CERS:

Name:	RALPHS GROCERY #645
Address:	500 N. SEPULVEDA BLVD.
City,State,Zip:	EL SEGUNDO, CA 90245
Site ID:	146329
CERS ID:	10159971
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	146329
Site Name:	Ralphs Grocery #645
Violation Date:	01-29-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste",

RALPHS GROCERY #645 (Continued) **S113466417**

	name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/29/2019. 5 gallon container of Hazardous Waste Off-spec medicine located in the Pharmacy was observed without a hazardous waste label. Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division:	El Segundo City Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	146329
Site Name:	Ralphs Grocery #645
Violation Date:	01-29-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 02/05/2019. The business failed to complete and electronically submit a site map with all required content including: hazardous materials/waste storage areas. Current site map depicts hazardous materials in the "Produce Prep" room but this room did not have any hazardous materials during inspection. Complete and electronically submit a site map with all required content. Facility shall update site map and remove hazardous materials symbol from "Produce Prep" room.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow

EL SEGUNDO CITY (Continued) **1006826713**

to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,?2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October?1,?2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 07/29/2019. Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. UST#4 (Motor Oil) was observed without any form of overfill prevention equipment. UST#4 is used to store motor oil and deliveries of motor oil consist 100 to 500 gallons of motor oil at one time. This is a repeat violation that was initially observed and noted during a routine inspection on 3/20/19. The facility shall install overfill prevention equipment on UST#4. The installation of the overfill prevention equipment will be made under a UST Construction Permit from the ESFD. Once installation is completed, testing of the overfill prevention equipment shall be witnessed by the ESFD.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110064159119

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FINDS:

Registry ID: 110008261139

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Assessment Report
Completed Date:	09/24/1996
Comments:	Preliminary Assessment completed under U.S. EPA grant. Site is no further assessment for U.S. EPA. However, DTSC requires a Preliminary Endangerment Assessment.

INTERNATIONAL RECTIFIER CORP (Continued) **U002287919**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/25/1995
Comments: The Department received a hazardous substace release report. The site had a waste leak from a plating line and acidic aqueous waste left metal contamination in the soil. Due to evidence of contamination, the Department recommends a PEA. The Department notified the RP that a PEA be conducted.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 364694
Site Name: Keysight Technologies, Inc.
Violation Date: 10-17-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 11/03/2017. The facility did not have a final copy of manifest 001083854VES used to transport waste oil to Veolia. Locate a copy of all manifests for [001083854VES] and submit copies to the CUPA.
Violation Division: El Segundo City Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 364694
Site Name: Keysight Technologies, Inc.
Violation Date: 10-17-2017
Citation: 22 CCR 12 66262.23(a)(4) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)(4)
Violation Description: Failure to send a legible copy of each hazardous waste manifest to the Department within 30 days of each shipment of hazardous waste.
Violation Notes: Returned to compliance on 11/03/2017. The facility was not aware of the requirement for the generator to send a copy to the DTSC. No copies of the manifest were being sent to the State. Send a copy of all hazardous waste manifests to the DTSC and submit a statement to the CUPA demonstrating compliance.
Violation Division: El Segundo City Fire Department
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Noted: Nitorgen, Helium, Argon, and waste oil. This facility has 30 days to fix the following corrective items. 1. Number of employees is not included on business owner/operator page. 2. Waste oil shall be added to disclosure. 3. This facility shall remove isopropanol and instapak molding foam from disclosure.

Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 11/27/2012
Comments: On November 27, 2012, DTSC conditionally approved the PEA Workplan provided specific comments be implemented and/or addressed during PEA fieldwork and in the PEA Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/31/2013
Comments: On January 31, 2013, DTSC provided comments on the Draft Environmental Impact Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 07/01/2013
Comments: DTSC approved the Community Profile, which describes the community and identifies potential community concerns regarding Site activities.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 04/10/2013
Comments: Via email on April 10, 2013, DTSC was informed that the Notice of Determination for the Environmental Impact Report (EIR) was filed with the County Clerk's office on March 22, 2013 and mailed to the State Clearinghouse. The FINAL EIR (SCH No. 2011061056), certified on March 21, 2013, is comprised of the following documents: 1) FINAL EIR, dated March 2013; 2) DRAFT EIR, dated January 2013; 3) ADDENDUM TO FINAL EIR (i.e., DTSC's comment letter, dated January 31, 2013, on the Draft EIR; and The Planning Center's response letter, dated March 11, 2013, to DTSC's comments).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/05/2013
Comments: On September 5, 2013, DTSC approved the Removal Action Workplan for implementation.

Completed Area Name: PROJECT WIDE

201 N. DOUGLAS PROPERTY (Continued) **S108200735**

Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 07/18/2013
Comments: On July 18, 2013 and July 19, 2013, the Community Notice was distributed via US mail and e-mail. The Community Notice provided information on the Site history, proposed methane mitigation system, and 30-day public comment period (July 22 through August 20).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 4.15 Request
Completed Date: 07/17/2013
Comments: On July 17, 2013, DTSC signed the SFPD 4.15 Form documenting the commitment of the District and DTSC to California Department of Education to complete the required response action prior to project occupancy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 07/22/2013
Comments: On July 22, 2013, the Public Notice Ad regarding the Draft RAW was published in the Daily Breeze.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 12/11/2014
Comments: On December 11, 2014, DTSC approved the Remedial Design Document, dated December 2014. RAW implementation is anticipated to commence during school construction activities in March 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/24/2017
Comments: DTSC approved the Removal Action Completion Report provided DTSC comments are incorporated in future operation and maintenance field work/reports.

CA BOND EXP. PLAN:

Reponsible Party:	FEDERAL FACILITY SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The Department will either enter into an interagency agreement with the Department of Defense or will issue an order. The Department has budgeted $15,000 for oversight/monitoring costs. DHS will seek 100 percent cost recovery for its direct costs plus staff costs and overhead related to the project. The Department of Defense is expected to fund all remedial investigation and cleanup activities.
Site Description:	The Fort McArthur site is a former nike missile base located in the White's Point area of San Pedro. The Army transferred the site to the Air Force for housing and the Air Force transferred part of the site to the City of Los Angeles for a park. Thesite is located at 25th Street and Western Avenue in San Pedro.
Hazardous Waste Desc:	Ninety-six acres of the original 561-acre complex remain under Air Force control. The remaining properties were disposed of as surplus. An initial assessment study was performed on the active ninety-six acres of Fort McArthur. Nine acres of potential contamination were identified. Only two areas are recommended by the Air Force for further site characterization. Released wastes include pesticides and battery acids.
Threat To Public Health & Env:	Residues of hazardous wastes in the soil are the only identified environmental threat. Ground water is intruded by seawater and is unsuitable at this time for use as a drinking water supply. There is no known exposure at this time.
Site Activity Status:	The installation restoration program (IRP) has been initiated at this base. Currently, the program is in the operations/remedial action phase of the mitigation process.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

THE BOEING COMPANY (Continued) **1000240982**

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P012
. Waste name: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U012
. Waste name: ANILINE (I,T) (OR) BENZENAMINE (I,T)

. Waste code: U041
. Waste name: EPICHLOROHYDRIN (OR) OXIRANE, (CHLOROMETHYL)-

. Waste code: U079
. Waste name: 1,2-DICHLOROETHYLENE (OR) ETHENE, 1,2-DICHLORO-,(E)-

. Waste code: U112
. Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: U133
. Waste name: HYDRAZINE (R,T)

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U165
. Waste name: NAPHTHALENE

. Waste code: U213
. Waste name: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

. Waste code: U219
. Waste name: THIOUREA

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1107

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 141821

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 8132

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 1028

THE BOEING COMPANY (Continued) **1000240982**

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB’s

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE,

THE BOEING COMPANY (Continued) **1000240982**

1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: LABP
. Waste name: LAB PACK

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: P012
. Waste name: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	1107
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	141821
Waste code:	D003
Waste name:	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs):	8132
Waste code:	D006
Waste name:	CADMIUM
Amount (Lbs):	1028
Waste code:	D007
Waste name:	CHROMIUM
Amount (Lbs):	2088
Waste code:	D008
Waste name:	LEAD
Amount (Lbs):	49159
Waste code:	D011
Waste name:	SILVER
Amount (Lbs):	10402
Waste code:	F001
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	118
Waste code:	F003

THE BOEING COMPANY (Continued) **1000240982**

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 20778

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 20778

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS
Amount (Lbs): 7824

Name: THE BOEING COMPANY - S15
Address: 1920 E IMPERIAL HWY
City,State,Zip: EL SEGUNDO, CA 90245
Site ID: 160608
CERS ID: 10206970
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 160608
Site Name: The Boeing Company - S15
Violation Date: 02-23-2017
Citation: 22 CCR 15 66265.195(c) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(c)
Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.
Violation Notes: Returned to compliance on 03/13/2017. The inspection log did not have any records for the month of February, 2017. Failure to document daily inspections of the waste tanks. The facility did not have any inspections records for the daily tank inspections for the month of February. There were good records for all other past months. The tanks shall be inspected each day of operation and those inspections shall be documented.

WDS:

Name:	WEST COMPLEX FACILITY
Address:	1 Hornet Way
City:	EL SEGUNDO
Facility ID:	4 19I006362
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	4
Facility Telephone:	3103315418
Facility Contact:	Jennifer Sasaki
Agency Name:	NORTHROP GRUMMAN CORP. MASD
Agency Address:	One Hornet Way MS PA12/W9
Agency City,St,Zip:	El Segundo 90245
Agency Contact:	Jennifer Sasaki
Agency Telephone:	3103315418
Agency Type:	Private
SIC Code:	3721
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/20/1991
Comments: Tetra Tech submitted a preliminary endangerment assessment (environmental assessment) report to the Dept prepared for the rail construction corporation which plans to build a portion of the Los Angeles County Transportation Commission Metro Green Line Project across the identified haz waste property of H. Kramer facility. Tetra Tech provided the proposed construction plan in the PEA. The RP paid the PEA fees to the Dept. PEA was completed. PEA concluded that the site should be referred to U.S. EPA for further action because it is currently on CERCLIS. Currently, EPA is the lead agency for further action.

Completed Area Name: PROJECT WIDE

H. KRAMER & CO. (Continued) **S101540204**

Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	01/03/1991
Comments:	Sample Results: Slag Pile = PB 2500 mg/kg, CU 53800, BE 230, ZN 76000, AS 17, PB WET 259; Soil = AS 2800 mg/kg, BE 18, CU 1700, PB 420, ZN 76; Groundwater = AS 140 mg/kg, CR6 .23, SE .24, PCE 200 ug/l, TCE 370, Toluene 270, Xylene 300, Carbon Tet 43 (from ENSR Report to EPA, February 1990). Site Screening Done: Site is a brass foundry contaminated w/ AS, PB, ZN, CU. Possible Asbestos in furnace area. Slag pile is primary source. Previous Company had evaporation pond. AS & Solvents in groundwater probably from pond. Pond is now filled with slag.

Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Not reported
Site History:	H. Kramer & Company operated a brass foundry at the Site from 1951 through mid-1985. Slag generated from site operations was disposed in a waste pile, filling. Operations by a previous owner, Harshaw

H. KRAMER & CO. (Continued) **S101540204**

Chemical Company (Harshaw), included the smelting of antimony. Harshaw generated wastes containing heavy metals, which included arsenic. With the exception of the building foundations in the southwest portion of the Site, all structures have been demolished. Regional Board issued Cleanup and Abatement Order No. 92-094 (CAO). The CAO stated the following: The concrete /asphalt cap was selected as remedy and installed at the Site in 1995 to eliminate the direct contact pathways and to minimize infiltration of surface water into the subsurface soil.Case was closed conditionally in 1995. Site is under post remediation long term monitoring program. However, based on the available data, Regiona Bord staff asked H. Kramer to conduct additional Investigation to find another source of VOCs. New investigation (June 2009) data indicates another VOCs offsite groundwater (from up-gradient [north of the site]) plume may contributed to the onsite groundwater. Aditional groundwater investigation is required by RP.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB’s

. Waste code: 271

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: Organic monomer waste (includes unreacted resins)

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: SILVER

. Waste code: D021
. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 58750

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6660

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 231640

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 297248

Waste code: D011
Waste name: SILVER
Amount (Lbs): 40685

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 286725

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 35260

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 264240

Waste code: F005

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Description:	Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification:	Large Quantity Generator
Description:	Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Owner/Operator Summary:

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: E
Accumulated waste on-site: No
Generated waste on-site: Yes

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 271
. Waste name: Organic monomer waste (includes unreacted resins)

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D021
. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 58750

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6660

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 231640

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 297248

Waste code: D011
Waste name: SILVER
Amount (Lbs): 40685

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 286725

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 35260

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 264240

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019
Date Data Arrived at EDR: 07/30/2019

Next Scheduled EDR Contact: 10/14/2019
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

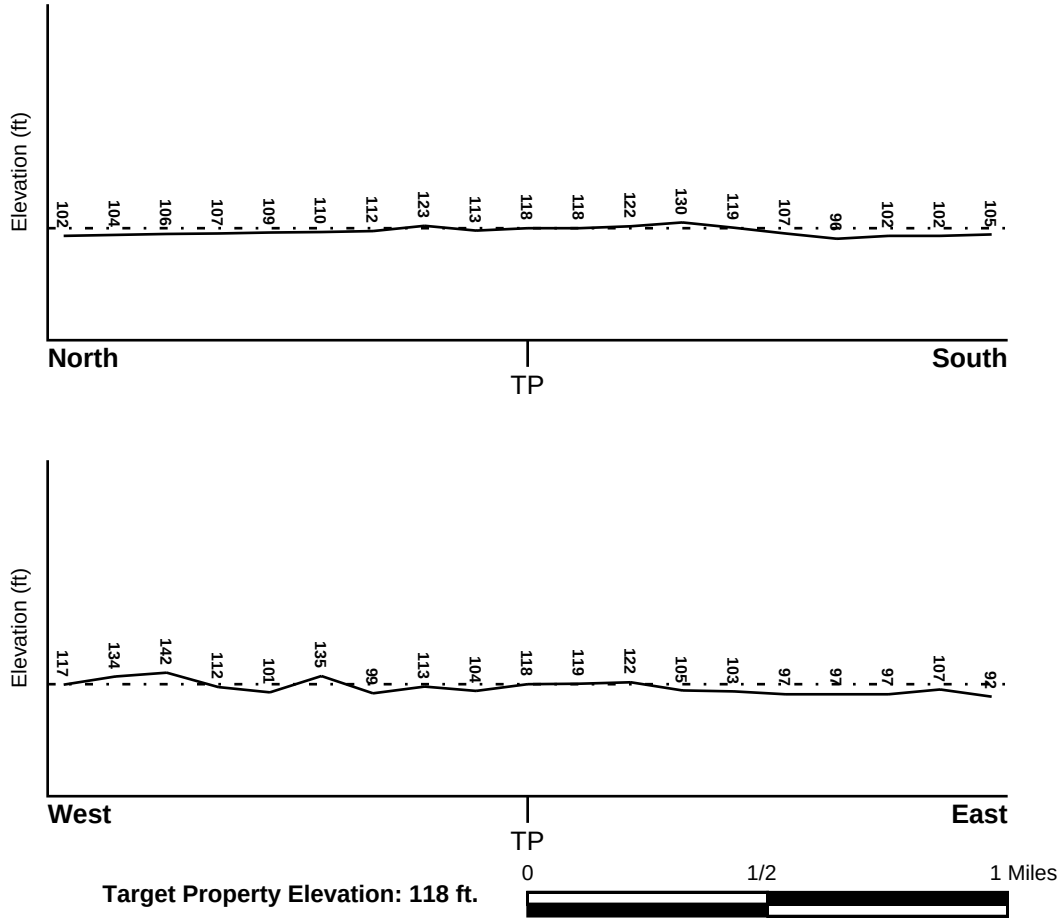
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1770F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile West
Site Name:	International Rectifier
Site EPA ID Number:	CAD076208313
Groundwater Flow Direction:	West
Inferred Depth to Water:	80 feet.
Hydraulic Connection:	Aquifers underlying the site are interconnected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	DELHI
Soil Surface Texture:	sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	10 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
2	10 inches	30 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
3	30 inches	50 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
4	50 inches	70 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand
clay

Surficial Soil Types: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand

clay

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay loam
sandy clay

Deeper Soil Types: coarse sand
silty clay loam
gravelly - fine sandy loam
stratified
gravelly - sandy loam
weathered bedrock
clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The use of this material is subject to the terms of a license agreement. You will be held liable for any unauthorized copying or disclosure of this material.

This Report contains certain products owned by or licensed by Tele Atlas North America, Inc. ("TANA") and licensed to EDR pursuant to an agreement between EDR and TANA (the "TANA Agreement"). Such products include the Dynamap® /2000 (commencing with the most current version, nationwide coverage, ArcInfo™ format, tiled by county, with semi−annual Updates) and are referred to in this Report as the "Licensed Products".

The use of the Licensed Products with a non−TANA map may result in increased variance between the location displayed on the map and ground truth location.

The recipient of the Report (hereinafter referred to as an "End User") shall use such Report solely for its internal purposes and not for resale.

U.S. GOVERNMENT RIGHTS. If End User is an agency, department, or other entity of the United States Government, or funded in whole or in part by the United States Government, then use, duplication, reproduction, release, modification, disclosure or transfer of this commercial product and accompanying documentation, is restricted in accordance with the LIMITED or RESTRICTED rights as described in DFARS 252.227−7014(a)(1) (JUN 1995) (DOD commercial computer software definition), DFARS 227.7202−1 (DOD policy on commercial computer software), FAR 52.227−19 (JUN 1987) (commercial computer software clause for civilian agencies), DFARS 252.227−7015 (NOV 1995) (DOD technical data − commercial items clause); FAR 52.227−14 Alternates I, II, and III (JUN 1987) (civilian agency technical data and noncommercial computer software clause); and/or FAR 12.211 and FAR 12.212 (commercial item acquisitions), as applicable. In case of conflict between any of the FAR and DFARS provisions listed herein, the construction that provides greater limitations on the Government's rights shall control. Contractor/manufacturer is Tele Atlas North America, Inc., 11 Lafayette Street, Lebanon, NH 03766−1445. Phone: 603.643. 0330. The Licensed Products are ©1984−2008 by Tele Atlas North America, Inc. ALL RIGHTS RESERVED. For purpose of any public disclosure provision under any federal, state or local law, it is agreed that the Licensed Products are a trade secret and a proprietary commercial product and not subject to disclosure.

If End User is an agency, department, or other entity of any State government, the United States Government or any other public entity or funded in whole or in part by the United States Government, such End User agrees to protect the Licensed Products from public disclosure and to consider the Licensed Products exempt from any statute, law, regulation, or code, including any Sunshine Act, Public Records Act, Freedom of Information Act, or equivalent, which permits public access and/or reproduction or use of the Licensed Products. In the event that such exemption is challenged under any such laws, any and all right to retain any copies or to use of the Licensed Products shall be terminated and considered immediately null and void. Any copies of the Licensed Products held by End User shall immediately be destroyed. If any court of competent jurisdiction considers this clause void and unenforceable, in whole or in part, for any reason, then all Licensed Products previously delivered to End User will be destroyed.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EBI Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # A5F8-4EAD-B359

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Mr. Robert Swennes
BSREP II Office Holdings II LLC
750 North Street, Suite 710
Washington, District of Columbia 20012

Subject: Phase I Environmental Site Assessment
Grand Avenue Courtyard
1960 East Grand Avenue, El Segundo, California
EBI Project No. 1117000509

Dear Mr. Swennes :

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you. This report has been completed in general conformance with the ASTM Standard E 1527-13.

The purpose of this report is to acquire environmental information, observe the general condition and maintenance status of the Subject Property, to suggest remediation and/or maintenance practices considered customary for the Subject Property to continue in its current operation, compared to properties of similar age and condition, and to identify recognized environmental conditions in connection with the Subject Property described in this report.

Reliance on the report and the information contained herein shall mean (i) the report may be relied upon by a lender to be selected by *BSREP II Office Holdings II LLC*, in determining whether to make a loan evidenced by a note secured by the Subject Property ("the Mortgage Loan"); (ii) the report may be relied upon by any purchaser in determining whether to purchase the Mortgage Loan (but not the Subject Property) from that lender, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the report may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; (iv) the report speaks only as of its date in the absence of a specific written update of the report signed and delivered by EBI Consulting.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to *BSREP II Office Holdings II LLC* . Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,
EBI CONSULTING

EXECUTIVE SUMMARY

At the request of BSREP II Office Holdings II LLC, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 1960 East Grand Avenue in El Segundo, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes two contiguous rectangular parcels, cumulatively totaling approximately 5.37 acres. The Subject Property is currently improved with a 12-story, multi-tenant office building, with a gross area of approximately 254,937± square feet and a nine-story parking garage with two sub-levels. There is no basement present beneath the office structure. The existing improvements were constructed in 1987. There are currently no manufacturing or industrial operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

1.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 1960 East Grand Avenue in El Segundo, California.

1.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

1.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water and radon.

1.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of BSREP II Office Holdings II LLC , in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by BSREP II Office Holdings II LLC (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of *ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit BSREP II Office Holdings II LLC to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record

sources and interviews with authorities having jurisdiction over the Subject Property. BSREP II Office Holdings II LLC agrees that EBI has no obligation to verify independently the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI Services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

1.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to assist a lender to be selected by BSREP II Office Holdings II LLC in determining whether to make a loan evidenced by a note secured by the Subject Property. Reliance upon this report does not extend to entities or individuals interested in purchasing the Subject Property. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. EBI's liability to a purchaser wishing to use this report is limited to the cost of the report. Payment for the report is made by, and EBI's contract and report extends to BSREP II Office Holdings II LLC only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

1.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Los Angeles County Assessor's Office and Mr. Don McCurry, Chief Engineer, the Subject Property is currently owned by Realty Associates IX LP.

The Subject Property is located at 1960 East Grand Avenue in El Segundo, Los Angeles County, California. The Subject Property includes two contiguous rectangular parcels, identified by the Los Angeles County Assessor's Office as Map 4138, Parcel 7, Lot 65, and Map 4138, Parcel 7, Lot 66, cumulatively totaling approximately 5.37 acres. The Subject Property is located approximately 540 feet east of the intersection of East Grand Avenue and Sepulveda Boulevard. Figure 1 - Location Map depicts the location of the Subject Property on a street map of El Segundo, California. Figure 2 - Locus Map depicts the location of the Subject Property on the *Venice, California* United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is currently improved with a 12-story, multi-tenant office building, with a gross area of approximately 254,937± square feet and a nine-story parking garage with two sub-levels. There is no basement present beneath the office structure. The existing improvements were constructed in 1987.

The existing office building is located on the eastern portion of the property. Areas of the Subject Property surrounding the existing building include the following: one 11-story parking garage with two subterranean levels, located on the southwestern portion of the Subject Property; asphalt-paved surface parking, located along the north, east, and west sides of the building; concrete walkways, located throughout the Subject Property; and, landscaping surrounding the building. Land and building areas are as follows:

SUBJECT PROPERTY IMPROVEMENTS					
Address	**Floors**	**Basement**	**Area (SF)**	**DOC**	**Lot Size (Acres)**
1960 East Grand Avenue, Office Tower	12	No	254,937	1987	5.37
1940 East Grand Avenue, Parking Garage	11	Yes	246,126	1987	Inclusive

SF: Gross Square Feet
DOC: Date of Construction

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of assessment, the Subject Property was occupied by 63 office tenants. Six vacant tenant spaces were identified at the time of assessment. There are currently no manufacturing or industrial operations conducted at the Subject Property. EBI was not provided with a copy of the most recent tenant list.

Please refer to Section 5.2 for further discussion regarding hazardous substances and petroleum products at the Subject Property.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	**Provider/Source**
Potable Water Supply	City of El Segundo
Sewage Disposal System	City of El Segundo
Electrical Service	Edison
Natural Gas Service	Southern California Gas
Oil Service	None
Heating/Cooling Systems	Natural gas water heaters located in the rooftop mechanical penthouse deliver heated water to VAV boxes above the tenant ceiling spaces and an electric cooling tower supplies cooled air VAV boxes above the tenant ceiling spaces
Emergency Power	One diesel-fired emergency generator with a self-contained fuel tank

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by retail/commercial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by East Grand Avenue, beyond which is Mattel (1955 East Grand Avenue) and a multi-tenant office complex (300 North Sepulveda Boulevard).
South	The Subject Property is bound to the south by a commercial development under construction (101 Continental Boulevard).
East	The Subject Property is bound to the east by multi-tenant commercial structures (1990 East Grand Avenue and 201 Continental Boulevard).
West	The Subject Property is bound to the west by a parking garage (222 North Sepulveda Boulevard).

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties. The adjacent property to the northeast, 1955 East Grand Avenue, is identified as a RCRA generator of hazardous waste, a Historic CORTESE site, a LUST site, and a UST site. The adjacent property to the east, 1990 East Grand Avenue, is identified as a Historic CORTESE site, a LUST site, and a UST site. These sites are further discussed in Section 4.1.1 and 4.1.2.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by BSREP II Office Holdings II LLC with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. Relevant documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by BSREP II Office Holdings II LLC . A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

BSREP II Office Holdings II LLC has provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

BSREP II Office Holdings II LLC provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

BSREP II Office Holdings II LLC has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

BSREP II Office Holdings II LLC has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

BSREP II Office Holdings II LLC provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

BSREP II Office Holdings II LLC retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in Appendix E.

The database report identified five "orphan sites". Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal SEMS Sites	0.5 mile	No	0
Federal SEMS ARCHIVE Sites	0.5 mile	No	**6**

4.1.1 Federal Agency Database Records

National Priority List (NPL)
The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)
SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS database.

SEMS – ARCHIVE
SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was

removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. The Subject Property was not identified on the SEMS-ARCHIVE database. However, six sites located within 0.5 mile of the Subject Property were identified on the SEMS-ARCHIVE database. Information regarding the listed sites is presented in the following table:

SEMS-ARCHIVE			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Raytheon Company 2000 E. El Segundo Blvd. El Segundo, CA 90245	1,380 feet / Southeast / Crossgradient	CAD000633230	Discovery: 05/21/1991 Preliminary Assessment: 09/12/1991 Status: SEMS-ARCHIVE
Allied Sales & Salvage 160 S. Sepulveda Blvd. El Segundo, CA 90245	1,875 feet / South-southwest / Crossgradient	CAD063821789	Discovery: 05/01/1986 Preliminary Assessment: 01/01/1987 Status: SEMS-ARCHIVE
International Rectifier 233 Kansas Street El Segundo, CA 90245	2,242 feet / West-northwest / Crossgradient	CAD076208313	Discovery: 08/23/1995 Preliminary Assessment: 09/24/1996 Status: SEMS-ARCHIVE
Northrop Corp Aircraft Div. 2043 E. Mariposa Avenue El Segundo, CA 90245	1,996 feet / Northeast / Crossgradient	CAD000627216	Discovery: 05/08/1990 Preliminary Assessment: 06/06/1990 Status: SEMS-ARCHIVE
Devlin Pharmaceuticals Inc. 700 N. Sepulveda Blvd. El Segundo, CA 90245	2,254 feet / North-northwest / Crossgradient	CAD981373848	Discovery: 02/01/1986 Preliminary Assessment: 05/01/1986 Status: SEMS-ARCHIVE
Hughes Aircraft Co. Radar System 2060 E. Imperial Hwy. El Segundo, CA 90245	2,578 feet / North-northeast / Crossgradient	CAT080010853	Discovery: Not reported Preliminary Assessment: Not reported Status: SEMS-ARCHIVE

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified SEMS-ARCHIVE facilities represent an environmental concern to the Subject Property.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. The Subject Property was not identified on the RCRA CORRACTS database. However, five sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database. Information regarding the listed sites is presented in the following table:

RCRA-CORRACTS			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Raytheon Company 2000 E. El Segundo Blvd. El Segundo, CA 90245	1,380 feet / Southeast / Crossgradient	CAD000633230	(21) Violations: 09/06/1989 – 06/22/2006 Dates of Compliance: 11/18/1991 – 07/21/2006
Northrop Corp Aircraft Div. 2043 E. Mariposa Avenue El Segundo, CA 90245	1,996 feet / Northeast / Crossgradient	CAD000627216	(2) Violations: 05/18/1989 Dates of Compliance: 08/17/1989
The Boeing Company 1920 E. Imperial Hwy. El Segundo, CA	4,031 feet / North / Crossgradient	CAD060897063	(13) Violations: 02/08/1988 – 08/20/2013 Dates of Compliance: 05/13/1988 – 09/20/2013
Rockwell International 815 Lapham St. El Segundo, CA 90245	4,222 feet / Northeast / Crossgradient	CAD097855126	(1) Violation: 11/28/1990 Date of Compliance: 12/04/1992
Northrop Grumman El Segundo 1 Hornet Way El Segundo, CA 90245	4,650 feet / East-northeast / Crossgradient	CAD000627273	(11) Violations: 02/11/1988 – 05/08/1992 Dates of Compliance: 02/11/1988 – 05/29/1992

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of open violations, distance, and expected hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified RCRA-CORRACTS facilities represent an environmental concern to the Subject Property.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). The Subject Property was not identified on the RCRA non-CORRACTS TSD database. However, four sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database. Information regarding the listed sites is presented in the following table:

RCRA NON-CORRACTS TSD			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Raytheon Company 2000 E. El Segundo Blvd. El Segundo, CA 90245	1,380 feet / Southeast / Crossgradient	CAD000633230	(21) Violations: 09/06/1989 – 06/22/2006 Dates of Compliance: 11/18/1991 – 07/21/2006
Northrop Corp. Aircraft Div. 2031 E. Mariposa Ave. El Segundo, CA 90245	1,769 feet / North-northeast / Crossgradient	CAD009687336	(2) Violations: 06/26/1987 – 01/31/1097 Dates of Compliance: 09/15/1988 - 08/03/1987
Northrop Corp. Aircraft Div. 2043 E. Mariposa Avenue El Segundo, CA 90245	1,996 feet / Northeast / Crossgradient	CAD000627216	(2) Violations: 05/18/1989 Date of Compliance: 08/17/1989
Hughes Aircraft Co. Radar System 2060 E. Imperial Hwy. El Segundo, CA 90245	2,578 feet / North-northeast/ Crossgradient	CAT080010853	(8) Violations: 06/28/2006 – 05/09/1984 Dates of Compliance: 07/21/2006 - 01/01/1985

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of open violations, distance and expected hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified RCRA NON-CORRACTS TSD facilities represent an environmental concern to the Subject Property.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. The Subject Property and one adjoining property were identified on the RCRA Generator database. Information regarding the listed sites is presented in the following table:

RCRA GENERATORS			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Team One Advertising 1960 East Grand Ave., Suite E El Segundo, CA 90245	Subject Property	CAD982504094	No violations found
Mattel Inc. 1955 E. Grand Ave. El Segundo, CA 90245	Adjacent / North-northeast / Crossgradient	CAD983655804	No violations found

* Presumed hydrogeologic gradient based upon regional topography

One former occupant of the Subject Property, Team One Advertising, was listed as a RCRA-SQG of hazardous waste. According to Mr. Don McCurry, Facility Engineer, Team One Advertising was a marketing firm occupying office space in the building. Based upon information presented in the environmental database report, Team One Advertising formerly generated between 100 Kg and 1,000 Kg of hazardous waste per month, although the nature of the waste is not identified in the environmental database report. No violations were reported for Team One Advertising. Based upon the absence of reported violations associated with this listing, the decommissioning of this facility, and the site conditions observed at the time of EBI's reconnaissance, the former RCRA-SQG database listing for Team One Advertising is not considered to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property.

Based upon the absence of reported violations and the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified adjacent RCRA Generator facility represent an environmental concern to the Subject Property.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither

the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)
ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

Facility Index System/Facility Registry System (FINDS)
FINDS is a centrally managed database by the USEPA that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The database provides information regarding environmental activities that may affect air, water, and land in the United States. It is usually a cross-reference to other sources/databases that contain more detail. The Subject Property was identified on the FINDS database. Information regarding the Subject Property is presented in the following table:

FINDS SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Environmental Interest / Information System**
Team One Advertising 1960 East Grand Ave., Suite E El Segundo, CA 90245	Subject Property	110002835175	RCRAInfo

* Presumed hydrogeologic gradient based upon regional topography

The Subject Property is listed on the RCRAInfo, a national information system supporting the RCRA program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. The Subject Property does not appear on any FINDS systems that report known or suspected contamination, and no additional action or investigation regarding these listings is recommended.

Enforcement & Compliance History Information (ECHO)
ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. The Subject Property was identified on the ECHO database. Information regarding the Subject Property is presented in the following table:

ECHO SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Team One Advertising 1960 East Grand Ave., Suite E El Segundo, CA 90245	Subject Property	110002835175	Current Compliance Status: No violations

* Presumed hydrogeologic gradient based upon regional topography

One former occupant of the Subject Property, Team One Advertising, was identified on the ECHO database. Based upon the absence of reported violations, the decommissioning of this facility, and the conditions observed at the time of EBI reconnaissance, it is considered unlikely that conditions

associated with the Subject Property ECHO listing represent an environmental concern to the Subject Property.

4.1.2 State and Tribal Agency Database Records

Annual Workplan Sites (AWP)
The California Department of Toxic Substance Control (DTSC) Annual Workplan Sites (AWP) identifies known hazardous substance release sites targeted for cleanup. The data source is the California Environmental Protection Agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the AWP database.

California High-Priority Confirmed Release Sites (RESPONSE)
The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in the remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RESPONSE database.

California Hazardous Waste Sites (ENVIROSTOR)
The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Subject Property was not identified on the ENVIROSTOR database. However, 23 sites located within 1.0 mile of the Subject Property were identified on the ENVIROSTOR database. Of the listed sites, 22 sites are located greater than 0.25 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these 22 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. Information regarding the SHWS site located within 0.25 mile of the Subject Property is presented in the following table:

ENVIROSTOR			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Raytheon Space and Airborne Systems 2000 E El Segundo Blvd. El Segundo, CA 90245	1,113 feet / South / Crossgradient	80001335	Notification Date: 01/01/2008 Contaminants: 1,1,1-Trichloroethane, TCE Media Impacted: Soil Status: Active Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

Based upon the separating distance and presumed hydrogeologic gradient relative to the Subject Property, and/or the reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified ENVIROSTOR Sites represent an environmental concern to the Subject Property.

Cal-Sites/HIST Cal-Sites
Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control (DTSC). This database is no longer updated by the state agency. It has been replaced by ENVIROSTOR. Neither the Subject

Property nor any sites located within 1.0 mile of the Subject Property were identified on the Cal-Sites/HIST Cal-Sites databases.

Proposition 65 Notification Records (Notify 65)
Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. The Notify 65 database includes listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Notify 65 database.

Toxic Pits Cleanup Act Sites (Toxic Pits)
The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Toxic Pits database.

California Bond Expenditure Plan
The California Bond Expenditure Plan was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds. The Subject Property was not identified on the California Bond Expenditure Plan database. However, one site located within 1.0 mile of the Subject Property was identified on the California Bond Expenditure Plan database. Information regarding the listed site is presented in the following table:

CALIFORNIA BOND EXPENDITURE PLAN			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Fort McArthur 200 North Douglas Street, Bldg. 212 San Pedro, CA 90245	3,104 feet / East / Upgradient	Not reported	Notification Date: Not reported Contaminants: Not reported Media Impacted: Soil Status: Installation Restoration Program Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

Based upon the separating distance and reported impact to soil only, it is considered unlikely that conditions associated with the identified Toxic Pits site represent an environmental concern to the Subject Property.

Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)
The Hazardous Waste and Substance Site List (also known as the Cortese/HIST Cortese databases) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California DTSC is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese/HIST Cortese databases. The Subject Property was not identified on the Cortese/HIST Cortese databases. However, 13 sites located within 0.5 mile of the Subject Property were identified on the Cortese/HIST Cortese databases. Of the listed sites, nine sites are located greater than 0.25 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these nine sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. The remaining sites located within 0.25 mile of the Subject Property have been granted No Further Action

status by the Los Angeles RWQCB and based upon the current regulatory status; these four sites are considered unlikely to represent an environmental concern to the Subject Property. Information regarding the four sites located within 0.25 mile of the Subject Property is presented in the following table:

CORTESE/HIST CORTESE			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Mattel Inc. 1955 E. Grand Ave. El Segundo, CA 90245	Adjacent / North-northeast / Crossgradient	902450089	Notification Date: 12/31/1997 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 02/02/1998
Hughes Aircraft Co. CSG 1990 Grand Ave. E El Segundo, CA 90245	Adjacent / East / Upgradient	R-13532	Notification Date: 08/19/1996 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 08/19/1996
Jim & Jack Auto Body 307 Sepulveda Blvd., N. El Segundo, CA 90245	936 feet / West-northwest / Crossgradient	I-13092	Notification Date: 10/02/1989 Contaminants: Waste oil/motor/hydraulic/lubricating Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 10/08/1992
Hughes Aircraft Company 2000 El Segundo Blvd., E. El Segundo, CA 90245	1,113 feet / South / Crossgradient	R-10917X	Notification Date: 01/14/1986 Contaminants: Solvents Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 07/22/1996

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, media impacted, and distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified Cortese/HIST Cortese facilities represent an environmental concern to the Subject Property.

Spill, Leaks, Investigations, and Cleanup (SLIC)

The Spills, Leaks, Investigations, and Cleanups (SLIC) database, maintained by the California Water Resources Control Board, includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites. The Subject Property was not identified on the SLIC database. However, three sites located within 0.5 mile of the Subject Property were identified on the SLIC database. Information regarding the listed sites is presented in the following table:

SLIC			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
West Coast Barrier Proj. 9 E. Segundo Blvd. El Segundo, CA 90245	1,843 feet / Southwest / Crossgradient	SL599992902	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Completed – Case Closed Date of Closure: 08/30/2002

SLIC			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Int. Rectifier Corp. El Segundo 233 Kansas St. El Segundo, CA 90245	2,242 feet / West / Downgradient	SL184571440	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Completed – Case Closed Date of Closure: 02/27/1997
International Rectifier Corp. 233 Kansas El Segundo, CA 90245	2,241 feet / West / Downgradient	0608	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: No Further Action Date of Closure: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, and the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified SLIC sites represent an environmental concern to the Subject Property.

Voluntary Cleanup Program (VCP) Properties

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. The Subject Property was not identified on the VCP database. However, two sites located within 0.5 mile of the Subject Property were identified on the VCP database. Information regarding the listed sites is presented in the following table:

VCP			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Hilton Garden Inn Mariposa Avenue & Nash Street El Segundo, CA 90245	2,392 feet / Northeast / Crossgradient	19130106	Responsible Party: Hilton Garden Inn Notification Date: Not reported Contaminants: TPH Media Impacted: Soil Status: No Further Action Date of Closure: 09/24/1999
Former Northern American Trisonic Wind Tunnel 400 Duley Road El Segundo, CA 90245	2,610 feet / East-northeast / Crossgradient	60000905	Responsible Party: Northern American Trisonic Wind Tunnel Notification Date: 01/22/2009 Contaminants: Not Reported Media Impacted: Soil Status: No Further Action Date of Closure: 01/07/2014

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, and the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified VCP sites represent an environmental concern to the Subject Property.

Leaking Underground and Aboveground Storage Tank Sites (LUST/LAST)

The Regional Water Quality Control Board (RWQCB) maintains a database of reported Leaking Storage Tank (LUST/LAST) sites. The Subject Property was not identified on the LUST/LAST databases. However, 16 sites located within 0.5 mile of the Subject Property were identified on the LUST/LAST databases. Of the listed sites, 11 sites are located greater than 0.25 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these 11 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. The remaining five sites located within 0.25 mile of the Subject Property have been granted No Further Action status by the Los Angeles RWQCB and based upon the current regulatory status; these five sites are considered unlikely to represent an environmental concern to the Subject Property. Information regarding the remaining sites located within 0.25 mile of the Subject Property is presented in the following table:

LUST/LAST			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Global Solutions 1955 Grand Ave. El Segundo, CA 90245	Adjacent / North-northeast / Crossgradient	902450089	Notification Date: 12/31/1997 Contaminants: Not reported Media Impacted: Soil Status: Case Closed Date of Closure: 02/02/1998
Mattel Inc. 1955 E. Grand Ave. El Segundo, CA 90245	Adjacent / North-northeast / Crossgradient	T0603701269	Notification Date: 12/31/1997 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 02/02/1998
Hughes Aircraft Co. CSG 1990 Grand Ave., E. El Segundo, CA 90245	Adjacent / East / Upgradient	T0603705198	Notification Date: 08/19/1996 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 08/19/1996
Jim & Jack Auto Body 307 Sepulveda Blvd., N. El Segundo, CA 90245	938 feet / West-northwest / Crossgradient	T0603704033	Notification Date: 10/02/1989 Contaminants: Waste oil/moto/hydraulic/lubricating Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 10/08/1992
Hughes Aircraft Company 2000 El Segundo Blvd., E. El Segundo, CA 90245	1,113 feet / South / Crossgradient	T0603792958	Notification Date: 01/14/1986 Contaminants: Solvents Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 07/22/1996

* Presumed hydrogeologic gradient based upon regional topography

The adjacent properties to the northeast and east were identified as LUST sites. EBI reviewed a Conceptual Site Model (CSM) Report for the release reported at Hughes Aircraft, 1990 East Grand Avenue dated August 19, 1996. Contaminants of concern were not identified, but were associated with the historic use of the site for aviation-related activities. The last regulatory activity at the site was reportedly conducted in January 1, 1950. No cleanup actions were reported at the site. The case was closed on August 19, 1996. EBI reviewed a CSM Report for the release reported at Global Solutions / Mattel, 1955 East Grand Avenue dated December 31, 1997. Contaminants of concern were not identified, but were also associated with the historic use of the site for aviation-related activities. No

cleanup actions were reported at the site, and the case was closed on February 2, 1998. Based upon the current regulatory status, and the separating distance and/or presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified LUST sites represent an environmental concern to the Subject Property.

California UST Databases (AST, UST, FID UST, HIST UST, SWEEPS UST)

The California Environmental Protection Agency, the California Water Resources Control Board and other entities previously maintained or currently maintain various lists recording permitted aboveground and underground storage tank (AST/UST) sites in California. The Subject Property was not identified on the AST/UST databases. However, three adjoining properties were identified on the AST/UST databases. Information regarding the listed sites is presented in the following table:

CA UST DATABASES				
Location	**Distance / Direction / Gradient**	**Capacity / Contents**	**Year Installed**	**Status**
Mattel, Inc. 333 Continental Blvd. El Segundo, CA 90245	Adjacent / Northeast / Crossgradient	(1) 2,650-gallon AST / Not reported	Not reported	Not reported
		(1) UST of unidentified capacity / Petroleum blend fuel	Not reported	Removed (Not Reported)
United Airlines 1955 E. Grand Ave. El Segundo, CA 90245	Adjacent / North-northeast / Crossgradient	(1) UST of unidentified capacity / Not Reported	1989	Active
Hughes Aircraft Co. CSG 1990 Grand Ave., E. El Segundo, CA 90245	Adjacent / East / Upgradient	(1) UST of unidentified capacity / Not Reported	1989	Active

* Presumed hydrogeologic gradient based upon regional topography

The 1990 and 1995 East Grand Avenue adjacent properties are cross-listed as Leaking Underground Storage Tank Sites, and are discussed further above.

Based upon the absence of reported releases at the 333 Continental Boulevard property, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

Solid Waste Information System (SWIS and SWF/LF)

The Solid Waste Information System (SWIS and SWF/LF) facility database contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For each facility, the database contains information about location, owner, operator, facility type, regulatory and operational status, authorized waste types, local enforcement agency and inspection and enforcement records. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SWIS and SWF/LF databases.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)

The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board (SWRCB) and the Regional Water Quality Control Boards (RWQCBs) for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program

Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the WMUDS/SWAT database.

California Hazardous Material Incident Report System (CHMIRS)

The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the California Office of Emergency Services. The Subject Property was not identified on the CHMIRS database.

Hazardous Waste Information System (HAZNET)

The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. Four former occupants of the Subject Property were identified on the HAZNET database. Based upon information presented in the database, report, a former tenant of the Subject Property, Tishman Speyer Properties, Inc., generated laboratory waste chemicals and disposed of the waste stream by storage, bulking, and/or transfer off site. A second former tenant of the Subject Property, Team One Advertising, generated photochemicals/photoprocessing waste from 1993 until 1995 and disposed of the waste stream by off-site recycling. Reality Associated Fund #9, a third former tenant of the Subject Property, generated an unreported regulated waste in 2012, transferring stored waste off-site for disposal. The fourth identified former tenant, Commonwealth Grand Avenue Corp., generated off-specification aged or surplus inorganics, latex waste, and laboratory waste chemicals in 2003 and 2006. The wastes were transferred off-site. According to the database report, there are no reported violations associated with these former facilities. Based upon the absence of reported violations, and conditions observed during EBI's reconnaissance, it is considered unlikely that conditions associated with the identified HAZNET facilities represent an environmental concern to the Subject Property.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Engineering Control or Institutional Control Registries.

State and Tribal Brownfield Sites

Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Brownfield Sites databases.

Tribal Environmental Databases

The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The

environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acres. No tribal administered lands were identified within 1.0 mile of the Subject Property.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

City of El Segundo Building Department
EBI reviewed available files regarding the Subject Property at the City of El Segundo Building Department for information regarding past uses of the Subject Property. The original building permits and certificates of occupancy for the existing building were not readily available for review. The review of Building Department records did not identify past uses of the Subject Property that would constitute a recognized environmental condition.

City of El Segundo Fire Department
EBI reviewed available files regarding the Subject Property at the City of El Segundo Fire Department, Fire Prevention Division. EBI identified a hazardous materials inventory detailing the storage of up to 210 gallons of diesel fuel in the first floor fire pump room of the Subject Property. El Segundo Fire Department files additionally included a letter regarding Addendum #2 to Krazan Phase I Environmental Site Assessment for the proposed Hyatt Place Property, addressed as 1940 and 1960 East Grand Avenue. The letter, prepared by Krazan & Associates, Inc. (Krazan), addresses concentrations of petroleum hydrocarbons detected in soils at the Subject Property. Krazan collected soil samples from the site in July 2008 and submitted them for laboratory analysis. Soil samples reportedly were found to have total recoverable petroleum hydrocarbon (TRPH) concentrations of 43 milligrams per kilogram (mg/kg). Krazan noted that State of California Regional Water Quality Control Board Environmental Screening Level (ESL) for soils in residential settings were 83 mg/kg for gasoline and 370 mg/kg for total petroleum hydrocarbons. Based on the results of soil analysis at the Subject Property compared to the applicable reporting levels, Krazan concluded that the concentrations detected at the site were insignificant. The letter does not indicate how many borings were advanced at the site, how many soil samples were analyzed, or where at the site the soil samples were collected. This letter was also identified during a previous Phase I ESA performed by AECOM and further discussion of this letter is provided in Section 4.3.8.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 115 feet above mean sea level (msl). The topography of the Subject Property is relatively flat. The Subject Property is located in an undulating area, and the general slope of the surrounding region is to the west (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the *Venice, California* USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Subject Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments.

According to the Environmental Data Resources, Inc. (EDR) GeoCheck Physical Setting Source Summary, the dominant soil composition in the vicinity of the Subject Property is classified as Delhi. This soil consists of somewhat excessively well drained soil extending to a depth of more than 60 inches.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is the Pacific Ocean, located approximately 2.1 miles west of the Subject Property.

Local groundwater gradient is typically expected to follow surface topography; however, the absence of a distinct ground surface slope at the Subject Property prevents estimation of groundwater flow direction by this method. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
At least 1896–1930s	Undeveloped land.	Undeveloped land.	Aerial Photographs Topographic Maps Municipal Records Personal Interviews Other Historical Records

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
1930s–1970s	Undeveloped land, part of nearby oil field.	Undeveloped land and oil wells.	Aerial Photographs Topographic Maps Municipal Records Personal Interviews Other Historical Records
1970s–1986	Undeveloped land.	Undeveloped land and commercial development.	Aerial Photographs Topographic Maps Municipal Records Personal Interviews Other Historical Records
1987 to Present	Existing office building and parking garage.	Commercial development.	Aerial Photographs Topographic Maps City Directories Municipal Records Personal Interviews Other Historical Records

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review, with the exception of the oil wells located in the vicinity of the Subject Property between the 1930s and 1970s.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR) for the previous Phase I Environmental Site Assessment (ESA) dated October 24, 2016, as referenced in Section 4.3.8 of this report. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of the aerial photographs are presented in the EBI October 24, 2016 ESA included in Appendix G.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
1923	No	**Subject Property:** The Subject Property appears to consist of cleared, undeveloped land.
		Surrounding Area: The surrounding properties to the north, east, south, and west are cleared, undeveloped land.
1928	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1923 photograph, with the exceptions that a small structure and what appears to be a pond are visible on the northern portion of the Subject Property.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1923 photograph, with the exception that small structures are visible on the surrounding properties to the north and east.
1938, 1953	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted in the 1928 photograph, with the exception that a structure is visible on the southeastern portion of the Subject Property.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted in the 1928 photograph, with the exception that a structure, apparently an oil derrick, is visible on the surrounding property to the west.
1963	No	**Subject Property:** No structures or other notable features are visible on the Subject

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
		Property.
		Surrounding Area: No structures or other notable features are visible on the surrounding properties to the north, east, south, and west.
1972, 1977	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted in the 1963 photograph.
		Surrounding Properties: A roadway, trending east to west, is visible on the surrounding property to the north, beyond which no structures are visible. A paved parking lot is visible on the surrounding property to the south. No structures or other notable features are depicted on the surrounding properties to the east and west.
1983	No	**Subject Property:** The Subject Property appears to be occupied by a parking lot.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted in the 1977 photograph, with the exception that commercial structures are visible on the surrounding properties to the east and west. A commercial structure is visible beyond the roadway to the north.
1989, 1994, 2002, 2005, 2009, 2010, 2012	No	**Subject Property:** A rectangular commercial structure is visible on the northeastern portion of the Subject Property, with a second commercial structure, a parking garage, on the southwestern portion of the Subject Property. The northwestern portion of the Subject Property appears to be occupied by a paved parking lot. Landscaping is visible on the southeastern portion of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted in the 1983 photograph.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by EDR Sanborn Maps, Inc. The EDR Report indicated that coverage for the vicinity of the Subject Property was not available. A copy of the search documentation letter is presented in Appendix F.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR) for the previous Phase I Environmental Site Assessment (ESA) dated October 24, 2016, as referenced in Section 4.3.8 of this report. Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the historic topographic maps are presented in the EBI October 24, 2016 ESA included in Appendix G.

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1896, 1924,	No	**Subject Property:** No structures or other notable features are depicted on the Subject Property.

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1930, 1948		**Surrounding Properties:** No structures or other notable features are depicted on the surrounding properties to the north, east, south, and west.
1950	No	**Subject Property:** Access roads are depicted running across the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1948 map, with the exception that small roadways are depicted on the surrounding properties to the east, south, and west. Small structures are depicted on the surrounding properties to the east, and a substation is identified on the surrounding property to the west.
1964	**Yes**	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1950 map.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1950 map, with the exception hat no substation is identified on the surrounding property to the west. **Oil wells** are identified to the northeast of the Subject Property.
1972, 1981, 2012	No	**Subject Property:** No structures or other notable features are depicted on the Subject Property.
		Surrounding Properties: A roadway, trending east to west, is depicted on the surrounding property to the north. No structures or other notable features are depicted on the surrounding properties to the east, south, and west.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR) for the previous Phase I Environmental Site Assessment (ESA) dated October 24, 2016, as referenced in Section 4.3.8 of this report. Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in the EBI October 24, 2016 ESA included in Appendix G.

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
1990, 1991, 1995, 2000, 2001, 2008, 2013	No	Various office tenants.

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

Property records for the Subject Property were obtained at the Los Angeles County Assessor's Office. The property card does not identify the current owner; however, Mr. Don McCurry, Chief Engineer, identified the owner as Realty Associates IX LP. Assessor's Office records indicate that the existing buildings were constructed in 1987. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

EBI retained Land Title Inquiries, Inc. to conduct a search for Environmental Liens and Activity and Use Limitations for the Subject Property. The search was completed by a title professional from Land Title Inquiries, Inc. and included review of reasonably ascertainable Land Title and Judicial records. The Environmental Lien Search Report indicated that no environmental liens or Activity and Use Limitations were found of record. A copy of the Environmental Lien Search Report and accompanying documentation is presented in Appendix F.

4.3.8 Previous Environmental Reports

EBI was provided with the following previous environmental reports performed for the Subject Property.

Phase I Environmental Site Assessment, 1940 and 1960 East Grand Avenue, El Segundo, California, prepared by Clayton Group Services, Inc., *A Bureau Veritas Company*, (Clayton), of Pleasanton, California, dated January 26, 2007

The Clayton Report was completed in general conformance with ASTM Standard E 1527-05. The scope of the Clayton Report investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records, review of the physical characteristics and history of the Subject Property. The following information was presented in the Clayton Report:

- At the time of the Clayton Report, the 5.37-acre Subject Property was improved with a nearly 260,000-square-foot, 12-story, office building at 1960 East Grand Avenue; an 11-story (9 above grade and 2 sub grade levels) parking structure at 1940 East Grand Avenue; an asphalt-paved parking lot; and landscaping.

- At the time of assessment, the existing structures were occupied by commercial office tenants and automobile parking. No industrial or manufacturing operations were observed at the Subject Property at the time of assessment.

- Based upon review of historical resources dating back to 1928, Clayton reported that in 1928 the Subject Property and surrounding area appear to have been agriculturally cultivated. By 1938 oil exploration dominated much of the area; the subject property featured an AST and a bermed pit, which were removed by 1947 – the area was known as the El Segundo Oil Field. Thereafter until the mid-1970s when modern land configuration emerged, the subject property and adjoining properties were graded from time to time. The current office building and parking garage were built on the Subject Property around 1988 and the land uses have remained commercial office since.

- Regarding the former El Segundo Oil Field, no oil or gas wells are known to have been present on the Subject Property, but there was an AST and a bermed pit in 1938. Soil investigations conducted on the Subject Property in the 1980s revealed the presence of petroleum hydrocarbon odors and stains within fill materials to depths of nearly 20 feet bgs. A limited amount of analytical testing detected no petroleum hydrocarbons in the fill. Regulatory agencies have not required that the subject property or surrounding areas investigate historical oil field uses. In addition, the underlying fill material at the subject property is covered with buildings, parking lots, or engineered landscaping, all of which minimize human exposure to the underlying fill. Furthermore, groundwater is first encountered around 100 feet below ground surface, which is well below the extent of the fill, and is unlikely to have been impacted from Subject Property activities. Therefore, Clayton notes that this finding is a *historic recognized environmental condition* (HREC).

- The current use and storage of hazardous substances and petroleum products at the subject property is limited to diesel fuel for backup power, cooling water treatment chemicals, janitorial supplies, other subject property equipment (e.g., liquid-cooled transformer), and the photo processing wastes. Clayton observed secondary containment systems for most of the chemicals and wastes, and the various containers were in good condition with no evidence of chemical releases. No major chemical violations are noted in the regulatory agency records. Therefore, this finding represents a *de minimis* condition and not a REC.

- Clayton identified evidence of the following existing underground storage tanks (USTs) and aboveground storage tanks (ASTs) at the Subject Property: one 22,500-gallon water storage reservoir. The UST is a concrete basin that measures approximately 17 by 14 by 12.5 feet deep. In addition, one 120-gallon and two 75-gallon aboveground storage tanks (ASTs) are located beneath generators in office building ground floor equipment rooms and store diesel fuel for backup power generation.

- Clayton observed no indications of PCBs, except for a pad-mounted, liquid-cooled transformer, a hydraulic refuse compactor, light ballasts, and seven elevators. The transformer is located near the parking structure, the compactor is located in an office building ground floor equipment room, and the light ballasts are located throughout the office building. These are self-contained, and Clayton observed no evidence of releases or stains near this equipment. The elevators are cable-drawn and have no hydraulic hoists.

- Clayton reviewed various prior environmental reports prepared for the Subject Property. The reports included the following: a 1986 Geotechnical Report; a 1986 Preliminary Contaminated Soil Evaluation; and a 1995 Limited Asbestos [and other material] Survey. The 1986 Geotechnical Report indicated that the subject property was vacant grassy, weedy land that had been part of an oil field; no oil wells were encountered on the subject property. During surrounding area development from around 1969 through 1971, the subject property was graded and fill material was imported.

- The 1986 Preliminary Contaminated Soil Evaluation describes 24 soil borings advanced at the subject property in 1981, 1982, 1984, and 1986. Indications of petroleum hydrocarbon-impacted soil (e.g., odors, stains) were noted in fill materials found at depths of 4.0, 9.5, 17, and 19 feet bgs. Three soil samples collected at depths ranging from 5.0 to 12 feet bgs were tested for total petroleum hydrocarbons (TPH) and for benzene, toluene, ethylbenzene, xylenes (BTEX, collectively); no TPH or BTEX concentrations were detected.

- The 1995 Limited Asbestos [and other material] Survey describes an inspection and sampling for suspect asbestos containing material (ACM), lead containing paint (LCP), and polychlorinated biphenyl (PCB)-containing light ballasts, as well as an evaluation of radon gas. Identified suspect ACM included roofing, pipe wrap insulation, duct tape mastic, floor tiles and mastic, drywall joint compound, spray-on fireproofing, and ceiling tiles. No asbestos was detected in samples collected from the 5th, 6th, 8th, 10th, 11th, and 12th floors, roof, and from the parking garage. Identified suspect LCP included stairwells on the 12th floor, piping and equipment in a mechanical room, and areas within the parking garage. No lead was detected in the eight paint chip samples collected, except for 0.934% lead (a cooling tower pipe). This concentration exceeded the U.S. Department of Housing and Urban Development (HUD) action level of 0.5%, but the subject property is not residential. No PCB concentrations were identified in light ballasts. Radon levels for the area were determined to be 1.0 picoCuries per liter (pCi/L), and below the United States Environmental Protection Agency's (USEPA) action level of 4.0 pCi/L.

- Based upon review of the environmental database report, Clayton identified the following listings for the Subject Property: HAZNET, RCRA-SQG and FINDS databases. Occupant Team One Advertising is a generator of hazardous wastes, including photochemical/photo processing and laboratory waste chemicals. No violations are reported, and no releases are documented.

- Based upon review of the environmental database report, Clayton identified several adjacent properties with various listings; however, Clayton identified no off-site facilities that were considered likely to have impacted the Subject Property.

Based upon the findings of the Phase I Environmental Site Assessment, Clayton did not identify any recognized environmental conditions (RECs) associated with the Subject Property. Clayton recommended no further action or investigation.

Phase I Environmental Site Assessment, Grand Avenue Courtyard, 1940 and 1960 East Grand Avenue, El Segundo, California 90245, prepared by AECOM of Camarillo, California, dated August 2010

The AECOM Report was completed in general conformance with ASTM Standard E 1527-05. The scope of the AECOM Report investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records, and review of the physical characteristics and history of the Subject Property. The following information was presented in the AECOM Report:

- At the time of the AECOM Report, the Subject Property consisted of two parcels totaling approximately 5.36-acres developed with a twelve-story, 260,000 square foot office building and an eleven-level above ground parking garage. The office building does not have a basement, two of the parking garage levels are below grade. The subject property also has a surface parking lot and extensive landscaping including a Kio pond.

- At the time of assessment, on-site tenant activities and operations include office activities. Tenants include airline related businesses, law firms, advertising agencies, other office tenants and a café. No industrial or manufacturing operations were observed at the Subject Property at the time of assessment.

- Historical research indicates that prior to construction of the current office building and parking garage in 1988, the subject property was part of an oil field. The subject property appears to have been vacant, undeveloped land as depicted on an 1896 topographic map. A 1924 topographic map also shows the subject property to be vacant and undeveloped. A 1928 aerial photograph shows what appears to be an oil sump (referred to in previous environmental reports as a bermed pit) located on the north central portion of the subject property, with an aboveground storage tank (AST) shown on the eastern portion of the subject property in 1938. The subject property remained essentially unchanged until after 1956. In the 1965 and 1976 aerial photographs, the subject property appears to be vacant, graded land. Construction of the existing buildings began in 1987 and the buildings were completed in 1988. The office building has been occupied by office tenants since that time. City directories indicate that the subject property was occupied by various office tenants from 1990 through 2000.

- In AECOM's opinion, it is not uncommon for there to be residual amounts of petroleum hydrocarbons in the soils in the area of the subject property, potentially as a result of the historical use of the area as an oil field. AECOM identified a letter from Krazan and Associates Inc. (Krazan) to OTO Development, LLC dated June 22, 2009. This letter indicates that Krazan had conducted soil sampling at the subject property in July 2008. Krazan concluded that petroleum hydrocarbons detected in subject property soils (43 ppm) did not pose a significant risk for further development of the subject property. Additionally, the prior Clayton report indicates that odors and stains indicating petroleum hydrocarbon impacts were noted at the subject property during soil sampling from 1981 through 1986. Three soil samples were analyzed at that time for petroleum hydrocarbons and benzene, toluene, ethylbenzene, and xylenes (BTEX), but these compounds were not detected in the soil samples analyzed. However, based on soil sample analysis results obtained as part of prior assessments, the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion.

- AECOM reported that no underground storage tanks (USTs) are currently located on the subject property, other than a 22,000-gallon fire water storage tank located under the east side of the office building. An emergency generator is located on the first floor of the office building. The generator includes a self-contained 120-gallon diesel AST. Two additional 120-gallon diesel aboveground storage tanks are associated with the fire pumps located on the first floor of the office building. These ASTs are located within a concrete berm. No drains, stains, or leaks were observed in the vicinity of the diesel ASTs or generator.

- Small quantities of paints, cleaners, degreaser (WD-40), stains, and motor oil (associated with the generators) were observed to be stored on shelving units and/or in flammable materials cabinets in the janitorial supply rooms, mechanical rooms, storage rooms, and generator rooms. The materials were not stored in the vicinity of floor drains and no significant staining was observed in the storage areas. Two 55-gallon drums of water treatment chemicals are stored on the roof of the office building adjacent to the cooling tower. These chemicals are located on secondary containment pallets.

- A concrete pad-mounted transformer was observed outside at the northwest corner of the parking garage. The transformer is owned by, and is the responsibility of, the Southern California Edison Company. No markings were observed on the transformer indicating polychlorinated biphenyl (PCB) content; however, no staining was observed on the transformer or on the concrete pad. Additionally, based on the age of the subject property development (circa 1988), PCBs are not

anticipated to be present within the on-site transformer equipment. Based on the above information; the onsite transformer appears to be properly managed.

- AECOM reviewed various previous environmental reports prepared for the Subject Property. The reports included the following: Report of Geotechnical Investigation, Proposed Building Development, Grand Avenue Between Sepulveda, Continental, and El Segundo Boulevards, El Segundo, California, dated March 8, 1984. Prepared by LeRoy Crandall and Associates for Nu-West Inc. (California); Report of Phase I Environmental Site Assessment, Xerox Centre, 1960 East Grand Avenue, El Segundo, California, dated April 1995. Prepared by Kleinfelder, Inc. for Homart Development Co.; and Phase I Environmental Site Assessment, 1940 and 1960 East Grand Avenue, El Segundo, California, dated January 26, 2007. Prepared by Clayton Group Services, Inc. for Lowe Enterprises; HBI Mold Assessment Report and Clearance Document, 1960 East Grand Avenue, El Segundo, California, dated May 14, 2007. Prepared by Healthy Buildings International, Inc. for Lowe Enterprises, and HBI Mold Assessment Report and Clearance Document, 1st Floor Central Corridor, 1960 East Grand Avenue, El Segundo, California, dated May 21, 2007. Prepared by Healthy Buildings International, Inc. for Lowe Enterprises. The first three reports are summarized in and/or included the previous Clayton report. The fourth report is discussed as follows: Healthy Buildings International Inc. (HBI) performed a mold assessment following a water leak in a 3rd floor break room. HBI conducted visual observations for stains, discoloration and visible mold growth. Moisture levels were measured in areas that appeared to be damp. Marginally wet drywall was identified in a stairwell, a 3rd floor restroom and the ceiling of the 1st floor café and in the 1st floor central corridor. Fans and dehumidifiers were used to dry out the areas. A follow-up inspection did not reveal and stains or mold growth or excessive dampness. Airborne samples for mold did not indicate a significant source of mold in the building.

- Based upon review of the environmental database report, the subject property was identified on the RCRA-SQG, FINDS and HAZNET databases as Team One Advertising, Suite E. This current tenant of the building is listed as a small-quantity generator of hazardous waste. The RCRA-SQG database indicated that no violations have been reported for this tenant. The HAZNET database indicates that this tenant has generated photoprocessing waste, which is sent to a recycler or transfer station. According to the site contact, hazardous waste is no longer generated by this tenant. The subject property is not listed on a contamination-related database. Based on AECOM's area reconnaissance and information provided in the EDR report, the former and current uses of the adjacent or nearby sites do not appear to present RECs in association with the subject property.

Based upon the findings of the Phase I Environmental Site Assessment, AECOM did not identify any recognized environmental conditions (RECs) associated with the Subject Property. AECOM recommended no further action or investigation.

Phase I Environmental Site Assessment, Grand Avenue Courtyard, 1960 East Grand Avenue, El Segundo, California, prepared by EBI Consulting, Inc. (EBI) of Burlington, Massachusetts, dated October 24, 2016

The EBI Report was completed in general conformance with ASTM Standard E 1527-13. The scope of the EBI Report investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records, review of the physical characteristics and history of the Subject Property, and a limited visual survey for the presence of asbestos-containing materials (ACM). The following information was presented in the EBI Report:

- At the time of the EBI Report, the Subject Property was improved with one office building and a parking garage which were constructed in 1987. The subject buildings are situated on two parcels, comprising approximately 5.37-acres.

- At the time of assessment, the existing structure was occupied by 69 commercial office tenants. No industrial or manufacturing operations were observed at the Subject Property at the time of assessment.

- Based upon review of historical resources dating back to 1890s (aerial photographs, USGS topographical maps), EBI reported that the Subject Property was vacant, undeveloped land prior to construction of the existing improvements in 1987.

- EBI did not identify evidence of existing or former underground storage tanks (USTs) at the Subject Property.

- EBI reported that two (2) 120-gallon diesel fuel aboveground storage tanks (ASTs) were in use to support the firewater pump system. The ASTs are located in the fire pump room on the first floor of the office building. EBI also identified one (1) 120-gallon diesel AST associated with an emergency generator. The AST is double-walled steel and is located below the generator in a room on the first floor of the building. No staining or other evidence of a release of diesel fuel was observed on the underlying concrete floors in the vicinity of the ASTs.

- EBI identified one electrical transformer room on the first floor of the office building. The transformer room was not accessible during the survey. EBI identified one pad-mounted transformer adjacent to the parking garage at the Subject Property. EBI reported that no staining or other evidence of a release of dielectric fluid was observed in the vicinity of the transformer room or transformers. EBI did not observe labeling on the transformers identifying PCB content. EBI reported that the transformers were owned and operated by the public electrical utility company, Southern California Edison.

- EBI reported that the office building was serviced by five overhead traction elevators; and, the parking garage was serviced by two overhead traction elevators.

- EBI reported that hazardous substances and/or petroleum products identified at the Subject Property was limited to commonly available janitorial and cleaning supplies located in the storage shed, storage rooms, and maintenance office, including interior latex paint, mineral spirits, household cleaners, and water treatment chemicals associated with the closed-loop heating/cooling system. Areas of chemical storage were reported to be well maintained and free of spills, staining, or other indications of a release.

- EBI reviewed previous Phase I ESA reports, as discussed above, including a letter prepared by Krazan & Associates, Inc. (Krazan), addressing concentrations of petroleum hydrocarbons previously detected in soil at the Subject Property. According to Krazan, soil samples collected from the site in July 2008 were submitted for laboratory analysis of total recoverable petroleum hydrocarbons (TRPH). The laboratory results identified TRPH at a concentration of 43 milligrams per kilogram (mg/kg) in soil. Krazan concluded that the TRPH encountered was insignificant. The prior Clayton report stated that petroleum hydrocarbon odors and stains were noted at the property during soil sampling from 1981 through 1986, prior to development. The contamination was deemed to be associated with the historical use of the property and immediate vicinity as part of an oil field in approximately the 1920s through the 1950s. Based upon review of available information, the

historic contamination identified on the Subject Property is considered to represent a *de minimis* condition and no further action is recommended.

- Based upon review of the environmental database report, EBI identified no on-site or off-site facilities that were considered likely to have impacted the Subject Property.

- EBI conducted a limited visual survey for the presence of asbestos-containing materials (ACM). The following suspect materials were identified: sheetrock/joint compound composite material and 2'x4' white perforated acoustical ceiling tile, vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, and various construction mastics and caulking. These materials were observed to be undamaged and in good condition at the time of assessment.

Based upon the findings of the Phase I Environmental Site Assessment, EBI did not identify any recognized environmental conditions (RECs) associated with the Subject Property. EBI recommended no further action or investigation.

Relevant information from the previous reports is discussed in the appropriate sections of this report, and portions of the previous reports are presented in Appendix G.

4.3.9 Other Historical Records and Interviews

Mr. Don McCurry, Building Engineer, was interviewed to obtain information regarding the history of the Subject Property. Mr. McCurry reported that he has been familiar with the Subject Property for approximately 21 years and that the existing building was constructed in 1987. Mr. McCurry was unaware of the use or occupants of the Subject Property prior to 1987.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Ms. Debra Bechtold, EBI Senior Scientist, on February 8, 2017. Ms. Bechtold was accompanied by and interviewed Mr. Don McCurry, the Subject Property Engineer.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was overcast and approximately 70° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	**Approximate Quantity / Container / Material**	**Location**	**Storage Condition**
Cleaning Compounds and Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Janitorial Closets	Good: No leaks or spills
HVAC Treatment Compounds	(3) 45-gallon drums: anti-freeze and microbicides (3) 15-gallon pails: microbicides	Mechanical Penthouse	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property. The facility maintains a Spill Prevention, Control and Countermeasure (SPCC) Plan for handling materials in use at the Subject Property. It should be noted that a compliance audit was beyond the scope of work for this assessment and was not performed.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL			
Classification	**Type of Waste / Generation Process**	**Type of Storage / Location**	**Disposal Method / Contractor**
Non-regulated Solid Waste	Municipal Solid Waste / Routine Site Operations	2 Solid Waste Dumpsters (Trash Storage Room)	Athens Services
	Cardboard Recyclables / Routine Site Operations	1 Recycling Dumpster (Trash Storage Room)	Full Circle Recycling Company
	Construction Debris	1 Roll-off dumpster (East side of Subject Property)	CWS
Non-regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	NA (Municipal Sanitary Sewer)	City of El Segundo
Regulated Solid or Liquid Waste	Spent fluorescent tubes, ballasts, and lead-acid batteries / Routine Site Operations and Maintenance	Cardboard Bins (Receiving Dock)	Regency Lighting
Biomedical Waste	None identified	NA	NA

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTS) & ABOVEGROUND STORAGE TANKS (ASTS)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs located at the Subject Property. EBI identified the following ASTs located at the Subject Property.

STORAGE TANKS		
(2) 120-gallon ASTs	Contents:	Diesel Fuel
	Location:	Ground Floor Fire Pump Room
	Year Installed:	Unknown
	Construction Materials:	Single-wall steel tank
	Leak Detection/Prevention:	Concrete block secondary containment basin
	Staining / Releases:	None identified
(1) 120-gallon AST	Contents:	Diesel Fuel
	Location:	Ground Floor Emergency Generator Room
	Year Installed:	Unknown
	Construction Materials:	Single-wall steel tank
	Leak Detection/Prevention:	Concrete block secondary containment basin
	Staining / Releases:	None identified

One diesel-fired emergency generator and associated 120-gallon AST are located on the ground floor of the existing office building. The generator and AST are surrounded by a concrete secondary containment basin. No staining or other evidence of a release of diesel fuel was observed on the underlying concrete floor.

Two diesel-fired fire pumps and associated 120-gallon ASTs are located on the ground floor of the existing office building. The fire pumps and ASTs are surrounded by a concrete secondary containment basin. No staining or other evidence of a release of diesel fuel was observed on the underlying concrete floor.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of former USTs or ASTs located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

The following oil-containing equipment was identified at the Subject Property:

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Transformers and Fluid-Containing Electrical Equipment	(1) Electrical Transformer [Southern California Edison]	1987 / Transformer vault, Ground Floor of office building	NA
	(1) Pad-mounted Electrical Transformer [Southern California Edison]	1987 / North of Parking Garage	No
Hydraulic Equipment	None identified	NA	NA
Other Oil-containing Equipment	None identified	NA	NA

EBI observed one pad-mounted electrical transformer located on the central portion of the Subject Property, adjacent to the parking garage. The transformer appeared to be in good condition, and no staining or other evidence of a release of dielectric fluid was observed in the vicinity of the transformer unit. The transformer unit is owned and operated by the regional electrical utility provider, Edison Electric. In the event of a release of dielectric fluid from one of its transformers, the utility company typically conducts regulatory response actions and cleanup.

One electric transformer is reportedly located within a utility vault on the eastern side of the ground floor of the office building. The transformer unit is reportedly owned and operated by the regional electrical utility provider, Southern California Edison. The transformer vault was sealed by the electric utility and was not accessible at the time of reconnaissance. In the event of a release of dielectric fluid

from one of its transformers, the utility company typically conducts regulatory response actions and cleanup.

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	**Identified**
Interior Drains, Trenches, or Sumps	**Yes**
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	**Yes**
Wastewater or Stormwater Discharge/Disposal	**Yes**
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No

Floor drains were observed in the restrooms and former service kitchen. Floor drains and a sump pit were also observed in the parking garage. The floor drains and sump pit reportedly discharge to the municipal sewer system. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of these structures.

A decorative pond is located on the southeastern portion of the Subject Property. No staining or other evidence of a release was observed in the vicinity of this feature.

The ground surface outside the building is relatively flat. Stormwater runoff from the asphalt-paved parking areas on the northwestern and eastern portions of the Subject Property discharges to catch basins located along Grand Avenue. The catch basins are associated with the municipal stormwater sewerage system, operated by the City of El Segundo. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the stormwater drainage features.

6.0 INTERVIEWS

The following persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. Mr. Don McCurry completed the Pre-Survey Questionnaire during the completion of the EBI assessment conducted in October 2016 and a copy is provided in Appendix C. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property.

INTERVIEWS			
Contact / Affiliation	**Date of Communication**	**Years Associated with Subject Property**	**Telephone No.**
Mr. Don McCurry Chief Engineer Davis Partners	02/08/2017	21	(310) 414-0014
Mr. Neal Perkey Regional Director Davis Partners	02/08/2017	5	(310) 414-0014

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

According to Mr. Don McCurry, Chief Engineer, there is no asbestos-containing materials in the buildings.

As discussed in Section 4.3.8, a prior Phase I ESA prepared by Clayton Group Services, dated January 2007, included the review of a 1995 Limited Asbestos [and other material] Survey describing an inspection and sampling for suspect asbestos containing material (ACM). The survey identified suspect ACM including roofing, pipe wrap insulation, duct tape mastic, floor tiles and mastic, drywall joint compound, spray-on fireproofing, and ceiling tiles. Clayton reported that no asbestos was detected in samples collected from the 5th, 6th, 8th, 10th, 11th, and 12th floors, the roof, or from the parking garage.

EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of sheetrock/joint compound composite material and 2'x4' white perforated acoustical ceiling tile, and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, and various construction mastics and caulking. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also present in areas of the buildings that were accessed as part of this assessment.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to

subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Los Angeles County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the non-residential nature of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm^2) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the non-residential use of the existing buildings and in accordance with the scope of work of this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

Municipal water service is provided to the Subject Property by the City of El Segundo. Potable water is reportedly obtained from Northern California and the Colorado River. Based upon review of the 2016 Annual Drinking Water Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property.

However, the following *de minimis condition* was identified in connection with the Subject Property.

- EBI identified a letter, prepared by Krazan & Associates, Inc. (Krazan), addressing concentrations of petroleum hydrocarbons previously detected in soils at the Subject Property. Soil samples collected from the site in July 2008 were submitted for laboratory analysis, and total recoverable petroleum hydrocarbons (TRPH) concentrations of 43 milligrams per kilogram (mg/kg) were reportedly found in the soil and were determined to be insignificant. This letter was also identified during a previous Phase I ESA performed by AECOM and further discussion of this letter is provided in Section 4.3.8. Additionally, the prior Clayton report indicates that odors and stains indicating petroleum hydrocarbon impacts were noted at the subject property during soil sampling from 1981 through 1986, prior to development of the Subject Property. The contamination was deemed to be associated with the historical use of the subject property and immediate vicinity as part of an oil field in approximately the 1920s through 1950s. Based upon review of available information, the historic contamination identified on the Subject Property is considered to represent a de minimis condition and no further action is recommended.

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, no further action is recommended.

COMMENTS

BOUNDARY LINES..... MORE ESTABLISHED FROM RECOVERED CITY, COUNTY AND/OR PRIVATE SURVEY MONUMENTS WHOSE CHARACTER AND SOURCE ARE SO NOTED ON THE SURVEY.

LEGAL DESCRIPTION..... FROM INFORMATION SUPPLIED BY CLIENT, USUALLY A TITLE POLICY OR TITLE REPORT.

EASEMENTS..... PLOTTABLE EASEMENTS ARE SHOWN FROM AN ORIGIN SUPPLIED TITLE REPORT. NON-PLOTTABLE ONES ARE NOTED ON THE SURVEY AS HAVING "EFFECT ON". BECAUSE OUR SERVICE IS LIMITED TO REPORTING OF EASEMENT LOCATIONS WE STRONGLY RECOMMEND LEGAL COUNSEL BE RETAINED TO REPORT ON TITLE PAPERS IN THEIR ENTIRETY.

TITLE REPORT..... FIRST AMERICAN TITLE INSURANCE COMPANY OF NEW YORK COMMITMENT NO. NCS-435880-NY UPDATED AUGUST 26, 2010.

(X) INDICATES TITLE REPORT EXCEPTION NO.

BASIS OF BEARINGS..... THE BEARING NORTH 89°59'35" WEST OF THE CENTERLINE OF GRAND AVENUE, AS SHOWN ON PARCEL MAP NO. 14316, P.M.B. 59, PAGE 40, WAS TAKEN AS THE BASIS OF BEARINGS FOR THIS SURVEY.

AREA..... BASED UPON MEASURED BEARINGS AND DISTANCES AS SHOWN HEREON, THE AREA IS:
533,609 SQ. FT. = 5.3287 ACRES (GROSS)
231,857 SQ. FT. = 5.3227 ACRES (NET)
WHERE "GROSS" IS DEFINED AS THE AREA OF THE SUBJECT FEE PARCEL AS LEGALLY DESCRIBED HEREON AND "NET" IS DEFINED AS THE REMAINING SUBJECT PARCEL, AFTER SUBTRACTION OF EXISTING STREET EASEMENTS.

PARKING COUNT..... REGULAR 648 PARKING SPACES
COMPACT 254 PARKING SPACES
HANDICAP 13 PARKING SPACES
915 TOTAL PARKING SPACES

ZONING..... ZONE CO (CORPORATE OFFICE)
SEE SURVEYOR'S NOTE 4.

BUILDING SETBACK..... FRONT SETBACK: 25'
SIDE SETBACK: 15'
REAR SETBACK: 10'
HEIGHT RESTRICTION: 200'
SEE SURVEYOR'S NOTE 4.

FLOOD ZONE..... SUBJECT PROPERTY LIES WITHIN FLOOD ZONE C (AREA OF MINIMAL FLOODING) AS SHOWN ON FLOOD INSURANCE RATE MAP COMMUNITY PANEL NO. 060118, DATED APRIL 7, 1998, AS PUBLISHED BY FEDERAL EMERGENCY MANAGEMENT AGENCY.

UTILITIES..... UTILITIES SHOWN HEREON ARE CURRENT AS OF DECEMBER 12, 1991 AND NO UPDATE WAS PERFORMED FOR THIS SURVEY.

EFFECT OF..... GENERAL AND SPECIAL TAXES AND ASSESSMENTS FOR THE FISCAL YEAR 2010-2011, THE LIEN OF SUPPLEMENTAL TAXES, IF ANY. (1)(2).

EFFECT OF..... AN EASEMENT TO SOUTHERN CALIFORNIA EDISON FOR UNDERGROUND ELECTRICAL SUPPLY SYSTEMS AND COMMUNICATION SYSTEMS AND INCIDENTAL PURPOSES RECORDED NOVEMBER 20, 1928 AS INSTRUMENT NO. 86-1810330 OF OFFICIAL RECORDS. PLOTTED. (4)

EFFECT OF..... AN EASEMENT FOR PIPE LINE AND UTILITY PURPOSES FOR DOCUMENT RECORDED JUNE 30, 1969 AS INSTRUMENT NO. 739 IN BOOK D-4419, PAGE 268 OF OFFICIAL RECORDS. PLOTTED. (5)

EFFECT OF..... AN EASEMENT FOR DRAINAGE OF WATER RUN OFF FROM THE ADJACENT PROPERTY RECORDED MAY 26, 1976 AS INSTRUMENT NO. 78-560101 OF OFFICIAL RECORDS. THIS EASEMENT IS INDETERMINATE IN LOCATION. (6)

EFFECT OF..... AN EASEMENT TO SOUTHERN CALIFORNIA EDISON FOR COMMUNICATION SYSTEMS AND INCIDENTAL PURPOSES RECORDED JANUARY 30, 1987 AS INSTRUMENT NO. 87-145073 OF OFFICIAL RECORDS. PLOTTED. (7)

EFFECT OF..... AN EASEMENT TO CITY OF EL SEGUNDO FOR PUBLIC STREET AND INCIDENTAL PURPOSES RECORDED MAY 26, 1987 AS INSTRUMENT NO. 87-624469 OF OFFICIAL RECORDS. PLOTTED. (8)

THERE IS NO EVIDENCE OF EARTH MOVING WORK, BUILDING CONSTRUCTION OR BUILDING ADDITIONS WITHIN RECENT MONTHS.

THERE ARE NO CHANGES TO THE STREET RIGHT OF WAY LINE EITHER COMPLETED OR PROPOSED.

THE SITE IS NOT BEING USED AS A SOLID WASTE DUMP, SUMP OR SANITARY LANDFILL.

LEGAL DESCRIPTION

PARCEL ONE:

PARCEL 1 IN THE CITY OF EL SEGUNDO, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS SHOWN ON PARCEL MAP NO. 14316, AS PER MAP FILED IN BOOK 159, PAGE 49 OF PARCEL MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

EXCEPT THEREFROM OIL, GAS AND OTHER HYDROCARBON SUBSTANCES, WATER (AND STEAM) AND OTHER MINERALS, WHETHER SIMILAR TO THOSE SPECIFIED OR NOT, WITHIN OR THAT MAY BE PRODUCED FROM SAID LAND, WITH NO RIGHT OR INTEREST OF ANY KIND THEREIN, EXPRESS OR IMPLIED IN THE SURFACE OF SAID LAND, BUT WITH THE SOLE AND EXCLUSIVE RIGHT FROM TIME TO TIME TO DRILL AND MAINTAIN WELLS AND SUPPORTING WORKS INTO ON THROUGH SAID LAND BELOW A DEPTH OF 500 FEET AND TO PRODUCE, INJECT, STORE AND REMOVE FROM AND THROUGH SUCH WELLS ON WORKS, OIL, GAS AND OTHER SUBSTANCES OF WHATSOEVER NATURE INCLUDING THE RIGHT TO PERFORM ANY AND ALL OPERATIONS DEEMED NECESSARY OR CONVENIENT FOR THE EXERCISE OF SAID RIGHT, AS RESERVED BY STANDARD OIL COMPANY OF CALIFORNIA, A CORPORATION, IN DEED RECORDED JUNE 30, 1969 AS INSTRUMENT NO. 739, IN BOOK D-4419, PAGE 268, OFFICIAL RECORDS.

PARCEL TWO:

PARCEL 2 IN THE CITY OF EL SEGUNDO, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS SHOWN ON PARCEL MAP NO. 14316, AS PER MAP FILED IN BOOK 159, PAGE 49 OF PARCEL MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

EXCEPT THEREFROM OIL, GAS AND OTHER HYDROCARBON SUBSTANCES, WATER (AND STEAM) AND OTHER MINERALS, WHETHER SIMILAR TO THOSE SPECIFIED OR NOT, WITHIN OR THAT MAY BE PRODUCED FROM SAID LAND, WITH NO RIGHT OR INTEREST OF ANY KIND THEREIN, EXPRESS OR IMPLIED IN THE SURFACE OF SAID LAND, BUT WITH THE SOLE AND EXCLUSIVE RIGHT FROM TIME TO TIME TO DRILL AND MAINTAIN WELLS AND SUPPORTING WORKS INTO OR THROUGH SAID LAND BELOW A DEPTH OF 500 FEET AND TO PRODUCE, INJECT, STORE AND REMOVE FROM AND THROUGH SUCH WELLS ON WORKS, OIL, GAS AND OTHER SUBSTANCES OF WHATSOEVER NATURE INCLUDING THE RIGHT TO PERFORM ANY AND ALL OPERATIONS DEEMED NECESSARY OR CONVENIENT FOR THE EXERCISE OF SAID RIGHT, AS RESERVED BY STANDARD OIL COMPANY OF CALIFORNIA, A CORPORATION, IN DEED RECORDED JUNE 30, 1969 AS INSTRUMENT NO. 739, IN BOOK D-4419, PAGE 268, OFFICIAL RECORDS.

SURVEYOR'S NOTES

THIS SURVEY HAS BEEN PREPARED FOR TITLE INSURANCE PURPOSES

1. THE BOUNDARY DATA AND TITLE MATTERS AS SHOWN HEREON HAVE BEEN DEVELOPED FROM THE REFERENCED TITLE REPORT.
2. THIS SURVEY MAY NOT CONTAIN SUFFICIENT DETAIL FOR DESIGN PURPOSES.
3. THIS SURVEY DOES NOT INCLUDE EASEMENTS EXCEPT THOSE SPECIFICALLY DELINEATED HEREON. NOR DOES IT SHOW THE LOCATION OF OR ENCROACHMENTS BY SUBSURFACE FOOTINGS AND/OR FOUNDATIONS OF BUILDINGS SHOWN ON THIS MAP.
4. IF UNDERGROUND PUBLIC UTILITIES AND OTHER SUBSTRUCTURES, ZONES, SET BACK AND STREET WIDENING DATA ARE SHOWN HEREON; IT IS FOR INFORMATION ONLY, HAVING BEEN OBTAINED FROM A GENERAL REQUEST AT THE LOCAL AGENCY'S PUBLIC COUNTER AND/OR OTHER SOURCES NOT CONNECTED WITH THIS COMPANY. NO REPRESENTATION IS MADE AS TO THE ACCURACY, CURRENCY OR COMPLETENESS OF SAID INFORMATION AND ANYUSERS OF SAID INFORMATION ARE URGED TO CONTACT THE UTILITY OR LOCAL AGENCY DIRECTLY.

SURVEYOR'S CERTIFICATE:

I HEREBY CERTIFY (AS DEFINED AND LIMITED BY SECTION 8770.5 OF THE BUSINESS AND PROFESSIONS CODE OF CALIFORNIA) TO REALTY ASSOCIATES ADVISORS, LLC; FIRST AMERICAN TITLE INSURANCE COMPANY, AND THEIR RESPECTIVE SUCCESSORS AND ASSIGNS THAT THIS IS A TRUE AND CORRECT SURVEY OF THE PROPERTY HAVING A STREET ADDRESS OF 1250 GRAND AVENUE, EL SEGUNDO, CALIFORNIA, AND SHOWS THE TRUE AND CORRECT LOCATION OF THE BUILDINGS AND VISIBLE IMPROVEMENTS SITUATED ON SUCH LAND AND ALL EASEMENTS RIGHTS-OF-WAY, SETBACK LINES) AND SIMILAR RESTRICTIONS OF RECORD AS CONTAINED IN THE REFERENCED PRELIMINARY TITLE REPORT; AFFECTING THE PROPERTY SURVEYED. EXCEPT AS SHOWN, THE BUILDINGS AND IMPROVEMENTS DO NOT OVERHANG OR ENCROACH UPON ANY EASEMENT OR RIGHTS-OF-WAY OF OTHERS, AND THERE ARE NO ENCROACHMENTS OTHER WAY ACROSS PROPERTY LINES. THE PROPERTY SURVEYED CONTAINS 5.3227 ACRES AND 915 PARKING SPACES; AND IS NOT LOCATED WITHIN A FLOOD PLAIN AREA.

I HEREBY CONFIRM THAT THIS SURVEY IS MADE AT LEAST IN ACCORDANCE WITH THE "MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/ACSM LAND TITLE SURVEYS," JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS IN 2005, AND INCLUDES ITEMS 2, 3, 4, 6, 7(a), 7(b)(1), 7(c), 8, 9, 10, 11(a), 13, 14, 16, 17 AND 18 OF TABLE A THEREOF. PURSUANT TO THE ACCURACY STANDARDS AS ADOPTED BY ALTA AND NSPS AND IN EFFECT ON THE DATE OF THIS CERTIFICATION, THE UNDERSIGNED FURTHER CERTIFIES THAT THE POSITIONAL UNCERTAINTIES RESULTING FROM THE SURVEY MEASUREMENTS MADE ON THIS SURVEY DO NOT EXCEED THE ALLOWABLE POSITIONAL TOLERANCE.

APPENDIX C

PRE-SURVEY QUESTIONNAIRE AND OTHER RELEVANT DOCUMENTATION

EBI Consulting
environmental | engineering | due diligence

Please fill out and sign this questionnaire to the best of your knowledge for the Engineer's/Scientist's site visit. Email to **Jonathan Kerry** at REResearchGroup@ebiconsulting.com or fax to (781) 425-3623, for our report files, and keep the original to provide to the Engineer or Scientist.

Subject Property Name: Grand Avenue Courtyard **EBI Project #:** 1116005380

Address: 1960 East Grand Avenue El Segundo CA

Subject Property Owner: **Purchase Date:**

On-Site Property Contact: Don McCurry **Telephone:** 310.414.0014

Fax: Chief Engineer **Email:**

Your Name and title	**Signature**	**Date**
		10/12/16

PROPERTY CONDITION REPORT PRE-SURVEY QUESTIONNAIRE

Additional plans and documentation (see page 4) must be forwarded to the site for the Engineer during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Engineer's report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #?
2. What is the legal Municipality or County that has jurisdiction over the property? El Segundo/LA County
3. What is the assessors file ID number and tax file ID number if available?

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? 5.3
5. How many parking spaces (and HCP parking spaces) are present at the property?
6. How many buildings comprise the subject property? 2
   a. If the property is a mall or large retail center, please confirm and list ownership of each building.
7. What is the gross and net rentable square footage of the building(s)?
8. What is the date of construction of the building(s)? When was the building(s) first occupied? 1986/87
9. How many tenant spaces or apartments are at the Subject Property? 69
   a. If the property is apartments, please provide a unit and type count by bedroom and square feet.
10. Please list, to the best of your knowledge, any deficiencies or problems with the site, parking area, amenities or utilities.
11. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems.
12. During the last five years, have any major capital improvements been made to the site or building(s)? If so, please explain, with the approximate cost.

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. office tenants

2. Describe the past uses of the property noting tenant names and oil/chemical usage. office tenants, formerly 1 café tenant

3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy?

4. (Y) (N) Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property?

5. (Y) (N) Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation?

6. (Y) (N) Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation?

7. (Y) (N) Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation?

8. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation?

9. (Y) (N) Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation?

10. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation?

11. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe.

12. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? Transformer vault - Edison owned and maintained

13. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at **or** adjacent to the property? If yes, please describe.

14. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe.

15. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe.

16. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe.

17. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N
Above or Underground	120 gal	Diesel fuel	unknown	N
Above or Underground	120 gal	Diesel fuel	unknown	N
Above or Underground	120 gal	Diesel fuel	Unknown	N
Above or Underground	gal			

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation: NO

19. Additional comments and/or pertinent information relevant to this Phase I ESA:

Document and Information Checklist

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

A. Plans	B. Municipal Documents	C. Additional Information
▪ ALTA Survey or Site Plan* ▪ Architectural Building Plans* - plans, elevations, wall section, foundation, HVAC & elec. schedules ▪ Reduced scale Site and Building Plans ▪ ***Extremely critical for properties in Seismically active zones 3 and 4**** *STRUCTURAL PLANS – **Seismic Assessments are required for these properties. Structural drawings must be provided at the time of the site visit. If no drawings are provided, the report will be delayed and the Seismic Assessment may be overly conservative.*** ▪	▪ Certificate of Occupancy* ▪ Building Permit* ▪ Façade inspection compliance* ▪ Copy of tax cards ▪ Copy of violations **B.1 NYC Projects** ▪ Department of Building Violations* ▪ Environmental Control Board Violations* ▪ Local Law 11 Facade Reports*	▪ Capital expense report for 1 to 3 years* ▪ Tenant Rent Roll* ▪ Roof warranty ▪ History of recent improvements ▪ Schedule of Floor Area Measurements - Gross and Rentable Square Feet ▪ Previous Due Diligence or Building Component Reports, including, but not limited to, façade*, roof*, mechanical*, electrical, elevator, sprinkler, fire alarm or life safety equipment, or pavement. ▪ Copy of most Recent Appraisal

EBI Access Requirements

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.

_____
_____
_____
_____
_____

7. Does the property owner provide janitorial and cleaning services within the tenant's leased space (e.g., sweeping/vacuuming floors, cleaning bathrooms, emptying trashcans, etc.)?

YES X NO ☐ (If "yes", answer the remaining questions)

Are the janitorial and cleaning services of a kind that are usually and customarily offered or provided to tenants of similar class properties in the same geographic market in which the property is located? YES X NO ☐

Does the property owner contract with a cleaning company to provide the janitorial and cleaning services or do property employees provide such services? If provided by a cleaning company, please indicate the company's name. Yes, ABLE Janitorial Services

8. Does the property owner provide security services at the property?

YES X NO ☐ (If yes, answer the remaining questions)

Are the security services (including duties of the security personnel) of a kind that are usually and customarily offered or provided to tenants of similar class properties in the same geographic market in which the property is located? YES X NO ☐

confidential
Debra Bechtold
Feb 13, 2017 19:46

Are the security services provided for the general property, and not include specialized security services for a particular tenant? YES X NO ☐

9. Does the property owner provide parking spaces to its tenants (other than by net leasing the parking facilities to an unrelated person, who in turn, operates the parking facilities as part of its own business)?

YES X NO ☐ (If "yes", answer the remaining questions)

Check the box or boxes that describe the parking facilities (check more than one box if applicable):

- ☐ Open lot or garage (circle one) with no gated entry
- X Open lot or garage (circle one) with gated entry
- ☐ Open lot or garage (circle one) with gated entry and cashier / parking attendant on duty
- X Reserved parking
- X Public parking available for an hourly, daily or monthly charge

Are the parking facilities located in or adjacent to the property and are the parking facilities appropriate in size for the number of tenants and their guests, customers, and subtenants who are expected to use the facilities? YES X NO ☐

Does the property owner provide any services in connection with the parking facilities (other than maintenance, repair, and lighting of the facilities)? YES X NO ☐

If "yes", please explain. Car wash on-site 2 days per week. Operated by independent contractor.

Are the services provided in connection with the parking facilities of a kind that are usually and customarily offered or provided to tenants of similar class properties in the same geographic market in which the property is located? YES X NO ☐

Do tenants make separate payments for the use of parking spaces? YES X NO ☐

Are certain parking spaces reserved for use by particular tenants? YES X NO ☐

If "yes", are recurring functions unique to the reserved parking spaces (other than assigning and marking such spaces), such as towing illegally parked cars, performed by an independent contractor? YES X NO ☐

Are parking attendants provided at the parking facilities to facilitate parking by the general public for a parking fee? YES ☐ NO X

If "yes", are the parking attendants employed by an independent contractor who operates the parking facilities under a management agreement with the property owner? YES ☐ NO ☐

Are the services provided by the independent contractor usually and customarily offered or provided to tenants of similar class properties in the same geographic market in which the property is located? YES X NO ☐

If the independent contractor provides any services (other than maintenance, repairs, and cleaning of the parking facilities; collecting parking fees; parking cars to achieve the maximum capacity of the parking facility or for reasons of safety or security) please describe (e.g., indicate if the independent contractor provides for or arranges automobile detailing, washing, oil changes and repairs etc.). The independent contractor (ABM Parking) negotiates for off-site and event parking._____

Are these additional services provided by the independent contractor usually and customarily offered or provided to tenants of similar class properties in the same geographic market in which the property is located? YES X NO ☐

10. **Does the property owner provide any services within the tenant's leased space (other than janitorial and cleaning, overhead light bulb replacement, lock out / lock changing, and maintenance and repair of building systems which are addressed in previous questions)? For example, does the owner offer "handyman" type of services where a tenant can request that miscellaneous services be performed at an hourly rate or at cost-plus mark-up or other arrangement?**

YES ☐ NO X (If yes, answer the remaining questions)

Please describe the nature of the services provided, the billing arrangement and whether employees or independent contractors provide the services. _____

Are each of these services of a kind that are usually and customarily offered or provided to tenants of similar class properties in the same geographic market in which the property is located? YES X NO ☐

11. **Does the property owner arrange for the construction of capital improvements (i.e., leasehold improvements) to a tenant's leased space pursuant to a tenant's specifications?**

YES X NO ☐ (If "yes", answer the remaining questions.)

Are the owner's activities, as well as the activities of any independent contractor hired by the owner, of a type usually and customarily furnished, rendered, or arranged for by landlords in connection with the ownership, operation, and leasing of space in similar class properties located in the same geographic market where the property is located?
YES X NO ☐

Are the owner's activities limited to arranging, supervising, and coordinating the construction project, and do independent contractors perform all actual physical construction?
YES X NO ☐

confidential
Debra Bechtold
Feb 13, 2017 19:46

Does the owner receive any fees (e.g., supervisory fees) in connection with arranging for the construction of capital improvements? YES X NO ☐

If "yes", please explain the nature of the fees. Construction management fees of 3% are charged by the 3rd party property management company per the agreed upon Property management
contract._____
_____
_____
_____

Doe the owner participate in construction of tenant improvements at times other than in connection with the inception of a new lease or lease renewal? YES ☐ NO X
If "yes", please explain. _____
_____
_____
_____
_____
_____

12. **Has the property owner entered into agreements (generally a license or lease agreement) with telecommunication providers that permit the providers to wire the building and provide telecommunication services (e.g., telephone, cable, internet, data transmission, etc.) to tenants pursuant to which the property owner receives fees, or does the owner otherwise directly provide telecommunication services (specify which applies)?**

YES X NO ☐ (If "yes", answer the remaining questions)

If the owner directly provides telecommunication services to its tenants, please explain the arrangement. Phone / data / internet / telecommunications through AT&T or Level 3 Communications, LLC_____
_____
_____

Are the telecommunications services offered to the tenants of the type usually and customarily offered or provided to tenants of similar class properties located in the same geographic market in which the property is located?
YES ☐ NO ☐

13. **Does the property owner provide any "concierge" services (e.g., ordering food, running errands, making restaurant reservations, ordering theatre tickets, picking up dry cleaning, etc.) to the tenants?**

YES ☒ **NO** If "yes", please describe the type of concierge services provided and by whom (employees or independent contractor). _____

EBI Consulting
environmental | engineering | due diligence

Debra Bechtold
Senior Scientist
Los Angeles, CA
Office: 562.907.8148

SUMMARY OF EXPERIENCE

Ms. Bechtold is a senior scientist with over 20 years of professional due diligence experience. She has been involved in all aspects of performing phase i environmental assessments. She has experience in all phases of environmental assessments and remedial action including soil and groundwater characterization, remedial action plans, remediation oversight and UST investigations and removals. She has extensive experience in facilities-related services including asbestos and lead-based paint surveys, and radon testing.

Ms. Bechtold she has completed projects for commercial, financial, industrial, telecommunications and real estate management firms as well as for local and state governmental clients.

RELEVANT PROJECT EXPERIENCE

Ms. Bechtold performed and managed over 300 phase i environmental site assessment projects on industrial, commercial, residential, agricultural and undeveloped properties in connection with real estate transactions and telecommunications facilities. Duties included performing site and area reconnaissance, reviewing regulatory searches and researching site history, interviewing site managers/owner and identifying and evaluating potential environmental concerns.

Ms. Bechtold served as a project manager for the I-710 Brownfields study which consisted of 15 preliminary site assessments, 10 phase I environmental site assessments and an area study encompassing 14 city blocks consisting of over 200 parcels.

She has managed numerous subsurface investigations; including groundwater investigations, soil remediation projects involving soil excavation and disposal. Ms. Bechtold obtained regulatory closure for former gasoline service stations using natural attenuation modeling for impacted groundwater. She has directed the installation, operation and maintenance of soil vapor extraction remediation systems for sites impacted by volatile organic compounds (i.e., dry cleaners and industrial facilities).

EDUCATION

B.A., Geography, 1980, California State University – Long Beach

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Certificate in hazardous materials management, 1995,
OSHA/RCRA 40-hour hazardous waste operations and emergency response training
Asbestos Building Inspector, 40 CFR 763 sub e AHERA & TSCA Title II

Hallie A. Vitolo
Program Director
8119 Waterview Boulevard
Lakewood Ranch, FL 34202
Office/Mobile: 603.818.2750

SUMMARY OF EXPERIENCE

MS. VITOLO HAS OVER 25 YEARS OF EXPERIENCE IN THE ENVIRONMENTAL CONSULTING INDUSTRY. SHE HAS CONDUCTED NUMEROUS SITE ASSESSMENTS, EXTENSIVE SUBSURFACE INVESTIGATIONS AND REMEDIAL DESIGN AND INSTALLATION WORK ON BOTH OIL AND CHEMICAL WASTE SITES. HER WORK WITH STATE REGULATORY AGENCIES TO NEGOTIATE REASONABLE CLEANUP SOLUTIONS AND EXPERIENCE WITH ALTERNATIVE ENVIRONMENTAL INSURANCE COVERAGE HAS ENABLED MS. VITOLO TO ASSIST LARGE PORTFOLIO CLIENTS TO FIND WAYS TO BETTER ASSESS AND MINIMIZE LONG-TERM LIABILITY. SHE HAS PROVEN KNOWLEDGE OF REALISTIC REMEDIATION COSTS AND PERFORMANCE BASED ON MANY YEARS WORK AS AN ENVIRONMENTAL CONSTRUCTION PROJECT MANAGER.

MS. VITOLO HAS WORKED IN THE DUE DILIGENCE INDUSTRY FOR OVER 10 YEARS AND HAS CONDUCTED TECHNICAL REVIEW OF THOUSANDS OF PHASE I ENVIRONMENTAL SITE ASSESSMENTS THROUGHOUT THE UNITED STATES. SHE HAS WORKED WITH NUMEROUS WALL STREET LENDING INSTITUTIONS, LEGAL COUNSEL AND GOVERNMENT AGENCIES TO DEVELOP STRATEGIES FOR MANAGING ENVIRONMENTAL LIABILITY IN THE REAL ESTATE INDUSTRY.

RELEVANT PROJECT EXPERIENCE

ENVIRONMENTAL SITE ASSESSMENTS: MS. VITOLO HAS CONDUCTED TECHNICAL REVIEW OF THOUSANDS OF ASTM PHASE I ENVIRONMENTAL SITE ASSESSMENTS FOR INDUSTRIAL, COMMERCIAL, RETAIL, HEALTHCARE, RAW LAND, MULTI-FAMILY RESIDENTIAL PROPERTIES AND TELECOMMUNICATION SITES. SHE IS FAMILIAR WITH FANNIE MAE, FREDDIE MAC, SBA, FDIC AND NUMEROUS LENDER-SPECIFIC REQUIREMENTS.

SUBSURFACE INVESTIGATIONS: MS. VITOLO HAS COMPLETED SUBSURFACE INVESTIGATIONS AT COMMERCIAL PROPERTIES ACROSS THE UNITED STATES. SHE HAS OVERSEEN DRILLING ACTIVITIES, BORING INSTALLATION, SOIL AND GROUNDWATER SAMPLING, REMEDIAL PILOT STUDIES, TANK REMOVALS, CONTAMINATED SOIL REMOVAL PROJECTS AND REMEDIAL SYSTEM INSTALLATIONS. SHE HAS WORKED WITH REGULATORY AGENCIES TO EVALUATE REMEDIAL STRATEGIES AND RISK AND HAS SUCCESSFULLY CLOSED NUMEROUS SITES.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

1960 EAST GRAND AVENUE
EL SEGUNDO, CA 90245

COORDINATES

Latitude (North):	33.9193230 - 33° 55' 9.56''
Longitude (West):	118.3933500 - 118° 23' 36.06''

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/10/2016 has revealed that there

are 6 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/12/2016 has revealed that there are 5 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/12/2016 has revealed that there are 4 RCRA-TSDF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/12/2016 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/12/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 23 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Records of Emergency Release Reports

CA CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CA CHMIRS list, as provided by EDR, and dated 09/26/2016 has revealed that there are 6 CA CHMIRS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

CA RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

A review of the CA RGA LF list, as provided by EDR, has revealed that there are 2 CA RGA LF sites within approximately 0.5 miles of the target property.

CA RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the CA RGA LUST list, as provided by EDR, has revealed that there are 16 CA RGA LUST sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE

RAYTHEON COMPANY (Continued) **1015732613**

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 27150

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 12650

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Corrective Action Summary:

Event date: 09/07/1991
Event: CA029WQ

Event date: 09/07/1991
Event: CA049PA

Event date: 09/07/1991
Event: RFA Completed

Event date: 09/07/1991
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 01/24/1992
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 01/24/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 03/19/2012
Event: RFI Workplan Received

Event date: 06/28/2012
Event: RFI Workplan Approved

Event date: 06/25/2013
Event: RFI Supplemental Implementation Begun

Event date: 03/24/2015
Event: RFI Report Received

Event date: 05/29/2015

RAYTHEON COMPANY (Continued) **1015732613**

Event: RFI Approved

Event date: 09/21/2015
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Description: SUMP OVERFLOWED

WDS:
Facility ID: Los Angeles River 196000415
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAG994005 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 4
Facility Telephone: 6264586303
Facility Contact: Ed Gerlits
Agency Name: LA CO DEPT OF PUBLIC WORKS
Agency Address: Not reported
Agency City,St,Zip: 0
Agency Contact: Not reported
Agency Telephone: Not reported
Agency Type: County
SIC Code: 9999
SIC Code 2: Not reported
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: MISCEL
Waste Type2: Not reported
Waste2: Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type)
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: 0
Complexity: Not reported

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No

NORTHROP CORP AIRCRAFT DIV (Continued) **1000409954**

Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 04/28/1992
Site name: NORTHROP CORP/AIRCRAFT DIV
Classification: Large Quantity Generator

Date form received by agency: 04/12/1990
Site name: NORTHROP CORPORATION AIRCRAFT DIV
Classification: Large Quantity Generator

Date form received by agency: 08/18/1980
Site name: NORTHROP CORP AIRCRAFT DIV
Classification: Not a generator, verified

Corrective Action Summary:
Event date: 01/01/1990
Event: CA029ST

Event date: 06/06/1990
Event: CA074LO

Event date: 06/06/1990
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 09/24/1996
Comments: Preliminary Assessment completed under U.S. EPA grant. Site is no further assessment for U.S. EPA. However, DTSC requires a Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/25/1995
Comments: The Department received a hazardous substace release report. The site had a waste leak from a plating line and acidic aqueous waste left metal contamination in the soil. Due to evidence of contamination, the Department recommends a PEA. The Department notified the RP that a PEA be conducted.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 33204

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

HUGHES AIRCRAFT CO RADAR SYSTEM (Continued) **1015730700**

USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

CA BOND EXP. PLAN:
Reponsible Party: FEDERAL FACILITY SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: The Department will either enter into an interagency agreement with the Department of Defense or will issue an order. The Department has budgeted $15,000 for oversight/monitoring costs. DHS will seek 100 percent cost recovery for its direct costs plus staff costs and overhead related to the project. The Department of Defense is expected to fund all remedial investigation and cleanup activities.
Site Description: The Fort McArthur site is a former nike missile base located in the White's Point area of San Pedro. The Army transferred the site to the Air Force for housing and the Air Force transferred part of the site to the City of Los Angeles for a park. Thesite is located at 25th Street and Western Avenue in San Pedro.
Hazardous Waste Desc: Ninety-six acres of the original 561-acre complex remain under Air Force control. The remaining properties were disposed of as surplus. An initial assessment study was performed on the active ninety-six acres of Fort McArthur. Nine acres of potential contamination were identified. Only two areas are recommended by the Air Force for further site characterization. Released wastes include pesticides and battery acids.
Threat To Public Health & Env: Residues of hazardous wastes in the soil are the only identified environmental threat. Ground water is intruded by seawater and is unsuitable at this time for use as a drinking water supply. There is no known exposure at this time.

FORT MCARTHUR (Continued) **S100833329**

Site Activity Status: The installation restoration program (IRP) has been initiated at this base. Currently, the program is in the operations/remedial action phase of the mitigation process.

201 N. DOUGLAS PROPERTY (Continued) **S108200735**

Comments:	On November 6, 2012, DTSC conducted a PEA Scoping Meeting with the Wiseburn School District; in addition, representatives for the current propety owner and potential future property owner were in attendance. DTSC received a total of 13 documents/reports (electronic format) of existing Site data/information (1996 to 2012). The District indicated it will provide DTSC a letter indicating that the Existing Data will be considered as a PEA Equivalent Report and submit a PEA Workplan.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	01/16/2013
Comments:	DTSC determined that a response action, to include methane mitigation through the removal action workplan process, is required for the Site. Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Workplan
Completed Date:	11/27/2012
Comments:	On November 27, 2012, DTSC conditionally approved the PEA Workplan provided specific comments be implemented and/or addressed during PEA fieldwork and in the PEA Report.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Other Report
Completed Date:	01/31/2013
Comments:	On January 31, 2013, DTSC provided comments on the Draft Environmental Impact Report.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Community Profile
Completed Date:	07/01/2013
Comments:	DTSC approved the Community Profile, which describes the community and identifies potential community concerns regarding Site activities. Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Other Report
Completed Date:	04/10/2013
Comments:	Via email on April 10, 2013, DTSC was informed that the Notice of Determination for the Environmental Impact Report (EIR) was filed with the County Clerk's office on March 22, 2013 and mailed to the State Clearinghouse. The FINAL EIR (SCH No. 2011061056), certified on March 21, 2013, is comprised of the following documents: 1) FINAL EIR, dated March 2013; 2) DRAFT EIR, dated January 2013; 3) ADDENDUM TO FINAL EIR (i.e., DTSC's comment letter, dated January 31, 2013, on the Draft EIR; and The Planning Center's response letter, dated March 11, 2013, to DTSC's comments).
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan

201 N. DOUGLAS PROPERTY (Continued) **S108200735**

Completed Date: 09/05/2013
Comments: On September 5, 2013, DTSC approved the Removal Action Workplan for implementation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 07/18/2013
Comments: On July 18, 2013 and July 19, 2013, the Community Notice was distributed via US mail and e-mail. The Community Notice provided information on the Site history, proposed methane mitigation system, and 30-day public comment period (July 22 through August 20).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 4.15 Request
Completed Date: 07/17/2013
Comments: On July 17, 2013, DTSC signed the SFPD 4.15 Form documenting the commitment of the District and DTSC to California Department of Education to complete the required response action prior to project occupancy.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 8058

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 36850

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Corrective Action Summary:

Event date: 01/01/1990
Event: CA029ST

Event date: 02/27/1991
Event: CA029EP

Event date: 02/27/1991
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 02/27/1991
Event: CA049PA

Event date: 06/01/1992
Event: RFA Completed, Assessment was an RFA.

Event date: 08/14/1992
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 08/14/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 09/21/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 06/13/2013
Event: Current Human Exposures under Control, Yes, Current Human Exposures

THE BOEING COMPANY (Continued) **1000240982**

Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 06/24/2013
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 75478

Waste code: D002

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 67278

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 03/27/1992
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 03/27/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
