) AT THE BEGINNING AND THE END OF THE OPERATION.

FILE COPY

6. ON OR BEFORE JANUARY 15TH OF EACH YEAR, THE OPERATOR SHALL RECORD IN THE ENGINE OPERATING LOG:

   A. THE TOTAL HOURS OF ENGINE OPERATION FOR THE PREVIOUS CALENDAR YEAR, AND
   B. THE TOTAL HOURS OF ENGINE OPERATION FOR MAINTENANCE AND TESTING FOR THE PREVIOUS CALENDAR YEAR.

7. ENGINE OPERATION LOG(S) SHALL BE RETAINED ON SITE FOR A MINIMUM OF THREE CALENDAR YEARS AND SHALL BE MADE AVAILABLE TO THE EXECUTIVE OFFICER OR REPRESENTATIVE UPON REQUEST.

8. OPERATION BEYOND THE 50 HOURS PER YEAR ALLOTTED FOR ENGINE MAINTENANCE AND TESTING SHALL BE ALLOWED ONLY IN THE EVENT OF A LOSS OF GRID POWER OR UP TO 30 MINUTES PRIOR TO A ROTATING OUTAGE, PROVIDED THAT: (A) THE UTILITY DISTRIBUTION COMPANY HAS ORDERED ROTATING OUTAGES IN THE CONTROL AREA WHERE THE ENGINE IS LOCATED OR HAS INDICATED THAT IT EXPECTS TO ISSUE SUCH AN ORDER AT A CERTAIN TIME; AND (B) THE ENGINE IS LOCATED IN A UTILITY SERVICE BLOCK THAT IS SUBJECT TO THE ROTATING OUTAGE. ENGINE OPERATION SHALL BE TERMINATED IMMEDIATELY AFTER THE UTILITY DISTRIBUTION COMPANY ADVISES THAT A ROTATING OUTAGE IS NO LONGER IMMINENT OR IN EFFECT.

9. THIS ENGINE SHALL COMPLY WITH THE APPLICABLE REQUIREMENTS OF RULES 431.2, 1470 AND 1472.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

CITY: STATE/ZIP:

NAME: Western Labs. LICENSE:
ADDRESS: 13609 Normandie PHONE:
CITY: Gardena, CA STATE/ZIP:

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C-21 A Lic. No./State 21064

Date 5/21/82 Contractor Cleveland Wrecking

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professional Code: Any City which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 9 (Commencing with Sec. 7000) of Div. 3 of the B. & P.C.) or that he is exempt therefrom and the basis of the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500.00).)

☐ I, as sole owner of the property, or my employees with wages of their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P.C.: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P.C.: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____, B. & P.C. for this reason _____

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.)

Policy No. WX2 181 012 385-381 Company Liberty Mutual

☐ Certified copy is hereby furnished

☐ Certified copy is filed with the county building inspection department or county _____ department

Date 5/21/82 Applicant

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This section need not be completed if the permit is for one hundred dollars ($100) or less.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.)

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

To Whom It May Concern:

Your inspector, Ralph Ferguson inspected our sewer line Permit #5815, which he found completed in accordance to plans.

One change was made. Instead of raincap, we raised the floor sink 1 1/2" above decking.

If you have any questions, please feel free to call me.

Sincerely,

Sven Jacobsen
Facilities Engineer

JAMES F. STAHL
Chief Engineer and General Manager

January 15, 2002
File: 05-02-5815
Account No.: 1800591

Mr. Steve Tsumura
Environmental Safety Coordinator
City of El Segundo
350 Main St.
El Segundo, CA 90245

Dear Mr. Tsumura:

Industrial Wastewater Discharge Permit No. 5815

Computer Science Corp.
650 N. Sepulveda Blvd.
El Segundo, CA 90245

Effective immediately, Industrial Wastewater Discharge Permit No. 5815 is void for the following reason:

Exempt. This company is now *permit exempt.*

Exemption from obtaining a permit does not relieve the company of all responsibility. The company must comply with all other Districts' *Wastewater Ordinance* regulations such as keeping rainwater out of the sewer, preventing large amounts of solids or oil and grease from entering the sewer, making certain that the dissolved sulfide concentration is below 0.1 mg/ℓ and that the pH is above 6.0 at all times. In addition, the company must comply with all of your regulations which may involve obtaining a permit through your agency. Changes in the Sanitation Districts' policies or in the company's business operations may require that the company obtain an industrial wastewater discharge permit in the future.

Very truly yours,

James F. Stahl

CERTIFICATE OF ANALYSIS

Prepared For: IT Corporation
336 W. Anaheim St.
Wilmington, CA 90744

Attn: Jess Tapia

Date: October 24, 1985

Date Received: October 16, 1985

P.O. Number: 4794

Job Number: 34714/rjc

Six (6) samples from H.A.C. Space and Communications, Project #4794.

The samples were composited as directed by the client. The composites were then analyzed for pH, sulfide, oil and grease, flash point, and cyanide, with the results reported in Table I.

Metals analyses were performed using inductively coupled argon plasma spectroscopy. Results of these analyses are reported in Table II.

The samples were analyzed for semi-volatile organic contaminants using combined gas chromatography-mass spectrometry according to EPA Methods 625. Results for compounds on the EPA Hazardous Substances List are given on the enclosed summary sheets.

Other organic contaminants found are listed in Table III.

I certify that this report truly represents the finding of work performed by me or under my direct supervision.

To Whom It May Concern:

This is to certify that the information contained in the annual inventory form submitted March 1, 2003 to the El Segundo Fire Department is complete, accurate and up to date. Further, there has been no change in the quantity of any hazardous material as reported in the most recently submitted annual inventory form, and all chemicals handled in excess of 55 gallons, 200 cubic feet and 500 pounds have been included.

Please contact me at (949) 286-8713 if you have any questions or require further information.

Re: Hughes Space and Communications Company, Business Plan Update

Dear Mr. Carver,

Attached is the 2000 update to Hughes Space and Communications Company's El Segundo Business Plan. Included in this submittal are the following items:

1. Completed Business Owner/Operator Identification form and updated responses to questions from the 1999 Business Plan submittal;
2. Completed Business Activity form;
3. Completed Recyclable Materials Report forms, pages 1 & 2;
4. "Floppy Disk" with complete HSC hazardous materials inventory for El Segundo sites.

If you have any questions regarding these materials, please call me at (310) 416-5291.

Sincerely,

Hughes Space and Communications Company

Attention: Hazardous Materials Unit

Subject: MSDS Submittal

The hazardous material (Sodium Bisulfite) referenced by the enclosed Material Safety Data Sheet has recently been stored in quantities exceeding 10,000 lbs. at the Boeing Co. site located at 2401 E. Wardlow Road, Long Beach, CA 90807. This submittal is made in accordance with requirements set forth in 40 CFR 370.21. This material is used solely as a treatment chemical in our industrial wastewater pretreatment unit. This MSDS has also been sent to the Region 1 Local Emergency Planning Committee.

Please contact the undersigned at 562-593-3836 with any questions/comments.

Very truly yours,

Re: Wastewater Permit Applications for Boeing Satellite Systems, Inc., El Segundo, California

BOEING

Dear Ms. Wienke:

Per my telephone conversation with Alicia Jauregi, attached are permit applications for Boeing Satellite Systems, Inc., industrial wastewater discharge locations in El Segundo. These applications were previously submitted to the County Sanitation Districts of Los Angeles County (CSDLAC) to provide notification of a name change from Hughes Space and Communications Company to Boeing Satellite Systems, Inc.

Following an evaluation by CSDLAC staff, we were notified that this change was considered an ownership change and that our applications were deficient because they did not include a signature from the City of El Segundo. The attached applications, which are copies of the originals that were retained by CSDLAC staff, have been reviewed and approved by El Segundo representative Steve Tsumura and contain his original signature. I am also enclosing copies of our temporary permits assigned by Inspector Marcos Rams for reference.

Please note, wastewater generating processes at Boeing Satellite Systems, Inc., facilities remain unchanged from the former Hughes Space and Communications Company.

Please call me with any questions you might have at (310) 416-9394.

Sincerely,

Jerrod Newlander

Subject: Company Business Name Change

Dear Mr. Carver,

Effective October 7, 2000, the business formerly known has Hughes Space and Communications Company, has undergone a name change. The Company will now be known as Boeing Satellite Systems, Inc.

Please note the name change will affect the following:

1. El Segundo Hazardous Material Business Plan (an updated Business Plan without appendices is attached)
2. Uniform Fire Permits City of El Segundo
3. The El Segundo Hazardous Waste/Hazardous Material "CUPA" Permits

If you have any questions regarding this subject, or require additional information, please contact me at (310) 416-4426.

Sincerely,

Anu B. Garg

CERTIFIED MAIL

RECEIVED

JUN 14 2001

EL SEGUNDO
FIRE DEPT.

James Carver
El Segundo Fire Department
314 Main Street
El Segundo, CA 90245

Dear Mr. Carver:

This letter is being sent as a follow-up to our conversations about the Verizon Wireless facilities within the City of El Segundo. Our chemical inventories and business emergency plans have previously been filed under our former company name, AirTouch Cellular. As a result of the merger between Vodafone AirTouch and Bell Atlantic, our new operating name is Verizon Wireless. In California, our legal name is as follows:

Los Angeles SMSA Limited Partnership
dba Verizon Wireless
by AirTouch Cellular, a California Corporation, its General Partner.

Enclosed please find updated chemical inventory forms and business emergency plans for the following facilities:

Verizon Wireless (Site: El Segundo)
650 S. Sepulveda Boulevard
El Segundo, CA 90245

Verizon Wireless (Site: Terminal)
1302 E. Imperial Avenue
El Segundo, CA 90245

Our corporate offices have moved to a new building complex in the City of Irvine. Please send all invoices and other correspondence to the following address:

Verizon Wireless
15505 Sand Canyon Avenue, Building D
Irvine, CA 92618
Attn: Melinda Hsu, Network

If you have any questions or require additional information, please contact me at (949) 286-8713. Thank you for your assistance.

Sincerely,

Melinda Hsu

AIRTOUCH™
Cellular

Business Emergency Plan

General Information

This site is a cellular telephone communications facility which is unmanned, small in size, contains only one or two hazardous materials that are rarely handled or disturbed, and generates no hazardous waste. Therefore, this business emergency plan has been simplified to include only information that pertains to this site.

This facility contains electrical equipment and batteries for powering the equipment. The batteries contain electrolyte in the form of dilute sulfuric acid, which is a corrosive liquid. However, it is completely absorbed and immobilized within the battery so it will not leak even if the battery case is punctured. There are 12 sealed batteries at this site, each containing 8.75 gallons of electrolyte for a total of 105 gallons.

AIRTOUCH™
Cellular

Business Emergency Plan

Emergency Notification

This facility is unmanned, but is remotely monitored 24 hours per day by the AirTouch Cellular Network Control Center (NCC). The NCC continuously monitors a minimum of 32 different site functions such as security, room air temperature and moisture, smoke, heat, and hydrogen gas detection. Any anomaly is immediately reported to AirTouch Cellular personnel who are then dispatched to the site. Smoke and heat detector alarms are immediately reported to the local fire department via 911.

In the event of a spill, release or threatened release (regardless of size) involving a hazardous material, AirTouch Cellular personnel shall immediately report the event to the NCC. AirTouch Cellular personnel will determine if the spill, release or threatened release is reportable. If it is determined to be reportable, AirTouch Cellular personnel shall report the release or spill to the appropriate agencies. AirTouch Cellular does not utilize a private on-site emergency response team.

Fire, Police, Sheriff	**911**
State Office of Emergency Services	(800) 852-7550
	(916) 427-4341
National Response Center	(800) 424-8802
El Segundo Fire Department	(310) 322-4311
AirTouch Cellular Network Control Center	(714) 669-3508
	(800) 242-7622

AirTouch Cellular personnel affected by exposure to hazardous materials should be transported to the following medical facility along with a copy of the MSDS for the chemical in question:

Los Angeles Metropolitan Medical Center -
Hawthorne Campus
13300 Hawthorne Boulevard
Hawthorne, CA 90250
(310) 679-3321

AIRTOUCH™
Cellular

Business Emergency Plan

Release Prevention and Mitigation

This facility has been engineered, designed and built to withstand severe earthquakes. All batteries are mounted in steel racks and braced. All equipment bays and cable racks are securely mounted and braced. This site is secured to prevent break-in and is remotely monitored to detect any anomaly. AirTouch Cellular has taken great steps to prevent potential problems before they occur. AirTouch Cellular personnel who visit this site are trained to be aware of hazards and to report any problems.

Because this is an unmanned facility and the batteries are securely mounted, the likelihood of a person being on site when an electrolyte release occurs is extremely remote. The nature of battery electrolyte is such that, even if a release occurs, there is very little danger to anyone inside the facility and no danger to persons outside the facility. AirTouch Cellular personnel have been trained to exit the facility and contact the NCC in the unlikely event of a release. Eyewash solution is provided at this facility for first aid.

AirTouch Cellular personnel are not trained to mitigate a release of electrolyte. No mitigation materials are kept at this facility. It is AirTouch Cellular policy that any release requiring the notification of an emergency response agency be handled by the responding emergency personnel. AirTouch Cellular personnel would be made available for site entry assistance and technical advice.

AIRTOUCH™
Cellular

Business Emergency Plan

Training

There are few personnel who have reason to visit this facility. It is not accessible to the general public and only AirTouch Cellular personnel who have been issued keys have access to it. All AirTouch Cellular personnel who have access to this facility are made aware of the fact that there are batteries inside and that the batteries contain dilute sulfuric acid. AirTouch Cellular personnel are also given a copy of the Material Safety Data Sheet (MSDS) to read. All AirTouch Cellular personnel are familiarized with the Business Emergency Plan, and are made aware of the location of the on-site Hazardous Materials Disclosure/Business Emergency Plan and MSDS and they are instructed to:

- Report any release of hazardous materials to the NCC immediately.
- Report any other problems that they may observe.
- Refer to this Hazardous Materials Disclosure/Business Emergency Plan for assistance.
- Not attempt mitigation of releases other than very small ones.
- Take this Hazardous Materials Disclosure/Business Emergency Plan and exit and secure the facility, if necessary.
- Wait for responding emergency personnel.

Training for AirTouch Cellular personnel is conducted at the time of employment and on an annual basis thereafter. The training records are kept on site with the Hazardous Materials Disclosure/Business Emergency Plan as well as at the AirTouch Cellular regional office.

Use CHEMTREC only in the event of chemical emergencies involving a spill, leak, fire, exposure, or accident involving chemicals.

Reason for Re-Issue: Reformat

I. PRODUCT IDENTIFICATION

Product Name: Battery, Round Cell KS-20472
Chemical Name/Synonym: KS-20472, Flooded Lead-acid Battery
Product Code/Comcode: 402785232, 402785240, 402785257, 402785265
HMDB Number: 9928
Label Codes

Health: 3 - Corrosive
Fire: 0 - Non-flammable
Reactivity: 2 - Moderately reactive

II. HAZARDOUS INGREDIENTS

Component	CAS #	%	TLV(ACGIH)	PEL(OSHA)
*Lead and lead sulfate (7446-14-2)	7439-92-1	< 60	50 ug/m^3	50 ug/m^3
**Sulfuric acid	7664-93-9	10-30	1 mg/m^3, [1]	1 mg/m^3 [1]

[1]**STEL (ACGIH):** 3 mg/m^3 [1]**STEL (OSHA):** N/A

Comments: The data presented refer primarily to the acid electrolyte since this compound poses the predominant immediate hazard associated with this product. *These chemicals are subject to Section 313 Title III SARA Reporting Requirements. **This chemical in its existing form is not subject to SARA 313 Title III Reportable Requirement. However, if the use of this product results in aerosol formation of this chemical, then the aerosol of this chemical is subject to SARA 313 Title III Reportable Requirements.

III. PHYSICAL PROPERTIES

Appearance/Odor: Acid electrolyte is clear with a strong acrid odor.
Specific Gravity: 1.30
Boiling Point: > 219 °F
Vapor-Pressure: > 20 mm Hg at 77 °F
Evaporation Rate: < 1
% Volatiles by Volume: N/A
% Volatile Organic Carbon: N/A
Vapor Density (Air=1): 3.4
Melting Point: -17 °F
Solubility in Water: Soluble
pH: < 1

IV. HEALTH HAZARD SUMMARY

Primary Routes of Exposure

Oral: **Skin:** X **Eye:** X **Inhalation:** X

Effects of Overexposure:

The electrolyte is corrosive to skin, eyes, and mucous membranes. Repeated or prolonged inhalation of mists can cause inflammation of the upper respiratory tract and chronic bronchitis; pulmonary edema and death may occur from severe exposures.
Early symptoms of lead intoxication include a persistent metallic taste, vomiting, diarrhea or constipation, and severe abdominal pain. Continued exposures may result in muscle weakness and fatigue, nerve system damage, paralysis, liver and kidney damage, anemia, anorexia, and adverse reproductive and developmental effects.

Listed as a Carcinogen or Potential Carcinogen By the Following Agencies?

NTP: No **IARC:** Yes **OSHA:** No

Toxicity Study Information:

Only select Registry of Toxic Effects of Chemical Substances (RTECS) data are presented here. Consult latest issue for more information.

Sulfuric acid: The International Agency for Research on Cancer (IARC) has classified "strong inorganic acid mist containing sulfuric acid" as a Category I carcinogen, a substance that is carcinogenic to humans. This classification does not apply to liquid forms of sulfuric acid contained within a battery. The inorganic acid mist is not generated under normal use of this product. Misuse of the product such as overcharging, may result in the generation of sulfuric acid mist.

Lead-TC_{LO}: 10 ug/m^3, human, inhalation; TD_{LO}: 450 mg/kg/yr, human, oral. Reported to cause chromosomal aberrations in human and animal cells. Causes reproductive and developmental effects in experimental animals.

According to the International Agency for Research on Cancer (IARC) Monograph Supplement (1987), there is inadequate evidence for the carcinogenicity of lead in humans. Lead and inorganic lead compounds are classified as group 2B carcinogens by IARC. OSHA regulated (29 CFR 1910.1025).

Lead sulfate-LD_{LO}: 2 g/kg, dog, oral; LD_{LO}: 30 g/kg, guinea pig, oral. Positive sister chromatid exchange assays in human and animal cells.

The lead and lead sulfate contained in this product pose a minimal hazard because they are enclosed. A lead hazard may result during recycling or if battery is discarded improperly.

V. FIRST AID PROCEDURES

Eye: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

Skin: In case of contact, immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Ingestion: If swallowed, do NOT induce vomiting. Give victim a glass of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

Notes to physician: None

VI. FIRE AND EXPLOSION HAZARD DATA

Flash Point: N/A **Autoignition Temp:** N/A
Flammable Limits: LEL: N/A **UEL:** N/A

Extinguishing Media: For small fires use carbon dioxide, dry chemical. For large fires, flood area with large quantities of water, while suppressing vapors with waterfog/spray.

Special Firefighting Procedures: Cool battery exterior with water to prevent rupture. Firefighters should wear positive pressure self-contained breathing apparatus and thermal protective clothing to avoid toxic and corrosive mists, vapors, and possibly lead fumes.

Unusual Fire and Explosion Hazards: Sulfuric acid, especially when diluted with water, can react with metals to produce flammable gas. Remove all sources of ignition and ventilate area if battery is ruptured or recharging.

VII. REACTIVITY DATA

Stability: Stable

Conditions to Avoid: Prolonged overcharging; sources of ignition. Do not allow metallic articles to simultaneously contact the negative and positive terminals of the battery.

Incompatibility (Materials to Avoid): Combustibles, organic materials, strong oxidizers and reducing agents. strong acids and bases, active metals, water. Carbides, chlorates, nitrates, picrates, fulminates, halides, halogenates, peroxides, sulfides, potassium, sulfur, nascent hydrogen.

Hazardous Decomposition Products:

Sulfuric acid: Sulfur oxides, sulfuric acid mist, hydrogen.

Lead: Presence of nascent hydrogen may generate toxic arsine gas.

Thermal decomposition of battery casing may produce nitrogen oxides and cyanides.

Hazardous Polymerization: Will not occur

Conditions to Avoid: None

VIII. SPECIAL PROTECTION INFORMATION

Ventilation: General ventilation should be adequate under normal conditions of use.
Respiratory Protection: Respirators are not required under normal conditions of use. Use NIOSH approved respirator for acid mist if PEL or TLV is exceeded when handling electrolyte.
Protective Gloves: Required. Neoprene, rubber, or polyethylene types are suggested.
Eye Protection: Required. Chemical splash goggles or full face shield is suggested.
Other Clothing and/or Equipment: Eyewash and safety shower should be available for immediate use. Rubber boots and rubber apron in accordance with potential for electrolyte exposure. Long legged and long sleeved clothing.

IX. ENVIRONMENTAL INFORMATION

Steps to be Taken in Case Material is Released or Spilled: If an acid spill is external to the battery, cover the spill with clay or other recognized acid absorbing agent. Neutralize the acid with sodium bicarbonate (baking soda) or other recognized neutralizer. In an emergency sand, ashes, or gravel can be used to cover spill, and soda ash or lime used to neutralize acid; such substances should not be used on the battery itself as they can cause damage to it. Do not flush with water, even after acid has been neutralized.
Waste Disposal Method: Contains lead. Dispose of according to all applicable regulations.
TSCA Status: All components appear on the TSCA chemical substance inventory.
Shipping Information: USDOT/IATA: Name: Battery, Wet, Filled with acid
Class: 8 **ID#:** UN2794 **PG:** III

X. SPECIAL PRECAUTIONS

Storage and Handling Requirements:

Store in a cool, dry, well ventilated area. Protect batteries from physical damage. All lead acid cells have enormous circuit capability. Extreme care should be exercised to avoid shorting of cell terminals. When working around cells remove rings, wrist watches, necklaces, metal bracelets, belt buckles, etc. Explosive hydrogen gas may be generated during charging. Avoid creating sparks, keep away from sources of ignition and ventilate area during charging.

N.D. = Not Determined **N/A** = Not Applicable.

While information in this fact sheet has been compiled from reference materials and other sources believed to be reliable, its accuracy and completeness is not guaranteed, nor is any responsibility assumed or implied for any loss or damage resulting from inaccuracies or omissions. Any specific evaluation will involve professional judgement by the user's industrial hygiene personnel.

Hazardous Materials Disclosure

Facility Information

This site is an unmanned cellular telephone communications facility that houses electrical equipment and batteries for powering the equipment. It is remotely monitored 24 hours per day by our Regional Operations Control Center (ROCC). The only hazardous material at this site is battery electrolyte (dilute sulfuric acid) which is contained inside each battery. There are 12 sealed batteries inside this facility that contain a cumulative total of 105 gallons of electrolyte. The following information about this facility is provided to meet State, Federal and local disclosure requirements:

Business Emergency Plan

General Information

This site is a cellular telephone communications facility. Because it is unmanned, small in size, contains only one or two hazardous materials that are rarely handled or disturbed, and generates no hazardous waste, this business emergency plan has been simplified to include only information that pertains to this site. Consequently, it is shorter and easier to use than typical emergency plans.

This facility contains electrical equipment and batteries for powering the equipment. The batteries contain electrolyte in the form of dilute sulfuric acid, which is a corrosive liquid. There are 12 sealed batteries at this site, each containing 8.75 gallons of electrolyte for a total of 105 gallons.

This is AirTouch Cellular cell site # 208
The AirTouch Cellular name for this site is El Segundo
The site address is:

650 S. Sepulveda Blvd.
El Segundo, CA 90245

This facility is owned by:

AirTouch Cellular L. A. Market

Business Emergency Plan

Emergency Notification

This facility is unmanned, but it is remotely monitored 24 hours per day by the company's Regional Operations Control Center (ROCC). Personnel at the ROCC are continuously monitoring a minimum of 32 different site functions such as security, room air temperature and moisture, smoke, heat, and hydrogen gas detection. Any anomaly is immediately reported to maintenance personnel who are then dispatched to the site. Smoke and heat detector alarms are immediately reported to the fire department via 911.

Once on-site, the field technician reports back to the ROCC concerning conditions at the site. Any hazardous material release, or threatened release, is reported to the ROCC. ROCC personnel will immediately notify the key decision maker and, if warranted, the appropriate emergency response agency. For conditions not requiring immediate attention or action, the field technician and key decision maker will determine the appropriate course of action. In most cases involving battery acid the battery manufacturer will be contacted and a technician will respond to resolve the problem.

The ROCC has on file all information concerning the property owner or manager and notification will be made as required. Problems encountered on sites near or on school property will be reported to the school district office.

(Company Name)
at 650 Sepulveda Blvd., El Segundo, CA (#208)
(address where chemical are stored and/or used)

To whom it may concern:

This is to certify that the information contained in the annual inventory form submitted July 04, 1994 to the El Segundo Fire Department is complete, accurate and up to date.
(Date of last inventory submittal)
Further, there has been no changes in the quantity of any hazardous material as reported in the most recently submitted annual inventory form, and all chemicals handled in excess of 55 gallons, 200 cubic feet and 500 pounds have been included.

Please contact Network Control Center at (714) 669-3508 if you have any questions

Dear Steve:

As per our telephone conversation this date, I am sending this letter to confirm that AirTouch Cellular's two cell sites within your jurisdiction remain unchanged from what has been previously disclosed. The addresses of these two site are:

ATC Site #208	608 S. Sepulveda Boulevard
ATC Site #436	1302 East Imperial Avenue

There is a Business Emergency Plan at each site, even though they are unmanned and the only hazardous material present is battery electrolyte. Thanks for allowing us to update you via letter.

Sincerely,

Bruce L. Spencer

Release Prevention and Mitigation

This facility has been engineered, designed and built to withstand severe earthquakes. All batteries are mounted in steel racks and braced. All equipment bays and cable racks are securely mounted and braced. The site is secured to prevent break-in and is remotely monitored to detect any anomaly. AirTouch Cellular has taken great steps to prevent potential problems before they occur. Personnel who visit this site are trained to be aware of hazards and to report any problems.

Because this is an unmanned facility and the batteries are securely mounted, the likelihood of a person being on site when an electrolyte release occurs is extremely remote. The nature of battery electrolyte is such that, even in the event that a release occurs, there is very little danger to anyone inside the facility and no danger to persons outside the facility. Protective clothing is provided for all personnel who actually work on the batteries, and all site-visit personnel have been trained to exit the facility and contact the ROCC in the unlikely event of a release. Eyewash solution is provided at this facility for personnel first aid.

AirTouch Cellular personnel are not trained to mitigate a release of electrolyte. No mitigation materials are kept at this facility. It is AirTouch policy that any release requiring the notification of an emergency response agency be handled by the responding emergency personnel. An AirTouch facility technician would be made available for site entry assistance and technical advice.

Training

There are few personnel who have reason to visit this facility. It is not accessible to the general public and only people who have been issued keys have access to it. All personnel who have access to this facility are made aware of the fact that there are batteries inside, that the batteries contain dilute sulfuric acid, and they are given a copy of the Material Safety Data Sheet (MSDS) to read. All personnel are made aware of the location of the on-site Emergency Plan and MSDS and they are instructed to:

- Report any release of battery acid to the ROCC immediately.
- Report any other problems that they may observe.
- Refer to this Emergency Plan for assistance.
- Not attempt mitigation of releases other than very small ones.
- Take the Emergency Plan, exit and secure the facility.
- Wait for responding personnel.

Training for personnel who visit cell sites is performed on an as-needed basis by AirTouch Cellular's Human Resources department. The training records are kept in the Human Resources department at AirTouch Cellular's Irvine office.

ROCC personnel remotely monitor this site and they are trained in the procedures to follow when a release is reported by someone on-site or when trouble is indicated by monitoring equipment. These procedures are kept on file at the ROCC, as are the training records for ROCC personnel.

- Report any release of battery acid to the ROCC immediately.
- Report any other problems that they may observe.
- Refer to this Emergency Plan for assistance.
- Not attempt mitigation of releases other than very small ones.
- Take the Emergency Plan, exit and secure the facility.
- Wait for responding personnel.

Training for personnel who visit cell sites is performed on an as-needed basis by PacTel's Human Resources department. The training records are kept in the Human Resources department at PacTel Cellular's Irvine office.

ROCC personnel remotely monitor this site and they are trained in the procedures to follow when a release is reported by someone on-site or when trouble is indicated by monitoring equipment. These procedures are kept on file at the ROCC, as are the training records for ROCC personnel.

Material Safety Data Sheet

Sulfuric Acid (Dilute), Electrolyte

I. General Information/Summary

Product Identity:

Chemical Name: Sulfuric Acid (Dilute)
Common Name: Battery Electrolyte, Battery Acid

Summary Information:

Dilute sulfuric acid is a corrosive liquid that is clear in color and has a slightly acrid odor. It can cause burns when it comes in contact with skin or eyes. Body contact and breathing of vapors should be avoided. It is non-flammable but may evolve heat when water is added to it. Hydrogen gas may be evolved when it comes in contact with metals. Extinguishing media appropriate to surrounding fire should be used. Runoff from fire control methods should not be allowed to enter sewers or waterways. Small acid spills may be neutralized with bicarbonate of soda. Larger spills may be neutralized with a mixture of soda ash/slaked lime (50/50). Follow applicable regulations for disposal of neutralized waste with a pH between 5.5 and 8.5.

II. Hazardous Ingredients/Material Identification

Hazardous Component: Sulfuric Acid	**% By Weight:** 28 - 40%	**Chemical Family:** Acid
CAS Registry #: 7664-93-99	**OSHA PEL:** 1.0 mg/m^3	**ACGIH TLV:** 1.0 mg/m^3
Non-Hazardous Component: Water	**% By Weight:** 60 - 72%	

HMIS Rating:	Health: **2**	Flammability: **0**	Reactivity: **2**	Other: **0**
NFPA Rating:	Health: **2**	Flammability: **0**	Reactivity: **2**	Other: **Corrosive**

III. Physical/Chemical Characteristics

Boiling Point:	N/A	**Specific Gravity (Water = 1):**	1.202 - 1.303
Vapor Pressure:	Ambient	**Melting Point:**	N/A
Vapor Density:	N/A	**Evaporation Rate:**	N/A
Solubility in Water:	100%	**Appearance/Odor:**	Clear liquid, acrid odor

IV. Fire/Explosion Hazard

Flash Point:	Non-combustible	**Autoignition Temperature:**	N/A
LEL:	N/A	**UEL:**	N/A

Extinguishing Media: Use extinguishing media appropriate to surrounding fire. Dry chemical, Halon, carbon dioxide, water or foam may be used.

Special Firefighting Procedures: Self contained breathing apparatus and full protective clothing should be worn. Structural firefighter's protective clothing may be damaged if it comes in contact with acid. Rubber gloves should be worn. Runoff from firefighting activities should be prevented from entering sewers or waterways prior to neutralization.

Unusual Fire & Explosion Hazards: Water added to dilute sulfuric acid will evolve heat unless in large quantities. Hydrogen gas may be generated.

V. Reactivity Data

Stability/Polymerization: Sulfuric acid is stable at room temperature in closed containers. Hazardous polymerization will not occur.

Incompatibility (Materials to Avoid): Metals, combustibles.

Conditions to Avoid: Contact with metal, storage near combustibles.

Hazardous Decomposition or Byproducts: Hydrogen gas. Sulfur trioxide may be generated at high temperatures.

VI. Health Hazard Data

Summary of Risks: Dilute sulfuric acid is a respiratory tract, skin, and eye irritant. Exposure can result in burns, tissue damage, scarring, and blindness if splashed in the eye.

Carcinogenity: None known at this time.

Routes of Entry: Inhalation, skin, eyes, ingestion.

Health Hazards - Acute: Tissue destruction on contact. May cause 2nd and 3rd degree burns or blindness. Ingestion will cause corrosive burns on contact. May be fatal if swallowed.

Health Hazards - Chronic: Inhalation of mists may cause upper respiratory irritation and possible pulmonary edema.

Signs and Symptoms of Exposure: Irritating or burning of exposed tissue.

Medical Conditions Aggravated by Exposure: Respiratory disorders may be aggravated by prolonged inhalation of mists.

Emergency First Aid: Skin/Eyes - Flush with water for at least 15 minutes. Remove contaminated clothing.

Emergency First Aid: Inhalation - Remove exposed person to fresh air and support breathing as needed.

Emergency First Aid: Ingestion - Do not induce vomiting. Drink large amounts of water or milk. Seek medical attention immediately.

VII. Precautions for Safe Handling and Use

Steps To Be Taken if Material Is Released or Spilled: Neutralize spill with soda ash or lime. Use adequate ventilation with soda ash due to CO_2 evolution. Keep unprotected individuals away from large spills. Contain large spills with earth or clay dikes.

Waste Disposal Method: If local ordinances permit, neutralized acid may be rinsed to sewer.
RCRA Waste Disposal No.: D002 - Corrosive.

Precautions To Be Taken in Handling and Storing: Add water to acid to avoid excessive heat generation. Store away from reactives and combustibles in cool, dry area.

VIII. Control Measures/Protective Equipment

Respiratory Protection: If needed, NIOSH-approved acid mist respirator.

Ventilation: Local exhaust to avoid vapor/ mist buildup.

Eye Wear: Chemical splash goggles.

Gloves: Rubber or neoprene.

Other Protective Clothing: Acid resistant apron or clothes.

Work Practices: Maintain eyewash and drench shower in area.

EL SEGUNDO
FIRE DEPARTMENT

El Segundo Fire Department
Hazardous Materials Office
314 Main Street
El Segundo, CA 90245

Hazardous Materials Coordinator:

PacTel Cellular (PTC) has authorized Radix Consulting to handle HazMat disclosure and Business Emergency Plans for each of their cell sites in Southern California. PTC has over two hundred cell sites in Los Angeles county and must deal with twenty-five different administering agencies in an effort to comply with applicable codes and ordinances. We contacted numerous AA's in different counties in Southern California in order to determine the various disclosure and BEP requirements. What we found was that each AA had a different way of doing virtually the same thing, with each agency having its own set of forms to fill out and return. Because PTC has so many different cell sites, we have established a computer database in which site information is stored. In an effort to keep things manageable and easily updatable in the future, we have designed a computerized disclosure/BEP form which we feel meets the requirements of each administering agency. They are uncomplicated and easily read due to their simplified nature. Since each PTC cell site is unmanned and usually consists only of a small building or room that houses electrical equipment and batteries, much of the information requested in the disclosure and BEP forms does not apply. Typical sites have a rack of twelve or twenty four batteries that are sealed lead acid or calcium lead gel cells. The only hazardous material in the batteries is dilute sulfuric acid with a specific gravity of approximately 1.3. Occasionally, diesel fuel or propane for emergency generator use will be stored in a tank outside of a site.

PTC presently has 2 sites in El Segundo, each of which contains more than 55 gallons of dilute sulfuric acid electrolyte in batteries, and may also contain a fuel tank with more than 55 gallons of diesel fuel or propane. Based on these amounts, we are enclosing a combined Disclosure/Business Emergency Plan for each site. A copy of the applicable BEP is kept at each site in the location shown on the Facility Plan. Two additional copies are kept on file at PTC.

There is presently no NFPA placarding at any of PTC's cell sites in Los Angeles County. PacTel Cellular recognizes their responsibility to provide placarding for emergency responders, but also realizes that one type of placard (NFPA 704) does not necessarily provide the best information. Since PacTel's sites range from rooms in or on top of high rise office buildings, to stand alone buildings in vacant lots, PTC would prefer not to install NFPA placarding at many of their sites. A case in point would be a site inside of a room within a high rise or other office building. Placing an NFPA 704 placard at the front door would possibly be upsetting to the property owner, tenants and customers, would serve very little purpose in the event of an emergency, and could even serve as a detriment to proper response. Based upon our meetings with responding and administering agencies, PacTel Cellular is willing to provide placarding at each site which will best meet the needs of each administering agency. Therefore, we ask that you review the choices offered on the enclosed form and select the choice, or choices, that best meet your requirements. We will provide the requested placarding as soon as we receive a response from your agency on the enclosed form. Please return the form to Radix Consulting, 23591 Avenida Topanga, Mission Viejo, CA 92691.

PTC wishes to comply with the requirements of each administering agency and we have made every effort to do so by developing a system that will facilitate reporting and data tracking. We hope that the enclosed disclosure/ BEP's will meet your requirements. Once we hear from you regarding placarding, we will see that it is done as soon as possible. Should you have any questions, please feel free to contact us at (714) 586-0216.

Sincerely,

Bruce L Spencer

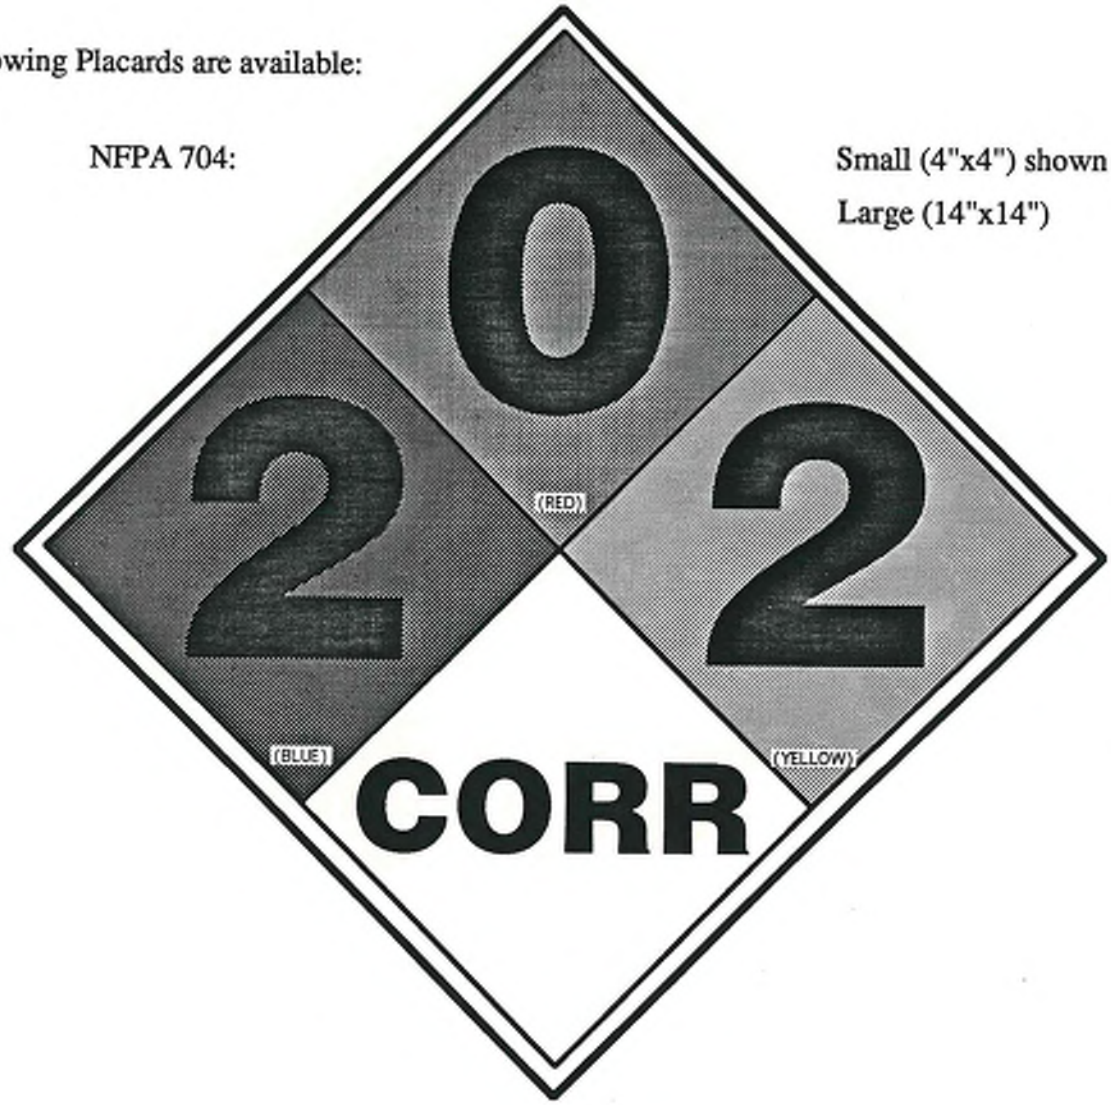
The following Placards are available:

NFPA 704:

Small (4"x4") shown

Large (14"x14")



Battery Acid:

Actual size, black on yellow

BATTERY ACID

POISON! DANGER!

STRONG OXIDIZER - CONTACT WITH OTHER MATERIALS MAY CAUSE FIRE. CAUSES SEVERE BURNS. MAY BE FATAL IF SWALLOWED.

Do not get in eyes, on skin, on clothing. Avoid breathing vapor. Keep in tightly closed container. Use with adequate ventilation. Wash thoroughly after handling.

EFFECTS OF OVEREXPOSURE: Liquid may cause severe burns to skin and eyes. Inhalation of vapors may cause coughing, chest pains, difficulty breathing, or unconsciousness. Ingestion may be fatal.

FIRST AID PROCEDURES: If swallowed, do NOT induce vomiting. If conscious, give water, milk, or milk of magnesia. In case of contact with skin or eyes, immediately flush with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Thoroughly clean contaminated clothing before reuse. Discard contaminated shoes. In all cases, contact a physician.

Consult MSDS for further health and safety information. **CAS NO. [7664-93-9]**

Re: 1998 Business Plan

Dear Mr. Carver,

Per our discussion on Feburaury 19, 1998, regarding the 1998 business plan update, Hughes Space and Communications Company (HSC) will not be submitting a business plan update in the beginning of 1998. HSC is planning on submitting the next HSC business plan to the El Segundo Fire Department (ESFD), when the ESFD is ready for electronic reporting, which is planned for April 1998. It is agreed between HSC and ESFD, that the recent September 1997 HSC business plan update meets the March 1, 1998, regulatory update deadline.

If you have any questions regarding this letter please call me at (310) 416-4426.

Sincerely,

Hughes Space and Communications Company

Re: Hughes Space and Communications Hazardous Materials Inventory Update

Dear Mr. Carver,

Attached is a copy of the Fall 1997 update of the Hughes Space and Communications (HSC) Company Business Plan. As discussed with Steve Tsumura on October 15, the Business Plan has been updated to include the HSC operations located off El Segundo Blvd. in the Hughes El Segundo South facility. Previously, the inventory had been reported under the Hughes Aircraft Company (HAC), Sensors and Communications Systems (SCS) business plan. The following attachments have been updated:

- Cover Page
- Building Locations Summary
- Emergency Equipment Inventory
- Site maps
- Emergency Hazmat Spill Notification

As an update, the split of Hughes Electronics and the merger of HAC with Raytheon is predicted for sometime at the end of the '97 calendar year. Following this predicted spilt, there will be service agreements between the two companies for a minimum of one year. Included in the service agreements is the Hughes Fire Dept. support, so emergency response will not change for at least one year.

If you have any questions regarding this document please call me at (310) 416-4426.

Sincerely,

Hughes Space and Communications Company

Re: Updated Business Plan

Dear Mr. Tsumura,

Attached is one copy of the 1997 update of the Business Plan and Hazardous Materials Inventory for Hughes Space and Communications Company.

Please notice, buildings S66, S67 and S52 have been removed from this years report. We moved out of S66 and S67 in June/July period, and S52 has been vacant for a few years.

If you have any questions regarding this document please give at (310) 416-4426.

Sincerely,

Hughes Space and Communications Company

Re: Hughes Space and Communications Company, Business Plan Update

Dear Mr. Carver,

Attached is the 2000 update to Hughes Space and Communications Company's El Segundo Business Plan. Included in this submittal are the following items:

1. Completed Business Owner/Operator Identification form and updated responses to questions from the 1999 Business Plan submittal;
2. Completed Business Activity form;
3. Completed Recyclable Materials Report forms, pages 1 & 2;
4. "Floppy Disk" with complete HSC hazardous materials inventory for El Segundo sites.

If you have any questions regarding these materials, please call me at (310) 416-5291.

Sincerely,

Hughes Space and Communications Company

To: Wride, Diane
Subject: 2005/ 2006 CUPA Consolidated Permit Fee: Correction Required

Hello Diane,

Based on my review of the invoice for the 2005/ 2006 CUPA Consolidated Permit Fee (invoice # 9719), some corrections may be required.

* Two or three building locations may have been included in error. Two of the building locations, 2000 E. El Segundo Blvd. (Bldg E01) and 700 N. Sepulveda Blvd. (Bldg S38) no longer contain hazardous materials greater than 55 gallons, 200 cubic feet, or 500 pounds as identified in the Business Plan submittal. The third location, 2240 E. Imperial Hwy. (Bldg S-4) is no longer occupied by Boeing Satellite Systems and was returned to the building owner on April 30, 2006. This building may or may not require a fee payment based on the lease termination date.

* In addition, two building locations may have been excluded in error. Two building locations, 2040 E. Mariposa St (Bldg S11) and 900 N. Sepulveda Blvd. (Bldg S31), that contain hazardous materials greater than 55 gallons, 200 cubic feet, or 500 as identified in the Business Plan submittal are not included on the 2005/ 2006 CUPA Consolidated Permit Fee invoice.

At your earliest convenience please confirm the correctness of the invoice, or provide me with guidance for correction so that I may pay the correct fee due.

Thank you,

David Seitz

BOEING

Subject: Company Business Name Change

Dear Mr. Carver,

Effective October 7, 2000, the business formerly known has Hughes Space and Communications Company, has undergone a name change. The Company will now be known as Boeing Satellite Systems, Inc.

Please note the name change will affect the following:

1. El Segundo Hazardous Material Business Plan (an updated Business Plan without appendices is attached)
2. Uniform Fire Permits City of El Segundo
3. The El Segundo Hazardous Waste/Hazardous Material "CUPA" Permits

If you have any questions regarding this subject, or require additional information, please contact me at (310) 416-4426.

Sincerely,

Anu B. Garg

EPA ID # (Hazardous Waste Only) *See Below

BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) 3

Boeing Satellite Systems, Inc.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page (OES Form 2730).

Does your facility…	If Yes, please complete these pages of the UPCF….	
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	✔ YES ☐ NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731)
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tanks?	☐ YES ✔ NO 5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
2. Intend to upgrade existing or install new USTs?	☐ YES ✔ NO 6	UST FACILITY UST TANK (one per tank) UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) (Formerly Form C)
3. Need to report closing a UST?	☐ YES ✔ NO 7	UST TANK (closure portion –one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: ---any tank capacity is greater than 660 gallons, or ---the total capacity for the facility is greater than 1,320 gallons?	✔ YES ☐ NO 8	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE 1. Generate hazardous waste?	✔ YES ☐ NO 9	EPA ID NUMBER – provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	✔ YES ☐ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☐ NO 11	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY (Formerly DTSC Forms 1772) ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit) (Formerly DTSC Forms 1772 A,B,C,D and L)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ✔ NO 12	CERTIFICATION OF FINANCIAL ASSURANCE (Formerly DTSC Form 1232)
5. Consolidate hazardous waste generated at a remote site?	☐ YES ✔ NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION (Formerly DTSC Form 1196)
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ✔ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION (Formerly DTSC Form 1249)

Reference: Electronic Submittal of Chemical Inventory

Dear Ms. Garg:

Thank you for participating in the City of El Segundo Fire Department's electronic data transfer program for the submittal of your chemical inventory. Based on regulations adopted on January 8, 1999 concerning the new Unified Program Consolidated Forms, we are looking forward to receiving your chemical inventory within the next 30 days. Enclosed with this letter is instruction on how to submit the chemical inventory electronically, and 3 1/2-inch floppy discs to store the data. To transfer the data, you will need the computer program Microsoft Access 97.

Included also are the forms "Business Activities" (form ESD-32) and "Business Owner/Operator Identification" (form ESD-38). After the inventory is updated, please submit the updated inventory (on the provided floppy discs) and completed forms to the Department. You may either mail or drop off the floppy discs to the El Segundo Fire Department at 314 Main Street, El Segundo, CA 90245.

Please be advised that the due dates identified on the Notice to Comply's, issued November 20, 2000 for 2006, 2012, 2030 and 2040 East Imperial Highway, 901 North Nash Street and 700 North Sepulveda Boulevard, and on December 23, 2000 for 950 North Sepulveda Boulevard are extended to march 1, 2001. This addition is provided to allow Boeing Satellite Systems, Inc. time to provide the chemical inventory in an electronic format that is compatible with the Department's Environmental Safety Division's computer system.

314 Main Street
El Segundo, CA 90245-3887
Phone (310) 524-2300 Fax (310) 414-0929

If you have any questions, comments, or ideas for improving the electronic data transfer program, please contact me by e-mail at jcarver@elsegundo.org, or by telephone at (310) 524-2239.

Sincerely,

James J. Carver

Subject: Electronic Submittal of Chemical Inventory and Updated Business Plan for 2001

BOEING

Dear Mr. Carver,

In response to the Notice to Comply issued on November 20, 2000 for Buildings S10, S47, S48, and S49 and the Notice to Comply issued on December 23, 2000 for Building S30, we have updated and transferred our chemical inventory to the electronic format you requested. In addition, I am submitting a complete up to date copy of the El Segundo Hazardous Material Business Plan for your records.

This includes twenty 3 1/2 – inch floppy discs with the appropriate chemical inventory data.

If you have any questions regarding this subject, or require additional information, please contact me at (310) 416-4426.

Sincerely,

Underground Storage Tank Program – Case Closure
Equinix Communications
1920 E. Maple Avenue, El Segundo
Case No. R-10916A; Global ID. T10000010173; Priority D-1

Dear Mr. Lopez:

This letter confirms the completion of a site investigation and corrective action for the recent underground piping replacement and upgrades associated with the existing underground storage tank(s) located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the underground piping replacement and upgrades are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground tank(s) site is in compliance with the requirements of subdivision (a) and (b) of section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of section 25296.10 of the Health and Safety Code.

Claims for reimbursement of corrective action costs submitted to the Underground Storage Tank Cleanup Fund more than 365 days after the date of this letter or issuance or activation of the Fund's Letter of Commitment, whichever occurs later, will not be reimbursed unless one of the following exceptions applies:

- Claims are submitted pursuant to Section 25299.57, subdivision (k) (reopened UST case); or

- Submission within the timeframe was beyond the claimant's reasonable control, ongoing work is required for closure that will result in the submission of claims beyond that time period, or that under the circumstances of the case, it would be unreasonable or inequitable to impose the 365-day time period.

If you have any questions concerning this matter, please contact Mr. Joshua Cwikla at (213) 576-6713 or joshua.cwikla@waterboards.ca.gov

UNDERGROUND STORAGE TANK PROGRAM: TRANSMITTAL OF CLOSURE LETTER

Equinix Communications
1920 E. Maple Avenue, El Segundo
Case No. R-10916A; Global ID. T10000010173; Priority D-1

Dear Mr. Lopez:

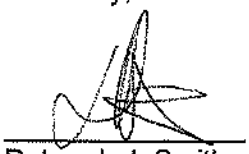
Attached please find the closure letter for the subject site. The current record fee title owners were notified of the proposed closure in accordance with Section 25296.20 of Chapter 6.7 of the Health and Safety Code. The California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Regional Board) sent a public notification of the proposed case closure to all interested parties, which included a 60-day public comment period. No comments were received.

Based on the site specific information and data available in GeoTracker and the Los Angeles Regional Board's case file, we conclude that this case meets all the criteria of the State Water Resources Control Board's Low-Threat Underground Storage Tank Case Closure Policy and that a case closure determination is appropriate.

Site data indicate that there may be residual petroleum hydrocarbons in soil, groundwater, and/or vapor at this site that could pose an unacceptable risk as a result of future construction/redevelopment activities, such as on- or off-site excavations, the installation of water wells at or near the site, or change to a more sensitive land use from commercial use. Responsible parties, land owners, and contractors performing subsurface activities at the site should be prepared to encounter soil, groundwater, and/or vapor contaminated with petroleum hydrocarbons. Appropriate health and safety equipment and protocols should be used, and any encountered pollution should be managed properly to avoid threats to human health or the environment.

Please contact Mr. Daniel P. Pirotton at (213) 576-6714 or at daniel.pirotton@waterboards.ca.gov if you have any questions.

Sincerely,



Deborah J. Smith
Executive Officer

V. FREE PRODUCT

Was free product encountered? **No**	Has free product been totally removed? **N/A**
When was free product recovery project completed? **N/A**	

VI. SOIL REMEDIATION

Method: **Soil Excavation**	Duration of remediation: **November 2016 to January 2017**
Waste manifest document: **Yes**	Volume of soil disposal/mass removal: **63 US Tons**

VII. GROUNDWATER REMEDIATION

Method: **No Remediation Attempted**	Duration of remediation: **N/A**
	Mass removal: **N/A**

VIII. COMMENTS AND JUSTIFICATION FOR RECOMMENDED ACTION

Site History

The Site has been operated as an active data storage center facility (Facility) since 2005, and is located at 1920 E Maple Avenue, El Segundo, California (Figure 1). The Site includes 11 generators, two 30,000-gallon diesel USTs, and associated underground piping. The USTs and associated piping are beneath a concrete pad, while the generators are installed on top of the pad. The concrete pad has a 6-inch raised curb around it serving as secondary containment for the above ground equipment. Each generator contains a 3,000-gallon belly tank for local storage of diesel fuel. (Figure 2). During recent underground piping replacement and upgrades, possible contamination from a previous diesel fuel spill was identified. On February 23, 2017, the City of El Segundo Fire Department (ESFD) transmitted this case to this Regional Board due to concerns of soil and groundwater impacts from the Site.

Data Summary

On March 26, 2008, approximately 2,000-2,500 gallons of diesel fuel was released from a generator and was contained within the concrete containment area. The fuel was removed using a vacuum truck and disposed of using an environmental cleanup service.

In 2009, secondary containment testing results revealed failures in the piping system. As part of the associated piping repairs in May of 2010, soil samples were then collected around the piping adjacent to select generators to a maximum depth of four feet below ground surface (bgs) under the observation of the ESFD (Figure 3). The maximum concentrations of total petroleum hydrocarbons as diesel (TPH_D), toluene, ethylbenzene, xylenes, and naphthalene were 5,600 milligrams per kilogram (mg/kg) (TPH_D), 0.00089 mg/kg (toluene), 0.71 mg/kg (ethylbenzene), 1.51 mg/kg (xylenes), and 1.6 mg/kg (naphthalene) respectively. Benzene and methyl tertiary butyl ether (MTBE) were not detected above laboratory reporting limits (Table 1).

In October of 2014, Equinix performed additional piping repairs associated with minor reported leakage.

In September of 2016, as part of upgrades and replacement to piping and connections associated with the USTs and generators, Equinix performed soil sampling in the areas excavated for the purposes of repairs or replacement of system components. Under the observation of ESFD, Equinix collected 22 soil samples at a depth of two feet bgs (Figure 4). No samples were collected in the UST area. The maximum concentrations of TPH_D, ethylbenzene, and xylenes detected were 9,200 mg/kg (TPH_D), 0.12 mg/kg (ethylbenzene), and 0.177 mg/kg (xylenes), respectively. Benzene, toluene, and MTBE were not detected above laboratory reporting limits. Soil samples were not analyzed for naphthalene (Table 2).

Under the direction of ESFD, in November 2016 and January 2017 Equinix removed approximately 63 US Tons of diesel contaminated soil from the excavated areas associated with the piping system repairs. No confirmation soil samples were collected.

The depth to groundwater is anticipated to be approximately 90 feet bgs, with flow to the west based on measurements of groundwater at a Site Cleanup case (LAX – Korean Airlines, at 6101 West Imperial Highway, Los Angeles, case no. 1061B) located approximately 2,140 feet north of the Site in 2011.

Under the direction of the Regional Board, eight soil borings (B-1, B-2, B-3, B-5, B-6, B-8, B-9, and B-10) were advanced at the Site from October 17–19, 2017 to maximum depths of 32 feet bgs (Figure 5). The anticipated depth of 50 feet bgs could not be achieved due to ground refusal. Borings were drilled in a line from east to west just south of the backup generators, within the piping corridor where the product lines were replaced, and diesel-impacted soils were excavated (B-1–B-3). Borings were also drilled in a line from east to west, approximately 10 to 15 feet south of the first row of borings, to assess the lateral extent of remaining impacts (B-4 – B-6). No borings were drilled to the north of the product pipeline excavation due to inaccessibility. TPH_D was detected in all borings at concentrations ranging from 3.9 mg/kg at the 30-foot depths of borings B-3 and B-10 to 10,000 mg/kg at the 4-foot depth of boring B-3 in the piping corridor area. Figure 5 displays all TPH_D and volatile organic compound (VOC) concentrations as well as the associated boring locations. TPH_D concentrations greater than 25 mg/kg were limited to within 10 feet bgs, with only borings B-2, B-3, and B-6 (all within the piping corridor area) having maximum detections greater than 1,000 mg/kg. Residual diesel impacts near the surface may not extend to groundwater which is estimated to be approximately 60 feet deeper than the maximum depth sampled at the Site. Total petroleum hydrocarbons as gasoline (TPH_G) was not analyzed since gasoline was never used at the Site. VOCs including benzene, MTBE, and other fuel oxygenates were non-detect (ND) in soil samples from all borings with the exception of one detection of naphthalene in boring B-3 at the 5-foot depth (0.08 mg/kg). Table 3 displays all soil analytical results for the 2017 Site Assessment.

As part of the October 2017 site assessment, four of the borings advanced were also located around the two existing diesel USTs (B-7 – B-10). The maximum concentration of TPH_D detected in the UST area was 23 mg/kg at a depth of 20 feet bgs in boring B-8. Soil analysis within the UST area was non-detect for VOCs indicating minimal shallow soil impacts and no impacts to groundwater from the USTs.

Soil beneath the site consists of interbedded layers of sand, silty sand, sandy clay, and clayey sand to at least 32 feet bgs. A representative boring log is included as Appendix A.

The nearest sensitive receptor is Lambs and Ivy Daycare Center, located approximately 1,200 feet to the east.

The nearest drinking water well is approximately 2 miles to the east.

Low Threat UST Closure Policy Criteria Evaluation

General Criteria

The site meets all General Criteria components of the Low Threat Policy.

a) The water purveyor within the area of the Site is the City of El Segundo Water Department.
b) The release was from a piping system that conveys diesel fuel from the USTs to the backup generators.
c) In 2009, secondary containment testing results revealed failures in the piping system. These minor leaks were stopped and the UST system was upgraded. No new leaks or piping failures have been detected since the upgrades.
d) Free product was not detected at the site.
e) A site conceptual model has been developed.
f) Equinix removed approximately 63 US Tons of diesel contaminated soil from the excavated areas associated with the piping system repairs.
g) Soil samples were tested for MTBE.
h) The site does not create a nuisance.

Groundwater

The Low Threat Closure Policy groundwater criteria are not applicable. This is a soil only case. No detections of TPH_D, or fuel related VOCs were detected above Regional Screening Levels (RSLs) below 10 feet bgs. The inferred high groundwater elevation at the Site is approximately 90 feet bgs. Groundwater was not encountered to a depth of 32 feet bgs at the Site.

Vapor Intrusion to Indoor Air

The site meets Scenario 3.3 of the Low Threat Closure Policy, with the exception that TPH concentrations exceed 100 mg/kg throughout the entire bioattenuation zone. The maximum concentration of TPH_D detected in soil is 10,000 mg/kg at the 4-foot depth of boring B-3 and decrease significantly with depth. The Site has 11 active generators, utilizing the two 30,000-gallon diesel USTs. Exposures to petroleum vapors related to residual concentrations of the historical diesel impacted soil are comparatively insignificant relative to exposures from small surface spills and fugitive vapor releases that typically occur at active facilities. Additionally, the residual soil impacts are covered by a concrete pad in an open air area of the facility minimizing unacceptable human health risks.

Direct Contact and Outdoor Air Exposure

The parking lot surface is currently covered with a concrete pad. The Site satisfies the media-specific criteria 3.a for Direct Contact and Outdoor Air exposure under the commercial/industrial land use scenario as follows:

a) Residual benzene in soil does not exceed 8.2 mg/kg (maximum residual ≤ 10 ft bgs = **ND mg/kg**).
b) Residual ethylbenzene in soil does not exceed 89 mg/kg (maximum residual ≤ 10 ft bgs = **ND mg/kg**).
c) Residual naphthalene in soil does not exceed 45 mg/kg (maximum residual ≤ 10 ft bgs = **0.08 mg/kg**)

Therefore, no results exceeded the Low Threat Closure Policy criteria identified below:

Maximum Soil Sample Concentration Results (mg/kg) Max residual at site within 10 feet bgs:		Commercial/Industrial		Utility Worker
		(0 to 5 ft bgs)	Volatilization to outdoor air (5 to 10 ft bgs)	(0 to 10 ft bgs)
Benzene	**ND**	8.2	12	14
Ethylbenzene	**ND**	89	134	314
Naphthalene	**0.08**	45	45	219
PAH	**NA**	0.68	NA	4.5

Factors Supporting Low Risk Closure

The extent of soil contamination has been adequately defined.

MTBE and benzene have never been detected in all soil sampling conducted at the Site.

The UST area revealed only minor detections of TPH_D and non-detect for VOCs indicating minimal shallow soil impacts and no impacts to groundwater from the USTs.

Approximately 63 US Tons of diesel contaminated soil from the excavated areas associated with the piping system repairs was removed from the Site.

Groundwater has not been impacted. No detections of TPH_D, or fuel related VOCs were detected above Regional Screening Levels (RSLs) below 10 feet bgs.

Free product was not reported at the Site.

Case closure is consistent with the Low Threat Closure Policy.

IX. MTBE FATE & TRANSPORT PLUME LENGTH MODELING ANALYSIS

This is a soil only case, groundwater is anticipated to be encountered at 90 feet bgs. MTBE has never been detected in all soil sampling conducted at the Site.

X. ELECTRONIC DELIVERABLE FORMAT (EDF) SUBMISSION

Has electronic data reporting requirement been met? Yes

XI. AB 681 REQUIREMENT (Land Owner Notification)

- TPH = Total petroleum hydrocarbons.
- BTEX = benzene, toluene, ethylbenzene, and xylenes, respectively. MTBE = methyl tertiary butyl ether.
- Respective MCLs (ppm): B=0.001, T=0.15, E=0.3, X=1.75, MTBE=0.013.
- BTEX screening concentrations determined per the attenuation factor method as described in RWQCB Guidance for VOC Impacted Sites (March 1996), with a natural degradation factor of 11 for BTEX and of 3 for MTBE. Table values can be linearly interpolated between distance above groundwater and are proportional to fraction of each lithological thickness.
- Values in Table 4-1 are for soils above drinking water aquifers. All groundwaters are considered as drinking water resources unless exempted by one of the criteria as defined under SWRCB Resolution 88-63 (TDS>3000 mg/L, or deliverability <200 gal/day, or existing contamination that cannot be reasonably treated). Regional Board staff will make a determination of potential water use at a particular site considering water quality objectives and beneficial uses. For non-drinking water aquifers, regardless of depth, TPH for ">150 feet" category in the table should be used;
- Distance above groundwater must be measured from the highest anticipated water level. Lithology is based on the USCS scale.
- In areas of naturally-occurring hydrocarbons, Regional Board staff will make determinations on TPH levels.

Results above the MCLs are presented in**BOLD.** The samples were analyzed by EPA Test Methods 8015M and 8260B

*	Duplicate sample was collected concurrently with sample MW-10
mg/L	Milligrams per liter
ug/L	Micrograms per liter
MDL	Method Detection Limits employed by the testing laboratory, The MDLs may have been raised for samples containing elevated concentrations of contaminants or insufficient sample quality.
MCL	Maximum Contaminant Levels for water, California Regional Water Quality Control Board, January 18, 1995 and March 12, 1999 Memorandums, and Title 22 California Code of Regulations, September 12, 2003
J	Estimated concentration. The result is less than the practical quantitation limit, but greater than the MDL.
I	Probable laboratory contamination. This analyte was found in the laboratory method blank at a comparable level.
TPH-g	Total petroleum hydrocarbons as gasoline-quantified against standard.
TPH-d	Total petroleum hydrocarbons as diesel-quantified against standard.
B	Benzene
T	Toluene
E	Ethylbenzene
X	Xylenes, m,p/o
MtBE	Methyl tertiary-butyl ether
tBA	Tertiary-butyl alcohol or Tert Butanol
tAME	Tertiary-amyl methyl ether
EtBE	Ethyl tertiary-butyl ether
1,2-DCA	1,2-dichloroethane
QCTB	Quality Control Trip Blank
na	Not analyzed for this constituent
ns	Not sampled this quarter
DIPE	Di-isopropyl ether
IPB	Isopropylbenzene
1,3,5-TMB	1,3,5-Trimethylbenzene
PCE	Tetrachloroethene
VC	Vinyl Chloride
sec-Butyl	sec-Butylbenzene
nl	none listed
ns/fp	not sampled due to the presence of free-floating product
1,2,4-TMB	1,2,4-Trimethylbenzene
cis-1,2-DCE	cis-1,2-Dichloroethene
TCE	Trichloroethene
n-Propylb	n-Propylbenzene
n-Butylb	n-Butylbenzene
1,1-DCA	1,1-dichloroethane
IPB	Isopropylbenzene
1,2-DCA	1,2-dichloroethane
t-1,2-DCE	trans-1,2-dichloroethene
4-IPT	4-Isopropyltoluene
CM	Chloromethane

B-10-30	10/19/2017	30	13	ND	ND	ND	ND	ND	ND	ND	ND	ND	ND	ND

Abbreviations and Notes:

bgs = below ground surface

mg/kg = milligrams per kilogram

ND = not detected; see laboratory report for practical quantitation limit and method detection limit

Dections in **BOLD** are above industrial screening level of 1,100 mg/kg for TPHd

-- No value for direct exposure human health risk levels

TPH-d analyzed by CA LUFT

Benzene, Toluene, Ethyl-benzene, Total Xylenes, MTBE, ETBE, DIPE, TAME, TBA, Ethanol, and Napthalene analyzed by EPA Method 5035/8260B.

TPH-d = Total petroleum hydrocarbons as diesel

MTBE = Methyl tertiary butyl ether

ETBE = Ethyl tertiary butyl ether

DIPE = Diisopropyl ether

TAME = Tertiary amyl methyl ether

TBA = Tertiary butyl alcohol

VOCs = Volatile Organic Compounds

CORPORATE OFFICE

February 9, 1978

Sanitation District of L.A. County
1955 Workman Mill Road
P.O. Box 4998
Whittier, California 90607

SUBJECT: PERMIT # 5815, FILE 05-00.05-00/77-5815 R

To Whom It May Concern:

Your inspector, Ralph Ferguson inspected our sewer line Permit #5815, which he found completed in accordance to plans.

One change was made. Instead of raincap, we raised the floor sink 1 1/2" above decking.

If you have any questions, please feel free to call me.

Sincerely,

Sven Jacobsen
Facilities Engineer

Attention: Donald F. Holquin

Subject: Industrial Wastewater Discharge Permit No. 5815
Computer Science Corporation
650 North Sepulveda Blvd.
El Segundo, CA 90245

Dear Mr. Holquin:

Enclosed are two (2) approved sets of plans, and copies of the approved Industrial Wastewater Discharge Permit for the subject company. Please review these for compliance with your requirements, and retain the copies you require for your files. A copy of this letter is forwarded to the applicant to notify him of the Sanitation Districts' permit requirements, which are in force from the current date. If any additional permit requirements are issued to the applicant by your agency, copies should be forwarded to the Sanitation Districts for our records. The approved plans consist of:

Plot Plan Including Existing and Proposed Sewer Lines

Approval of the plans and permit is contingent upon continuing compliance with applicable Sanitation Districts' Ordinance requirements, upon any corrections shown in red on the drawings, and upon the items indicated on the attached requirement list.

If you have any questions concerning these requirements, please call the Sanitation Districts' Industrial Waste Section at extension 260.

Very truly yours,

John D. Parkhurst
Chief Engineer and
General Manager

INDUSTRIAL WASTEWATER DISCHARGE PERMIT

REQUIREMENT LIST

COMPANY NAME Computer Science Corporation

INDUSTRIAL WASTEWATER DISCHARGE PERMIT NO. 5815

DATE OF PERMIT ISSUANCE October 21, 1977

The above named company is required to comply with all indicated items on this list as a condition of the permit approval. Satisfactory evidence of compliance with these conditions should be supplied to the Sanitation Districts where requested. Satisfactory evidence will consist of a minimum of written notification signed by a responsible company official, and in some cases may involve the submission of additional drawings and data.

1. The permittee is advised that the chromium content in the cooling tower bleed-off must not cause the concentration of chromium in the total discharge to exceed the allowable limit. Numerical limits have been established by the Sanitation Districts for the maximum concentrations of heavy metals, and other toxic materials, permissible in an industrial discharge to the public sewers. The limits are those shown in the enclosed table of "INDUSTRIAL WASTEWATER EFFLUENT LIMITATIONS." The subject company is advised that any discharge in excess of these limits requires corrective action by the discharger. Penalties applicable to violations of these limits will be strictly enforced by the Sanitation Districts.---------- /X/

2. Industrial Wastewater Discharge permit 5815 is issued only for the discharge of cooling tower bleed-off to the public sewer. Before any other industrial waste is discharged to the sewer system subject company is required to file a revised permit application.---------- /X/

3. The applicant's Surcharge statement for fiscal years 1974-75, 1975-76, and 1976-77 were delinquent September 15, 1975, September 15, 1976 and September 15, 1977 respectively, and should be filed as soon as possible. Necessary forms and instructions for filing surcharge statements are enclosed in the applicant's copy.---------- /X/

4. Any proposed revisions which result in a significant change in wastewater quantity or quality (approximately 25% or more or 25,000 gallons per day) from the values reported in the permit application will required a new permit application to be submitted for the Districts' approval.---------- /X/

Account No.: 1800591

Mr. Steve Tsumura
Environmental Safety Coordinator
City of El Segundo
350 Main St.
El Segundo, CA 90245

Dear Mr. Tsumura:

Industrial Wastewater Discharge Permit No. 5815

Computer Science Corp.
650 N. Sepulveda Blvd.
El Segundo, CA 90245

Effective immediately, Industrial Wastewater Discharge Permit No. 5815 is void for the following reason:

Exempt. This company is now *permit exempt.*

Exemption from obtaining a permit does not relieve the company of all responsibility. The company must comply with all other Districts' *Wastewater Ordinance* regulations such as keeping rainwater out of the sewer, preventing large amounts of solids or oil and grease from entering the sewer, making certain that the dissolved sulfide concentration is below 0.1 mg/l and that the pH is above 6.0 at all times. In addition, the company must comply with all of your regulations which may involve obtaining a permit through your agency. Changes in the Sanitation Districts' policies or in the company's business operations may require that the company obtain an industrial wastewater discharge permit in the future.

Very truly yours,

James F. Stahl

Sanitation Districts' Industrial Waste Discharge Permit Number [1/] 5813

Industrial Waste Contact Person: T. Sandoval

Title: Corporate Property Management Western Region Mgr.

Person in Charge of Local Operations: R. Kelly

Title: Corporate Property Management Manager

Owner of Company: Corporation

II. CATEGORY DETERMINATION

A. Unit Operations

Please check any of the following unit operations which are performed at your facility:

1. [ ] Electroplating
2. [ ] Electroless Plating
3. [ ] Anodizing

Note: 1/ One Baseline Monitoring Report (BMR) must be completed for every industrial waste discharge point to the sewer from your facility. To obtain additional copies of this BMR form you may copy it or call Eddie Esfandi at (213) 699-7411, extension 278.

4. [ ] Coating (phosphatizing, chromating and coloring)

5. [ ] Chemical etching and milling

6. [ ] Printed circuit board manufacturing

7. [X] None of the above

B. Companies Exempt from EPA Electroplating and Metal Finishing Regulations

If you checked item number 7 in II A above, your facility is not covered by the EPA regulations for either the electroplating or metal finishing category. Your claim to such an exemption will be verified through on-site Sanitation Districts' inspections of your facility.

If you believe that your facility is not covered by the above regulations, please indicate which EPA industrial regulatory cateogry should be applied to your facility, if any:

A/C Cooling Tower discharge

Please state the Federal Standard Industrial Classification Number(s) (SIC) used for your facility: 7372 _____ _____

As your checking of item number 7 in II A above denotes you are exempt, you do not need to fully complete this Baseline Monitoring Report (BMR). Please go on to Section VIII of this form; check the exempt box and sign the accompanying statement. Please then proceed to Section X of this form, complete the certification statement and return this form to the Sanitation Districts.

C. Companies Not Exempt

If you did not check item number 7 in II A above, please continue. Please check the appropriate item(s) below:

Type of facility in the electroplating and metal finishing industry. This facility is a(n):

1. [ ] Independent Printed Circuit Board Manufacturer [Manufacturers printed circuit boards primarily for sale to other companies]

2. [ ] Job Shop [Owns less than 50% (area basis) of the materials undergoing metal finishing]

3. [ ] Captive Shop [Owns over 50% (area basis) of the materials undergoing metal finishing]

4. [ ] Integrated Facility [Combines regulated electroplating and metal finishing waste streams with significant amounts (over 10%) of process waste streams not covered by the electroplating or metal finishing regulations]

5. ☐ Nonintegrated Facility (Significant wastewater discharges only from operations covered by the electroplating or metal finishing regulations)

D. Companies Subject Only to the Electroplating Regulations

If you checked only items 1 and/or 2 in II C above (Independent Printed Circuit Board Manufacturer or Job Shop), your facility is not subject to the EPA's Metal Finishing Category regulations (40 CFR 433). However, your facility is subject to the EPA categorical regulations for the Electroplating Category (40 CFR 413). Please indicate whether or not you have previously submitted a BMR to the Sanitation Districts as required by the EPA Electroplating Category Regulations.

Yes	No	If Yes, please give date of submittal
☐	☐	_____

If your facility is covered by the Electroplating Category regulations and your company has not as yet submitted a BMR, you must fully complete this BMR and return it to the Sanitation Districts as soon as possible.

III. TOTAL TOXIC ORGANIC INFORMATION

If you checked item(s) 1 and/or 2 in II C above (Printed Circuit Board Manufacturer and/or Job Shop), your facility is subject to the revised Electroplating regulations for control of Total Toxic Organics (TTO). If you checked item(s) 3, 4 or 5 in II C above (Captive Shop, Intergrated Facility or Nonintegrated Facility), your facility is subject to the Metal Finishing Regulations for control of TTO. Please see Appendix A for a list of toxic organic chemical compounds included in TTO. Please check the appropriate box(es) below:

☐ No toxic organic compounds as listed in Appendix A are used or stored at this facility.

☐ A solvent management plan, as required by the EPA regulations, will be submitted for Districts' approval.

☐ Monitoring for TTO will be performed and information on TTO compounds in the company wastewater will be submitted to the Sanitation Districts.

Please list all organic chemical compounds regularly used or stored at your facility: _____

_____

_____

_____

If your company is subject to only the Electroplating (and not the Metal Finishing) regulations and has previously submitted a BMR to the Sanitation Districts with the information hereafter requested in this form, and no significant changes in this information are necessary, the following portion of this BMR need not be completed. Please go to Section VIII of this BMR, check the appropriate box and sign the accompanying statement. Then go to Section X, complete the certification statement and return this form to the Sanitation Districts.

IV. ENVIRONMENTAL CONTROL PERMITS

Please complete the following portions of this report if you checked item(s) 3, 4 or 5 in II C above (facilities covered by the Metal Finishing Category regulations), or if your company has not as yet filed your required BMR under the Electroplating Category regulations.

Please indicate other environmental control permits held by or for your facility (DO NOT include permits regulating air quality control)

Cooling water or other wastewater dilution flows:			
Total Industrial Wastewater Flows: (total of regulated and nonregulated wastewater flows)			

NOTES: 1/ A BMR must be completed for every industrial waste discharge point to the sewer.

2/ Wastewater flows from operations covered by EPA industrial categorical regulations.

3/ Please indicate by letter in this column whether wastewater flow value is: Estimated (E), Measured (M), Intermittent (I) or Continuous (C).

4/ Please identify the EPA regulatory category under which such wastewater is controlled.

5/ Wastewater flows from operations not covered by EPA industrial categorical regulations.

Annual water intake: in millions of gallons _____ per year.

Source of water: Purchase from water purveyor /___/

Company well /___/

VII. CONCENTRATION OF POLLUTANTS IN WASTEWATER

A. Sampling and Analysis Information

The daily maximum and average concentrations must be furnished for all regulated pollutants in all wastewater streams described in Section VI above. The wastewater must be sampled and analyzed and other information furnished as described in Appendix B. Copies of the wastewater analysis results must be attached to this BMR when it is submitted to the Sanitation Districts.

The method of wastewater sample collection used was:

/___/ Flow-proportioned composite sample

/___/ Time-proportioned composite sample

/___/ Grab sample--for which pollutants? _____ _____ _____

B. Other Wastewater Sampling and Analysis Information

Sampling dates and times: _____

_____

Wastewater sampling location(s): _____

_____

Name and address of company obtaining wastewater samples:

_____

Name and address of laboratory performing the analyses:

_____

VIII. STATEMENT OF COMPLIANCE

This statement is to be made by a qualified environmental professional or (for the exempt category) by a responsible company official.

I hereby certify that the EPA categorical pretreatment standards which apply to this company are being met on a consistent basis.

Yes /___/ No /___/ Exempt /___/

Additional pretreatment or operational and maintenance measures which are recommended to bring the company into compliance with the EPA categorical regulations are as follows:

(1)_____

(2)_____

(3)_____

(4)_____

(5)_____

Date: _____ Print Name: _____

Sign Name: _____

Qualification as an Environmental Professional: _____

_____

Company Name: _____

Company Address: _____

IX. COMPLIANCE SCHEDULE

If your company is presently in compliance with the EPA categorical pretreatment standards, or your company is exempt, disregard this item and continue on to itme number X.

If presently not in compliance with the EPA categorical pretreatment standards, please complete the following compliance schedule:

Increment of Progress	Commencement Date	Completion Date
A. Engineering investigation	_____	_____
Consultant selection, if needed	_____	_____
Review of present condition	_____	_____
Treatment process selection	_____	_____
Conceptual design	_____	_____
Final design	_____	_____
B. Permitting process	_____	_____
City/County Engineer	_____	_____

Increment of Progress	Commencement Date	Completion Date
C. Construction	_____	_____
Equipment selection	_____	_____
Installation	_____	_____
D. Start up and trouble shooting	_____	_____
E. Date of final completion and compliance	_____	_____

No progress increment shall exceed nine months and no completion date shall be later than the compliance date for the EPA pretreatment standards. Subdivide any increment if it exceeds nine months. The Districts may be able to review your conceptual design before the preparation of detail plans if the pretreatment is reasonably complex. However, the engineering investigations leading to the conceptual design need to be as complete as possible, and the Districts cannot provide design assistance. The inability of the Districts to review the designs in a timely manner does not excuse noncompliance with the EPA regulations.

X. CERTIFICATION

I certify, under the penalty of perjury, that I have personally examined, and am familiar with, all of the information in this Baseline Monitoring Report, including all attachments. Based upon my inquiry of those persons immediately responsible for obtaining the information contained in this Report, I believe that the information is true, accurate and complete.

Health Services, Sacramento

INTRODUCTION

Under Technical Directive Document number F9-8709-019, Ecology and Environment, Inc.'s Field Investigation Team (FIT) has been tasked to reassess all Preliminary Assessments (PAs) in the Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) with "active" or "pending" status according to guidelines established to implement the Superfund Amendments and Reauthorization Act (SARA). The strategy for determination of further action under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) is based solely on each site's potential to achieve a score high enough on the Hazard Ranking System (HRS) for inclusion on the National Priorities List (NPL). This strategy is intended to identify those sites posing the highest relative risk to human health or the environment. All other sites needing remedial or enforcement follow-up will be referred to the State or an appropriate Federal agency.

This site was evaluated primarily using the original HRS model. Additionally, this site was also evaluated for its potential to score using the draft revised HRS model. The following is a summary of FIT's findings with regard to this site.

recycled paper

SUMMARY

Devlin Pharmaceuticals (Devlin) was located at 700 N. Sepulveda Blvd., El Segundo, California (Los Angeles County) from 1974 to 1981. The site is owned by Mr. Bruce Rabin and is currently occupied by Hughes Aircraft Company (HAC). HAC has no manufacturing capabilities and uses the site for storage of furniture.

Operation began at the site in 1958. Mr. Rabin operated a pharmaceutical and lighter fluid manufacturing facility on the property. The property was leased to Bergan Brunswick in 1966. Bergan Brunswick manufactured pharmaceuticals. In 1974 the property was leased to Devlin Pharmaceuticals Inc. Devlin manufactured pharmaceuticals and vitamins. Devlin vacated the site in 1981, and in 1982 the present lease holder, HAC, rented the property.

When the operation was started by Rabin in 1958, eight underground storage tanks were installed. The tanks contained gasoline, mineral oils, alcohols and solvents for lighter fluid production. The tanks were made of concrete and from available CERCLIS file information, there is no evidence to indicate that the tanks leaked. The tanks and the lines to the tanks were removed in 1982 by Rabin (prior to the HAC lease).

Bergen Brunswick had a clarifier installed but did not use the underground tanks. The exact nature of the waste is not known but is assumed to be non-hazardous based on the PA done by John Casey of the California Department of Health Services (DOHS).

Devlin also operated the clarifier and did not use the underground tanks. All waste generated were non-hazardous and sewerable.

There is no surface water use within three miles of the site.

In 1985 HAC submitted clarifier sludge samples to the IT Corporation for analysis. Based on this analysis, there no evidence to indicate the potential for air contamination.

The wastes on-site have a maximum toxicity value due to the presence of metals, including zinc, lead and chromium. From available CERCLIS file information there is no evidence indicating releases from the tanks or potential contamination. The waste quantity is low, and the containers showed no evidence of destabilization. Although the underlying strata is highly permeable, there is no evidence indicating contamination of the Silverado aquifer, which serves a population of over 10,000persons from well within 3 miles of the site. The aquifer lies at a depth of 200 to 250 feet .

A PA was done in November of 1985 by the DOHS recommending active status, low priority. The recommendation was based on the unregulated removal of the tanks by Rabin (threat of potential contamination of soil during removal).

FIT does not concur with the previous conclusion, and recommends no further action. A preliminary HRS screening estimate does not support the site's eligibility to be considered for inclusion on the National Priorities List (NPL) due to: (1) low waste quantity disposed on site; (2) good containment of material; (3) no surface water targets; (4) no indication of airborne contamination; and (5) depth of the aquifer.

RECOMMENDATION

1. EPA

FIT, under CERCLA, recommends no further action for the Devlin Pharmaceutical Inc. site. The recommendation is based on the following:

- o no evidence of on-site contamination;
- o low potential for air release;
- o low waste quantity;
- o no surface water targets; and
- o there is a low potential for observed release to groundwater due to the stability of the containment vessels.

2. State or other Agency

Copies of this reassessment will be sent to DOHS for its consideration.

To Whom It May Concern,

Ramboll Environ US Corporation (Ramboll Environ) is pleased to submit this report to Aerospace Center LLC, a California limited liability company; Rabin Family LLC, a California limited liability company; Ronnie Dalesandro and Susan Hymers, not individually but as Trustees of The Rabin Trust; John D. Winters and Sherry Winters, not individually but as Trustees of the Elaine Winters Survivors Trust; and, John D. Winters and Sherry Winters, not individually but as Executors of the Estate of Elaine Winters to present the findings of a Phase II subsurface investigation conducted recently at the property located at 700 N. Sepulveda Boulevard, El Segundo, California (the "site:" see Figure 1). The Phase II subsurface investigation was performed in accordance with the proposal provided to Liner LLP on February 4, 2016.

BACKGROUND

Based solely on information provided in a Phase I environmental site assessment (ESA) performed by Partner Engineering and Science, Inc. (Partner) in September 2015 (Phase I Environmental Site Assessment Report, Boeing Building II, 700 N. Sepulveda Boulevard, El Segundo, California, dated September 18, 2015 [the "2015 Phase I Report"]), the approximately 1.99 acre site was undeveloped until approximately 1927. Between approximately 1927 and 1938, the site was used as agricultural land. In approximately 1957, the current building was constructed on the site. According to the 2015 Phase I Report, tenants at the site have included Pharmaceutical Co. (1958), The Rabin Company/Pharmapak Drug Company (1960), Rabin Winters Corporation (1962-1967), Rabin Winters Division of Brunswig Drug/Bergan Brunswick (1966-1974), BBC Laboratories (1971), Norton Products/Tannehill Pharmaceuticals (1971), Devlin Pharmaceuticals (1974-1981), Hughes Aircraft Company (1982-1999), and The Boeing Company (2008 - present).

Between 1958 and 1985, eight 1,000 gallon USTs of concrete construction were present on the site and used for the storage of gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. In 1985, the tanks were filled in place but were subsequently removed from the site in 1990, reportedly without regulatory closure. In addition, between 1966 and 1985 a concrete clarifier was in use at the site. In 1985, the clarifier was abandoned under the regulatory oversight of the Los Angeles County Department of Public Works (DPW). The site received no further action (NFA) status for the clarifier in 1994. However, no

documentation regarding the closure of the clarifier, including whether any sampling was performed as part of closure activities, was provided for Partner's review. As a result, Partner characterized this issue as a recognized environmental condition (REC) in the 2015 Phase I Report.

In addition, no subsurface characterization activities are known to have been conducted in the vicinity of the former USTs or the concrete clarifier. As a result, and with the specific objective of evaluating the potential for the REC identified by Partner in its 2015 Phase I Report to have impacted the subsurface of the site, Ramboll Environ proposed to complete the scope of work presented in our proposal dated May 12, 2016 and as described below; based on the anticipated depth to groundwater in the site vicinity (on the order of approximately 100 feet), no groundwater sampling was performed as part of the Phase II subsurface investigation.

SCOPE OF WORK

The scope of work included (Task 1) pre-field activities and mobilization; (Task 2) soil and soil vapor sampling; (Task 3) laboratory testing; and (Task 4) data evaluation and reporting. Drilling and sampling activities were supervised by Ramboll Environ field personnel working under the supervision of a California Registered Professional Geologist.

PRE-FIELD ACTIVITIES AND MOBILIZATION

Prior to implementation of the subsurface investigation, a geophysical survey was performed at the site on March 5, 2016, by Spectrum Geophysics of Chatsworth, California in an effort to locate the former UST area and the clarifier. The geophysical survey was performed using a variety of equipment, including EM-61 high sensitivity metal detection, shallow focus terrain conductivity, ground penetrating radar, and electromagnetic utility-locating methods. According to the 2015 Phase I ESA Report, the exact locations of the former UST area and clarifier are not known; the tanks were described as being located "north of the building near receiving." The location of the clarifier is not known but may be located in proximity to the former UST area (information contained in an appendix to the 2015 Phase I Report contains a hand drawn map with a feature labelled as a "large stationary cylindrical tank;" this feature is located to the immediate west of the former UST area and could possibly be the clarifier). As a result, the focus of the geophysical survey was an approximately 11,500 square foot area to the north of the building marked "USTs" on Figure 2 in the 2015 Phase I Report (and shown on Figure 1 in this report). The results of the geophysical survey indicated an anomaly within the survey area that was interpreted by Spectrum Geophysics to be the "most likely" location of the former USTs; the anomaly was observed in the general area marked "USTs" on Figure 2 in the 2015 Phase I Report. Furthermore, this anomaly approximately coincided with a patched area observed on the asphalt surface. No feature indicative of the former concrete clarifier was identified in the surveyed area. The geophysical survey report provided by Spectrum Geophysics is included in Attachment A.

In addition to the area that was cleared for the presence of underground pipes/utilities by Spectrum Geophysics' geophysical survey, Ramboll Environ contacted Underground Services Alert (DigAlert) to mark the locations of all major utilities at the site boundaries.

Prior to initiating drilling activities, Ramboll Environ prepared a site-specific Health and Safety Plan (HASP). The HASP was designed to minimize exposure of Ramboll Environ's field personnel to potentially hazardous materials. All field personnel were required to implement the procedures presented in the HASP while performing field work. As part of this task, Ramboll Environ also contracted with the appropriate subcontractors for the planned fieldwork.

SOIL VAPOR SURVEY AND SOIL SAMPLING

On March 19, 2016, under Ramboll Environ's oversight, BC2 Environmental of Orange, California, advanced 6 soil borings (SB-1 through SB-6) in the area identified as an anomaly during the geophysical survey (see Figure 1). Because the location of the concrete clarifier could not be identified, the soil borings planned for that area (SB-7 and SB-8) were not drilled. At each soil boring location, the asphalt surface was penetrated using a direct push drilling rig, then the soil boring was hand augered to approximately 5 feet below ground surface (bgs) to confirm that no subsurface utilities or lines were present at that location. Once the top 5 feet was hand augered, each soil boring was then advanced to its total depth of approximately 15 feet bgs using a direct push drilling rig. The soil borings were logged in accordance with

the Unified Soil Classification System (USCS) and monitored using an organic vapor meter photoionization device (PID) equipped with a 10.6 electron volt lamp calibrated against an isobutylene standard.

In each soil boring, soil samples were collected at three depth intervals ("shallow," "middle," and "deep"). Soil samples were collected in an attempt to sample native soil and sample depths were adjusted based on soil composition changes from backfill material to native soil in the former USTs area. The depth interval for the shallow and middle sample in each soil boring varied from 7 to 11 feet and 10 to 13 feet bgs, respectively. The depth interval for the deep soil sample at each location was 15 feet bgs.

Soil samples for volatile organic compound (VOC) analyses were collected using Encore soil samplers and sample containers, while soil samples collected for all other analysis were collected in acetate sleeves with Teflon-lined plastic end caps or glass sampling jars with plastic lids. Soil samples were labelled, placed in plastic Ziploc bags for additional containment purposes, and then placed in an insulated cooler with ice for shipment to the laboratory under chain-of-custody protocols. Samples were delivered to TestAmerica Laboratories, Inc., of Irvine, California, for analytical testing. The two shallowest samples from each soil boring were laboratory analyzed, while the deeper samples were placed on hold at the laboratory, pending analytical results of the shallower samples. Soil samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline-, diesel fuel-, and oil-range hydrocarbons (TPH-g, TPH-d, and TPH-o, respectively) in accordance with United States Environmental Protection Agency (USEPA) Method 8015 Modified; VOCs, in accordance with USEPA Method 8260B; and California Manual 17 Metals by (USEPA) Methods 6010B/7471A.

Soil borings were converted to temporary soil vapor probes at depths of approximately 10.5 ft bgs in SB-1 through SB-3, SB-5, and SB-6, and 12 ft bgs in SB-4 (the vapor probe was installed at 12 ft bgs in SB-4 to place it in native soil). The soil vapor probes were installed and sampled in general accordance with the guidelines established by the California Environmental Protection Agency (Cal/EPA), the Department of Toxic Substances Control, the Los Angeles Regional Water Quality Control Board, and the San Francisco Bay Regional Water Quality Control Board in "*Advisory Active Soil Gas Investigations*", dated July 2015 (the advisory). The soil vapor probes were constructed with a temporary airstone filter and 1/4 inch tubing equipped with a valve at its termination. The probe tip was set with a minimum of 6 inches of sand on each side, or one foot total depth, and a minimum of 6 inches of dry bentonite was placed below and above this sand pack.

Following an equilibration period of at least 120 minutes (in accordance with the advisory), each soil vapor probe was sampled. Soil vapor samples were collected in vapor-tight glass syringes and analyzed in an onsite mobile laboratory operated by H&P Mobile Geochemistry of Carlsbad, California. In addition to the 6 primary soil vapor samples, a duplicate sample was collected from probe SV-1-10.5 and a material blank sample was collected from a soil vapor probe and associated tubing assembled and installed by BC2 Environmental. Each soil vapor sample was analyzed for the full suite of VOCs in accordance with USEPA Method 8260B.

In accordance with the advisory, each soil vapor probe was purged three purge volumes before sampling. Additionally before sampling, a shut-in test and a leak test (utilizing the compound 1,1-difluoroethane) were performed in accordance with advisory guidelines to confirm that no leaks existed in the above ground sampling equipment and that ambient air had not been allowed into the soil vapor sample. The analysis of soil vapor samples and the material blank did not indicate the presence of 1,1-difluroethane at concentrations above laboratory reporting limits, indicating that these samples are considered to be representative of the soil vapor at each respective location and depth.

Prior to collection of samples and between successive sampling attempts, sampling equipment was decontaminated to minimize the potential for cross-contamination. After the collection of soil vapor samples, the tubing was removed from each sampling location, the boreholes sealed with hydrated bentonite, and patched to match the surrounding asphalt surface.

Soil cuttings and decontamination water generated during subsurface investigation activities were placed in a 55-gallon Department of Transportation (DOT)-rated drum and stored on site pending offsite disposal.

Results of Sampling

The lithology at the site consisted of dark reddish brown sand extending from the surface to approximately 8 to 12 ft bgs, and transitioned to red sand to the total depth drilled (approximately 15 ft bgs). The transition from dark reddish brown to red sand was considered the contact between backfill material and native soil. In SB-4 and SB-5, pieces of concrete or asphalt-like materials were encountered within the upper approximately 12 feet while drilling, possibly indicating that those materials made up some of the backfill material used when the USTs were removed and the area backfilled.

Analytical results for soil vapor samples are summarized in Table 1 and analytical results for soil samples are summarized in Tables 2a and 2b; laboratory analytical reports are included in Attachment B (soil vapor samples) and Attachment C (soil samples).

Soil Vapor

The following analytes were detected at concentrations above the respective laboratory reporting limits: benzene; carbon tetrachloride; chloroform; 1,1-dichloroethene, dichlorodi-fluoromethane (F12); ethylbenzene; m,p-xylene; o-xylene; naphthalene, tetrachloroethene, toluene; trichloroethene; 1,1,2-trichloro-trifluoroethane (F113), and trichlorofluoromethane (F11).

Soil

The following analytes were detected at concentrations above the laboratory reporting limits: TPH-d and TPH-o, arsenic, barium, beryllium, chromium, cobalt, copper, lead, mercury, nickel, vanadium, and zinc.

SOIL VAPOR AND SOIL SCREENING LEVELS

In evaluating the soil vapor data, Ramboll Environ considered risk-based soil vapor screening levels for residential land use, based on the USEPA Regional Screening Levels (RSLs)(USEPA 2015) and/or Department of Toxic Substances Control (DTSC)-modified screening levels (SLs). The development of the screening levels is described below.

The DTSC-modified RSLs or USEPA RSLs are concentrations of chemicals in residential air that the Cal/EPA and/or USEPA consider to be below thresholds of concern for risks to human health over a lifetime. The thresholds of concern used to develop the RSLs are an excess lifetime cancer risk of one-in-a-million (10^{-6}) and a hazard quotient (HQ) of 1.0 for noncancer health effects. The NCP (40 Code of Federal Regulations [CFR] § 300) is commonly cited as the basis for target risk and hazard levels. According to the NCP, lifetime incremental cancer risks posed by a site should not exceed one in a million (1×10^{-6}) to one hundred in a million (1×10^{-4}), and noncarcinogenic chemicals should not be present at levels expected to cause adverse health effects (i.e., HI greater than one). As a conservative measure, the RSLs are calculated to correspond to an estimated cancer risk of 1×10^{-6} (the low or conservative end of the target risk range) or a noncancer HQ of 1.0. The USEPA RSLs were used unless the DTSC-modified RSLs were more stringent. Under this approach, the DTSC-modified RSLs were used for benzene and PCE.

Soil screening levels were obtained from the USEPA RSL Summary Table (USEPA 2015), and the soil vapor screening levels were derived from the DTSC, Human and Ecological Risk Office Note 3 (Cal/EPA 2016), and/or the Regional Screening Level Summary Table (USEPA 2015). Both the soil vapor and soil screening levels are provided in Tables 1 (soil vapor) and 2a and 2b (soil), respectively.

DATA EVALUATION

Soil vapor results were compared to screening levels derived from Cal/EPA and/or USEPA in a future residential building land use scenario, as described above. None of the VOC compounds that were detected above laboratory reporting limits in the soil vapor samples exceeded their respective screening levels.

Soil sample results were compared to USEPA RSLs for soils in a residential land use scenario. As indicated above, the only compound detected in any of the soil samples that exceeded its respective USEPA RSL was arsenic. Arsenic was detected in four soil samples (SB-2-10, SB-3-10, SB-4-11, and SB-5-10) at concentrations ranging from 3.6 to 4.3 milligrams per kilogram (mg/kg). These concentrations exceed both the residential and commercial/industrial land use USEPA RSLs for arsenic of 0.68 and 3.0 mg/kg, respectively. Arsenic is a naturally occurring metal in soil and tends to be present in native California soils

at concentrations that exceed applicable regulatory thresholds. According to one source,[1] the average concentration of arsenic detected in California soils is 3.5 mg/kg (with a minimum detection of 0.6 mg/kg and a maximum detection of 11.0 mg/kg in the samples collected for this study); in a second source,[2] naturally-occurring arsenic was detected in California soils at concentrations ranging from 0.3 mg/kg to 69 mg/kg. A third study specific to Southern California soils,[3] and based on statistical analysis of a large data set from school sites in Los Angeles County, gave an upper-bound background arsenic concentration of 12 mg/kg. In addition, detected concentrations of arsenic are relatively consistent throughout the samples collected at the site. Therefore, it is Ramboll Environ's opinion that the arsenic detected in the soil at the site is naturally occurring.

CONCLUSIONS AND RECOMMENDATIONS

Based on the results of the sampling described above, it is Ramboll Environ's professional opinion that (a) the investigation that was conducted by Ramboll Environ was a reasonable and prudent investigation designed to assess the potential impacts from historic USTs and a clarifier at the site and should be deemed to be 'all appropriate inquiry' with respect to such potential impact; (b) the low concentrations of constituents detected in the soil vapor and soil sampling results in the area of the site investigated (i) were well below the residential screening levels, the most restrictive applicable screening levels; (ii) are consistent with a no further action status for the site; (iii) are not indicative of any release or condition which has adversely impacted the environmental integrity of the site, which would require additional investigation, monitoring, or remediation or reporting to any governmental agency; (c) are not indicative of conditions which would require special handling in connection with the redevelopment of the site; and (d) no further investigation, monitoring, or remediation is recommended or warranted.

Please call any of the undersigned if you should have questions.

Very truly yours,

SPECTRUM GEOPHYSICS, 20434 CORISCO STREET, CHATSWORTH, CALIFORNIA 91311

1.0 INTRODUCTION

On March 5, 2016, Spectrum Geophysics conducted a geophysical investigation at a commercial property located at 700 North Sepulveda Boulevard in El Segundo, California. The purpose of the investigation was to delineate the surface trace of detectable steel underground storage tanks (USTs), backfilled excavations or concrete clarifiers within the 190-foot by 95-foot survey area. The area of investigation, as designated by Patrick Holland-Stergar of Ramboll, was primarily asphalt covered though some areas of concrete were visible adjacent to the building.

The expected surficial geology in the upper 8 feet (maximum depth of geophysical investigation) of the survey area was Quaternary Eolian and Dune deposits consisting of wind-blown sands. There may also be artificial fill from previous construction. The water table is expected to be below the maximum depth of investigation, but moisture in the upper five feet of soil can contribute to signal attenuation in ground penetrating radar data. Based on information provided by the Client, the site was occupied by a Boeing facility in the past and had up to 8 USTs present.

Site interferences included a building, several stairwells, a loading dock, several metallic vault lids, bollards, trash bins, and a drain invert.

2.0 EQUIPMENT

The equipment used during this investigation consisted of a Geonics EM-61 high-sensitivity metal detector, a Sensors & Software “Noggin Smart Cart” ground penetrating radar, a shallow-focus metal detector (M-scope), and electromagnetic (EM) utility-locating equipment. An Allegro digital field computer was used to enter acquisition paramenters and store data during the EM-61 survey.

3.0 METHODS AND FIELD PROCEDURES

Prior to data collection, a 5-foot by 5-foot grid was created parallel and perpendicular to the building located at the northern boundary of the survey area. A survey chain with 5-foot markers was used to establish the survey lines and stations, and survey paint was used to mark the locations of each survey station on the ground. The survey was completed with no interference from vehicle traffic. It should be noted that no EM-61 or GPR data were collected outside of the blue dashed boundary labeled "Area of Subsurface Investigation" in Figure 1.

EM-61 data acquisition (archive photo)

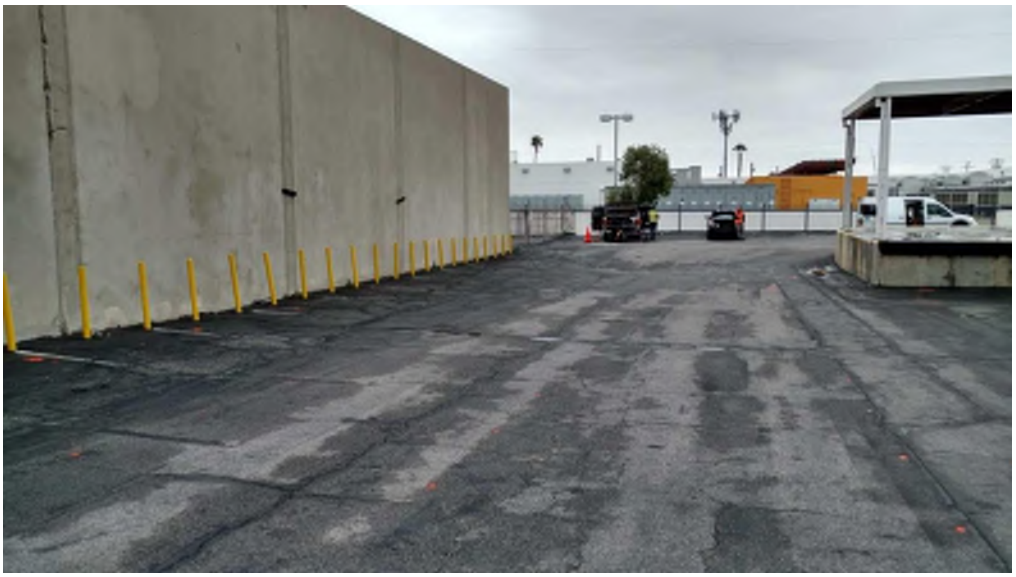
3.1 EM-61 High Sensitivity Metal Detector

The EM-61 high-sensitivity metal detector was used in an effort to delineate areas where metallic objects (such as underground storage tanks and metal piping) may be buried. The EM-61 transmitter generates short pulses of a primary magnetic field that induces electromagnetic currents in nearby metallic objects. Between pulses, the two receiver coils measure the decay of these electromagnetic currents in millivolts (mV). The measured values are proportional to the metal content (ferrous and non-ferrous) of the nearby objects

Prior to data acquisition the EM-61 battery level was checked and found to be within an acceptible range for data collection. After the EM-61 had a few minutes to warm up, the unit was nulled in a location with more than four meters of separation between the coils and any known metallic objects. A cable-shake test was performed to assure the cables were in good working condition and the connectors were fastened properly. Finally a static test was run in which a series of EM-61 readings were taken with no metal followed by a series of readings with a ½-inch bolt on the ground in the center of the EM-61 coils. The EM-61 was found to be working as expected.

During this investigation EM-61 readings were collected at 2.5-foot intervals along parallel west-east lines spaced 5 feet apart within the area of investigation. These data were processed in the field and used to generate contour maps to assist in identifying anomalous areas that may be caused by buried utilities or features of interest.

Top and bottom coil data can be useful for identifying near-surface metallic objects; although, the top coil generally has a greater response than the bottom coil to deeply buried objects. The differential data (top coil data minus the bottom coil data) was used during this survey to distinguish deeper targets such as metallic USTs from shallow ones such as a vault lid or scrap metal. Utilization of the differential data allows for the suppression of near surface targets that might mask the response from deeper targets of interest.



3.2 Electromagnetic (EM) Utility Location

Passive and active EM utility-locating methods were used in an effort to identify possible sources of EM-61 anomalies and to identify buried objects having no surface expression.

Electromagnetic (EM) utility location (archive photo)

Passive locating is possible when electrically conductive conduits are energized by ambient radio frequencies (RF) that are often produced by 50/60 cycle electrical, radio, audio, television, and communication transmissions. A receiver tuned to these frequencies can be used to locate the re-radiated signal emitted by the conductor (i.e., conduit).

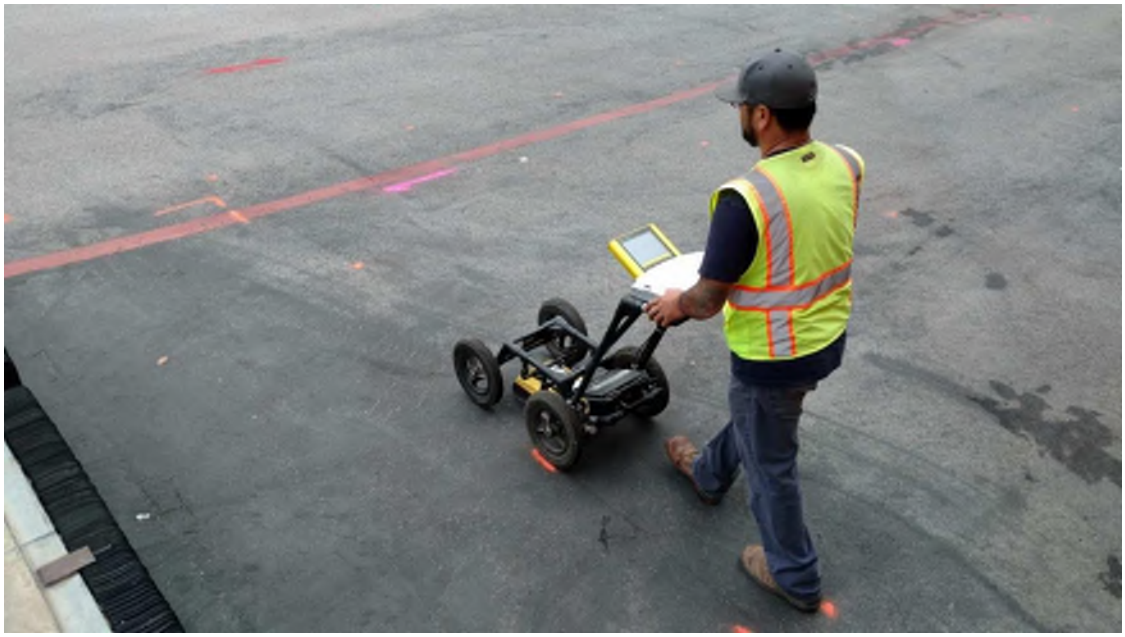
Active locating is initiated by conducting an EM signal at a known frequency (8 and 33 kHz for this site) on a conduit exposed at the surface. A receiver, tuned to these frequencies, is then used to locate the signal maxima (or surface trace) of the applied signal.

3.3 Ground Penetrating Radar

Ground penetrating radar (GPR) data were collected on east – west lines spaced 2.5 feet apart within the survey grid established by the geophysics crew. The purpose of the GPR survey was to locate anomalies from non-metallic sources like backfilled excavations or concrete clarifiers and better characterize EM-61 anomalies. During GPR data acquisition, an antenna containing both a transmitter and a receiver is pushed along the ground surface. The transmitter radiates short pulses of high-frequency (center frequency of 500-MHz)

electromagnetic energy into the ground. These electromagnetic waves propagate into the subsurface at a velocity that is dependent on the electrical properties of the material through which the waves travel. When the GPR waves encounter an interface of two materials having different electrical properties, a portion of the energy is reflected back to the surface and received at the antenna at a time (in nanoseconds) that is related to the depth of the reflecting interface, where later times generally represent greater depths of investigation. The contrast in velocity between the media either side of the interface can be quantified by a reflection coefficient at the media boundary, where a larger reflection coefficient (larger electrical contrast in materials) corresponds to a higher amplitude reflection.

The reflected signal is received at the antenna, transmitted to a control unit (the Smart Cart) and displayed on the computer screen as the data are being acquired. The data may be stored electronically, and subsequently processed with various software packages.



4.0 RESULTS

A map of the area of geophysical investigation is presented in Figure 1. A contour map of the EM-61 Differential Data is presented in Figure 2 and sample GPR profiles are displayed in Figure 3.

4.1 EM-61

The high-amplitude EM-61 anomalies on the north and south perimeter of the survey area are the result of surface metal like the building walls and bollards. There are two linear anomalies identified in the EM-61 data produced from metallic piping running east to west along 55N and a south to north trending railroad track centered from 162E to 1723E. These features were relocated with the utility locators or GPR and plotted on the site map. There are a few isolated EM-61 anomalies from surface metal like sewer clean-outs, a man-hole cover and electric vault cover.

4.2 GPR

Most of the shallow metallic objects such as underground piping and rail road tracks were relocated during the GPR survey. One GPR anomaly with no corresponding EM-61 anomaly was identified. Anomaly A is broad GPR anomaly located from 50E to 150E, between 77N and 88N. This GPR anomaly is characterized by relatively high-amplitude reflectors in the soil compared to the GPR signal in the surrounding soil. There is no corresponding EM-61 anomaly within the bounds of Anomaly A which indicates that the source of the high-amplitude GPR reflectors is not associated with buried metal, but rather a slight change in the electrical conductivity of the soil. A possible source of this GPR anomaly is backfill material which slightly amplifies the GPR signal relative to the adjacent soils.

5.0 LIMITATIONS

Reliable EM-61 data cannot be collected within 8 feet of surface metallic objects such as reinforced concrete pads, vault lids and/or manholes, buildings and parked vehicles. As a result, Spectrum cannot guarantee that a UST is not present beneath these features.

The penetration depth of the GPR signal was approximately 3 feet in the area investigated. As a consequence, some subsurface utilities may not have been detected, and USTs present at depths greater than 3 feet in the areas adjacent to surface metal may not have been detected due to the shallow penetration of the GPR. Because of this limitation, Spectrum cannot guarantee that all non-metallic conduits, such as sewers and PVC water lines, have been identified within the area of investigation. A discussion of the limitations of each method follows.

5.1 EM-61

The EM-61 is capable of detecting a 55-gallon drum up to a depth of 3 meters under favorable conditions. We recommended a minimum 10-foot buffer between the survey area and any metallic or metal bearing surface cultural features such as buildings, fences, parked vehicles

or aboveground piping which could severely compromise the quality of the data. Reliable EM-61 data cannot be collected over areas covered with reinforced concrete.

5.2 GPR

The performance capability of GPR is dependent on the electrical conductivity of the soil at the site. If the soil conductivity is high, attenuation of the radar signal in the soil can severely restrict the maximum penetration depth of the radar signal. Under favorable conditions depth of penetration can be greater than 10 feet; however, average depths of GPR penetration in the West and Southwest tend to range between 2-5 feet.

5.3 General

It should be understood that the detection of subsurface objects and utilities is dependent upon acquiring reliable measured values of magnetic fields or electro-magnetic waves with geophysical instruments above ground. These data may be interpreted as representative of subsurface objects due to the measured signal strength. These waves or fields, however, may be attenuated and/or distorted by a number of factors including soil moisture, corrosion, and proximity to other surface and subsurface facilities.

ATTACHMENT B
SOIL VAPOR SAMPLE ANALYTICAL REPORT

Mobile Geochemistry Inc.

23 March 2016

Ms. Rebekah Wale
Ramboll Environ
18100 Von Karman Ave, Suite 600
Irvine, CA 92612

H&P Project: RAM031916-L6
Client Project: 04-16856Q /700 N. Sepulveda Blvd

Dear Ms. Rebekah Wale:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 19-Mar-16 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis Villarreal

%REC	Percent Recovery
RPD	Relative Percent Difference

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP and the ISO 17025 programs, certification number L11-175.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

Narrative

Job Narrative
440-142056-1

Comments
No additional comments.

Receipt
The samples were received on 3/19/2016 1:50 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.7º C.

Receipt Exceptions
Method(s) 8260B: All the EPA 5035A Terracore water-preserved vials for the following sample froze and cracked during storage: SB-2-10 (440-142056-5). The EPA prep 5030B test method had to be used for this sample.

GC/MS VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC VOA
Method(s) 8015B: Surrogate recovery for the following sample was outside control limits: (440-142363-A-3). Re-extraction and/or re-analysis was performed with concurring results. The original analysis has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method(s) 3546 / 8015B: The following sample had smaller initial amount used due to the nature of the sample matrix: SB-6-11 (440-142056-14). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 440-142062-1

Laboratory: TestAmerica Irvine

Narrative

Job Narrative
440-142062-1

Comments
No additional comments.

Receipt
The samples were received on 3/21/2016 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.6º C.

GC/MS VOA
Method(s) 8260B: The continuing calibration verification (CCV) associated with batch 440-319492 recovered above the upper control limit

Job ID: 440-142062-1 (Continued)

Laboratory: TestAmerica Irvine (Continued)

for Ethyl-t-butyl ether (ETBE). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following sample is impacted: SB-4-13 (440-142062-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and/or precision of Antimony and Silver for preparation batch 440-319531 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep
Method(s) 3546 / 8015B: The following samples had smaller initial amounts used due to the nature of the sample matrix: SB-4-11 (440-142062-1) and SB-4-13 (440-142062-2). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

Metals

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
F1	MS and/or MSD Recovery is outside acceptance limits.
F2	MS/MSD RPD exceeds control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Certification Summary

Mata, Patty

From: Patrick Holland-Stergar [PHollandstergar@ramboll.com]
Sent: Tuesday, March 22, 2016 4:25 PM
To: Mata, Patty
Subject: Samples taken off hold for 700 N. Sepulveda Blvd. Project, El Segundo

Hi Patty,

For the 700 N. Sepulveda, El Segundo, project, please take the second shallowest sample from each boring location off of hold and run for all analyses listed. Thus, please take SB-1-10; SB-2-10; SB-3-10; SB-4-13; SB-5-10; and SB-6-11 off of hold and run for all analyses listed.

Also, please do not charge us for the disposable plastic terracore samplers I received with the rest of the sampling supplies, I did not order these items and understand that they were included in my supplies deliver by mistake.

Thanks,

Patrick Holland-Stergar

APPENDIX H

QUALIFICATIONS

Education:

BS Physics, University of California, Irvine
BA Business Administration, University of California, Irvine

Training/Licenses/Registrations:

Radon Measurement Specialist, National Radon Safety Board # NRSB 12SS030
Asbestos Building Inspector (AHERA)

Summary of Professional Experience:

Mr. McNeil has performed due diligence services on all commercial property types including but not limited to, multi-family, multi-tenant, single-tenant, retail shopping centers, industrial facilities, gasoline servicing stations, nursing/assisted living facilities and mobile home parks. He has performed thousands of Phase I Environmental Site Assessments (ESAs), Property Condition Assessments (PCAs), and Physical Needs Assessments (PNAs) in accordance with Fannie Mae, Freddie Mac, and HUD guidelines on multi-family housing, and in accordance with client specific scopes of work for all other commercial property types.

Select project experience for Mr. McNeil includes:

- Freddie Mac scope combination ESA/PCA, 140-unit multi-family, San Bernardino County, California
- Freddie Mac Small Balance Loan report, 66 Unit multi-family, Kern County, California
- Combination ESA/PCA, 585,147 square foot office complex, Orange County, California
- ESA, industrial facility, steel fabrication and machine shop, Los Angeles County, California
- ESA, 171,330 square foot research and development laboratory, Orange County, California
- ESA, 420-unit multifamily property, San Bernardino County, California
- PCA, 125,333 square foot retail shopping center, Los Angeles County, California
- PCA, 78,388 square foot medical office building, Los Angeles County, California
- PCA, 7,320 square foot office building, Honolulu, Hawaii

Mr. McNeil has over 35 years' experience in hazardous materials handling, storage, and transportation; over 30 years' experience in construction, remodeling, and renovation of residential and non-residential use properties; and over 20 years' experience in direct report preparation of commercial due diligence reports.

Victor T. DeTroy – National Client Manager, Due Diligence Services

B.A. - Earth and Environmental Science, Columbia University, Cum Laude

Registered Environmental Property Assessor (REPA) #2061012266170822
OSHA 40-Hour Hazardous Waste Operations
Emergency Response (HAZWOPER) Training
EPA AHERA 24-hour Asbestos Building Inspector

Mr. DeTroy has worked the environmental service industry since 2007 and provides project management to ensure compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Transaction Screens, limited due diligence assessments, Phase II and Phase III subsurface investigations, and quarterly groundwater monitoring events. He has successfully completed assessments on a variety of residential, commercial, and complex industrial sites. Mr. DeTroy is accustomed to all aspects of Due Diligence Property Assessments and the needs and requirements of a variety of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae, HUD, and customized client formats.

Project experience for Mr. DeTroy includes:

- Phase I Environmental Site Assessments
- Telecommunication Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Environmental Transaction Analyses
- Limited Environmental Site Assessments
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup
- Due Diligence Portfolio Management
- The design and implementation of Phase II soil and groundwater investigations and Phase III subsurface characterizations for a variety of suspected contaminants for due diligence and liability purposes

Subsurface investigations have included extensive soil and groundwater testing, identification of petroleum hydrocarbons and volatile organic compounds contamination in near surface soils, and contaminant plume delineation in soil vapor, soil, and groundwater. Mr. DeTroy's management and technical experience has allowed AEI's projects to be performed in a cost effective and timely manner to the satisfaction of AEI's clients and regulatory agencies.
