Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/20/1991
Comments: Tetra Tech submitted a preliminary endangerment assessment (environmental assessment) report to the Dept prepared for the rail construction corporation which plans to build a portion of the Los Angeles County Transportation Commission Metro Green Line Project across the identified haz waste property of H. Kramer facility. Tetra Tech provided the proposed construction plan in the PEA. The RP paid the PEA fees to the Dept. PEA was completed. PEA concluded that the site should be referred to U.S. EPA for further action because it is currently on CERCLIS. Currently, EPA is the lead agency for further action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/03/1991
Comments: Sample Results: Slag Pile = PB 2500 mg/kg, CU 53800, BE 230, ZN 76000, AS 17, PB WET 259; Soil = AS 2800 mg/kg, BE 18, CU 1700, PB 420, ZN 76; Groundwater = AS 140 mg/kg, CR6 .23, SE .24, PCE 200 ug/l, TCE 370, Toluene 270, Xylene 300, Carbon Tet 43 (from ENSR Report to EPA, February 1990). Site Screening Done: Site is a brass foundry contaminated w/ AS, PB, ZN, CU. Possible Asbestos in furnace area. Slag pile is primary source. Previous Company had evaporation pond. AS & Solvents in groundwater probably from pond. Pond is now filled with slag.

Case Type:	Cleanup Program Site
Case Worker:	NA
Local Agency:	Not reported
RB Case Number:	0425
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Not reported
Site History:	H. Kramer & Company operated a brass foundry at the Site from 1951 through mid-1985. Slag generated from site operations was disposed in a waste pile, filling. Operations by a previous owner, Harshaw Chemical Company (Harshaw), included the smelting of antimony. Harshaw generated wastes containing heavy metals, which included arsenic. With the exception of the building foundations in the southwest portion of the Site, all structures have been demolished. Regional Board issued Cleanup and Abatement Order No. 92-094 (CAO). The CAO stated the following: The concrete /asphalt cap was selected as remedy and installed at the Site in 1995 to eliminate the direct contact pathways and to minimize infiltration of surface water into the subsurface soil.Case was closed conditionally in 1995. Site is under post remediation long term monitoring program. However, based on the available data, Regiona Bord staff asked H. Kramer to conduct additional Investigation to find another source of VOCs. New investigation (June 2009) data indicates another VOCs offsite groundwater (from up-gradient [north of the site]) plume may contributed to the onsite groundwater. Aditional groundwater investigation is required by RP.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/05/2016

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 08/05/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/12/2016
Date Data Arrived at EDR: 09/28/2016

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/12/2016

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

East Map:	5640440 INGLEWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

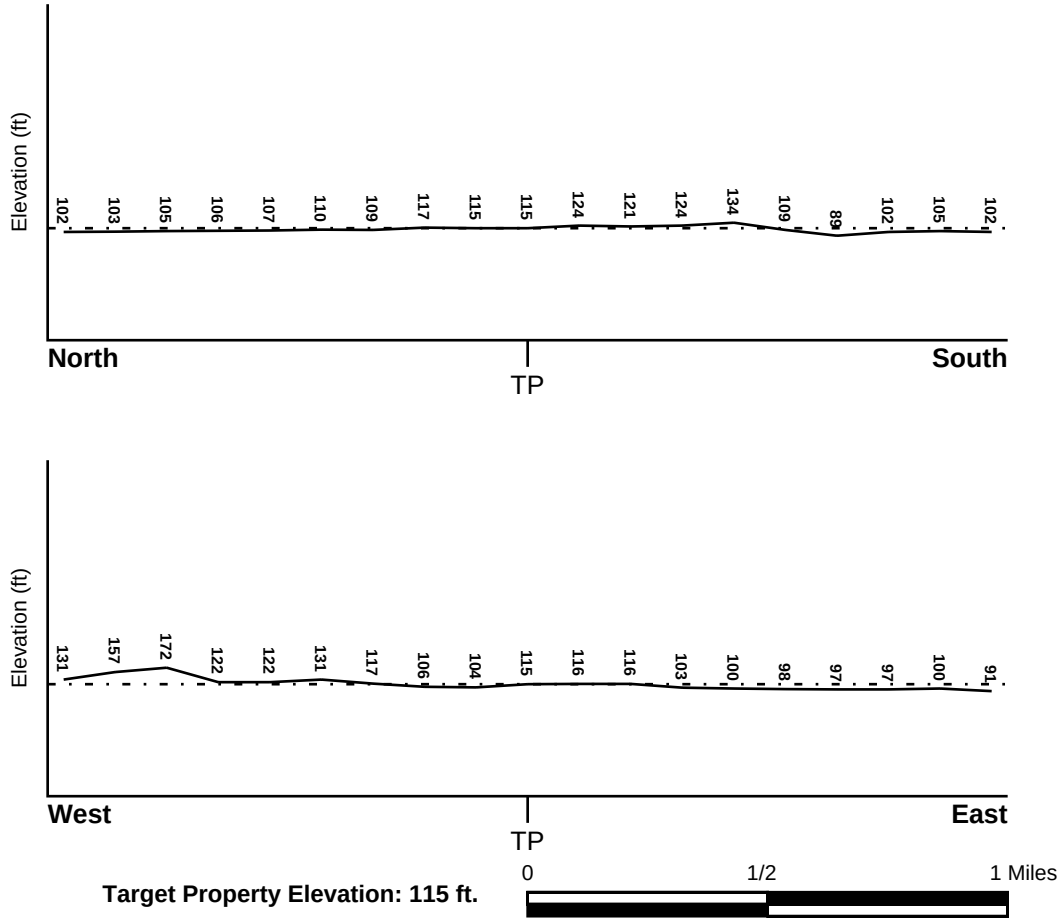
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile West
Site Name:	International Rectifier
Site EPA ID Number:	CAD076208313
Groundwater Flow Direction:	West
Inferred Depth to Water:	80 feet.
Hydraulic Connection:	Aquifers underlying the site are interconnected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	DELHI
Soil Surface Texture:	sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	10 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
2	10 inches	30 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
3	30 inches	50 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
4	50 inches	70 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand
clay

Surficial Soil Types: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand

clay

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay loam
sandy clay

Deeper Soil Types: coarse sand
silty clay loam
gravelly - fine sandy loam
stratified
gravelly - sandy loam
weathered bedrock
clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The use of this material is subject to the terms of a license agreement. You will be held liable for any unauthorized copying or disclosure of this material.

This Report contains certain products owned by or licensed by Tele Atlas North America, Inc. ("TANA") and licensed to EDR pursuant to an agreement between EDR and TANA (the "TANA Agreement"). Such products include the Dynamap® /2000 (commencing with the most current version, nationwide coverage, ArcInfo™ format, tiled by county, with semi−annual Updates) and are referred to in this Report as the "Licensed Products".

The use of the Licensed Products with a non−TANA map may result in increased variance between the location displayed on the map and ground truth location.

The recipient of the Report (hereinafter referred to as an "End User") shall use such Report solely for its internal purposes and not for resale.

U.S. GOVERNMENT RIGHTS. If End User is an agency, department, or other entity of the United States Government, or funded in whole or in part by the United States Government, then use, duplication, reproduction, release, modification, disclosure or transfer of this commercial product and accompanying documentation, is restricted in accordance with the LIMITED or RESTRICTED rights as described in DFARS 252.227−7014(a)(1) (JUN 1995) (DOD commercial computer software definition), DFARS 227.7202−1 (DOD policy on commercial computer software), FAR 52.227−19 (JUN 1987) (commercial computer software clause for civilian agencies), DFARS 252.227−7015 (NOV 1995) (DOD technical data − commercial items clause); FAR 52.227−14 Alternates I, II, and III (JUN 1987) (civilian agency technical data and noncommercial computer software clause); and/or FAR 12.211 and FAR 12.212 (commercial item acquisitions), as applicable. In case of conflict between any of the FAR and DFARS provisions listed herein, the construction that provides greater limitations on the Government's rights shall control. Contractor/manufacturer is Tele Atlas North America, Inc., 11 Lafayette Street, Lebanon, NH 03766−1445. Phone: 603.643. 0330. The Licensed Products are ©1984−2008 by Tele Atlas North America, Inc. ALL RIGHTS RESERVED. For purpose of any public disclosure provision under any federal, state or local law, it is agreed that the Licensed Products are a trade secret and a proprietary commercial product and not subject to disclosure.

If End User is an agency, department, or other entity of any State government, the United States Government or any other public entity or funded in whole or in part by the United States Government, such End User agrees to protect the Licensed Products from public disclosure and to consider the Licensed Products exempt from any statute, law, regulation, or code, including any Sunshine Act, Public Records Act, Freedom of Information Act, or equivalent, which permits public access and/or reproduction or use of the Licensed Products. In the event that such exemption is challenged under any such laws, any and all right to retain any copies or to use of the Licensed Products shall be terminated and considered immediately null and void. Any copies of the Licensed Products held by End User shall immediately be destroyed. If any court of competent jurisdiction considers this clause void and unenforceable, in whole or in part, for any reason, then all Licensed Products previously delivered to End User will be destroyed.

Mr. Luke Marchand
TA Realty
28 State Street, 10th Floor
Boston, MA 02109

Subject: Phase I Environmental Site Assessment
Grand Avenue Courtyard
1960 East Grand Avenue, El Segundo, California
EBI Project No. 1116005380

Dear Mr. Marchand:

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you. This report has been completed in general conformance with the ASTM Standard E 1527-13.

The exclusive purpose of this *Phase I Environmental Site Assessment* (the *Report*) is to observe the general physical condition and maintenance status of the property, to suggest repair or maintenance items considered customary for the property to continue in its current operation compared to properties of similar age and condition, and to assist *TA Realty,* in its pre-sale effort in evaluating their Property.

This *Report* was performed utilizing methods and procedures consistent with established commercial practices and in conformance with industry standards. The suggestions represent EBI's opinion based on written, graphic or verbal information, the property condition and data available to us at the time of the survey. Factual information regarding operations, conditions or data provided by the Client, occupants, owner or their representative has been assumed to be correct and complete.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to *TA Realty*. Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,
EBI CONSULTING

EXECUTIVE SUMMARY

At the request of TA Realty, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 1960 East Grand Avenue in El Segundo, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes two contiguous rectangular parcels, cumulatively totaling approximately 5.37 acres. The Subject Property is currently improved with a 12-story, multi-tenant office building, with a gross area of approximately 193,000± square feet. There is no basement present beneath the existing structure. The existing improvements were reportedly constructed in 1987.

At the time of assessment, the Subject Property was occupied by 69 office tenants. Nine vacant tenant spaces were identified at the time of assessment. There are currently no manufacturing or industrial operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

1.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 1960 East Grand Avenue in El Segundo, California.

1.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

1.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water and radon.

1.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of TA Realty, in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by TA Realty (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of *ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit TA Realty to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record

sources and interviews with authorities having jurisdiction over the Subject Property. TA Realty agrees that EBI has no obligation to verify independently the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI Services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

1.4 SPECIAL TERMS AND CONDITIONS

The exclusive purpose of this Phase I Environmental Site Assessment (the *Report*) is to observe the general physical condition and maintenance status of the property, to suggest repair or maintenance items considered customary for the property to continue in its current operation compared to properties of similar age and condition, and to assist TA Realty, in its pre-sale effort in evaluating their Property. Amendments to EBI's limitations as stated herein that may occur after issuance of the *Report* are considered to be included in this *Report.* EBI's liability to a purchaser wishing to use this *Report* is limited to the cost of the *Report*. By accepting draft and final *Reports*, TA Realty agrees to these terms and limitations.

1.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Los Angeles County Assessor's Office, the Subject Property is currently owned by Realty Associates IX LP.

The Subject Property is located at 1960 East Grand Avenue in El Segundo, Los Angeles County, California. The Subject Property includes two contiguous rectangular parcels, identified by the El Segundo, California Assessor's Office as Map 4138, Parcel 7, Lot 65, and Map 4138, Parcel 7, Lot 66, cumulatively totaling approximately 5.37 acres. The Subject Property is located approximately 540 feet east of the intersection of East Grand Avenue and Sepulveda Boulevard. Figure 1 - Location Map depicts the location of the Subject Property on a street map of El Segundo, California. Figure 2 - Locus Map depicts the location of the Subject Property on the *Venice, California* United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is currently improved with a 12-story, multi-tenant office building, with a gross area of approximately 193,000± square feet. There is no basement present beneath the existing structure. The existing improvements were reportedly constructed in 1987.

The existing building is located on the eastern portion of the property. Areas of the Subject Property surrounding the existing building include the following: one 11-story parking garage with two subterranean levels, located on the southwestern portion of the Subject Property; asphalt-paved surface parking, located along the north, east, and west sides of the building; concrete walkways, located throughout the Subject Property; and landscaping surrounding the building. Land and building areas are as follows:

SUBJECT PROPERTY IMPROVEMENTS					
Address	**Floors**	**Basement**	**Area (SF)**	**DOC**	**Lot Size (Acres)**
1960 East Grand Avenue	12	No	193,000	1987	5.37
Parking Garage	11	Yes	246,126	1987	Inclusive

SF: Gross Square Feet
DOC: Date of Construction

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of assessment, the Subject Property was occupied by 69 office tenants. Nine vacant tenant spaces were identified at the time of assessment. There are currently no manufacturing or industrial operations conducted at the Subject Property. EBI was not provided with a copy of the most recent tenant list.

Please refer to Section 5.2 for further discussion regarding hazardous substances and petroleum products at the Subject Property.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	**Provider/Source**
Potable Water Supply	City of El Segundo
Sewage Disposal System	City of El Segundo
Electrical Service	Edison
Natural Gas Service	Southern California Gas
Oil Service	None
Heating/Cooling Systems	Natural gas water heaters located in the rooftop mechanical penthouse deliver heated water to VAV boxes above the tenant ceiling spaces and an electric cooling tower supplies cooled air VAV boxes above the tenant ceiling spaces.
Emergency Power	One diesel-fired emergency generator with a self-contained fuel tank

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by retail/commercial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by East Grand Avenue, beyond which is Mattel (1955 East Grand Avenue) and a multitenant office complex (300 North Sepulveda Boulevard).
South	The Subject Property is bound to the south by an under-construction commercial development (101 Continental Boulevard).
East	The Subject Property is bound to the east by multitenant commercial structures (1990 East Grand Avenue and 201 Continental Boulevard).
West	The Subject Property is bound to the west by a parking garage (222 North Sepulveda Boulevard).

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties. The adjacent property to the northeast, 1955 East Grand Avenue, is identified as a RCRA generator of hazardous waste, a Historic CORTESE site, a LUST site, and a UST site. The adjacent property to the east, 1990 East Grand Avenue, is identified as a Historic CORTESE site, and LUST site, and a UST site. These sites are further discussed in Section 4.1.1 and 4.1.2.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by TA Realty with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. Relevant documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by TA Realty. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

TA Realty has provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

TA Realty provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

TA Realty has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

TA Realty has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

TA Realty provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

TA Realty retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in Appendix E.

The database report identified five "orphan sites". Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**
Federal NPL Sites	1.0 mile	No	0

4.1.1 Federal Agency Database Records

National Priority List (NPL)
The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)
SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS database.

SEMS – ARCHIVE
SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was

removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. The Subject Property was not identified on the SEMS-ARCHIVE database. However, six sites located within 0.5 mile of the Subject Property were identified on the SEMS-ARCHIVE database. Information regarding the listed sites is presented in the following table:

SEMS-ARCHIVE			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Raytheon Company 2000 E El Segundo Blvd El Segundo, CA 90245	1,382 feet/ Southeast/ Crossgradient	CAD000633230	Discovery: 05/21/1991 Preliminary Assessment: 09/12/1991 Status: SEMS-ARCHIVE
Allied Sales & Salvage 160 S Sepulveda Blvd El Segundo, CA 90245	1,875 feet/ South-southwest/ Crossgradient	CAD063821789	Discovery: 05/01/1986 Preliminary Assessment: 01/01/1987 Status: SEMS-ARCHIVE
International Rectifier 233 Kansas Street El Segundo, CA 90245	1,953 feet/ West-northwest/ Crossgradient	CAD076208313	Discovery: 08/23/1995 Preliminary Assessment: 09/24/1996 Status: SEMS-ARCHIVE
Northrop Corp Aircraft Div 2043 E Mariposa Avenue El Segundo, CA 90245	1,996 feet/ Northeast/ Crossgradient	CAD000627216	Discovery: 05/08/1990 Preliminary Assessment: 06/06/1990 Status: SEMS-ARCHIVE
Devlin Pharmaceuticals Inc 700 N Sepulveda Blvd El Segundo, CA 90245	2,253 feet/ North-northwest/ Crossgradient	CAD981373848	Discovery: 02/01/1986 Preliminary Assessment: 05/01/1986 Status: SEMS-ARCHIVE
Hughes Aircraft Co Radar System 2060 E. Imperial Hwy. El Segundo, CA 90245	2,578 feet/ North-northeast/ Crossgradient	CAT080010853	Discovery: Not reported Preliminary Assessment: Not reported Status: SEMS-ARCHIVE

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, the separating distance/presumed hydrogeologic gradient relative to the Subject Property, and/or the reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified SEMS-ARCHIVE facilities represent an environmental concern to the Subject Property.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. The Subject Property was not identified on the RCRA CORRACTS database. However, five sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database. Information regarding the listed sites is presented in the following table:

RCRA-CORRACTS			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Raytheon Company 2000 E El Segundo Blvd El Segundo, CA 90245	1,382 feet/ Southeast/ Crossgradient	CAD000633230	(1) Violation: 01/24/1992 Date of Compliance: Not reported
Northrop Corp Aircraft Div 2043 E Mariposa Avenue El Segundo, CA 90245	1,996 feet/ Northeast/ Crossgradient	CAD000627216	(1) Violation: 06/06/1990 Date of Compliance: Not reported
The Boeing Company 1920 E. Imperial Hwy El Segundo, CA	4,030 feet/ North/ Crossgradient	CAD060897063	(1) Violation: 02/27/1991 Date of Compliance: Not reported (1) Violation: 08/14/1992 Date of Compliance: Not reported
Rockwell International 815 Lapham St El Segundo, CA 90245	4,224 feet/ Northeast/ Crossgradient	CAD097855126	(1) Violation: 12/03/1993 Date of Compliance: Not reported
Bldg. 902 500 N Douglas St El Segundo, CA 90245	4,651 feet/ East-northeast/ Crossgradient	CAD000627273	(1) Violation: 05/21/1990 Date of Compliance: Not reported (1) Violation: 03/27/1992 Date of Compliance: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified RCRA-CORRACTS facilities represent an environmental concern to the Subject Property.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). The Subject Property was not identified on the RCRA non-CORRACTS TSD database. However, four sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database. Information regarding the listed sites is presented in the following table:

RCRA NON-CORRACTS TSD			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Raytheon Company 2000 E El Segundo Blvd El Segundo, CA 90245	1,382 feet/ Southeast/ Crossgradient	CAD000633230	(1) Violation: 06/22/2006 Date of Compliance: 07/21/2006 (6) Violations: 04/27/2000 Date of Compliance: 09/06/2002 (4) Violations: 08/16/1994 Date of Compliance: 10/14/1994 (3) Violations: 01/25/1994 Date of Compliance: 02/28/1994 (1) Violation: 11/22/1991 Date of Compliance: 01/06/1994 (2) Violations: 08/05/1991 Date of Compliance: 11/18/1991 (2) Violations: 09/06/1989 Date of Compliance: 01/06/1994 (2) Violations: 09/06/1989 Date of Compliance: 11/18/1991
Northrop Corp Aircraft Div 2031 E Mariposa Ave El Segundo, CA 90245	1,769 feet/ North-northeast/ Crossgradient	CAD009687336	(1) Violation: 06/26/1987 Date of Compliance: 09/15/1988 (1) Violation: 01/13/1987 Date of Compliance: 08/03/1987
Northrop Corp Aircraft Div 2043 E Mariposa Avenue El Segundo, CA 90245	1,996 feet/ Northeast/ Crossgradient	CAD000627216	(2) Violations: 05/18/1989 Date of Compliance: 08/17/1989
Hughes Aircraft Co Radar System 2060 E. Imperial Hwy. El Segundo, CA 90245	2,578 feet/ North-northeast/ Crossgradient	CAT080010853	(1) Violation: 06/28/2006 Date of Compliance: 07/21/2006 (1) Violation: 05/03/1995 Date of Compliance: 01/01/1996 (2) Violations: 12/09/1991 Date of Compliance: 01/09/1992 (1) Violation: 05/13/1988 Date of Compliance: 05/13/1988 (1) Violation: 03/22/1988 Date of Compliance: 03/22/1988 (1) Violation: 12/12/1985 Date of Compliance: 01/01/1986 (1) Violation: 05/09/1984 Date of Compliance: 01/01/1985

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of open violations and/or the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified RCRA NON-CORRACTS TSD facilities represent an environmental concern to the Subject Property.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous

waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. The Subject Property and one adjoining property were identified on the RCRA Generator database. Information regarding the listed sites is presented in the following table:

RCRA GENERATORS			
Site	**Distance / Direction / Gradient***	**EPA ID No.**	**Regulatory Status**
Team One Advertising 1960 East Grand Ave Suite E El Segundo, CA 90245	Subject Property	CAD982504094	No violations found
Mattel Inc 1955 E Grand Ave El Segundo, CA 90245	Adjacent/ North-northeast/ Crossgradient	CAD983655804	No violations found

* Presumed hydrogeologic gradient based upon regional topography

One former occupant of the Subject Property, Team One Advertising, was listed RCRA-SQG of hazardous waste. According to Mr. Don McCurry, Facility Engineer, Team One Advertising was a marketing firm occupying office space in the building. Based upon information presented in the environmental database report, Team One Advertising formerly generated between 100 Kg and 1,000 Kg of hazardous waste per month, although the nature of the waste is not identified in the environmental database report. No violations were reported for Team One Advertising. Based upon the absence of reported violations associated with this listing, the decommissioning of this facility, and the site conditions observed at the time of EBI's reconnaissance, the former RCRA-SQG database listing for Team One Advertising is not considered to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property.

Based upon the absence of reported violations and the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified RCRA Generator facility represent an environmental concern to the Subject Property.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

Facility Index System/Facility Registry System (FINDS)
FINDS is a centrally managed database by the USEPA that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The database provides information regarding environmental activities that may affect air, water, and land in the United States. It is usually a cross-reference to other sources/databases that contain more detail. The Subject Property was identified on the FINDS database. Information regarding the Subject Property is presented in the following table:

FINDS SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Environmental Interest/ Information System**
Team One Advertising 1960 East Grand Ave Suite E El Segundo, CA 90245	Subject Property	110002835175	RCRAInfo

* Presumed hydrogeologic gradient based upon regional topography

The Subject Property is listed on the RCRAInfo, a national information system supporting the TCRA program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. The Subject Property does not appear on any FINDS systems that report known or suspected contamination, and no additional action or investigation regarding these listings is recommended.

Enforcement & Compliance History Information (ECHO)
ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. The Subject Property was identified on the ECHO database. Information regarding the Subject Property is presented in the following table:

ECHO SITES			
Site	**Distance / Direction / Gradient***	**ID No.**	**Regulatory Status**
Team One Advertising 1960 East Grand Ave Suite E El Segundo, CA 90245	Subject Property	110002835175	Current Compliance Status: No violation

* Presumed hydrogeologic gradient based upon regional topography

One former occupant of the Subject Property, Typographic House, Inc., was identified on the ECHO database. Based upon the absence of reported violations, the absence of current violations, the decommissioning of this facility, and the conditions observed at the time of EBI reconnaissance, it is considered unlikely that conditions associated with the Subject Property ECHO listing represent an environmental concern to the Subject Property.

4.1.2 State and Tribal Agency Database Records

Annual Workplan Sites (AWP)
The California Department of Toxic Substance Control (DTSC) Annual Workplan Sites (AWP) identifies known hazardous substance release sites targeted for cleanup. The data source is the California Environmental Protection Agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the AWP database.

California High-Priority Confirmed Release Sites (RESPONSE)

The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in the remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RESPONSE database.

California Hazardous Waste Sites (ENVIROSTOR)

The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Subject Property was not identified on the ENVIROSTOR database. However, 20 sites located within 1.0 mile of the Subject Property were identified on the ENVIROSTOR database. Of the listed sites, 19 sites are located greater than 0.25 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these 19 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. Information regarding the SHWS sites located within 0.25 mile of the Subject Property is presented in the following table:

ENVIROSTOR			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Raytheon Space and Airborne Systems 2000 E El Segundo Blvd El Segundo, CA 90245	1,113 feet/ South/ Crossgradient	80001335	Notification Date: Not reported Contaminants: 1,1,1-Trochloroethane Media Impacted: Soil Status: Active Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, the separating distance/presumed hydrogeologic gradient relative to the Subject Property, and/or the reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified ENVIROSTOR Sites represent an environmental concern to the Subject Property.

Cal-Sites/HIST Cal-Sites

Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control (DTSC). This database is no longer updated by the state agency. It has been replaced by ENVIROSTOR. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Cal-Sites/HIST Cal-Sites databases.

Proposition 65 Notification Records (Notify 65)

Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. The Notify 65 database includes listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Notify 65 database.

Toxic Pits Cleanup Act Sites (Toxic Pits)

The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Toxic Pits database.

California Bond Expenditure Plan

The California Bond Expenditure Plan was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds. The Subject Property was not identified on the California Bond Expenditure Plan database. However, one site located within 1.0 mile of the Subject Property was identified on the California Bond Expenditure Plan database. Information regarding the listed site is presented in the following table:

CALIFORNIA BOND EXPENDITURE PLAN			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Fort McArthur 200 North Douglas Street, Bldg. 212 San Pedro, CA 90245	3,106 feet/ East/ Upgradient	Not reported	Notification Date: Not reported Contaminants: Not reported Media Impacted: Soil Status: IRP Initiated Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

Based upon the separating distance/presumed hydrogeologic gradient relative to the Subject Property and/or the reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified Toxic Pits site represent an environmental concern to the Subject Property.

Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)

The Hazardous Waste and Substance Site List (also known as the Cortese/HIST Cortese databases) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California DTSC is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese/HIST Cortese databases. The Subject Property was not identified on the Cortese/HIST Cortese databases. However, 13 sites located within 0.5 mile of the Subject Property were identified on the Cortese/HIST Cortese databases. Of the listed sites, nine sites are located greater than 0.25 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these nine sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. Information regarding the SHWS sites located within 0.25 mile of the Subject Property is presented in the following table:

CORTESE/HIST CORTESE			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Mattel Inc 1955 E Grand Ave El Segundo, CA 90245	Adjacent/ North-northeast/ Crossgradient	902450089	Notification Date: 12/31/1997 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 02/02/1998
Hughes Aircraft Co CSG 1990 Grand Ave E El Segundo, CA 90245	Adjacent/ East/ Upgradient	R-13532	Notification Date: 08/19/1996 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 08/19/1996
Jim & Jack Auto Body 307 Sepulveda Blvd N El Segundo, CA 90245	936 feet/ West-northwest/ Crossgradient	I-13092	Notification Date: 10/02/1989 Contaminants: Waste oil/motor/hydraulic/lubricating Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 10/08/1992
Hughes Aircraft Company 2000 El Segundo Blvd E El Segundo, CA 90245	1,113 feet/ South/ Crossgradient	R-10917X	Notification Date: 01/14/1986 Contaminants: Solvents Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 07/22/1996

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of open violations and/or the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified Cortese/HIST Cortese facilities represent an environmental concern to the Subject Property.

Spill, Leaks, Investigations, and Cleanup (SLIC)

The Spills, Leaks, Investigations, and Cleanups (SLIC) database, maintained by the California Water Resources Control Board, includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites. The Subject Property was not identified on the SLIC database. However, three sites located within 0.5 mile of the Subject Property were identified on the SLIC database. Information regarding the listed sites is presented in the following table:

SLIC			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
West Coast Barrier Proj 9 E Segundo Blvd El Segundo, CA 90245	1,842 feet/ Southwest/ Crossgradient	SL599992902	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Completed – Case Closed Date of Closure: 08/30/2002
Int Rectifier Corp El Segundo 233 Kansas St El Segundo, CA 90245	2,241 feet/ West/ Downgradient	SL184571440	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Completed – Case Closed Date of Closure: 02/27/1997

SLIC			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
International Rectifier Corp. 233 Kansas El Segundo, CA 90245	2,241 feet/ West/ Downgradient	Not reported	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: No further action required Date of Closure: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, the separating distance/presumed hydrogeologic gradient relative to the Subject Property, and/or the reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified SLIC sites represent an environmental concern to the Subject Property.

Voluntary Cleanup Program (VCP) Properties

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. The Subject Property was not identified on the VCP database. However, two sites located within 0.5 mile of the Subject Property were identified on the VCP database. Information regarding the listed sites is presented in the following table:

VCP			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Hilton Garden Inn Mariposa Avenue and Nash Street El Segundo, CA 90245	2,393 feet/ Northeast/ Crossgradient	19130106	Responsible Party: Not reported Notification Date: Not reported Contaminants: None specified Media Impacted: Soil Status: No Further Action Date of Closure: NA
Former Northern American Trisonic Wind Tunnel 400 Duley Road El Segundo, CA 90245	2,612 feet/ East-northeast/ Crossgradient	60000905	Responsible Party: Not reported Notification Date: Not reported Contaminants: 30018, 30013 Media Impacted: CSS, soil Status: No Further Action Date of Closure: 01/07/2014

* Presumed hydrogeologic gradient based upon regional topography

Based upon the current regulatory status, the separating distance/presumed hydrogeologic gradient relative to the Subject Property, and/or the reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified VCP sites represent an environmental concern to the Subject Property.

Leaking Underground and Aboveground Storage Tank Sites (LUST/LAST)

The Regional Water Quality Control Board (RWQCB) maintains a database of reported Leaking Storage Tank (LUST/LAST) sites. The Subject Property was not identified on the LUST/LAST databases. However, 16 sites located within 0.5 mile of the Subject Property were identified on the LUST/LAST databases. Of the listed sites, 11 sites are located greater than 0.25 mile from the Subject Property.

Based upon the distance and/or hydrogeologic separation from the Subject Property, these 11 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. Information regarding the SHWS sites located within 0.25 mile of the Subject Property is presented in the following table:

LUST/LAST			
Site	**Distance / Direction / Gradient**	**ID No.**	**Regulatory Status**
Global Solutions 1955 Grand Ave El Segundo, CA 90245	Adjacent/ North-northeast/ Crossgradient	902450089	Notification Date: 12/31/1997 Contaminants: Not reported Media Impacted: Soil Status: Case Closed Date of Closure: 02/02/1998
Mattel Inc 1955 E Grand Ave El Segundo, CA 90245	Adjacent/ North-northeast/ Crossgradient	T0603701269	Notification Date: 12/31/1997 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 02/02/1998
Hughes Aircraft CO CSG 1990 Grand Ave E El Segundo, CA 90245	Adjacent/ East/ Upgradient	T0603705198	Notification Date: 08/19/1996 Contaminants: Not reported Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 08/19/1996
Jim & Jack Auto Body 307 Sepulveda Blvd N El Segundo, CA 90245	936 feet/ West-northwest/ Crossgradient	T0603704033	Notification Date: 10/02/1989 Contaminants: Waste oil/moto/hydraulic/lubricating Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 10/08/1992
Hughes Aircraft Company 2000 El Segundo Blvd E El Segundo, CA 90245	1,113 feet/ South/ Crossgradient	T0603792958	Notification Date: 01/14/1986 Contaminants: Solvents Media Impacted: Soil Status: Completed – Case Closed Date of Closure: 07/22/1996

* Presumed hydrogeologic gradient based upon regional topography

The adjacent properties to the northeast and east were identified as LUST sites. EBI reviewed a CSM Report for the release reported at 1990 East Grand Avenue on August 19, 1996. Contaminants of concern were not identified, but were associated with the historic use of the site for aviation-related activities. The last regulatory activity at the site was reportedly conducted in January 1, 1950. No cleanup actions were reported at the site. The case was closed on August 19, 1996. EBI reviewed a CSM Report for the release reported at 1955 East Grand Avenue on December 31, 1997. Contaminants of concern were not identified, but were also associated with the historic use of the site for aviation-related activities. No cleanup actions were reported at the site, and the case was closed on February 2, 1998. Based upon the current regulatory status, the separating distance/presumed hydrogeologic gradient relative to the Subject Property, and/or the reported nature/extent of contamination, it is considered unlikely that conditions associated with the identified LUST sites represent an environmental concern to the Subject Property.

California UST Databases (AST, UST, FID UST, HIST UST, SWEEPS UST)

The California Environmental Protection Agency, the California Water Resources Control Board and other entities previously maintained or currently maintain various lists recording permitted aboveground

and underground storage tank (AST/UST) sites in California. The Subject Property was not identified on the AST/UST databases. However, three adjoining properties were identified on the AST/UST databases. Information regarding the listed sites is presented in the following table:

CA UST DATABASES				
Location	**Distance / Direction / Gradient**	**Capacity / Contents**	**Year Installed**	**Status**
Mattel, Inc. 333 Continental Blvd El Segundo, CA 90245	Adjacent/ Northeast/ Crossgradient	(1) 2,650-gallon AST/ Not reported	Not reported	Not reported
		(1) UST of unidentified capacity/ Petroleum blend fuel	Not reported	Removed (Not Reported)
United Airlines 1955 E Grand Ave El Segundo, CA 90245	Adjacent/ North-northeast/ Crossgradient	(1) UST of unidentified capacity/ Not Reported	1989	Active
Hughes Aircraft Co CSG 1990 Grand Ave E El Segundo, CA 90245	Adjacent/ East/ Upgradient	(1) UST of unidentified capacity/ Not Reported	1989	Active

* Presumed hydrogeologic gradient based upon regional topography

The adjacent properties to the east and northeast are cross-listed as Leaking Underground Storage Tank Sites, and are discussed further above. Based upon the absence of reported releases and/or the separating distance/presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified sites represent an environmental concern to the Subject Property.

Solid Waste Information System (SWIS and SWF/LF)

The Solid Waste Information System (SWIS and SWF/LF) facility database contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For each facility, the database contains information about location, owner, operator, facility type, regulatory and operational status, authorized waste types, local enforcement agency and inspection and enforcement records. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SWIS and SWF/LF databases.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)

The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board (SWRCB) and the Regional Water Quality Control Boards (RWQCBs) for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the WMUDS/SWAT database.

California Hazardous Material Incident Report System (CHMIRS)

The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the

California Office of Emergency Services. The Subject Property was not identified on the CHMIRS database.

Hazardous Waste Information System (HAZNET)

The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. Four current or former occupants of the Subject Property were identified on the HAZNET database. Based upon information presented in the database, report, a former tenant of the Subject Property, Tishman Speyer Properties, Inc., generated laboratory waste chemicals. The waste materials were stored and/or transferred off-site for disposal. A second former tenant of the Subject Property, Team One Advertising, generated photochemicals/photoprocessing waste from 1993 until 1995. The waste materials were transferred to an off-site recycler. Reality Associated Fund #9, a third former tenant of the Subject Property, generated an unreported regulated waste in 2012, transferring stored waste off-site for disposal. The fourth identified former tenant, Commonwealth Grand Avenue Corp., generated off-specification aged or surplus inorganics, latex waste, and laboratory waste chemicals in 2003 and 2006. The wastes were transferred off-site. According to the database report, there are no reported violations associated with these former facilities. Based upon the absence of reported violations, it is considered unlikely that conditions associated with the identified HAZNET facilities represent an environmental concern to the Subject Property.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Engineering Control or Institutional Control Registries.

State and Tribal Brownfield Sites

Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Brownfield Sites databases.

Tribal Environmental Databases

The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acres. No tribal administered lands were identified within 1.0 mile of the Subject Property.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

City of El Segundo Building Department

EBI reviewed available files regarding the Subject Property at the City of El Segundo Building Department for information regarding past uses of the Subject Property. The original building permits and certificates of occupancy for the existing building were not readily available for review. The review of Building Department records did not identify past uses of the Subject Property that would constitute a recognized environmental condition.

City of El Segundo Fire Department

EBI reviewed available files regarding the Subject Property at the City of El Segundo Fire Department, Fire Prevention Division. EBI identified a hazardous materials inventory detailing the storage of up to 210 gallons of diesel fuel in the first floor fire pump room of the Subject Property. El Segundo Fire Department files additionally included a letter regarding Addendum #2 to Krazan Phase I Environmental Site Assessment for the proposed Hyatt Place Property, addressed 1940 and 1960 East Grand Avenue. The letter, prepared by Krazan & Associates, Inc. (Krazan), addresses concentrations of petroleum hydrocarbons detected in soils at the Subject Property. Krazan collected soil samples from the site in July 2008 and submitted them for laboratory analysis. Soil samples reportedly were found to have total recoverable petroleum hydrocarbons (TRPH) concentrations of 43 milligrams per kilogram (mg/kg). Krazan noted that State of California Regional Water Quality Control Environmental Screening Level (ESL) for soils in residential settings were 83 mg/kg for gasoline and 370 mg/kg for total petroleum hydrocarbons. Based on the results of soil analysis at the Subject Property compared to the applicable reporting levels, Krazan concluded that the concentrations detected at the site were insignificant. The letter does not indicate how many borings were advanced at the site, how many soil samples were analyzed, or where at the site the soil samples were collected. This letter was also identified during a previous Phase I ESA performed by AECOM and further discussion of this letter is provided in Section 4.3.8.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 115 feet above mean sea level (msl). The topography of the Subject Property is relatively flat. The Subject Property is located in an undulating area, and the general slope of the surrounding region is to the west (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the *Venice, California* USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property.

According to the Environmental Data Resources, Inc. (EDR) GeoCheck Physical Setting Source Summary, the dominant soil composition in the vicinity of the Subject Property is classified as Delhi. This soil consists of somewhat excessively well drained soil extending to a depth of more than 60 inches.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is the Pacific Ocean, located approximately 2.1 miles west of the Subject Property.

Local groundwater gradient is typically expected to follow surface topography; however, the absence of a distinct ground surface slope at the Subject Property prevents estimation of groundwater flow direction by this method. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	**Historical Uses**		**Source(s)**
	Subject Property	**Surrounding Area**	
At least 1896–1930s	Undeveloped land.	Undeveloped land.	Aerial Photographs Topographic Maps Municipal Records Personal Interviews Other Historical Records
1930s–1970s	Undeveloped land, part of nearby oil field	Undeveloped land and oil wells.	Aerial Photographs Topographic Maps Municipal Records Personal Interviews Other Historical Records
1970s–1987	Undeveloped land.	Undeveloped land and commercial development.	Aerial Photographs Topographic Maps Municipal Records Personal Interviews Other Historical Records
1987 to Present	Existing office building and parking garage.	Commercial development.	Aerial Photographs Topographic Maps City Directories Municipal Records Personal Interviews Other Historical Records

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review, with the exception of the oil wells located in the vicinity of the Subject Property between the 1930s and 1970s.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of the aerial photographs are presented in Appendix F.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Issues Noted**	**Observations**
1923	No	**Subject Property:** The Subject Property appears to consist of cleared, undeveloped land.
		Surrounding Area: The surrounding properties to the north, east, south, and west are cleared, undeveloped land.
1928	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1923 photograph, with the exceptions that a small structure and what appears to be a pond are visible on the northern portion of the Subject Property.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1923 photograph, with the exception that small structures are visible on the surrounding properties to the north and east.
1938, 1953	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted in the 1928 photograph, with the exception that a structure is visible on the southeastern portion of the Subject Property.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted in the 1928 photograph, with the exception that a structure, apparently an oil derrick, is visible on the surrounding property to the west.
1963	No	**Subject Property:** No structures or other notable features are visible on the Subject Property.
		Surrounding Area: No structures or other notable features are visible on the surrounding properties to the north, east, south, and west.
1972, 1977	No	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted in the 1963 photograph.
		Surrounding Properties: A roadway, trending east to west, is visible on the surrounding property to the north, beyond which no structures are visible. A paved parking lot is visible on the surrounding property to the south. No structures or other notable features are depicted on the surrounding properties to the east and west.
1983	No	**Subject Property:** The Subject Property appears to be occupied by a parking lot.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted in the 1977 photograph, with the exception that commercial structures are visible on the surrounding properties to the east and west. A commercial structure is visible beyond the roadway to the north.
1989, 1994, 2002, 2005, 2009, 2010, 2012	No	**Subject Property:** A rectangular commercial structure is visible on the northeastern portion of the Subject Property, with a second commercial structure, a parking garage, on the southwestern portion of the Subject Property. The northwestern portion of the Subject Property appears to be occupied by a paved parking lot. Landscaping is visible on the southeastern portion of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted in the 1983 photograph.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by EDR Sanborn Maps, Inc. The EDR Report indicated that coverage for the vicinity of the Subject Property was not available. A copy of the search documentation letter is presented in Appendix F.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the topographic maps are presented in Appendix F.

TOPOGRAPHIC MAP SUMMARY		
Year	**Issues Noted**	**Observations**
1896, 1924, 1930, 1948	No	**Subject Property:** No structures or other notable features are depicted on the Subject Property.
		Surrounding Properties: No structures or other notable features are depicted on the surrounding properties to the north, east, south, and west.
1950	No	**Subject Property:** Access roads are depicted running across the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1948 map, with the exception that small roadways are depicted on the surrounding properties to the east, south, and west. Small structures are depicted on the surrounding properties to the east, and a substation is identified on the surrounding property to the west.
1964	**Yes**	**Subject Property:** Conditions on the Subject Property appear to be similar to those depicted on the 1950 map.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1950 map, with the exception hat no substation is identified on the surrounding property to the west. **Oil wells** are identified to the northeast of the Subject Property.
1972, 1981, 2012	No	**Subject Property:** No structures or other notable features are depicted on the Subject Property.
		Surrounding Properties: A roadway, trending east to west, is depicted on the surrounding property to the north. No structures or other notable features are depicted on the surrounding properties to the east, south, and west.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories

were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

STREET DIRECTORY SUMMARY		
Year	**Issues Noted**	**Occupants**
1990, 1991, 1995, 2000, 2001, 2008, 2013	No	Various office tenants.

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

Property records for the Subject Property were obtained at the Los Angeles County Assessor's Office. The property card identifies the current owner as Realty Associates IX LP. Assessor's Office records indicate that the existing buildings were constructed in 1987. A listing of the former Subject Property owners was not available for review.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was provided with the following previous environmental reports performed for the Subject Property. Relevant information from the previous reports is discussed in the appropriate sections of this report, and portions of the previous reports are presented in Appendix G.

Phase I Environmental Site Assessment, 1940 and 1960 East Grand Avenue, El Segundo, California, prepared by Clayton Group Services, Inc., *A Bureau Veritas Company*, (Clayton), of Pleasanton, California, dated January 26, 2007

The Clayton Report was completed in general conformance with ASTM Standard E 1527-05. The scope of the Clayton Report investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local environmental records, review of the physical characteristics and history of the Subject Property. The following information was presented in the Clayton Report:

- At the time of the Clayton Report, the 5.37-acre Subject Property was improved with a nearly 260,000-square-foot, 12-story, office building at 1960 East Grand Avenue; an 11-story (9 above grade and 2 sub grade levels) parking structure at 1940 East Grand Avenue; an asphalt-paved parking lot; and landscaping.

- At the time of assessment, the existing structures were occupied by commercial office tenants and automobile parking. No industrial or manufacturing operations were observed at the Subject Property at the time of assessment.

- Based upon review of historical resources dating back to 1928, Clayton reported that in 1928 the Subject Property and surrounding area appear to have been agriculturally cultivated. By 1938 oil exploration dominated much of the area; the subject property featured an AST and a bermed pit, which were removed by 1947 – the area was known as the El Segundo Oil Field. Thereafter until the mid 1970s when modern land configuration emerged, the subject property and adjoining properties were graded from time to time. The current office building and parking garage were built on the Subject Property around 1988 and the land uses have remained commercial office since.

- Regarding the former El Segundo Oil Field, no oil or gas wells are known to have been present on the Subject Property, but there was an AST and a bermed pit in 1938. Soil investigations conducted on the Subject Property in the 1980s revealed the presence of petroleum hydrocarbon odors and stains within fill materials to depths of nearly 20 feet bgs. A limited amount of analytical testing detected no petroleum hydrocarbons in the fill. Regulatory agencies have not required that the subject property or surrounding areas investigate historical oil field uses. In addition, the underlying fill material at the subject property is covered with buildings, parking lots, or engineered landscaping, all of which minimize human exposure to the underlying fill. Furthermore, groundwater is first encountered around 100 feet below ground surface, which is well below the extent of the fill, and is unlikely to have been impacted from Subject Property activities. Therefore, Clayton notes that this finding is a *historic*, but not a current *recognized environmental condition* (REC).

- The current use and storage of hazardous substances and petroleum products at the subject property is limited to diesel fuel for backup power, cooling water treatment chemicals, janitorial supplies, other subject property equipment (e.g., liquid-cooled transformer), and the photo processing wastes. Clayton observed secondary containment systems for most of the chemicals and wastes, and the various containers were in good condition with no evidence of chemical releases. No major chemical violations are noted in the regulatory agency records. Therefore, this finding represents a *de minimis* condition and not a REC.

- Clayton identified evidence of the following existing underground storage tanks (USTs) and aboveground storage tanks (ASTs) at the Subject Property: one 22,500-gallon water storage reservoir. The UST is a concrete basin that measures approximately 17 by 14 by 12.5 feet deep. In addition, one 120-gallon and two 75-gallon aboveground storage tanks (ASTs) are located beneath generators in office building ground floor equipment rooms and store diesel fuel for backup power generation.

- Clayton observed no indications of PCBs, except for a pad-mounted, liquid-cooled transformer, a hydraulic refuse compactor, light ballasts, and seven elevators. The transformer is located near the parking structure, the compactor is located in an office building ground floor equipment room, and the light ballasts are located throughout the office building. These are self-contained, and Clayton observed no evidence of releases or stains near this equipment. The elevators are cable-drawn and have no hydraulic hoists.

- Clayton reviewed various prior environmental reports prepared for the Subject Property. The reports included the following: a 1986 Geotechnical Report; a 1986 Preliminary Contaminated Soil Evaluation; and a 1995 Limited Asbestos [and other material] Survey. The 1986 Geotechnical Report indicated that the subject property was vacant grassy, weedy land that had been part of an oil field; no oil wells were encountered on the subject property. During surrounding area development from around 1969 through 1971, the subject property was graded and fill material was imported.

- The 1986 Preliminary Contaminated Soil Evaluation describes 24 soil borings advanced at the subject property in 1981, 1982, 1984, and 1986. Indications of petroleum hydrocarbon-impacted soil (e.g., odors, stains) were noted in fill materials found at depths of 4.0, 9.5, 17, and 19 feet bgs. Three soil samples collected at depths ranging from 5.0 to 12 feet bgs were tested for total petroleum hydrocarbons (TPH) and for benzene, toluene, ethylbenzene, xylenes (BTEX, collectively); no TPH or BTEX concentrations were detected.

- The 1995 Limited Asbestos [and other material] Survey describes an inspection and sampling for suspect asbestos containing material (ACM), lead containing paint (LCP), and polychlorinated biphenyl (PCB)-containing light ballasts, as well as an evaluation of radon gas. Identified suspect ACM included roofing, pipe wrap insulation, duct tape mastic, floor tiles and mastic, drywall joint compound, spray-on fireproofing, and ceiling tiles. No asbestos was detected in samples collected from the 5th, 6th, 8th, 10th, 11th, and 12th floors, roof, and from the parking garage. Identified suspect LCP included stairwells on the 12th floor, piping and equipment in a mechanical room, and areas within the parking garage. No lead was detected in the eight paint chip samples collected, except for 0.934% lead (a cooling tower pipe). This concentration exceeded the U.S. Department of Housing and Urban Development (HUD) action level of 0.5%, but the subject property is not residential. No PCB concentrations were identified in light ballasts. Radon levels for the area were determined to be 1.0 picoCuries per liter (pCi/L), and below the United States Environmental Protection Agency's (USEPA) action level of 4.0 pCi/L.

- Based upon review of the environmental database report, Clayton identified the following listings for the Subject Property: HAZNET, RCRA-SQG and FINDS databases. Occupant Team One Advertising is a generator of hazardous wastes, including photochemical/photo processing and laboratory waste chemicals. No violations are reported, and no releases are documented.

- Based upon review of the environmental database report, Clayton identified several adjacent properties with various listings; however, Clayton identified no off-site facilities that were considered likely to have impacted the Subject Property.

Based upon the findings of the Phase I Environmental Site Assessment, Clayton did not identify any recognized environmental conditions (RECs) associated with the Subject Property. Clayton recommended no further action or investigation.

Phase I Environmental Site Assessment, Grand Avenue Courtyard, 1940 and 1960 East Grand Avenue, El Segundo, California 90245, prepared by AECOM of Camarillo, California, dated August 2010

The AECOM Report was completed in general conformance with ASTM Standard E 1527-05. The scope of the AECOM Report investigation included visual reconnaissance of the Subject Property, interviews with knowledgeable persons associated with the Subject Property, review of available regulatory information contained within federal and state environmental databases and other local

environmental records, and review of the physical characteristics and history of the Subject Property. The following information was presented in the AECOM Report:

- At the time of the AECOM Report, the Subject Property consisted of two parcels totaling approximately 5.36-acres developed with a twelve-story, 260,000 square foot office building and an eleven-level above ground parking garage. The office building does not have a basement, two of the parking garage levels are below grade. The subject property also has a surface parking lot and extensive landscaping including a Kio pond.

- At the time of assessment, on-site tenant activities and operations include office activities. Tenants include airline related businesses, law firms, advertising agencies, other office tenants and a café. No industrial or manufacturing operations were observed at the Subject Property at the time of assessment.

- Historical research indicates that prior to construction of the current office building and parking garage in 1988, the subject property was part of an oil field. The subject property appears to have been vacant, undeveloped land as depicted on an 1896 topographic map. A 1924 topographic map also shows the subject property to be vacant and undeveloped. A 1928 aerial photograph shows what appears to be an oil sump (referred to in previous environmental reports as a bermed pit) located on the north central portion of the subject property, with an aboveground storage tank (AST) shown on the eastern portion of the subject property in 1938. The subject property remained essentially unchanged until after 1956. In the 1965 and 1976 aerial photographs, the subject property appears to be vacant, graded land. Construction of the existing buildings began in 1987 and the buildings were completed in 1988. The office building has been occupied by office tenants since that time. City directories indicate that the subject property was occupied by various office tenants from 1990 through 2000.

- In AECOM's opinion, it is not uncommon for there to be residual amounts of petroleum hydrocarbons in the soils in the area of the subject property, potentially as a result of the historical use of the area as an oil field. AECOM identified a letter from Krazan and Associates Inc. (Krazan) to OTO Development, LLC dated June 22, 2009. This letter indicates that Krazan had conducted soil sampling at the subject property in July 2008. Krazan concluded that petroleum hydrocarbons detected in subject property soils (43 ppm) did not pose a significant risk for further development of the subject property. Additionally, the prior Clayton report indicates that odors and stains indicating petroleum hydrocarbon impacts were noted at the subject property during soil sampling from 1981 through 1986. Three soil samples were analyzed at that time for petroleum hydrocarbons and benzene, toluene, ethylbenzene, and xylenes (BTEX), but these compounds were not detected in the soil samples analyzed. However, based on soil sample analysis results obtained as part of prior assessments, the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion.

- AECOM reported that no underground storage tanks (USTs) are currently located on the subject property, other than a 22,000-gallon fire water storage tank located under the east side of the office building. An emergency generator is located on the first floor of the office building. The generator includes a self-contained 120-gallon diesel AST. Two additional 120-gallon diesel aboveground storage tanks are associated with the fire pumps located on the first floor of the office building. These ASTs are located within a concrete berm. No drains, stains, or leaks were observed in the vicinity of the diesel ASTs or generator.

- Small quantities of paints, cleaners, degreaser (WD-40), stains, and motor oil (associated with the generators) were observed to be stored on shelving units and/or in flammable materials cabinets in the janitorial supply rooms, mechanical rooms, storage rooms, and generator rooms. The materials were not stored in the vicinity of floor drains and no significant staining was observed in the storage areas. Two 55-gallon drums of water treatment chemicals are stored on the roof of the office building adjacent to the cooling tower. These chemicals are located on secondary containment pallets.

- A concrete pad-mounted transformer was observed outside at the northwest corner of the parking garage. The transformer is owned by, and is the responsibility of, the Southern California Edison Company. No markings were observed on the transformer indicating polychlorinated biphenyl (PCB) content; however, no staining was observed on the transformer or on the concrete pad. Additionally, based on the age of the subject property development (circa 1988), PCBs are not anticipated to be present within the on-site transformer equipment. Based on the above information; the onsite transformer appears to be properly managed.

- AECOM reviewed various previous environmental reports prepared for the Subject Property. The reports included the following: Report of Geotechnical Investigation, Proposed Building Development, Grand Avenue Between Sepulveda, Continental, and El Segundo Boulevards, El Segundo, California, dated March 8, 1984. Prepared by LeRoy Crandall and Associates for Nu-West Inc. (California); Report of Phase I Environmental Site Assessment, Xerox Centre, 1960 East Grand Avenue, El Segundo, California, dated April 1995. Prepared by Kleinfelder, Inc. for Homart Development Co.; and Phase I Environmental Site Assessment, 1940 and 1960 East Grand Avenue, El Segundo, California, dated January 26, 2007. Prepared by Clayton Group Services, Inc. for Lowe Enterprises; HBI Mold Assessment Report and Clearance Document, 1960 East Grand Avenue, El Segundo, California, dated May 14, 2007. Prepared by Healthy Buildings International, Inc. for Lowe Enterprises, and HBI Mold Assessment Report and Clearance Document, 1st Floor Central Corridor, 1960 East Grand Avenue, El Segundo, California, dated May 21, 2007. Prepared by Healthy Buildings International, Inc. for Lowe Enterprises. The first three reports are summarized in and/or included the previous Clayton report. The fourth report is discussed as follows: Healthy Buildings International Inc. (HBI) performed a mold assessment following a water leak in a 3rd floor break room. HBI conducted visual observations for stains, discoloration and visible mold growth. Moisture levels were measured in areas that appeared to be damp. Marginally wet drywall was identified in a stairwell, a 3rd floor restroom and the ceiling of the 1st floor café and in the 1st floor central corridor. Fans and dehumidifiers were used to dry out the areas. A follow-up inspection did not reveal and stains or mold growth or excessive dampness. Airborne samples for mold did not indicate a significant source of mold in the building.

- Based upon review of the environmental database report, the subject property was identified on the RCRA-SQG, FINDS and HAZNET databases as Team One Advertising, Suite E. This current tenant of the building is listed as a small-quantity generator of hazardous waste. The RCRA-SQG database indicated that no violations have been reported for this tenant. The HAZNET database indicates that this tenant has generated photoprocessing waste, which is sent to a recycler or transfer station. According to the site contact, hazardous waste is no longer generated by this tenant. The subject property is not listed on a contamination-related database. Based on AECOM's area reconnaissance and information provided in the EDR report, the former and current uses of the adjacent or nearby sites do not appear to present RECs in association with the subject property.

Based upon the findings of the Phase I Environmental Site Assessment, AECOM did not identify any recognized environmental conditions (RECs) associated with the Subject Property. AECOM recommended no further action or investigation.

4.3.9 Other Historical Records and Interviews

Mr. Don McCurry, Facility Engineer, was interviewed to obtain information regarding the history of the Subject Property. Mr. McCurry reported that he has been familiar with the Subject Property for approximately 21 years and that the existing building was constructed in 1987. Mr. McCurry was unaware of the use or occupants of the Subject Property prior to 1987.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Ms. Maura Kelly, EBI Field Assessor, on October 12, 2016. Ms. Kelly was accompanied by and interviewed Mr. Don McCurry, the Subject Property Engineer.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was overcast and approximately 70° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	**Approximate Quantity / Container / Material**	**Location**	**Storage Condition**
Cleaning Compounds and Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Janitorial Closets	Good: No leaks or spills
HVAC Treatment Compounds	(3) 45-gallon drums: anti-freeze and microbicides (3) 15-gallon pails: microbicides	Mechanical Penthouse	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property. The facility maintains a Spill Prevention, Control and Countermeasure (SPCC) Plan for handling materials in use at the Subject Property. It should be noted that a compliance audit was beyond the scope of work for this assessment and was not performed.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL			
Classification	**Type of Waste / Generation Process**	**Type of Storage / Location**	**Disposal Method / Contractor**
Non-regulated Solid Waste	Municipal Solid Waste / Routine Site Operations	2 Solid Waste Dumpster (Trash Storage Room)	Athens Services
	Cardboard Recyclables / Routine Site Operations	1 Recycling Dumpster (Trash Storage Room)	Full Circle Recycling Company
	Construction Debris	1 Roll-off dumpster (East side of Subject Property)	CWS
Non-regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	NA (Municipal Sanitary Sewer)	Massachusetts Water Resource Authority (MWRA)
Regulated Solid or Liquid Waste	Spent fluorescent tubes, ballasts, and lead-acid batteries/ Routine Site Operations and Maintenance	Cardboard Bins (Receiving Dock)	Regency Lighting
Biomedical Waste	None identified	NA	NA

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTS) & ABOVEGROUND STORAGE TANKS (ASTS)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs located at the Subject Property. EBI identified the following ASTs located at the Subject Property.

STORAGE TANKS		
(2) 120-gallon ASTs	Contents:	Diesel Fuel
	Location:	Ground Floor Fire Pump Room
	Year Installed:	Unknown
	Construction Materials:	Single-wall steel tank
	Leak Detection/Prevention:	Concrete block secondary containment basin
	Staining / Releases:	None identified
(1) 120-gallon AST	Contents:	Diesel Fuel
	Location:	Ground Floor Emergency Generator Room
	Year Installed:	Unknown
	Construction Materials:	Single-wall steel tank
	Leak Detection/Prevention:	Concrete block secondary containment basin
	Staining / Releases:	None identified

One diesel-fired emergency generator and associated 120-gallon AST are located on the ground floor of the existing office building. The generator and AST are surrounded by a concrete secondary containment basin. No staining or other evidence of a release of diesel fuel was observed on the underlying concrete floor.

Two diesel-fired fire pumps and associated 120-gallon ASTs are located on the ground floor of the existing office building. The fire pumps and ASTs are surrounded by a concrete secondary containment basin. No staining or other evidence of a release of diesel fuel was observed on the underlying concrete floor.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of former USTs or ASTs located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

The following oil-containing equipment was identified at the Subject Property:

OIL-CONTAINING EQUIPMENT			
Classification	**Type of Equipment**	**Year Installed / Location**	**Staining / Releases Identified**
Transformers and Fluid-Containing Electrical Equipment	(1) Electrical Transformer [Edison Electric Company]	Unknown/ Transformer vault, Ground Floor of office building	NA
	(1) Pad-mounted Electrical Transformer [Edison Electric Company]	Unknown/ North of Parking Garage	No
Hydraulic Equipment	None identified	NA	NA
Other Oil-containing Equipment	None identified	NA	NA

EBI observed one pad-mounted electrical transformer located on the central portion of the Subject Property, adjacent to the parking garage. The transformer appeared to be in good condition, and no staining or other evidence of a release of dielectric fluid was observed in the vicinity of the transformer unit. The transformer unit is owned and operated by the regional electrical utility provider, Edison Electric. In the event of a release of dielectric fluid from one of its transformers, the utility company typically conducts regulatory response actions and cleanup.

One electric transformer is reportedly located within a utility vault on the eastern side of the ground floor of the office building. The transformer unit is reportedly owned and operated by the regional electrical utility provider, Edison Electric. The transformer vault was sealed by the electric utility and

was not accessible at the time of reconnaissance. In the event of a release of dielectric fluid from one of its transformers, the utility company typically conducts regulatory response actions and cleanup.

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	**Identified**
Interior Drains, Trenches, or Sumps	**Yes**
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	**Yes**
Wastewater or Stormwater Discharge/Disposal	**Yes**
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No

Floor drains were observed in the restrooms and former service kitchen. Floor drains and a sump pit were also observed in the parking garage. The floor drains and sump pit reportedly discharge to the municipal sewer system. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of these structures.

A decorative pond is located on the southeastern portion of the Subject Property. No staining or other evidence of a release was observed in the vicinity of this feature.

The ground surface outside the building is relatively flat. Stormwater runoff from the asphalt-paved parking areas on the northwestern and eastern portions of the Subject Property discharges to catch basins located along Grand Avenue. The catch basins are associated with the municipal stormwater sewerage system, operated by the City of El Segundo. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the stormwater drainage features.

6.0 INTERVIEWS

The following persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire was been completed verbally during EBI site reconnaissance. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property.

INTERVIEWS			
Contact / Affiliation	**Date of Communication**	**Years Associated with Subject Property**	**Telephone No.**
Mr. Don McCurry Chief Engineer Davis Partners	10/12/2016	21	(310) 414-0014
Mr. Neal Perkey Regional Director Davis Partners	10/12/2016	5	(310) 414-0014

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of sheetrock/joint compound composite material and 2'x4' white perforated acoustical ceiling tile, and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, and various construction mastics and caulking. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also present in areas of the buildings that were accessed as part of this assessment.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of

lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Los Angeles County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the non-residential nature of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm^2) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the non-residential use of the existing buildings and in accordance with the scope of work of this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

Municipal water service is provided to the Subject Property by the City of El Segundo. Potable water is reportedly obtained from Northern California and the Colorado River. Based upon review of the 2016 Annual Drinking Water Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property. However, the following *de minimis condition* was identified in connection with the Subject Property.

- EBI identified a letter, prepared by Krazan & Associates, Inc. (Krazan), addressing concentrations of petroleum hydrocarbons previously detected in soils at the Subject Property. Soil samples collected from the site in July 2008 were submitted for laboratory analysis, and total recoverable petroleum hydrocarbons (TRPH) concentrations of 43 milligrams per kilogram (mg/kg) were reportedly found in the soil and were determined to be insignificant. This letter was also identified during a previous Phase I ESA performed by AECOM and further discussion of this letter is provided in Section 4.3.8. Additionally, the prior Clayton report indicates that odors and stains indicating petroleum hydrocarbon impacts were noted at the subject property during soil sampling from 1981 through 1986, prior to development of the Subject Property. The contamination was deemed to be associated with the historical use of the subject property and immediate vicinity as part of an oil field in approximately the 1920s through 1950s. Based upon review of available information, the historic contamination identified on the Subject Property is considered to represent a de minimis condition and no further action is recommended.

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, no further action is recommended.

		10/12/16

PROPERTY CONDITION REPORT PRE-SURVEY QUESTIONNAIRE

Additional plans and documentation (see page 4) must be forwarded to the site for the Engineer during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Engineer's report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #?
2. What is the legal Municipality or County that has jurisdiction over the property? El Segundo/LA County
3. What is the assessors file ID number and tax file ID number if available?

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? 5.3
5. How many parking spaces (and HCP parking spaces) are present at the property?
6. How many buildings comprise the subject property? 2
   a. If the property is a mall or large retail center, please confirm and list ownership of each building.
7. What is the gross and net rentable square footage of the building(s)?
8. What is the date of construction of the building(s)? When was the building(s) first occupied? 1986/87
9. How many tenant spaces or apartments are at the Subject Property? 69
   a. If the property is apartments, please provide a unit and type count by bedroom and square feet.
10. Please list, to the best of your knowledge, any deficiencies or problems with the site, parking area, amenities or utilities.
11. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems.
12. During the last five years, have any major capital improvements been made to the site or building(s)? If so, please explain, with the approximate cost.

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. office tenants

2. Describe the past uses of the property noting tenant names and oil/chemical usage. office tenants, formerly 1 café tenant

3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy?

4. (Y) (N) Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property?

5. (Y) (N) Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation?

6. (Y) (N) Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation?

7. (Y) (N) Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation?

8. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation?

9. (Y) (N) Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation?

10. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation?

11. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe.

12. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? Transformer vault - Edison owned and maintained

13. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at **or** adjacent to the property? If yes, please describe.

14. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe.

15. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe.

16. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe.

17. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N
Above or Underground	120 gal	Diesel fuel	unknown	N
Above or Underground	120 gal	Diesel fuel	unknown	N
Above or Underground	120 gal	Diesel fuel	Unknown	N
Above or Underground	gal			

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation: NO

19. Additional comments and/or pertinent information relevant to this Phase I ESA:

Document and Information Checklist

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

A. Plans	B. Municipal Documents	C. Additional Information
▪ ALTA Survey or Site Plan* ▪ Architectural Building Plans* - plans, elevations, wall section, foundation, HVAC & elec. schedules ▪ Reduced scale Site and Building Plans ▪ ***Extremely critical for properties in Seismically active zones 3 and 4**** *STRUCTURAL PLANS – **Seismic Assessments are required for these properties. Structural drawings must be provided at the time of the site visit. If no drawings are provided, the report will be delayed and the Seismic Assessment may be overly conservative.*** ▪	▪ Certificate of Occupancy* ▪ Building Permit* ▪ Façade inspection compliance* ▪ Copy of tax cards ▪ Copy of violations **B.1 NYC Projects** ▪ Department of Building Violations* ▪ Environmental Control Board Violations* ▪ Local Law 11 Facade Reports*	▪ Capital expense report for 1 to 3 years* ▪ Tenant Rent Roll* ▪ Roof warranty ▪ History of recent improvements ▪ Schedule of Floor Area Measurements - Gross and Rentable Square Feet ▪ Previous Due Diligence or Building Component Reports, including, but not limited to, façade*, roof*, mechanical*, electrical, elevator, sprinkler, fire alarm or life safety equipment, or pavement. ▪ Copy of most Recent Appraisal

EBI Access Requirements

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.

CONSTRUCTION TESTING & INSPECTION

June 22, 2009 Project No. 114-08033

Mr. Michael Gallen
OTO Development, LLC
1930 Nelson Avenue
Redondo Beach, CA 90278

RE: Addendum #2 to Krazan Phase I Environmental Site Assessment
Proposed Hyatt Place Property
1940 & 1960 East Grand Avenue
El Segundo, California

Dear Mr. Gallen:

Krazan & Associates, Inc., (Krazan) prepared this addendum to address the concentrations of petroleum hydrocarbons detected in soils sampled/analyzed from the project site by Krazan in July 2008. The analytical results revealed a concentration of 43 mg/kg of total recoverable petroleum hydrocarbons (TRPH). Krazan's review of the Cal-EPA California Human Health Screening Levels (CHHSLs) indicates that there are no CHHSLs for TRPH, only benzene, toluene, ethylbenzene, and xylenes (BTEX). Alternatively, Krazan's review of the State of California Regional Water Quality Control Board Environmental Screening Level (ESL) for soils in residential settings, specifically total petroleum hydrocarbons as gasoline, is 83 mg/kg and the ESL for total petroleum hydrocarbons as residual fuel (heavier hydrocarbons) is 370 mg/kg indicating the concentrations of petroleum hydrocarbons identified by Krazan are below the ESL for the State of California in residential settings. Consequently, it is

Krazan's professional opinion that, based on the results of the soil sampling/analysis conducted at the project site, compared to the California ESLs for petroleum hydrocarbons, the concentrations detected at the project site are insignificant and would not preclude the proposed development of the project site for commercial hospitality/hotel usage.

If you have any questions regarding the information presented in this report, please call me at (559) 348-2200.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

Cody W. Taylor, REA
National Client Manager

PROFESSIONAL QUALIFICATIONS

Maura Kelly
Staff Scientist
21 B Street
Burlington, MA 01803
Office: 781.418.2313 Mobile: 617.462.2690

SUMMARY OF EXPERIENCE

Ms. Kelly is a staff scientist specializing in Phase I Environmental Site Assessments (ESAs) in the commercial real estate sector. Ms. Kelly has conducted due diligence environmental assessments for a wide range of properties throughout the northeast. These assessments have been performed to evaluate site conditions, potential off-site liabilities, historic site and vicinity usage, environmental control systems, and site remediation costs in order to advise prospective buyers, lenders, current operators, and owners of current and existing environmental concerns. Sites inspected include multi-family residential, commercial, retail, and industrial properties.

RELEVANT PROJECT EXPERIENCE

Phase I Environmental Site Assessments: Ms. Kelly has conducted ASTM Phase I Environmental Site Assessments for a variety of properties located within the northeast. These properties have included commercial, retail, industrial, and multi-family residential properties. ASTM investigations include correspondence and consultation with Federal, state, and local government offices

Emily Celano
Program Manager
21 B Street
Burlington, MA 01803
Office: 781.418.2336 Mobile: 215.816.1764

SUMMARY OF EXPERIENCE

Emily Celano, Program Manager, has extensive experience focused in commercial real estate due diligence, since 2000. Emily's experience includes several years working in the environmental risk unit of a financial institution with principal markets in the northeastern U.S. Emily has an understanding of environmental due diligence perspectives for different finance transactions, including urban redevelopment, acquisition finance, refinance/renewal, and foreclosure. Emily has a working knowledge of various federal, state and local environmental regulations with respect to commercial real estate due diligence. Emily has reviewed over 2,500 ASTM Phase I Environmental Site Assessments (ESAs), Phase II Limited Subsurface Investigation (LSI) reports, and other regulatory/project documents for a variety of property types, including industrial, office, multifamily, hospitality, retail, gasoline station/automotive service, and development projects.

RELEVANT PROJECT EXPERIENCE

Program Manager, EBI Consulting, August 2015 - present

Perform technical reviews of ASTM Phase I ESAs for various clientele and property types throughout the U.S. Familiar with Fannie Mae, SBA, and various lender-specific ASTM Phase I ESA requirements. Correspond with clientele about report findings and coordinate project specific follow-up work. Correspond with project staff to ensure the successful completion of ESA reports and provide technical feedback to foster EBI's learning organization culture. Member of EBI's internal Green Team to promote EBI's internal sustainability program.

Project Manager, EFI Global, Inc., March 2014 – August 2015

Coordinated real estate environmental due diligence projects for multifamily, retail, office, hospitality, mixed-use, and light industrial properties throughout the U.S. Familiar with Fannie Mae, SBA, and various lender-specific ASTM Phase I ESA requirements. Corresponded with project staff and clients during project duration. Conducted technical review of Phase I ESAs and other project documents prior to client delivery. Coordinated project specific follow-up work, including regulatory agency file reviews, Phase II LSIs, Operations and Maintenance Plans, and Hazardous Material Building Surveys.

Environmental Risk Analyst, Santander Bank (formerly Sovereign Bank), August 2004 – March 2014

Liaison/in-house consultant for internal bank personnel (200+ lending officers and associated support staff) with respect to environmental liability evaluation and advisory services for commercial real estate collateralized lending transactions. Performed environmental database and desktop reviews and reviewed Phase I ESAs, Phase II LSIs, Remedial Action Plans, and other project/regulatory documents to evaluate environmental risks. Prepared internal review memoranda summarizing identified concerns and recommending follow-up evaluations to manage environmental risks prior to, and during the lending term. Properties were primarily located in the eastern United States and included industrial, office, multifamily, hospitality, retail, gasoline station/automotive service, and development projects.

Environmental Scientist, Mid-Atlantic Associates, November 2000 - August 2004

Managed all phases of residential heating oil release projects in New Jersey including field work, subsurface investigation, data interpretation, remedial approach, contractor oversight, client and regulatory agency liaison, and report preparation associated with third party liability insurance claims.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there are 6 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/27/2016 has revealed that there are 5 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/21/2016 has revealed that there are 4 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 05/02/2016 has revealed that there are 20 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

CA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the CA LUST list, as provided by EDR, has revealed that there are 16 CA LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist

Cleaner sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Land type: Private
Classification: TSDF
Description: Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Owner/Operator Summary:
Owner/operator name: RAYTHEON COMPANY
Owner/operator address: WINTER ST

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 27150

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 12650

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Event date: 09/07/1991
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 01/24/1992
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 01/24/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event: RFI Supplemental Implementation Begun

Event date: 03/24/2015
Event: RFI Report Received

Event date: 05/29/2015
Event: RFI Approved

Event date: 09/21/2015
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - General

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	11/07/1994
Comments:	DATABASE VALIDATION PROJECT CONFIRMS NFA FOR DTSC.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	11/16/1988
Comments:	Site Screening Done: DHS will concur with EPA recommendation of NFA due to the minimal quantity of oil disposed of and the fact that the stained areas have been cleaned up. Site will be referred to Los Angeles County Health Dept. Site removed from Cortese.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	12/02/1987
Comments:	Site Screening Done: Evidence of a small amount of onsite disposal found.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	* Discovery
Completed Date:	05/13/1981
Comments:	Facility identified via Abandoned Chemical Waste Disposal Survey. Questionnaire received. Years of Operation: 1957 to present.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

INT RECTIFIER CORP EL SEGUNDO (Continued) **U002287919**

Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 09/24/1996
Comments: Preliminary Assessment completed under U.S. EPA grant. Site is no further assessment for U.S. EPA. However, DTSC requires a Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/25/1995
Comments: The Department received a hazardous substace release report. The site had a waste leak from a plating line and acidic aqueous waste left metal contamination in the soil. Due to evidence of contamination, the Department recommends a PEA. The Department notified the RP that a PEA be conducted.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site name: HUGHES AIRCRAFT COMPANY RADAR SYSTEMS GR
Classification: Large Quantity Generator

Date form received by agency: 08/18/1980
Site name: RAYTHEON SYSTEMS CO
Classification: Large Quantity Generator

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

HUGHES AIRCRAFT CO RADAR SYSTEM (Continued) **1015730700**

Amount (Lbs): 33204

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 45379

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 32794

Waste code: D011
Waste name: SILVER
Amount (Lbs): 844

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 190

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 410

Waste code: D039
Waste name: TETRACHLOROETHYLENE
Amount (Lbs): 190

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 2685

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 2685

Waste code: U223
Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T)

HUGHES AIRCRAFT CO RADAR SYSTEM (Continued) **1015730700**

Amount (Lbs): 844

CA BOND EXP. PLAN:

Reponsible Party:	FEDERAL FACILITY SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The Department will either enter into an interagency agreement with the Department of Defense or will issue an order. The Department has budgeted $15,000 for oversight/monitoring costs. DHS will seek 100 percent cost recovery for its direct costs plus staff costs and overhead related to the project. The Department of Defense is expected to fund all remedial investigation and cleanup activities.
Site Description:	The Fort McArthur site is a former nike missile base located in the White's Point area of San Pedro. The Army transferred the site to the Air Force for housing and the Air Force transferred part of the site to the City of Los Angeles for a park. Thesite is located at 25th Street and Western Avenue in San Pedro.
Hazardous Waste Desc:	Ninety-six acres of the original 561-acre complex remain under Air Force control. The remaining properties were disposed of as surplus. An initial assessment study was performed on the active ninety-six acres of Fort McArthur. Nine acres of potential contamination were identified. Only two areas are recommended by the Air Force for further site characterization. Released wastes include pesticides and battery acids.
Threat To Public Health & Env:	Residues of hazardous wastes in the soil are the only identified environmental threat. Ground water is intruded by seawater and is unsuitable at this time for use as a drinking water supply. There is no known exposure at this time.
Site Activity Status:	The installation restoration program (IRP) has been initiated at this base. Currently, the program is in the operations/remedial action phase of the mitigation process.

Comments: Annual cost estimate completed, emailed and mailed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 11/06/2012
Comments: On November 6, 2012, DTSC conducted a PEA Scoping Meeting with the Wiseburn School District; in addition, representatives for the current propety owner and potential future property owner were in attendance. DTSC received a total of 13 documents/reports (electronic format) of existing Site data/information (1996 to 2012). The District indicated it will provide DTSC a letter indicating that the Existing Data will be considered as a PEA Equivalent Report and submit a PEA Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/16/2013
Comments: DTSC determined that a response action, to include methane mitigation through the removal action workplan process, is required for the Site.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 11/27/2012
Comments: On November 27, 2012, DTSC conditionally approved the PEA Workplan provided specific comments be implemented and/or addressed during PEA fieldwork and in the PEA Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/31/2013
Comments: On January 31, 2013, DTSC provided comments on the Draft Environmental Impact Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 07/01/2013
Comments: DTSC approved the Community Profile, which describes the community and identifies potential community concerns regarding Site activities.
Not reported

Completed Area Name: PROJECT WIDE

201 N. DOUGLAS PROPERTY (Continued) **S108200735**

Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 04/10/2013
Comments: Via email on April 10, 2013, DTSC was informed that the Notice of Determination for the Environmental Impact Report (EIR) was filed with the County Clerk's office on March 22, 2013 and mailed to the State Clearinghouse. The FINAL EIR (SCH No. 2011061056), certified on March 21, 2013, is comprised of the following documents: 1) FINAL EIR, dated March 2013; 2) DRAFT EIR, dated January 2013; 3) ADDENDUM TO FINAL EIR (i.e., DTSC's comment letter, dated January 31, 2013, on the Draft EIR; and The Planning Center's response letter, dated March 11, 2013, to DTSC's comments).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/05/2013
Comments: On September 5, 2013, DTSC approved the Removal Action Workplan for implementation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 07/18/2013
Comments: On July 18, 2013 and July 19, 2013, the Community Notice was distributed via US mail and e-mail. The Community Notice provided information on the Site history, proposed methane mitigation system, and 30-day public comment period (July 22 through August 20).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 4.15 Request
Completed Date: 07/17/2013
Comments: On July 17, 2013, DTSC signed the SFPD 4.15 Form documenting the commitment of the District and DTSC to California Department of Education to complete the required response action prior to project occupancy.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 07/22/2013
Comments: On July 22, 2013, the Public Notice Ad regarding the Draft RAW was published in the Daily Breeze.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 12/11/2014
Comments: On December 11, 2014, DTSC approved the Remedial Design Document, dated December 2014. RAW implementation is anticipated to commence during school construction activities in March 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 08/14/2013

201 N. DOUGLAS PROPERTY (Continued) **S108200735**

Comments:	DTSC received a letter report, dated August 14, 2013, regarding Indoor Air Monitoring which was conducted on August 13, 2013.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Other Report
Completed Date:	03/06/2014
Comments:	DTSC had no comments on the CEQA document.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Work Notice
Completed Date:	08/03/2015
Comments:	The Work Notice announcing Methane Mitigation Work (i.e., implementation of the RAW) was mailed/distributed.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 8058

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 36850

Waste code: D003

THE BOEING COMPANY (Continued) **1000240982**

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 6745

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 1942

Waste code: D008
Waste name: LEAD
Amount (Lbs): 26923

Corrective Action Summary:

Event date: 01/01/1990
Event: CA029ST

Event date: 02/27/1991
Event: CA029EP

Event date: 02/27/1991
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 02/27/1991
Event: CA049PA

Event date: 06/01/1992
Event: RFA Completed, Assessment was an RFA.

Event date: 08/14/1992
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 08/14/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 09/21/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be

THE BOEING COMPANY (Continued) **1000240982**

re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 06/13/2013
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 06/24/2013
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 75478

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 67278

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 634

Event: CA074LO

Event date: 05/21/1990
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 03/27/1992
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 03/27/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: LDR - General
Date achieved compliance: 02/11/1988
Evaluation lead agency: State

US AIRS (AFS):
Envid: 1000840757
Region Code: 09
County Code: CA037
Programmatic ID: AIR CASCA0000603700658
Facility Registry ID: 110009527486
D and B Number: Not reported
Facility Site Name: NORTHROP GRUMMAN CORP. AIRCRAFT DIV
Primary SIC Code: 4511
NAICS Code: 336411
Default Air Classification Code: MAJ
Facility Type of Ownership Code: POF
Air CMS Category Code: TVM
HPV Status: Not reported

Registry ID: 110064127671

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/20/1991
Comments: Tetra Tech submitted a preliminary endangerment assessment (environmental assessment) report to the Dept prepared for the rail construction corporation which plans to build a portion of the Los Angeles County Transportation Commission Metro Green Line Project across the identified haz waste property of H. Kramer facility. Tetra Tech provided the proposed construction plan in the PEA. The RP paid the PEA fees to the Dept. PEA was completed. PEA concluded that the site should be referred to U.S. EPA for further action because it is currently on CERCLIS. Currently, EPA is the lead agency for further action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/03/1991
Comments: Sample Results: Slag Pile = PB 2500 mg/kg, CU 53800, BE 230, ZN 76000, AS 17, PB WET 259; Soil = AS 2800 mg/kg, BE 18, CU 1700, PB 420, ZN 76; Groundwater = AS 140 mg/kg, CR6 .23, SE .24, PCE 200 ug/l, TCE 370, Toluene 270, Xylene 300, Carbon Tet 43 (from ENSR Report to EPA, February 1990). Site Screening Done: Site is a brass foundry contaminated w/ AS, PB, ZN, CU. Possible Asbestos in furnace area. Slag pile is primary source. Previous Company had evaporation pond. AS & Solvents in groundwater probably from pond. Pond is now filled with slag.

H KRAMER & COMPANY (Continued) **S101540204**

Potential Media Affected: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Not reported
Site History: H. Kramer & Company operated a brass foundry at the Site from 1951 through mid-1985. Slag generated from site operations was disposed in a waste pile, filling. Operations by a previous owner, Harshaw Chemical Company (Harshaw), included the smelting of antimony. Harshaw generated wastes containing heavy metals, which included arsenic. With the exception of the building foundations in the southwest portion of the Site, all structures have been demolished. Regional Board issued Cleanup and Abatement Order No. 92-094 (CAO). The CAO stated the following: The concrete /asphalt cap was selected as remedy and installed at the Site in 1995 to eliminate the direct contact pathways and to minimize infiltration of surface water into the subsurface soil.Case was closed conditionally in 1995. Site is under post remediation long term monitoring program. However, based on the available data, Regiona Bord staff asked H. Kramer to conduct additional Investigation to find another source of VOCs. New investigation (June 2009) data indicates another VOCs offsite groundwater (from up-gradient [north of the site]) plume may contributed to the onsite groundwater. Aditional groundwater investigation is required by RP.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Target Property Map:	5640438 VENICE, CA
Version Date:	2012
East Map:	5640440 INGLEWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

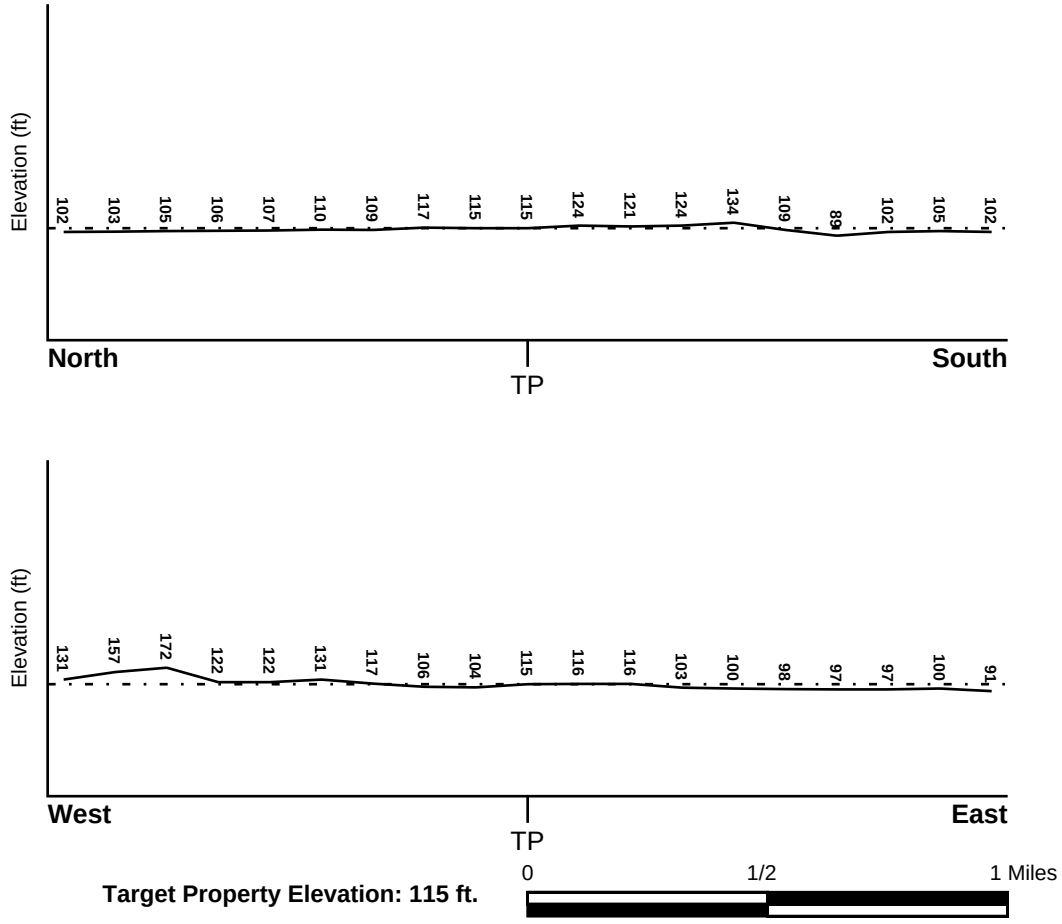
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1770F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile West
Site Name:	International Rectifier
Site EPA ID Number:	CAD076208313
Groundwater Flow Direction:	West
Inferred Depth to Water:	80 feet.
Hydraulic Connection:	Aquifers underlying the site are interconnected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	DELHI
Soil Surface Texture:	sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	10 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
2	10 inches	30 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
3	30 inches	50 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
4	50 inches	70 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand
clay

Surficial Soil Types: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand

clay

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay loam
sandy clay

Deeper Soil Types: coarse sand
silty clay loam
gravelly - fine sandy loam
stratified
gravelly - sandy loam
weathered bedrock
clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

The use of this material is subject to the terms of a license agreement. You will be held liable for any unauthorized copying or disclosure of this material.

This Report contains certain products owned by or licensed by Tele Atlas North America, Inc. ("TANA") and licensed to EDR pursuant to an agreement between EDR and TANA (the "TANA Agreement"). Such products include the Dynamap® /2000 (commencing with the most current version, nationwide coverage, ArcInfo™ format, tiled by county, with semi−annual Updates) and are referred to in this Report as the "Licensed Products".

The use of the Licensed Products with a non−TANA map may result in increased variance between the location displayed on the map and ground truth location.

The recipient of the Report (hereinafter referred to as an "End User") shall use such Report solely for its internal purposes and not for resale.

U.S. GOVERNMENT RIGHTS. If End User is an agency, department, or other entity of the United States Government, or funded in whole or in part by the United States Government, then use, duplication, reproduction, release, modification, disclosure or transfer of this commercial product and accompanying documentation, is restricted in accordance with the LIMITED or RESTRICTED rights as described in DFARS 252.227−7014(a)(1) (JUN 1995) (DOD commercial computer software definition), DFARS 227.7202−1 (DOD policy on commercial computer software), FAR 52.227−19 (JUN 1987) (commercial computer software clause for civilian agencies), DFARS 252.227−7015 (NOV 1995) (DOD technical data − commercial items clause); FAR 52.227−14 Alternates I, II, and III (JUN 1987) (civilian agency technical data and noncommercial computer software clause); and/or FAR 12.211 and FAR 12.212 (commercial item acquisitions), as applicable. In case of conflict between any of the FAR and DFARS provisions listed herein, the construction that provides greater limitations on the Government's rights shall control. Contractor/manufacturer is Tele Atlas North America, Inc., 11 Lafayette Street, Lebanon, NH 03766−1445. Phone: 603.643. 0330. The Licensed Products are ©1984−2008 by Tele Atlas North America, Inc. ALL RIGHTS RESERVED. For purpose of any public disclosure provision under any federal, state or local law, it is agreed that the Licensed Products are a trade secret and a proprietary commercial product and not subject to disclosure.

If End User is an agency, department, or other entity of any State government, the United States Government or any other public entity or funded in whole or in part by the United States Government, such End User agrees to protect the Licensed Products from public disclosure and to consider the Licensed Products exempt from any statute, law, regulation, or code, including any Sunshine Act, Public Records Act, Freedom of Information Act, or equivalent, which permits public access and/or reproduction or use of the Licensed Products. In the event that such exemption is challenged under any such laws, any and all right to retain any copies or to use of the Licensed Products shall be terminated and considered immediately null and void. Any copies of the Licensed Products held by End User shall immediately be destroyed. If any court of competent jurisdiction considers this clause void and unenforceable, in whole or in part, for any reason, then all Licensed Products previously delivered to End User will be destroyed.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EnviroBusiness, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

Clayton Project No. 33106-006851.00

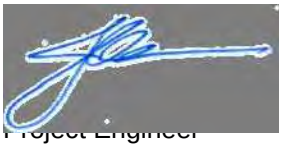
Subject: Phase I Environmental Site Assessment
1940 and 1960 East Grand Avenue
El Segundo, California

Dear Mr. Alarcon:

Clayton Group Services, Inc., *A Bureau Veritas Company*, (Clayton) is pleased to present our Phase I Environmental Site Assessment report for the above-referenced Site. Six report copies are enclosed.

We appreciate this opportunity to be of service. If you have any questions or need additional assistance, please contact me.

Sincerely,



Project Engineer

EXECUTIVE SUMMARY

Michael Alarcon of Lowe Enterprises retained Clayton Group Services, Inc., *A Bureau Veritas Company*, (Clayton) to conduct an ASTM E 1527-05 compliant Phase I Environmental Site Assessment (ESA) in conjunction with a prospective sale of property known as Grand Avenue Courtyard and located at 1940 and 1960 East Grand Avenue in El Segundo, Los Angeles County, California (subject property). The 5.37-acre subject property is also identified by assessor parcel numbers (APNs) 4138-007-065 and -066, which are reportedly owned by Commonwealth Grand Avenue Corp. During this ESA, Clayton discovered and researched no historical addresses or APNs, except for APN 4138-007-049.

The subject property is developed with a nearly 260,000-square-foot, 12-story, office building at 1960 East Grand Avenue; an 11-story (9 above grade and 2 sub grade levels) parking structure at 1940 East Grand Avenue; an asphalt-paved parking lot; and landscaping. Driveways off East Grand Avenue provide access. In addition to offices, a café is located on the ground floor of the office building. Support facilities include backup power, surplus water storage, and roof-mounted equipment.

In 1928 the subject property and surrounding area appear to have been agriculturally cultivated. By 1938 oil exploration dominated much of the area; the subject property featured an AST and a bermed pit, which were removed by 1947 – the area was known as the El Segundo Oil Field. Thereafter until the mid 1970s when modern land configuration emerged, the subject property and adjoining properties were graded from time to time. The current office building and parking garage were built on the subject property around 1988 and the land uses have remained commercial office since.

Regarding the former El Segundo Oil Field, no oil or gas wells are known to have been present on the subject property, but there was an AST and a bermed pit in 1938. Soil investigations conducted on the subject property in the 1980s revealed the presence of petroleum hydrocarbon odors and stains within fill materials to depths of nearly 20 feet bgs. A limited amount of analytical testing detected no petroleum hydrocarbons in the fill. Regulatory agencies have not required that the subject property or surrounding areas investigate historical oil field uses. In addition, the underlying fill material at the subject property is covered with buildings, parking lots, or engineered landscaping, all of which minimize human exposure to the underlying fill. Furthermore, groundwater is first encountered around 100 feet below ground surface, which is well below the extent of the fill, and is unlikely to have been impacted from subject property activities. Therefore, this finding is a historic, but not a current recognized environmental condition (REC).

This ESA has revealed no evidence of current RECs in connection with the subject property. Clayton recommends no additional assessment at this time.

1.0 INTRODUCTION

Michael Alarcon of Lowe Enterprises retained Clayton Group Services, Inc., *A Bureau Veritas Company*, (Clayton) to conduct an ASTM E 1527-05 compliant Phase I Environmental Site Assessment (ESA) in conjunction with a prospective sale of property known as Grand Avenue Courtyard and located at 1940 and 1960 East Grand Avenue in El Segundo, Los Angeles County, California (subject property). The 5.37-acre subject property is also identified by assessor parcel numbers (APNs) 4138-007-065 and -066, which are reportedly owned by Commonwealth Grand Avenue Corp. During this ESA, Clayton discovered and researched no historical addresses or APNs, except for APN 4138-007-049. Figure 1 shows the approximate subject property location.

1.1 PURPOSE

The main purpose of this ESA is to permit a user to satisfy one of the requirements to qualify for landowner liability protections under the CERCLA. This ESA may also help a user better understand business environmental risks. Towards these ends and consistent with good commercial and customary practice, this ESA is designed to identify recognized environmental conditions (RECs) as well as *de minimis* conditions in connection with the subject property by performing all appropriate inquiry into subject property ownership and use as well as into uses of adjoining properties and surrounding areas within approximate minimum search distances from the subject property.

1.2 METHODOLOGY

Clayton conducted this ESA in conformance with ASTM Designation: E 1527-05 *Standard Practice for ESAs: Phase I ESA Process*. The scope of work and the terms and conditions are described in the Clayton's November 28, 2006 Proposal No. 3303.06.707. Qualified personnel working under the responsible charge of an environmental professional conducted this ESA (Appendix A). This ESA includes the following parts: reconnaissance, interviews, records review, and evaluation. In addition, Clayton evaluated the following non-ASTM issues: asbestos, lead, radon, and mold.

1.3 LIMITATIONS

Clayton obtained information for this ESA from various sources (Appendix B), and to the extent it was relied on to form our opinion, this information is assumed to be correct and complete. Clayton is not responsible for the quality or content of information from these sources. Clayton encountered no significant data gaps or limitations, except for the following:

- Clayton has not reviewed records from Los Angeles County Fire Department. Based on the other gathered information, records from these sources would likely be cumulative. Therefore, this limitation is not a significant data gap.
- Clayton identified obvious subject property uses from the present back to 1928, which is data failure since the timeline does not extend back to the earlier of first developed use or 1940. Based on

Clayton's experience, information about prior subject property uses is not reasonably ascertainable or likely to be useful, and this data failure is not a significant data gap.

This ESA is exclusively for use by Lowe Enterprises. Clayton will not distribute or publish this report without consent, unless required by law. Clayton conducted this ESA in response to a limited assignment, and the information and opinions expressed in this report should be considered and implemented only in light of that assignment. Clayton's services in completing this ESA were consistent with normal standards of the profession. Clayton makes no other warranty, expressed or implied.

2.0 RECONNAISSANCE

On December 19, 2006 John D. Glover, P.E. with Clayton performed visual reconnaissance of the subject property, adjoining properties, and surrounding area. Mr. Alarcon, Don McCurry, and Christine Larkin-Ortiz each with Lowe Enterprises provided access to the subject property and accompanied Mr. Glover. Interior and exterior areas were systematically traversed on foot; adjoining properties were observed on foot from the subject property and public thoroughfare; the surrounding area was viewed from a vehicle. Photographs are appended. Figure 2 depicts a subject property plan.

2.1 SUBJECT PROPERTY USE

The subject property is developed with a nearly 260,000-square-foot, 12-story, office building at 1960 East Grand Avenue; an 11-story (9 above grade and 2 sub grade levels) parking structure at 1940 East Grand Avenue; an asphalt-paved parking lot; and landscaping. Driveways off East Grand Avenue provide access. In addition to offices, a café is located on the ground floor of the office building. Support facilities include backup power, surplus water storage, and roof-mounted equipment.

2.1.1 Hazardous Substances and Petroleum Products

Indications of the use, storage, or disposal of hazardous substances and petroleum products include manufacturing activities, drums, containers, stressed vegetation, stains, sheen, and heating/cooling systems. Clayton observed no such indications, except for the following:

- Diesel fuel for backup power generation – one 120-gallon and two 75-gallon aboveground storage tanks (ASTs) are located beneath generators in office building ground floor equipment rooms.
- Biocides and other water treatment chemicals – two 55-gallon drums and several 5-gallon buckets are stored on the office building roof near a cooling tower.
- Roof sealing compound – about 80, 5-gallon buckets temporarily are staged in an office building ground floor storage room.
- Janitorial materials – various typical cleaners in quart to gallon containers are stored on shelves located in an office building ground floor storage room.

- Paints and varnishes – several pint to gallon containers are stored in flammable materials cabinets located in a parking structure lowest floor secured area.
- Car wash soap – a 5-gallon tote is staged in a corner of one parking structure level.

The observed hazardous materials and petroleum products as well as the storage and use areas appeared well maintained. Clayton observed no evidence of leaks, stains, or other indications of releases. The diesel ASTs, water treatment chemicals, and flammables were secondarily contained.

2.1.2 Underground Storage Tanks (USTs)

Indications of USTs include vent piping, dispensing equipment, pavement variations, and fill ports. Clayton observed no indications of USTs, except for a 22,500-gallon water storage reservoir. This UST is a concrete basin that measures approximately 17 by 14 by 12.5 feet deep. A covered manway is located in an office building ground floor equipment room (the same room as the backup generators).

2.1.3 Aboveground Storage Tanks (ASTs)

Indications of ASTs include pavement bolts, containers, reservoirs, and generators. Clayton observed no indications of ASTs, except for the following: one 120-gallon diesel, two 75-gallon diesel ASTs, and a 250-gallon wash water AST. The diesel ASTs are located in the office building ground floor equipment rooms. They support backup power generation for emergency lights and fire suppression pumps. The diesel ASTs were secondarily contained, and appeared undamaged and well maintained; Clayton observed no evidence of releases. The wash water AST collects runoff generated from car washing performed within a bermed area located in a corner of the parking garage. During a wash, soapy water is continuously pumped into this AST.

2.1.4 Liquid Waste

Indications of liquid waste include discharge sources such as sumps, drains, clarifiers, pools of liquid, pits, ponds, lagoons, septic systems, wastewater, and storm water. Clayton observed no indications of discharge sources, except for cooking grease, car wash water, regular sanitary waste, and storm water. One 55-gallon drum of waste cooking grease (vegetable oil) is stored near a refuse bin closet; a commercial recycler regularly off-hauls this waste. Wash water is regularly off-hauled by the car wash operator, Wally's. The sanitary waste discharges through typical floor drains, toilets, and sinks to the municipal sewer. Storm water flows through roof drains or via sheet flow to the municipal storm sewer; also, a sump in the lowest parking garage level collects runoff that is pumped into the sanitary sewer.

2.1.5 Solid Waste

Indications of solid waste disposal include mounding, depressions, fill material, bins, debris, and active human use. Clayton observed no indications of solid waste disposal, except for general office refuse and recyclables, which are collected in roll-off bins located on the office building ground floor. These are regularly removed by a commercial hauler.

2.1.6 Polychlorinated Biphenyls (PCBs)

Indications of PCBs include transformers, capacitors, elevators, lifts, light ballasts. Clayton observed no indications of PCBs, except for a pad-mounted, liquid-cooled transformer, a hydraulic refuse compactor, light ballasts, and seven elevators. The transformer is located near the parking structure, the compactor is located in an office building ground floor equipment room, and the light ballasts are located throughout the office building. These are self-contained, and Clayton observed no evidence of releases or stains near this equipment. The elevators are cable-drawn and have no hydraulic hoists.

2.1.7 Wells

Indications of wells (e.g., supply, irrigation, monitor, injection, dry, abandoned, or other) include protruding pipes, cover plates, pumps, small sheds, large water storage containers, and mounded grout. Clayton observed no indications of wells.

2.2 ADJOINING PROPERTY AND SURROUNDING AREA USE

Adjoining property and surrounding area uses are primarily commercial. These uses include the following:

- North: LAX Business Center office complex (300, 360, 390 North Sepulveda Boulevard), Mattel corporate offices (1955 East Grand Avenue), and a hotel.
- East: Two multi-tenant office buildings (1970 and 1990 East Grand Avenue), and a multi-tenant office building (201 Continental Boulevard).
- South: Asphalt-paved parking lot.
- West: 11-story parking garage for Pacific Corporate Towers (222 North Sepulveda Boulevard).

3.0 INTERVIEWS

At various times during December 2006 John D. Glover, P.E. with Clayton conducted or attempted to conduct interviews. Unless otherwise noted, interviewed persons were generally forthcoming.

3.1 USER

A user is Lowe Enterprises. Clayton interviewed Mr. Alarcon, who completed a User Questionnaire (Appendix C). In summary, this user has no specialized knowledge or experience, and is not aware of environmental liens; activity and use limitations (AULs); or indications of chemicals, contamination, or cleanups associated with the subject property. In addition, this user believes that the price for the subject property reasonably reflects its fair market value.

3.2 PRESENT OWNERS, OPERATORS, AND OCCUPANTS

The present owner and operator is Commonwealth Grand Avenue Corp., which is a part of Lowe Enterprises. On December 19, 2006 Clayton interviewed owner representatives Mr. McCurry and Ms. Larkin-Ortiz, each of whom have years of knowledge regarding subject property use. They stated that Southern California Gas provides natural gas, Southern California Edison provides electricity, and that water and sewer are municipal. Neither was aware of any USTs, wells, or septic systems at the subject property (except for the current water reservoir).

3.3 PAST OWNERS, OPERATORS, AND OCCUPANTS

Clayton identified no past owners, operators, and occupants whose information is likely not duplicative. Therefore, Clayton interviewed none of the identified past owners, operators, and occupants.

3.4 NEARBY PROPERTY OWNERS AND OCCUPANTS

The subject property is not abandoned. Thus, Clayton interviewed no nearby owners and occupants.

3.5 GOVERNMENT OFFICIALS

Clayton attempted to interview inspectors at the Los Angeles County Fire Department – Health Hazardous Materials Division. Department representatives have insisted on following the formal file review request process, and therefore were unavailable for interview.

4.0 RECORDS REVIEW

Clayton reviewed records pertaining to the subject property. In addition, where practicable, Clayton reviewed records indicating uses at adjoining properties and surrounding area within approximate minimum search distances from the subject property.

4.1 PHYSICAL SETTING

4.1.1 Physiography

Clayton reviewed the 1981 United States Geological Survey (USGS) 7.5-Minute Series Venice, Calif. topographic map. This map shows the subject property vacant of structures and land features. Elevation is about 110 feet above mean sea level (amsl). Topography is relatively flat with a gentle, westerly downward slope. The nearest surface water appears to be Pacific Ocean about 2.1 miles west.

4.1.2 Geology

Clayton reviewed United States Department of Agriculture (USDA) soils information presented in a database search report prepared by Environmental Data Resources (EDR). The United States Soil

Conservation Service classifies soil at the subject property as Delhi, which predominately consists of coarse grained sand to depths of at least 70 inches below ground surface (bgs).

Clayton also reviewed a 1986 LeRoy Crandall and Associates geotechnical investigation report performed prior to the construction of the current office building. Soils encountered in the exploratory test borings generally consisted of dark gray, brown, and reddish-brown fill sands from the surface to depths of approximately 8.0 feet bgs. Yellowish brown sands were encountered from 8.0 to 27 feet bgs. Fine sands were found from 27 to about 87 feet bgs. Intermittent layers of sandy and clayey silts were found from 87 to 101 feet bgs (the deepest depth explored). In addition, during grading operations conducted during the early 1970s, fill material was found at depths ranging from 4.0 to 19 feet bgs.

4.1.3 Hydrology

According to the 1986 geotechnical report, groundwater was not encountered in the exploratory borings, which ranged in depths from 23 to 101 feet bgs. Near saturated soils suggestive of an intermittently perched groundwater zone, however, were encountered at approximately 80 feet bgs.

Clayton also reviewed groundwater information for facilities in the surrounding area. In October 2004, groundwater was about 90 feet bgs and flowed northeasterly at 225 South Aviation Boulevard (located about 3,500 feet east and slightly south). In May 2006, groundwater was about 80 feet bgs and flowed southeasterly at 850 South Sepulveda Boulevard (about 1 mile due south). In May 2005, groundwater was about 93 feet bgs and flowed southwesterly at 140 Standard Street (located about 1 mile due west). These data tend to confirm Clayton's experience that Sepulveda Boulevard generally defines a hydraulic divide whereby groundwater flows westerly to the west and easterly to the east of the boulevard. Note: Actual groundwater flow may be influenced by permeability differences or by pumping/recharge, and may deviate from regional trends.

4.2 FIRE INSURANCE MAPS

Clayton requested fire insurance maps of the subject property, adjoining properties, and surrounding area from the EDR collection. Reportedly, no map coverage exists.

4.3 AERIAL PHOTOGRAPHS

Clayton reviewed aerial photographs of the subject property, adjoining properties, and surrounding area from the EDR collection. Photograph summaries follow.

- **1928 Fairchild; Scale: 1"= 500'**

  The subject property, adjoining properties, and surrounding area appear as cultivated fields; numerous small structures resembling residences line these fields to the east. An apparent agriculture reservoir lies in the northeastern corner of the subject property. About 0.25 miles to the southwest are at least three large ASTs and an apparent petroleum storage surface impoundment.

- **1938 Laval; Scale: 1”= 555’**

  The subject property, adjoining properties, and surrounding area still have apparent cultivated fields. The area also appears associated with oil extraction and storage. For example, the probable residences to the east are largely gone, and several areas have cylindrical ASTs and apparent oil wells. On the subject property, one AST in a bermed area is in the southeastern corner, a bermed pit sits near the center; and two rectangular structures lie in the northeastern corner; no oil wells appear on the subject property. A road and a facility with several ASTs are on the eastern adjoining property.

- **1947 Fairchild; Scale: 1”= 666’**

  The subject property, adjoining properties, and surrounding area no longer appear cultivated, and there are fewer ASTs in the area. There is no AST on the subject property, the two rectangular structures are gone, and the bermed areas no longer appear in use. The northern portion of the subject property and the northern and southern adjoining properties appear graded.

- **1956 Fairchild; Scale: 1”= 400’**

  The subject property, adjoining properties, and surrounding area generally appear unchanged, except that the central and western areas of the subject property appear graded. Oil wells are no longer readily apparent in the area.

- **1965 Fairchild; Scale: 1”= 666’**

  The subject property, adjoining properties, and surrounding area have much fewer developments. The subject property and northern, southern, and western adjoining properties are graded. The eastern adjoining AST facility is mostly dismantled.

- **1976 Teledyne; Scale: 1”= 666’**

  The subject property is an unimproved lot. The northern adjoining property is a road resembling the current Grand Avenue and unimproved land. The eastern and western adjoining properties are also unimproved land. The southern adjoining property resembles the current parking lot.

- **1989 USGS; Scale: 1”= 666’**

  The subject property, adjoining properties, and surrounding area generally appear as they do today. Structures resembling the office building, parking garage, parking lot, and landscaping are on the subject property in their current configuration. Commercial-type buildings are on the northern, eastern, and western adjoining properties; the parking lot remains on the southern adjoining property.

- **1994 USGS; Scale: 1”= 666’**

  The subject property, adjoining properties, and surrounding area generally appear unchanged.

- **2002 USGS; Scale: 1”= 666’**

  The subject property, adjoining properties, and surrounding area generally appear unchanged.

4.4 TOPOGRAPHIC MAPS

Clayton reviewed USGS topographic maps of the subject property, adjoining properties, and surrounding area from the EDR collection. Map summaries follow.

- **1896 USGS 15-Minute Series Redondo, California; Scale: 1: 62,500**

  The subject property, adjoining properties, and surrounding area appear unimproved.

- **1924 USGS 6-Minute Series Inglewood, California; Scale: 1: 24,000**

  The subject property, adjoining properties, and surrounding area appear unimproved. Large surface impoundments and ASTs associated with Standard Oil Company are about 0.25 miles southwest.

- **1930 USGS 6-Minute Series Inglewood, California; Scale: 1: 24,000**

  The subject property, adjoining properties, and surrounding area appear unimproved.

- **1948 USGS 15-Minute Series Redondo, California; Scale: 1: 50,000**

  The subject property, adjoining properties, and surrounding area appear unimproved, except that the notation “Oil Wells” describes the subject property vicinity; specific well locations are not depicted. A Standard Oil Company Refinery is about 0.25 miles southwest, and Los Angeles International Airport is about 0.75 miles north.

- **1950 USGS 7.5-Minute Series Venice, California; Scale: 1: 24,000**

  The subject property and northern adjoining property appear unimproved. Roads lie near the eastern, western, and southern adjoining properties; about nine oil wells are in the surrounding area. The nearest well is about 200 feet west.

- **1964 USGS 7.5-Minute Series Venice, California; Scale: 1: 24,000**

  The subject property and northern, western, and southern adjoining properties appear unimproved. The adjoining roads and surrounding oil wells (nearest 1,200 feet east) are limited to eastern areas; the nearest well is about 1,200 feet east.

- **1972 USGS 7.5-Minute Series Venice, California; Scale: 1: 24,000**

  The subject property, adjoining properties, and surrounding appear unimproved, except that Grand Avenue is constructed to the north. The nearest oil wells are over 2,000 feet to the east.

- **1981 USGS 7.5-Minute Series Cuttings Wharf, California; Scale: 1: 24,000**

  The subject property, adjoining properties, and surrounding area generally appear unchanged, except that oil wells are not longer depicted to the east.

4.5 MUNGER MAPS

Clayton reviewed Munger Maps of the subject property, adjoining properties, and surrounding area from the University of California – Berkeley Map Library on November 29, 2000. The 1958 and a 1994 maps depict the subject property and vicinity located within the El Segundo Oil Field. No oil or natural gas wells are depicted on the subject property, although several are located in the immediately surrounding area. The nearest oil well is an abandoned well on the western adjoining property.

4.6 LOCAL STREET DIRECTORIES

Clayton reviewed local street directory entries for the subject properties and adjoining properties on East Grand Avenue and North Sepulveda Boulevard that EDR researched in approximately five-year intervals between the years 1920 and 2006. The subject property address at 1960 East Grand Avenue was not listed until 1990. When listed, occupants appear to be office-type businesses except for a café.

Northern adjoining property occupants at 360 North Sepulveda Boulevard appear to be office-type businesses, except possibly Keller Construction in 1980, Sir Speedy Printing in 1990 and 1995, RF Microsystems in 1995 and 2000, Convex Computer Corp. in 1995, and National Chemsearch Corp. in 2000. Western adjoining property occupants at 222 North Sepulveda Boulevard appear to be office-type businesses from 1985. Eastern adjoining property occupants at 1990 East Grand Avenue appear limited to Hughes Communications (satellite services) or National Satellite Services in 1986 and 1995; in 2000, occupants here were office-type, and Advanced HiTech Corp. was at 1990 East Grand Avenue.

4.7 REGULATORY AGENCIES

4.7.1 Tax Assessor

Clayton obtained current ownership and APN identification (as kept by the Los Angeles County Office of the Assessor) on December 11 and 19, 2006 from that office and from ParcelQuest. This office stated that historical APN 4138-007-049 is no longer active.

4.7.2 Building and Planning

Clayton visited the El Segundo Planning and Building Safety Department on December 19, 2006. The subject property is zoned for Corporate Office (CO) uses. Reviewed records summaries follow.

1940 East Grand Avenue

- December 1982 permit for a temporary construction trailer; owner Prudential Insurance Co
- April 1986 grading permit for 9-story parking structure; owner HOXR Associates c/o Homart Development
- August 1987 Statement of Compliance for a foundation and parking structure; owner Xerox Corp

1960 East Grand Avenue

- November 1985 foundation permit for east tower; owner HOXR Associates c/o Homart Development
- February 1988 framing for shell and core for 12-story office building
- March 1988 Certificate of Occupancy for office use (5th floor); owner Homart.
- 1992-93 tenant improvements; owner Xerox II of Xerox Centre II
- 1997, 1999 tenant improvements; owner Hines
- 2004, 2006 tenant improvements; owner Lowe Enterprises

Clayton also contacted the Los Angeles County Building and Planning Department on December 18, 2006. According to planning staff, this office has no records for the subject property.

4.7.3 Fire

Clayton contacted the El Segundo Fire Department on December 18, 2006. According to Steve Tsumura, subject property records were archived and unavailable for review on December 19, 2006, the day Clayton conducted reconnaissance.

Clayton also contacted the Los Angeles County Fire Department – Health Hazardous Materials Division (HHMD), the local Certified Unified Program Agency (CUPA), on December 18, 2006. This agency failed to process a request for information; a re-submitted request is pending.

4.7.4 Environmental Health

Clayton contacted the Los Angeles County Environmental Health Department, water and sewage program. According to Bernard Franklin, this office reportedly has no subject property records regarding private sewage disposal (i.e., septic systems) or wells.

4.7.5 Public Works

Clayton visited the El Segundo Public Works Department on December 19, 2006. Records indicate that in February 1941 Hughes Aircraft Co. owned land that encompassed the subject property. In February 1977 Sepulveda Properties, Inc. owned subject property land, which was not subdivided as it is today; no land improvements were depicted on an accompanying property map. In August 1983 NU-West, Inc subdivided the subject property.

Clayton also contacted the Los Angeles County Department of Public Works on December 18, 2006. Therese Batungbacal of the Mapping and Property Management Division referred Clayton to the City of El Segundo.

4.7.6 Air Quality

Clayton contacted the South Coast Air Quality Management District (SCAQMD) on December 18, 2006. SCAQMD records relate to the two fire pump generators and the backup emergency lighting generator at the subject property.

4.7.7 Water Quality

Clayton contacted the California Regional Water Quality Control Board – Los Angeles Region (RWQCB) on December 18, 2006. This office reportedly has no records for the subject property.

4.7.8 Toxic Substances

Clayton contacted the California Department of Toxic Substances Control – Glendale Office (DTSC) on December 18, 2006. According to VivianTutaan, this office has no subject property records.

4.8 SUBJECT PROPERTY DOCUMENTS

Clayton reviewed its December 5, 2000 Phase I ESA for the subject property. Relevant summaries of that ESA follow.

City of El Segundo Fire Department Records

At that time, Clayton reviewed City of El Segundo Fire Department records. These included annual fire safety inspections from 1988 to 2000, which documented only minor safety code violations (e.g., alarms, extinguishers, exits, signage); no hazardous material violations were found. Regarding hazardous materials, a 1989 disclosure document reported none. In 1990 the department issued a permit for three diesel ASTs for backup pump and lighting. In 2000 a Hazardous Materials Business Plan (HMBP) identified the diesel fuel as well as Freon 11 for cooling.

1986 Geotechnical Report

This report indicated that the subject property was vacant grassy, weedy land that had been part of an oil field; no oil wells were encountered on the subject property. During surrounding area development from around 1969 through 1971, the subject property was graded and fill material was imported.

1986 Preliminary Contaminated Soil Evaluation

This report describes 24 soil borings advanced at the subject property in 1981, 1982, 1984, and 1986. Indications of petroleum hydrocarbon-impacted soil (e.g., odors, stains) were noted in fill materials found at depths of 4.0, 9.5, 17, and 19 feet bgs. Three soil samples collected at depths ranging from 5.0 to 12 feet bgs were tested for total petroleum hydrocarbons (TPH) and for benzene, toluene, ethylbenzene, xylenes (BTEX, collectively); no TPH or BTEX concentrations were detected.

1995 Limited Asbestos [and other material] Survey

This report describes an inspection and sampling for suspect asbestos containing material (ACM), lead-containing paint (LCP), and polychlorinated biphenyl (PCB)-containing light ballasts, as well as an evaluation of radon gas. Identified suspect ACM included roofing, pipe wrap insulation, duct tape mastic, floor tiles and mastic, drywall joint compound, spray-on fireproofing, and ceiling tiles. No asbestos was detected in samples collected from the 5th, 6th, 8th, 10th, 11th, and 12th floors, roof, and from the parking garage.

Identified suspect LCP included stairwells on the 12th floor, piping and equipment in a mechanical room, and areas within the parking garage. No lead was detected in the eight paint chip samples collected, except for 0.934% lead (a cooling tower pipe). This concentration exceeded the U.S. Department of Housing and Urban Development (HUD) action level of 0.5%, but the subject property is not residential.

No PCB concentrations were identified in light ballasts. Radon levels for the area were determined to be 1.0 picoCuries per liter (pCi/L), and below the United States Environmental Protection Agency's (USEPA) action level of 4.0 pCi/L.

4.9 ACTIVITY & USE LIMITATIONS (AULS)

Clayton reviewed a title and judicial records report prepared by EDR and National Real Estate Information Services for indications of environmental liens and AULs recorded against the subject property. No such indications were apparent as of December 22, 2006.

4.10 ENVIRONMENTAL DATABASE SEARCH

Clayton reviewed an environmental database search report prepared by EDR for information pertinent to the subject property and other facilities located within specified search distances. The database report identifies about 130 facility listings, including orphans, as well as the accessed databases and the dates when information was updated (Appendix D).

The subject property is in the HAZNET, RCRA-SQG and FINDS databases. Occupant Team One Advertising is a generator of hazardous wastes, including photochemical / photoprocessing and laboratory waste chemicals. No violations are reported, and no releases are documented.

The northern adjoining property at 1955 East Grand Avenue (Global Solutions, Mattel, and United Airlines) is in the LUST, Cortese, SWEEPS UST, HMS, HAZNET, RCRA-SQG, Finds, and EMI databases. A leaking UST impacted soil only and the regulatory case was closed; organic and inorganic hazardous wastes are generated; a UST with unknown contents is present; and air emissions are regulated. Other than the closed soil case, no releases are documented.

The northern adjoining property at 360 North Sepulveda Boulevard (LAX Business Center and Hughes Aircraft) is in the HMS, SWEEPS UST, RCRA-SQG, and Finds databases, and at 390 North Sepulveda Boulevard (Nanowave) is on the HAZNET database. No releases are documented.

The eastern adjoining property at 1990 East Grand Avenue (Hughes Aircraft) is in the LUST, SWEEPS UST, and Cortese databases. A leaking UST impacted soil only and the regulatory case was closed. Other than the closed soil case, no releases are documented.

The western adjoining property at 222 North Sepulveda Boulevard (Pacific Corporate Towers) is in the UST, SWEEPS UST, HMS, HAZNET, and RCRA-SQG databases. At least one UST (vehicle fuel) was removed and that hazardous wastes are generated. No releases are documented.

There are many other identified facilities located farther from the subject property. These are all generally downgradient.

5.0 NON-ASTM ISSUES

Clayton addressed non-ASTM issues to help identify business environmental risks at the subject property. The scope of this section is limited, and should not be considered comprehensive.

5.1 ASBESTOS

Given the 1995 ACM inspection and sampling in conjunction with the 1988 office building construction, Clayton performed no assessment for asbestos.

5.2 LEAD

Given the 1995 LCP inspection and sampling in conjunction with the 1988 office building construction, Clayton performed no assessment for lead paint. In addition, given the construction date and the lack of residential tenants or children, Clayton performed no assessment for lead in drinking water.

5.3 RADON

Given the 1995 radon evaluation and the lack of regularly occupied sub grade structures, Clayton performed no assessment for radon.

5.4 MOLD

Clayton performed a visual assessment of the subject property for evidence of mold, such as microbial growth and moisture intrusion. During reconnaissance Clayton did not observe such evidence.

6.0 EVALUATION

Clayton evaluated the parts of this ESA in concert with each other. Our findings generally combine information from various sources checked so that we can form opinions, draw conclusions, and provide recommendations in a reasoned manner.

6.1 FINDINGS AND OPINIONS

Clayton's findings and opinions relate to known or suspect RECs, historical RECs, and *de minimis* conditions. For context, we begin with a subject property use summary.

In 1928 the subject property and surrounding area appear to have been agriculturally cultivated. By 1938 oil exploration dominated much of the area; the subject property featured an AST and a bermed pit, which were removed by 1947 – the area was known as the El Segundo Oil Field. Thereafter until the mid 1970s when modern land configuration emerged, the subject property and adjoining properties were graded from time to time. The current office building and parking garage were built on the subject property around 1988 and the land uses have remained commercial office since. Environmentally notable findings include:

- The subject property lies in the former El Segundo Oil Field. No oil or gas wells are known to have been present on the subject property, but there was an AST and a bermed pit in 1938. Soil investigations conducted on the subject property in the 1980s revealed the presence of petroleum hydrocarbon odors and stains within fill materials to depths of nearly 20 feet bgs. A limited amount of analytical testing detected no petroleum hydrocarbons in the fill. Regulatory agencies have not required that the subject property or surrounding areas investigate historical oil field uses. In addition, the underlying fill material at the subject property is covered with buildings, parking lots, or engineered landscaping, all of which minimize human exposure to the underlying fill. Furthermore, groundwater is first around 100 feet below ground surface, which is well below the extent of the fill, and is unlikely to have been impacted from subject property activities. Therefore, this finding is a historic, but not a current REC.
- The current use and storage of hazardous substances and petroleum products at the subject property is limited to diesel fuel for backup power, cooling water treatment chemicals, janitorial supplies, other subject property equipment (e.g., liquid-cooled transformer), and the photoprocessing wastes. Clayton observed secondary containment systems for most of the chemicals and wastes, and the various containers were in good condition with no evidence of chemical releases. No major chemical violations are noted in the regulatory agency records. Therefore, this finding represents a *de minimis* condition and not a REC.
- The subject property generally sits along a hydrogeologic divide whereby groundwater flows west and the east. As a result, none of the adjoining properties or surrounding facilities identified in the environmental database search report and in local street directories is expected to present a significant environmental concern to the subject property. Therefore, this finding is a *de minimis* condition and not a REC.

6.2 CONCLUSIONS AND RECOMMENDATIONS

Clayton conducted a Phase I ESA in conformance with ASTM Designation: E 1527-05 of the subject property located at 1940 and 1960 East Grand Avenue in El Segundo, Los Angeles County, California. This ESA has revealed no evidence of current RECs in connection with the subject property. Clayton recommends no additional assessment at this time.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Executive Summary

AECOM was retained by TA Associates Realty to perform a Phase I Environmental Site Assessment (ESA) of the Grand Avenue Courtyard office building property located at 1940 and 1960 East Grand Avenue in the City of El Segundo, Los Angeles County, California (subject property). The subject property consists of two parcels totaling approximately 5.36-acres developed with a twelve-story, 260,000 square foot office building and an eleven-level above ground parking garage. The office building does not have a basement, two of the parking garage levels are below grade. On-site tenant activities and operations include office activities. Tenants include airline related businesses, law firms, advertising agencies, other office tenants and a café. The subject property also has a surface parking lot and extensive landscaping including a Kio pond.

The exterior of the subject property office building is glass and concrete with steel framing and the parking garage is concrete. Interior building materials in the office building include 2- by 2-foot acoustic ceiling tiles, painted drywall, carpet, tile flooring, and 12- by 12-inch vinyl floor tiles. Office areas are located on each floor of the office building. The interior of the parking garage is concrete with some areas built out with painted drywall. The office building floors are accessed by four overhead cable-driven passenger elevators and one overhead cable-driven freight elevator. The parking garage has two overhead cable-driven elevators. The elevator mechanical rooms are located on the top floor of the buildings. Surface parking is present at ground level north of the parking garage. Two of the parking garage levels are below grade. Mechanical equipment is located on the top floor and first floor of the office building and the top floor of the garage. The electrical room for emergency electrical equipment is located on the first floor of the office building. The office building is built out with office space, janitorial rooms, restrooms, and a restaurant on the first floor. The garage building is mainly used for parking with some storage and maintenance rooms and a fitness center on the lowest level.

The subject property is bordered to the north by East Grand Avenue, beyond which are multi-tenant office buildings at 300, 360 and 390 North Sepulveda Boulevard, an office building occupied by Mattel at 1955 East Grand Avenue, and a Doubletree Hotel at 1985 East Grand Avenue; to the east by multi-tenant office buildings at 1970 and 1990 East Grand Avenue and 201 Continental Boulevard; to the south by a parking lot associated with an office building located further to the southeast; and to the west by a parking garage associated with a multi-tenant office building at 222 North Sepulveda Boulevard.

Historical research indicates that prior to construction of the current office building and parking garage in 1988, the subject property was part of an oil field. The subject property appears to have been vacant, undeveloped land as depicted on an 1896 topographic map. A 1924 topographic map also shows the subject property to be vacant and undeveloped. A 1928 aerial photograph shows what appears to be an oil sump (referred to in previous environmental reports as a bermed pit) located on the north central portion of the subject property, with an aboveground storage tank (AST) shown on the eastern portion of the subject property in 1938. The subject property remained essentially unchanged until after 1956. In the 1965 and 1976 aerial photographs, the subject property appears to be vacant, graded land. Construction of the existing buildings began in 1987 and the buildings were completed in 1988. The office building has been occupied by office tenants since that time. City directories indicate that the subject property was occupied by various office tenants from 1990 through 2000.

In AECOM's opinion, it is not uncommon for there to be residual amounts of petroleum hydrocarbons in the soils in the area of the subject property, potentially as a result of the historical use of the area as an oil field. AECOM identified a letter from Krazan and Associates Inc. (Krazan) to OTO Development, LLC

dated June 22, 2009. This letter indicates that Krazan had conducted soil sampling at the subject property in July 2008. Krazan concluded that petroleum hydrocarbons detected in subject property soils (43 ppm) did not pose a significant risk for further development of the subject property (see Section 7.2.1). Additionally, the prior Clayton report indicates that odors and stains indicating petroleum hydrocarbon impacts were noted at the subject property during soil sampling from 1981 through 1986. Three soil samples were analyzed at that time for petroleum hydrocarbons and benzene, toluene, ethylbenzene, and xylenes (BTEX), but these compounds were not detected in the soil samples analyzed. However, based on soil sample analysis results obtained as part of prior assessments, the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion. See related discussions in Section 5 and in Section 7.2.1.

The subject property was identified on the RCRA-SQG, FINDS and HAZNET databases as Team One Advertising, Suite E. This current tenant of the building is listed as a small-quantity generator of hazardous waste. The RCRA-SQG database indicated that no violations have been reported for this tenant. The HAZNET database indicates that this tenant has generated photoprocessing waste, which is sent to a recycler or transfer station. According to the site contact, hazardous waste is no longer generated by this tenant. The subject property is not listed on a contamination-related database. Based on AECOM's area reconnaissance and information provided in the EDR report, the former and current uses of the adjacent or nearby sites do not appear to present RECs in association with the subject property.

AECOM has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of the Grand Avenue Courtyard located at 1960 East Grand Avenue in El Segundo, California. Any exceptions to, or deletions from, this practice are described in Section 1.0 of the report. The assessment has revealed no RECs in connection with the subject property. No additional assessment activities are recommended at this time.

1.0 Introduction

1.1 Scope of work

This report presents the results of a Phase I Environmental Site Assessment (ESA) performed by AECOM of the Grand Avenue Courtyard office building property, located at 1940 and 1960 East Grand Avenue in the City of El Segundo, Los Angeles County, California 90245 (subject property). This work was performed in accordance with the Master Service Agreement between AECOM and Realty Associates Advisors, LLC, dated November 14, 2003 and AECOM's letter proposal dated July 28, 2010, and the ASTM Standard Practice for Environmental Site Assessments: Phase I ESA Process (E 1527-05).

1.2 Limitations

This report describes the results of AECOM's due diligence assessment to identify the presence of environmental liabilities materially affecting the subject facility and/or property. In the conduct of this due diligence evaluation, AECOM assessed the presence of such problems within the limits of the established scope of work as described in our letter proposal.

In the conduct of this due diligence investigation, AECOM has attempted to independently assess the presence of such problems within the limits of the established scope of work as described in our proposal. As with any due diligence evaluation, there is a certain degree of dependence upon oral information provided by facility or site representatives which is not readily verifiable through visual observations or supported by any available written documentation. AECOM shall not be held responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed by facility or site representatives at the time this assessment was performed. In addition, the findings in the Report are subject to certain conditions and assumptions. The conditions and assumptions are noted in the Report, and any party reviewing the findings of the Report must carefully review and consider all such conditions and assumptions.

This report and all field data and notes were gathered and/or prepared by AECOM in accordance with the agreed upon scope of work and generally accepted engineering and scientific practice in effect at the time of AECOM's assessment of the subject site. The statements, conclusions, and opinions contained in this report are only intended to give approximations of the environmental conditions at the subject site.

This report is prepared pursuant to an agreement between the client and AECOM and is for the exclusive use of the client. No other party is entitled to rely on the conclusions, observations, specifications, or data contained herein without first obtaining AECOM's written consent and provided any such party signs an AECOM generated Reliance Letter. A third party's signing of the AECOM Reliance Letter and AECOM's written consent are conditions precedent to any additional use or reliance on this report.

The passage of time may result in changes in technology, economic conditions, site variations, or regulatory provisions which would render the report inaccurate. Reliance on the report after the date of issuance as an accurate representation of current site conditions shall be at the user's sole risk.

The only limitation encountered during this assessment was that only representative office areas in the office building were accessed. Due to the use of the building by tenants for only office operations, this limitation is not expected to impact the conclusions of this assessment.

1.3 Data failure/data gaps

This assessment took place between August 2, 2010 and August 20, 2010, with the Phase I ESA site visit occurring on August 6, 2010. The following data failure/data gaps were encountered during the course of this assessment:

- As specified in the agreed upon scope-of-work, a title search and environmental lien search was not conducted as part of this ESA. However, based upon historical data collected from other sources, this data gap is not expected to have an impact on this assessment.
- Per ASTM, past owners, operators, and occupants of the subject property, who are likely to have material information regarding the potential for contamination at the subject property, shall be conducted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. AECOM was unable to interview past owners and/or operators at the subject property. This gap represents a limitation to this assessment but because of the known historical use of the property it is not anticipated to have an impact on this assessment.

2.0 Property description

2.1 Site location

AECOM visited the subject property on August 6, 2010. The subject property is an approximately 5.36-acre parcel of developed land located on the south side of East Grand Avenue, between Sepulveda Boulevard to the west and Continental Boulevard to the east, in El Segundo, Washington. According to the Los Angeles County Assessor's office, the subject property is further described as assessor's parcel numbers (APNs) 4138-007-065 and -066. Figure 1, the Site Location Map, shows the general location of the subject property.

2.2 Site description

One twelve-story office building, totaling 260,000 square feet, is located at the northeast corner of the subject property. An eleven-level parking garage is located at the southwest corner of the subject property. The office building is occupied by a number of tenants, including airline related businesses, law firms, advertising agencies, other office tenants and a café. All of the tenants use the building as office space. According to City of El Segundo Building Department records, the subject property was developed with the existing office building and parking garage in 1988. Surface parking is present at ground level north of the parking garage. Landscaping is present surrounding the buildings, along the property boundaries, and in parking area dividers. Figure 2, the Site Plan, depicts the subject property general layout and surrounding land uses. Representative site photographs are provided in **Appendix A**.

The exterior of the subject property office building is glass and concrete with steel framing and the parking garage is concrete. Interior building materials in the office building include 2- by 4-foot acoustic ceiling tiles, painted drywall, carpet, tile flooring, and 12- by 12-inch vinyl floor tiles. Office areas are located on each floor of the office building. The interior of the parking garage is concrete with some areas built out with painted drywall. The office building floors are accessed by four overhead cable-driven passenger elevators and one overhead cable-driven freight elevator. The parking garage has two overhead cable-driven elevators. The elevator mechanical rooms are located on the top floor of the buildings. Surface parking is present at ground level north of the parking garage. Two of the parking garage levels are below grade. Mechanical equipment, including two chillers, air handlers, a gas boiler, water pumps and a cooling tower, is located on the top floor and first floor of the office building and the top floor of the garage. The electrical room for emergency electrical equipment; including a diesel emergency generator, is located on the first floor of the office building. The office building is built out with office space, janitorial rooms, restrooms, and a restaurant on the first floor. The garage building is mainly used for parking with some storage and maintenance rooms and a fitness center on the lowest level.

An emergency generator is located on the first floor of the office building. The generator includes a self-contained 120-gallon diesel AST. Two additional 120-gallon diesel aboveground storage tanks are associated with the fire pumps located on the first floor of the office building. These ASTs are located within a concrete berm. No drains, stains, or leaks were observed in the vicinity of the diesel ASTs or generator.

Additional specific information regarding the site use is provided below in Section 3.0.

2.3 Adjacent site uses

The subject property is bordered to the north by East Grand Avenue, beyond which are multi-tenant office buildings at 300, 360 and 390 North Sepulveda Boulevard, an office building occupied by Mattel at 1955 East Grand Avenue, and a Doubletree Hotel at 1985 East Grand Avenue; to the east by multi-tenant office buildings at 1970 and 1990 East Grand Avenue and 201 Continental Boulevard; to the south by a parking lot associated with an office building located further to the southeast; and to the west by a parking garage associated with a multi-tenant office building at 222 North Sepulveda Boulevard.

2.4 Topography, vegetation, hydrology and geology

As determined by AECOM's review of the U.S. Geological Survey (USGS) 7.5-minute series topographic map (Venice, California Quadrangle), elevation at the subject property is approximately 115 feet above mean sea level. The surface topography of the subject property and immediately surrounding is relatively flat with a slight slope toward the north-northwest.

Vegetation at the subject property is comprised of planted landscaping, consisting of trees, small shrubs, and grasses located along the perimeter of the subject property, surrounding the onsite buildings, and in parking area dividers. No stressed vegetation was observed by AECOM or reported by Mr. Don McCurry, Chief Engineer of the subject property.

Based on well data provided by the Los Angeles County Department of Public Works Ground Water Wells website, shallow groundwater is expected to be present within 95 to 100 feet of the ground surface. Groundwater gradient in the area of the subject property appears to be toward the east.

A geotechnical investigation of the subject property performed in 1982 identified fill soils consisting of silty sand and sand up to 22 feet in thickness, with deeper fill within the northern portion of the subject property. Underlying natural soils consisted primarily of firm, dense sand. The geotechnical report did indicate that there was "some evidence of petroleum products" in the exploratory borings, but did not provide any more specific information on amount or locations. The exploratory borings were placed throughout the subject property, including the approximate area of the former oil sump and AST. However, based on soil sample analysis results obtained as part of prior assessments (see Section 5), the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion.

The EDR report identifies the bedrock rock geology at the subject property as belonging to the Stratified Sequence, Cenozoic Era, Quaternary System, Quaternary Series.

3.0 Site reconnaissance

On Friday, August 6, 2010, Mr. David Simon of AECOM's Orange, California office visited the subject property to conduct a site and area reconnaissance. During the site visit, Mr. Simon interviewed and was accompanied by Mr. Don McCurry, Chief Engineer with Tishman Speyer. The subject property has been owned and managed by Tishman Speyer since 1995.

3.1 Site use

AECOM evaluated the interior and exterior of the office building and parking garage. The office building is constructed with concrete slab floors and glass and concrete exteriors with steel framing. The office building contains office space, electrical rooms, an elevator room, and a mechanical room. The garage building is constructed of concrete. The garage building contains parking space, built-out maintenance offices and storage rooms and a fitness center. The buildings are occupied by office tenants. Tenants include airline related businesses, law firms, advertising agencies, other office tenants and a café. The subject property also has a surface parking lot and extensive landscaping including a Kio pond.

3.2 Underground and aboveground storage tanks

Mr. McCurry reported that no underground storage tanks (USTs) are currently located on the subject property, other than a 22,000-gallon fire water storage tank located under the east side of the office building. No evidence of USTs (i.e., vent pipes, fill ports) was observed by AECOM during the site visit.

An emergency generator is located on the first floor of the office building. The generator includes a self-contained 120-gallon diesel AST. Two additional 120-gallon diesel aboveground storage tanks are associated with the fire pumps located on the first floor of the office building. These ASTs are located within a concrete berm. No drains, stains, or leaks were observed in the vicinity of the diesel ASTs or generator.

3.3 Odors

No unusual odors were noted during AECOM's site visit.

3.4 Pools of liquid

No pools of liquid were observed on the subject property during AECOM's site visit, other than the Kio pond located at the northeast corner of the parking garage.

3.5 Hazardous materials

Small quantities of paints, cleaners, degreaser (WD-40), stains, and motor oil (associated with the generators) were observed to be stored on shelving units and/or in flammable materials cabinets in the janitorial supply rooms, mechanical rooms, storage rooms, and generator rooms. The materials were not stored in the vicinity of floor drains and no significant staining was observed in the storage areas. Two 55-gallon drums of water treatment chemicals are stored on the roof of the office building adjacent to the cooling tower. These chemicals are located on secondary containment pallets. According to AECOM's review of a Hazardous Materials Business Plan filed with the El Segundo Fire Department in 2008 (see Section 7.2.1), the facility stores 210 gallons of diesel fuel and 900 pounds of

chlorofluoromethane. The chlorofluoromethane is used in the closed-loop chiller system located on the top floor of the office building. No other permit or hazardous materials reporting information was obtained from the agencies contacted. It should be noted that an environmental compliance evaluation was not within the scope of work for this Phase I ESA. No other hazardous material storage was observed at the subject property during AECOM's site visit, or reported by Mr. McCurry to be used or stored at the subject property.

3.6 Solid (non-hazardous) waste

AECOM observed dumpsters located on the first floor of the office building, located within a concrete enclosure. According to Mr. McCurry, the dumpsters are used for general trash generated by the on-site office tenants. The garbage is collected by Waste Management once per week. No evidence of inappropriate disposal activities was observed in the dumpster area.

3.7 Hazardous waste

No hazardous wastes were observed by AECOM, or reported by Mr. McCurry, to be generated on the subject property.

3.8 PCB-containing equipment

A concrete pad-mounted transformer was observed outside at the northwest corner of the parking garage. The transformer is owned by, and is the responsibility of, the Southern California Edison Company. No markings were observed on the transformer indicating polychlorinated biphenyl (PCB) content; however, no staining was observed on the transformer or on the concrete pad. Additionally, based on the age of the subject property development (circa 1988), PCBs are not anticipated to be present within the on-site transformer equipment. Based on the above information; the onsite transformer appears to be properly managed.

No hydraulic elevators were observed at the subject property. Representative fluorescent light ballast were inspected during a 1995 Phase I ESA of the subject property (see Section 5). All light ballasts inspected in 1995 were labeled "no PCBs". No other potentially PCB-containing electrical or hydraulic equipment was identified at the subject property, or was reported by Mr. McCurry to be located at the subject property.

3.9 Heating and cooling

Office areas are heated with natural gas-fired roof-mounted heating, and electric-powered cooling, ventilation, and air conditioning (HVAC) units. No evidence of heating oil tanks was observed on the subject property, or reported by Mr. McCurry to be located at the subject property. Electricity and natural gas are provided to the subject property by the Southern California Edison Company and Southern California Gas.

3.10 Stains or corrosion

Some water staining was noted on the concrete walls of the lower levels of the parking garage. The staining extends from the top to the bottom of the walls in several areas, and is several inches wide (see photograph in Appendix A). Mr. McCurry indicated that the staining was the result of landscape irrigation water seepage. No other stains or corrosion was observed by AECOM during the site reconnaissance, or was reported by Mr. McCurry.

3.11 Water and wastewater/storm water

According to Mr. McCurry, the subject property receives its potable water from the City of El Segundo. No private groundwater supply wells were observed on the subject property during AECOM's site reconnaissance. Additionally, Mr. McCurry was not aware of private groundwater supply wells on the subject property.

Sanitary sewer services are provided by the City of El Segundo. Floor drains were observed by AECOM in the onsite restrooms and mop basin sinks were observed in some of the electrical and mechanical rooms. Mr. McCurry stated that these drains were connected to the sanitary sewer. No staining was observed in the vicinity of the floor drains or within the mop basin sinks. No evidence of a current or historical septic system was observed on the subject property. Additionally, Mr. McCurry was not aware of private on-site septic systems.

Storm water is directed via sheet flow to on-site storm water drains, which are directed to municipal storm water system. According to Mr. McCurry and AECOM's observations, the subject property does not receive storm water runoff from adjacent or surrounding sites.

One storm water sump was observed on the lower level of the parking garage. No staining or standing water was observed in the vicinity of the sump. According to Mr. McCurry, the sump drains to the municipal storm water system.

3.12 Wetlands

The EDR report provides maps based on the U.S. Fish and Wildlife Service National Wetland Inventory (NWI) data from 2002 and 2005. According to the NWI quadrangle data for the subject property area, the subject property is not located in a wetland. No wetland-type areas were observed in the vicinity of the subject property during AECOM's reconnaissance. A landscaped Kio pond is located at the northeast corner of the parking garage building. No other pits, ponds, or lagoons were observed on the subject property at the time of the site reconnaissance. However, it should be noted that a wetlands delineation survey was not conducted as part of this assessment work scope.

3.13 Lead-based paint

Historical research and information provided by Mr. McCurry indicates that the subject property was developed in approximately 1988. Based on the age of the buildings, lead-based paint is not likely to be present on the building materials. Mr. McCurry was not aware that any lead-based paint surveys had previously been conducted for the subject property. However, a 2007 Phase I ESA report (see Section 5) indicated that a lead based paint survey was conducted in 1995. Eight paint chip samples were collected from stairwells on the 12th floor, piping and equipment in the mechanical room, and areas within the parking garage. No lead was identified in the samples collected, with the exception of 0.934% lead in the paint chip sample from a cooling tower pipe. It has been AECOM's experience that lead-based paint in building materials can only be evaluated by sampling and laboratory analysis, and it should be noted that a lead-based paint survey of the subject property was not conducted as part of this assessment.

3.14 Asbestos

Historical research and information provided by Mr. McCurry indicates that the subject property was developed in approximately 1988. Based on the age of the buildings, asbestos-containing material is not likely to be present in the building materials. Additionally, a 2007 Phase I ESA report (see Section 5)

indicated that an asbestos survey of the subject property was conducted in 1995. An unspecified number of samples were collected from roofing materials, pipe wrap insulation, duct tape mastic, floor tiles and mastic, drywall joint compound, spray-on fireproofing, and ceiling tiles. No asbestos was identified in the samples of suspect building materials collected.

3.15 Radon

According to the U.S. EPA, Los Angeles County, California, is located within EPA Radon Zone 2, indicating that the average predicted indoor screening level for radon will be between 2.0 and 4.0 picoCuries per liter (pCi/L) of air. The U.S. EPA Recommended Action Level for radon in residential dwellings is 4.0 pCi/L. The U.S. EPA has not designated a Recommended Action Level for radon in commercial or industrial buildings. However, based on state radon test results, of 14 sites tested in the area of the subject property, only one resulted in concentrations of radon in air greater than 4 pCi/L. Based on federal radon test results, of 63 sites tested in the area of the subject property, the average concentration of radon in air in first floor living areas was 0.711 pCi/L; not reported in second floor living areas; and 0.933 pCi/L in basement areas. Based on this information, radon is not considered a significant concern in association with the subject property.

3.16 Mold

Accessible interior areas of the subject property were observed for the potential presence of mold as well as for conditions favorable for mold growth, such as water damage/intrusions. As previously stated in Section 3.10, some water staining was noted on the concrete walls of the lower levels of the parking garage (below ground). Mr. McCurry indicated that the staining was the result of landscape irrigation water seepage. No other stains or corrosion was observed by AECOM during the site reconnaissance, or was reported by Mr. McCurry.

Additionally, in May 2007, Healthy Buildings International Inc. (HBI) performed a mold assessment at the office building of the subject property following a water leak in a 3rd floor break room (see Section 5). HBI conducted visual observations for stains, discoloration and visible mold growth. Moisture levels were measured in areas that appeared to be damp. Marginally wet drywall was identified in a stairwell, a 3rd floor restroom and the ceiling of the 1st floor café and in the 1st floor central corridor. Fans and dehumidifiers were used to dry out the areas. A follow-up inspection by HBI one week later did not reveal stains or mold growth or excessive dampness. No staining or other evidence of mold growth in these areas was identified during the site reconnaissance for this assessment. Airborne samples for mold did not indicate a significant source of mold in the building.

4.0 Historical records review

AECOM consulted the following historical sources to develop a history of the previous uses or occupancies of the subject property and surrounding area. According to EDR-Sanborn, Inc., Sanborn Fire Insurance map coverage is not available for the subject property area. A discussion of previously prepared environmental reports for the subject property is provided in Section 5.0.

- Aerial photographs dated 1928, 1938, 1947, 1956, 1965, 1976, 1989, 1994, 2002, and 2005, obtained from EDR.
- Topographic maps dated 1897 (Redondo, 15-minute series), 1901 (Southern CA Sheet 1, 60-minute series), 1924 (Inglewood, 6-minute series), 1930 (Inglewood, 6-minute series), 1948 (Redondo, 15-minute series), 1950 (Venice, 7.5-minute series), 1964 (Venice, 7.5-minute series), 1972 (1964 photorevised), and 1981 (1964 photorevised), obtained from EDR.
- City directories abstract of information from various city directories dated from 1920 through 2006 (in approximate 5-year intervals), obtained from EDR.
- Interview with Mr. Don McCurry, Chief Engineer with Tishman Speyer, as representative of subject property management and current ownership.
- Building permit records obtained from the City of El Segundo Building Department.

4.1 Subject property

Historical research indicates that prior to construction of the current buildings in 1988, the subject property was part of an oil field in approximately the 1920s through 1950s. No structures or features are depicted on 1896 or 1924 topographic maps A 1928 aerial photograph shows what appears to be an oil sump (referred to in previous environmental reports as a bermed pit) located on the north central portion of the subject property in the area of the surface parking lot and landscaped area west of the office building, and with an aboveground storage tank (AST) shown on the eastern portion of the subject property in 1938, in the area currently occupied by the office building and the landscaped area south of the office building. The subject property remained essentially unchanged through at least 1956. The State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Map 121 of the El Segundo and Lawndale Oilfields shows that no oil wells were located on the subject property.

In the 1965 and 1976 aerial photographs, the subject property is shown as vacant, graded land. Construction of the existing buildings began in 1987 and the buildings were completed in 1988. The building has been occupied by office tenants since that time. City directories indicate that the property was occupied by various office tenants and a restaurant from 1990 through 2000.

In AECOM's opinion, it is not uncommon for there to be residual amounts of petroleum hydrocarbons in the soils in the area of the subject property, potentially as a result of the historical use of the area as an oil field. Based on soil sample analysis results, the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion. See related discussions in Section 5 and in Section 7.2.1.

4.2 Surrounding area

Historical research indicates that surrounding sites were vacant undeveloped land in at least 1896. The area surrounding the subject property was first developed as an oil field in the 1920s and 1930s, and continued to be used as an oil field into the 1950s. DOGGR Map 121 indicates that an oil well was located on the site adjacent to the west of the subject property. Redevelopment of the adjacent sites appears to have begun in the mid-1960s. The parking lot to the south of the subject property was constructed in the early to mid 1970s. The remaining buildings surrounding the subject property were constructed between 1976 and 1989.

5.0 Previous environmental reports

TA Associates Realty and Mr. McCurry provided several previously prepared environmental documents regarding the subject property, summarized below. Copies of these documents are provided in **Appendix B**.

Report of Geotechnical Investigation, Proposed Building Development, Grand Avenue Between Sepulveda, Continental, and El Segundo Boulevards, El Segundo, California, dated March 8, 1984. Prepared by LeRoy Crandall and Associates for Nu-West Inc. (California)

LeRoy Crandall and Associates performed a geotechnical investigation of the subject property in February 1982 and issued this report with supplementary foundation recommendations in March 1984. The geotechnical investigation identified fill soils consisting of silty sand and sand up to 22 feet in thickness, with deeper fill within the northern portion of the subject property. Underlying natural soils consisted primarily of firm, dense sand. The report notes that the subject property was formerly part of an oil field, but does not include dates or any other information regarding the oil field. The subject property was graded for development in 1969, 1970, and 1971, which included the placement of compacted fill material. Exploration borings conducted from 1981 through 1984, did find some visual evidence of petroleum hydrocarbons in subject property soils. No further information was provided on the amount or locations of these petroleum hydrocarbons. However, based on soil sample analysis results obtained as part of prior assessments (see continued discussion below), the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion.

Report of Phase I Environmental Site Assessment, Xerox Centre, 1960 East Grand Avenue, El Segundo, California, dated April 1995. Prepared by Kleinfelder, Inc. for Homart Development Co.

Kleinfelder, Inc. performed a Phase I ESA of the subject property in April 1995. During the ESA, the subject property was developed with the existing office building and garage. The Kleinfelder report identifies the subject property as being undeveloped prior to the construction of the existing buildings. The 22,000-gallon fire water UST was identified at the east side of the office building. The two 100-gallon diesel ASTs were identified associated with an emergency generator. All light ballasts inspected at the time were labeled "no PCBs". No nearby facilities that appeared to present an environmental concern were identified.

Phase I Environmental Site Assessment, 1940 and 1960 East Grand Avenue, El Segundo, California, dated January 26, 2007. Prepared by Clayton Group Services, Inc. for Lowe Enterprises.

Clayton Group Services, Inc. (Clayton) performed a Phase I ESA of the subject property in January 2007. During the ESA, the subject property was developed with the existing office building and garage. The Clayton report identifies the subject property as being agricultural in 1928 and occupied by an oil sump and an associated AST in 1938, which were removed by 1947. The land was graded in the 1970s and the existing buildings were constructed around 1988. No oil or gas wells were reported to have been developed on the subject property. Petroleum hydrocarbon odors and stains were noted during soil investigations conducted in the 1980s (as noted in the 1984 Geotechnical Investigation, discussed

above); however no petroleum hydrocarbons were detected by laboratory analysis of the soil. The odors and staining were considered to represent an historic recognized environmental condition. One 120-gallon and two 75-gallon diesel ASTs were associated with emergency generators. The approximate 22,000-gallon fire water UST was noted under the east side of the building. According to a 1986 geotechnical report described in this ESA report, the subject property was graded and fill material was imported from 1969 to 1971. Clayton reviewed a preliminary contaminated soil evaluation report prepared in 1986, prior to development of the subject property. A copy of this report could not be located during AECOM's site assessment activities; however, AECOM identified a letter from Krazan and Associates Inc. (Krazan) to OTO Development, LLC dated June 22, 2009. This letter indicates that Krazan had conducted soil sampling at the subject property in July 2008. Krazan concluded that petroleum hydrocarbons detected in subject property soils did not pose a significant risk for further development of the subject property (see Section 7.2.1). Additionally, the Clayton report indicates that odors and stains indicating petroleum hydrocarbon impacts were noted at the subject property during soil sampling from 1981 through 1986. Three soil samples were analyzed for petroleum hydrocarbons and benzene, toluene, ethylbenzene, and xylenes (BTEX), but these compounds were not detected in the soil samples analyzed.

In 1995 sampling was conducted for asbestos containing materials, lead based paint, polychlorinated biphenyls and radon. No asbestos was identified in the samples of suspect building materials collected from roofing materials, pipe wrap insulation, duct tape mastic, floor tiles and mastic, drywall joint compound, spray-on fireproofing, and ceiling tiles. Lead samples were collected from stairwells on the 12th floor, piping and equipment in the mechanical room, and areas within the parking garage. Lead was detected on a cooling tower pipe. No PCBs were identified and radon levels were determined to be below the EPA action level. No nearby facilities that appeared to present an environmental concern were identified.

Clayton concluded that "Regulatory agencies have not required that the subject property or surrounding areas investigate historical oil field uses. In addition, the underlying fill material at the subject property is covered with buildings, parking lots, or engineered landscaping, all of which minimize human exposure to the underlying fill. Furthermore, groundwater is first encountered around 100 feet below ground surface, which is well below the extent of the fill, and is unlikely to have been impacted from subject property activities. Therefore, this finding is a historic, but not a current REC".

HBI Mold Assessment Report and Clearance Document, 1960 East Grand Avenue, El Segundo, California, dated May 14, 2007. Prepared by Healthy Buildings International, Inc. for Lowe Enterprises, and ***HBI Mold Assessment Report and Clearance Document, 1st Floor Central Corridor, 1960 East Grand Avenue, El Segundo, California***, dated May 21, 2007. Prepared by Healthy Buildings International, Inc. for Lowe Enterprises.

Healthy Buildings International Inc. (HBI) performed a mold assessment following a water leak in a 3rd floor break room. HBI conducted visual observations for stains, discoloration and visible mold growth. Moisture levels were measured in areas that appeared to be damp. Marginally wet drywall was identified in a stairwell, a 3rd floor restroom and the ceiling of the 1st floor café and in the 1st floor central corridor. Fans and dehumidifiers were used to dry out the areas. A follow-up inspection did not reveal and stains or mold growth or excessive dampness. Airborne samples for mold did not indicate a significant source of mold in the building.

6.0 Property disclosure law and user provided information

6.1 Property disclosure law

The State of California does not have property disclosure laws, but rather follows the federal CERCLA law which places the burden on the property owner to perform due diligence on a property prior to purchase.

6.2 User provided information

AECOM submitted an ASTM "User Questionnaire" to Mr. Clifford Chandler of TA Associates Realty. Mr. Chandler's responses to the questionnaire indicate that TA Associates Realty is not aware of the presence of any environmental cleanup liens filed or recorded against the property, or any activity or land use limitations that are in place on the property or that have been filed or recorded in a registry. Additionally, Mr. Chandler reported that the purchase price being paid for this property reasonably reflected the fair market value of the property. Mr. Chandler reported that TA Associates Realty does not have any specialized knowledge or experience related to the property or nearby properties; nor are they aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases. Based on their knowledge and experience related to the property, Mr. Chandler reported that there were no obvious indicators that point to the presence or likely presence of contamination at the property.

7.0 Environmental records research

7.1 Federal and state agency records

EDR provided regulatory information for the subject property and surrounding sites using a database search. A copy of the database report is attached as Appendix C. All database abbreviations are provided in the EDR report. Sites that could not be mapped by EDR were researched by AECOM during the site reconnaissance and none were observed to be located in the vicinity of the subject property. A summary of the results of the EDR database search are presented below. A list of the databases searched and their respective search distances are provided in the EDR report.

7.1.1 Subject property

The subject property was identified on the RCRA-SQG, FINDS and HAZNET databases as Team One Advertising, Suite E. This current tenant of the building is listed as a small-quantity generator of hazardous waste. The RCRA-SQG database indicated that no violations have been reported for this tenant. The HAZNET database indicates that this tenant has generated photoprocessing waste, which is sent to a recycler or transfer station. According to the site contact, hazardous waste is no longer generated by this tenant. The subject property is not listed on a contamination-related database.

7.1.2 Nearby sites

The northern adjacent sites (across East Grand Avenue), at 300 and 360 North Sepulveda Boulevard are listed on the RCRA-NonGen, RCRA-SQG, SWEEPS UST, HAZNET, Los Angeles Co HMS, and FINDS databases. No violations were reported on the RCRA databases. The facilities are not listed on other contamination-related databases, and as such do present a REC in association with the subject property.

The northern adjacent site (crossgradient across East Grand Avenue), at 1955 East Grand Avenue is listed as a Leaking Underground Storage Tank (LUST) Site under the name Global Solutions. A release of aviation fuel was reported in 1997. The release was limited to the soil and the case was closed by the lead regulatory agency, the City of El Segundo, in 1998. The facility is not listed on other contamination-related databases. This address is also associated with listings on the RCRA-SQG, FINDS, Hist Cortese, HAZNET and EMI databases under the name of Mattel Inc. and on the SWEEPS UST and Los Angeles Co. HMS databases under the name of United Airlines Based on the closed case LUST status, this site does not present a REC in association with the subject property.

The eastern adjacent site (downgradient) at 1990 East Grand Avenue is listed as a LUST Site under the name Hughes Aircraft Co CSG. A release of aviation fuel was reported in 1996. The release was limited to the soil and the case was closed by the lead regulatory agency, the City of El Segundo, in 1996. The facility is not listed on any other contamination-related databases. This address is also associated with listings on the Hist Cortese and SWEEPS UST databases. Based on the closed case LUST status, this site does not present a REC in association with the subject property.

The western adjacent site at 222 North Sepulveda Boulevard is listed on the SWEEPS UST, HAZNET and EMI databases. The facility is not listed on a contamination-related database.

The Raytheon Company, SAS (Hughes Aircraft Company) facility, located at 2000 East El Segundo Boulevard, is listed on the Comprehensive Environmental Response Compensation and Liability Information System No Further Remedial Action Planned (CERC-NFRAP), CORRACTS, RCRA-TSDF, RCRA-LQG, Envirostor, LUST, UST, AST, Hist Cortese, and HWP databases. This property is located approximately ¼-mile south of the subject property. The LUST listing indicates that a release of solvents in 1986 only impacted soil. The case was closed by the LARWQCB in 1996. The CERC-NFRAP indicates that the facility was deferred to RCRA (Subtitle C) in 1991 and archived in 1996. The CORRACTS database indicates that the facility was assigned a low corrective action priority in 1991 and 1992. A RCRA Facility Assessment (RFA) was completed in 1991. A Stabilization Measures Evaluation conducted in 1992 determined that the facility was not amenable to stabilization activity at the time. The HWP database indicates that the 1991 RFA identified two areas of concern (AOCs). An underground fuel clean up and closure report was submitted to the LARWQCB in 1996 indicating that soil vapor extraction had been used to remove gasoline from the soil and groundwater. Based on its distance from the subject property, and the regulatory oversight, this site does not present a REC in association with the subject property.

Four additional CERC-NFRAP listings were identified within 1 mile of the subject property: International Rectifier, Devlin Pharmaceuticals Inc., Northrop Corp. Aircraft Div., and Allied Sales & Salvage. All of these facilities were determined to require no further remedial action following a preliminary assessment. All of these facilities are located over ¼ mile from the subject property. Based on the distance from the subject property and NFRAP status, these facilities do not present a REC in association with the subject property.

Three additional sites were listed on the CORRACTS database within ½ mile of the subject property: Northrop Corp Aircraft Div, Hughes Aircraft Co S&CG, and Rockwell International. The Northrop facility is located over ¼-mile from the subject property and was assigned a low corrective action priority. The Hughes facility is located over ½-mile from the subject property and was assigned a medium corrective action priority. The Rockwell facility is located over ½-mile from the subject property, was assigned a low corrective action priority, and had an RFA completed in 1994. Based on the distance from the subject property and low corrective action priority status, these facilities do not present a REC in association with the subject property.

Nine additional Leaking Underground Storage Tank (LUST) sites were listed within ½ mile of the subject property. Eight of these sites have only impacted soil and have been closed by the lead regulatory agency. The remaining site, International Rectifier Corp., at 233 Kansas Street is located approximately 2,185 feet west of the subject property. Two releases are noted for this facility: a release of solvents in 1990 only impacted soil and a release of wastewater in 1990 that has impacted groundwater. Assessment and remedial action are underway at the site. Based on the distance from the subject property, this site does not present a REC in association with the subject property.

No other sites of potential concern were identified on the databases searched by EDR, and no sites of potential concern were identified during AECOM's area reconnaissance. Specific information pertaining to the identified sites is provided in the EDR report.

7.2 Municipal and local authorities

7.2.1 City of El Segundo Fire Department, Fire Prevention Division

On August 13, 2010, AECOM reviewed information on file at the City of El Segundo Fire Department. The records on file included a Hazardous Materials Business Plan completed in 2008 and a letter from Krazan and Associates Inc. (Krazan) to OTO Development, LLC dated June 22, 2009.

The Hazardous Materials Business Plan completed in 2008 indicated that hazardous materials stored at the property included 210 gallons of diesel and 900 pounds of chlorofluoromethane. The chlorofluoromethane is used in the closed-loop chiller system located on the top floor of the office building.

The letter from Krazan to OTO Development, LLC dated June 22, 2009 indicated that Krazan had conducted soil sampling at the subject property in July 2008. AECOM presumes that the soil sampling was conducted as a soil-screening prior to anticipated construction activities pertaining to re-development of the parking lot portion of the subject property with a proposed hotel. A concentration of Total Recoverable Petroleum Hydrocarbons of 43 milligrams per kilogram (mg/kg) was reportedly detected during laboratory analysis of soil samples. Krazan noted that this concentration was below the State of California Regional Water Quality Control Board Environmental Screening Level for residential soil of 83 mg/kg for total petroleum hydrocarbons as gasoline and 370 mg/kg for total petroleum hydrocarbons as residual fuel. Krazan summarizes that the petroleum hydrocarbons detected did not pose a significant risk for further development of the subject property. No other details were provided in the letter. In AECOM's opinion, it is not uncommon for there to be residual amounts of petroleum hydrocarbons in the soils in the area of the subject property, potentially as a result of the historical use of the area as an oil field. Based on the above soil sample analysis results, and as previously identified in Section 4.1, details of which were also discussed in Section 5, the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion.

7.2.2 City of El Segundo Building Department

On August 6, 2010, AECOM searched permit records for the subject property at the City of El Segundo Building Department. A number of permits were available for the subject property including construction of the existing office building and parking garage and subsequent minor internal remodels, sprinkler modifications, and electrical updates. No permits identifying potential environmental concerns were identified.

7.2.3 Los Angeles County Assessor

AECOM preformed a search of the Los Angeles County Assessor Property Assessment Information System website (http://assessor.lacounty.gov/extranet/DataMaps/pais.aspx) for general building information, past ownership information, and general parcel information. Information obtained from this database is incorporated throughout this report.

7.2.4 California Regional Water Quality Control Board, Los Angeles Region

On August 13, 2010, AECOM received a letter from the California Regional Water Quality Control Board, Los Angeles Region (LARWQCB). This agency indicated that they do not have any records for the subject property.

7.2.5 United States Environmental Protection Agency (US EPA)

AECOM searched the US EPA Enforcement and Compliance History Online (ECHO) and Envirofacts Data Warehouse (Envirofacts). The ECHO database consists of US EPA compliance history at a site. Envirofacts is a database search of US EPA databases, including the CERCLIS database, which consists of sites being assessed under the Superfund program (NPL sites), hazardous waste sites, and potential hazardous waste sites. The subject property was identified on the ECHO and Envirofacts databases under the name Team One Advertising. This facility is noted as a small quantity hazardous

waste generator with no reported compliance violations, similarly as identified in the EDR report (Section 7.1.1). These listings are non-contamination related.

8.0 Conclusions and recommendations

8.1 Conclusions

AECOM has performed a Phase I ESA at Grand Avenue Courtyard, 1960 East Grand Avenue located in El Segundo, California. We have performed the Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05. Any exception to, or deletions from, this practice are described in Section 1.0 of the report. The assessment has revealed no evidence of RECs in connection with the subject property.

In AECOM's opinion, it is not uncommon for there to be residual amounts of petroleum hydrocarbons in the soils in the area of the subject property, potentially as a result of the historical use of the area as an oil field. Based on soil sample analysis results, the historical use of the subject property as part of an oil field in approximately the 1920s through 1950s is considered to represent a de minimis environmental condition in association with the subject property, in AECOM's opinion.

8.2 Recommendations

Based on the above findings and discussion, additional investigative activities are not recommended.

8.3 Environmental professional statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Signature: 
David Simon, REA
Project Engineer

APPENDIX H

TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or

substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

APPENDIX H

TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or

substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

RMS	Root mean square
SEL	Single Event Level or Sound Exposure Level
STC	Sound Transmission Class
UMTA	Federal Urban Mass Transit Administration
VdB	Vibration velocity level in decibels

1.0 EXECUTIVE SUMMARY

1.1 Purpose of Analysis and Study Objectives

This Noise Impact Analysis has been prepared to determine the noise impacts associated with the proposed 1950-1960 East Grand Avenue Project (proposed project). The following is provided in this report:

- A description of the study area and the proposed project;
- Information regarding the fundamentals of noise;
- Information regarding the fundamentals of vibration;
- A description of the local noise guidelines and standards;
- An evaluation of the current noise environment;
- An analysis of the potential short-term construction-related noise impacts from the proposed project; and,
- An analysis of long-term operations-related noise impacts from the proposed project.

1.2 Site Location and Study Area

The project site is located in the City of El Segundo (City) and consists of two (2) parcels of land (1950 East Grand Avenue and 1960 E Grand Avenue; collectively, the "project site"). 1950 East Grand Avenue is 2.685 acres and currently contains an 11-level 819 parking space parking structure at the rear of the property. 1960 East Grand Avenue is 2.685 acres and currently contains a 12-story office building near the front of the property. The 5.37 acre total project site is bounded by Grand Avenue and office buildings to the north, office buildings to the east, a hotel and surface parking lot to the south, and a parking structure to the west. The project study area is shown in Figure 1.

Sensitive Receptors in Project Vicinity

The nearest sensitive receptors to the project site are guests at the hotel located as near as 10 feet south of the project site. There is also a parking structure that is located as near as 15 feet to the west of the project site, however a parking structure is not a noise and vibration sensitive land use and no further analysis is provided in this report of the project impacts to the parking structure on the west side of the project site.

The nearest residents are at the multifamily homes located at the northwest corner of Holly Avenue and Indiana Street that are as near as 1,150 feet northwest of the project site. The nearest school is El Segundo Middle School that is located as near as a half mile west of the project site.

1.3 Proposed Project Description

A summary of the development proposed as part of the proposed project is detailed below and the proposed project site plan is shown in Figure 2.

1) On 1950 East Grand Avenue: Demolition of an existing 79-space surface parking lot and a row of 8 angled parking spaces located at the front of 1950 East Grand Avenue. Construction of a 4-story

93,559 net square foot office building with a mezzanine level that would contain a lobby area, a café/deli and two tenant spaces. On the west side of the new office building there will be an outdoor patio area and a truck loading area with two small truck loading spaces. A new backup diesel generator would be located on the north side of the existing parking structure and a new 23-space surface parking lot would be constructed on the east side of the existing parking structure in the rear of the lot.

2) On 1960 East Grand Avenue: Demolition of a passive open space area that currently contains walkways, with a few tables and benches. Construction of a 4-level 258 space parking structure.

3) Between the existing 12-story office building at 1960 East Grand Avenue and the new office building at 1950 East Grand Avenue: Construction of a large outdoor landscaped plaza with outdoor seating, and two outdoor firepits adjacent to the seating areas in order to provide a cohesive pedestrian-oriented office campus. A new fire lane will be constructed on the south side of the existing and new office buildings and will run from the driveway on the west side to the driveway on the east side of the project site.

1.4 Standard Noise Regulatory Conditions

The proposed project will be required to comply with the following regulatory conditions from the City of El Segundo and State of California.

City of El Segundo Noise and Vibration Regulations

The following lists the noise and vibration regulations from the Municipal Code that are applicable, but not limited to the proposed project.

- Section 7-2-4: Noise Standards
- Section 7-2-9: Vibration Limits
- Section 7-2-10(D): Construction Noise Exemptions

State of California Noise Regulations

The following lists the State of California noise regulations that are applicable, but not limited to the proposed project.

- California Vehicle Code Section 2700-27207 – On Road Vehicle Noise Limits
- California Vehicle Code Section 38365-38350 – Off-Road Vehicle Noise Limits

1.5 Summary of Analysis Results

The following is a summary of the proposed project's impacts with regard to the State CEQA Guidelines noise checklist questions.

Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less than significant impact.

Generation of excessive groundborne vibration or groundborne noise levels?

Less than significant impact.

For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Less than significant impact.

1.6 Mitigation Measures for the Proposed Project

This analysis found that through adherence to the noise and vibration regulations detailed in Section 1.4 above, all noise and vibration impacts would be reduced to less than significant levels and no mitigation is required.

2.0 NOISE FUNDAMENTALS

Noise is defined as unwanted sound. Sound becomes unwanted when it interferes with normal activities, when it causes actual physical harm or when it has adverse effects on health. Sound is produced by the vibration of sound pressure waves in the air. Sound pressure levels are used to measure the intensity of sound and are described in terms of decibels. The decibel (dB) is a logarithmic unit which expresses the ratio of the sound pressure level being measured to a standard reference level. A-weighted decibels (dBA) approximate the subjective response of the human ear to a broad frequency noise source by discriminating against very low and very high frequencies of the audible spectrum. They are adjusted to reflect only those frequencies which are audible to the human ear.

2.1 Noise Descriptors

Noise Equivalent sound levels are not measured directly, but are calculated from sound pressure levels typically measured in A-weighted decibels (dBA). The equivalent sound level (Leq) represents a steady state sound level containing the same total energy as a time varying signal over a given sample period. The peak traffic hour Leq is the noise metric used by California Department of Transportation (Caltrans) for all traffic noise impact analyses.

The Day-Night Average Level (Ldn) is the weighted average of the intensity of a sound, with corrections for time of day, and averaged over 24 hours. The time of day corrections require the addition of ten decibels to sound levels at night between 10 p.m. and 7 a.m. The Community Noise Equivalent Level (CNEL) is similar to the Ldn, except that it has an added 4.77 decibels to sound levels during the evening hours between 7 p.m. and 10 p.m. These additions are made to the sound levels at these time periods because during the evening and nighttime hours, when compared to daytime hours, there is a decrease in the ambient noise levels, which creates an increased sensitivity to sounds. For this reason the sound appears louder in the evening and nighttime hours and is weighted accordingly. The City of El Segundo also relies on the CNEL noise standard to assess transportation-related impacts on noise sensitive land uses.

2.2 Tone Noise

A pure tone noise is a noise produced at a single frequency and laboratory tests have shown that humans are more perceptible to changes in noise levels of a pure tone. For a noise source to contain a “pure tone,” there must be a significantly higher A-weighted sound energy in a given frequency band than in the neighboring bands, thereby causing the noise source to “stand out” against other noise sources. A pure tone occurs if the sound pressure level in the one-third octave band with the tone exceeds the average of the sound pressure levels of the two contiguous one-third octave bands by:

- 5 dB for center frequencies of 500 hertz (Hz) and above
- 8 dB for center frequencies between 160 and 400 Hz
- 15 dB for center frequencies of 125 Hz or less

2.3 Noise Propagation

From the noise source to the receiver, noise changes both in level and frequency spectrum. The most obvious is the decrease in noise as the distance from the source increases. The manner in which noise reduces with distance depends on whether the source is a point or line source as well as ground absorption, atmospheric effects and refraction, and shielding by natural and manmade features. Sound

from point sources, such as air conditioning condensers, radiate uniformly outward as it travels away from the source in a spherical pattern. The noise drop-off rate associated with this geometric spreading is 6 dBA per each doubling of the distance (dBA/DD). Transportation noise sources such as roadways are typically analyzed as line sources, since at any given moment the receiver may be impacted by noise from multiple vehicles at various locations along the roadway. Because of the geometry of a line source, the noise drop-off rate associated with the geometric spreading of a line source is 3 dBA/DD.

2.4 Ground Absorption

The sound drop-off rate is highly dependent on the conditions of the land between the noise source and receiver. To account for this ground-effect attenuation (absorption), two types of site conditions are commonly used in traffic noise models, soft-site and hard-site conditions. Soft-site conditions account for the sound propagation loss over natural surfaces such as normal earth and ground vegetation. For point sources, a drop-off rate of 7.5 dBA/DD is typically observed over soft ground with landscaping, as compared with a 6.0 dBA/DD drop-off rate over hard ground such as asphalt, concrete, stone and very hard packed earth. For line sources a 4.5 dBA/DD is typically observed for soft-site conditions compared to the 3.0 dBA/DD drop-off rate for hard-site conditions. Caltrans research has shown that the use of soft-site conditions is more appropriate for the application of the Federal Highway Administration (FHWA) traffic noise prediction model used in this analysis as most ground surfaces between the source and receptor will provide some noise absorption.

3.0 GROUND-BORNE VIBRATION FUNDAMENTALS

Ground-borne vibrations consist of rapidly fluctuating motions within the ground that have an average motion of zero. The effects of ground-borne vibrations typically only cause a nuisance to people, but at extreme vibration levels damage to buildings may occur. Although ground-borne vibration can be felt outdoors, it is typically only an annoyance to people indoors where the associated effects of the shaking of a building can be notable. Ground-borne noise is an effect of ground-borne vibration and only exists indoors, since it is produced from noise radiated from the motion of the walls and floors of a room and may also consist of the rattling of windows or dishes on shelves.

3.1 Vibration Descriptors

There are several different methods that are used to quantify vibration amplitude such as the maximum instantaneous peak in the vibrations velocity, which is known as the peak particle velocity (PPV) or the root mean square (rms) amplitude of the vibration velocity. Due to the typically small amplitudes of vibrations, vibration velocity is often expressed in decibels and is denoted as (L_v) and is based on the rms velocity amplitude. A commonly used abbreviation is vibration decibels (VdB), which in this text, is when L_v is based on the reference quantity of 1 micro inch per second.

3.2 Vibration Perception

Typically, developed areas are continuously affected by vibration velocities of 50 VdB or lower. These continuous vibrations are not noticeable to humans whose threshold of perception is around 65 VdB. Off-site sources that may produce perceptible vibrations are usually caused by construction equipment, steel-wheeled trains, and traffic on rough roads, while smooth roads rarely produce perceptible ground-borne noise or vibration.

3.3 Vibration Propagation

The propagation of ground-borne vibration is not as simple to model as airborne noise. This is due to the fact that noise in the air travels through a relatively uniform median, while ground-borne vibrations travel through the earth which may contain significant geological differences. There are three main types of vibration propagation; surface, compression, and shear waves. Surface waves, or Rayleigh waves, travel along the ground's surface. These waves carry most of their energy along an expanding circular wave front, similar to ripples produced by throwing a rock into a pool of water. P-waves, or compression waves, are body waves that carry their energy along an expanding spherical wave front. The particle motion in these waves is longitudinal (i.e., in a "push-pull" fashion). P-waves are analogous to airborne sound waves. S-waves, or shear waves, are also body waves that carry energy along an expanding spherical wave front. However, unlike P-waves, the particle motion is transverse or "side-to-side and perpendicular to the direction of propagation."

As vibration waves propagate from a source, the vibration energy decreases in a logarithmic nature and the vibration levels typically decrease by 6 VdB per doubling of the distance from the vibration source. As stated above, this drop-off rate can vary greatly depending on the soil but has been shown to be effective enough for screening purposes, in order to identify potential vibration impacts that may need to be studied through actual field tests.

4.0 REGULATORY SETTING

The project site is located in the City of El Segundo. Noise regulations are addressed through the efforts of various federal, state, and local government agencies. The agencies responsible for regulating noise are discussed below.

4.1 Federal Regulations

The adverse impact of noise was officially recognized by the federal government in the Noise Control Act of 1972, which serves three purposes:

- Promulgating noise emission standards for interstate commerce
- Assisting state and local abatement efforts
- Promoting noise education and research

The Federal Office of Noise Abatement and Control (ONAC) was initially tasked with implementing the Noise Control Act. However, the ONAC has since been eliminated, leaving the development of federal noise policies and programs to other federal agencies and interagency committees. For example, the Occupational Safety and Health Administration (OSHA) agency prohibits exposure of workers to excessive sound levels. The Department of Transportation (DOT) assumed a significant role in noise control through its various operating agencies. The Federal Aviation Administration (FAA) regulates noise of aircraft and airports. Surface transportation system noise is regulated by a host of agencies, including the Federal Transit Administration (FTA). Transit noise is regulated by the federal Urban Mass Transit Administration (UMTA), while freeways that are part of the interstate highway system are regulated by the Federal Highway Administration (FHWA). Finally, the federal government actively advocates that local jurisdictions use their land use regulatory authority to arrange new development in such a way that "noise sensitive" uses are either prohibited from being sited adjacent to a highway or, alternately that the developments are planned and constructed in such a manner that potential noise impacts are minimized.

Although the proposed project is not under the jurisdiction of the FTA, the FTA is the only agency that has defined what constitutes a significant noise impact from implementing a project. The FTA standards are based on extensive studies by the FTA and other governmental agencies on the human effects and reaction to noise and a summary of the FTA findings are provided below in Table A.

Table A – FTA Project Effects on Cumulative Noise Exposure

Existing Noise Exposure (dBA Leq or Ldn)	Allowable Noise Impact Exposure dBA Leq or Ldn		
	Project Only	Combined	Noise Exposure Increase
45	51	52	+7
50	53	55	+5
55	55	58	+3
60	57	62	+2
65	60	66	+1
70	64	71	+1
75	65	75	0

Source: Federal Transit Administration, 2018.

Since the federal government has preempted the setting of standards for noise levels that can be emitted by transportation sources, the City is restricted to regulating noise generated by the transportation system through nuisance abatement ordinances and land use planning.

4.2 State Regulations

Noise Standards

California Department of Health Services Office of Noise Control

Established in 1973, the California Department of Health Services Office of Noise Control (ONC) was instrumental in developing regularity tools to control and abate noise for use by local agencies. One significant model is the "Land Use Compatibility for Community Noise Environments Matrix," which allows the local jurisdiction to clearly delineate compatibility of sensitive uses with various incremental levels of noise.

California Noise Insulation Standards

Title 24, Chapter 1, Article 4 of the California Administrative Code (California Noise Insulation Standards) requires noise insulation in new hotels, motels, apartment houses, and dwellings (other than single-family detached housing) that provides an annual average noise level of no more than 45 dBA CNEL. When such structures are located within a 60-dBA CNEL (or greater) noise contour, an acoustical analysis is required to ensure that interior levels do not exceed the 45-dBA CNEL annual threshold. In addition, Title 21, Chapter 6, Article 1 of the California Administrative Code requires that all habitable rooms, hospitals, convalescent homes, and places of worship shall have an interior CNEL of 45 dB or less due to aircraft noise.

Government Code Section 65302

Government Code Section 65302 mandates that the legislative body of each county and city in California adopt a noise element as part of its comprehensive general plan. The local noise element must recognize the land use compatibility guidelines published by the State Department of Health Services. The guidelines rank noise land use compatibility in terms of normally acceptable, conditionally acceptable, normally unacceptable, and clearly unacceptable.

Vibration Standards

Title 14 of the California Administrative Code Section 15000 requires that all state and local agencies implement the California Environmental Quality Act (CEQA) Guidelines, which requires the analysis of exposure of persons to excessive groundborne vibration. However, no statute has been adopted by the state that quantifies the level at which excessive groundborne vibration occurs.

Caltrans issued the *Transportation- and Construction-Induced Vibration Guidance Manual* in 2004. The manual provides practical guidance to Caltrans engineers, planners, and consultants who must address vibration issues associated with the construction, operation, and maintenance of Caltrans projects. However, this manual is also used as a reference point by many lead agencies and CEQA practitioners throughout California, as it provides numeric thresholds for vibration impacts. Thresholds are established for continuous (construction-related) and transient (transportation-related) sources of vibration, which found that the human response becomes distinctly perceptible at 0.25 inch per second PPV for transient sources and 0.04 inch per second PPV for continuous sources.

4.3 Local Regulations

The City of El Segundo General Plan and Municipal Code establishes the following applicable policies related to noise and vibration.

City of El Segundo General Plan

The City of El Segundo adopted their General Plan in 1992. The General Plan sets the long-term goals and policies that decision makers use to guide the growth and development in the City; and the Noise Element establishes the goals and policies associated with noise exposure within the City. Goals and policies that are applicable to implementation of the proposed project are presented below.

Goal N 1: Encourage a high quality environmental within all parts of the City of El Segundo where the public's health, safety, and welfare are not adversely affected by excessive noise.

Objectives & Policies

Objective N 1-1 It is the objective of the City of El Segundo to ensure that City residents are not exposed to mobile noise levels in excess of the interior and exterior noise standards or the single event noise standards specified in the El Segundo Municipal Code.

Policy N1-1.1 Continue to work for the elimination of adverse noise sources, especially from Los Angeles International Airport West Imperial Terminal, and from helicopter and aircraft flyovers.

Policy N1-1.2 Play an active role in the planning process associated with preparation of the Los Angeles International Airport Master Plan.

Policy N1-1.3 Continue to work with the City of Los Angeles Department of Airports to reduce the noise-impacted area around Los Angeles International Airport to zero.

Policy N1-1.4 Consider noise impacts from traffic arterials and railroads, as well as aircraft, when identifying potential new areas for residential land use.

Policy N1-1.5 Encourage state inspection and enforcement of noise standards for motor vehicles, including those involved in public transit.

Policy N1-1.6 Encourage the State Department of Transportation (DOT) to conduct an active highway noise abatement program with scenic/aesthetic consideration for Sepulveda Boulevard (State Route 1).

Policy N1-1.7 Monitor California Department of Transportation and Los Angeles County Transportation Commission noise abatement measures aimed at minimizing noise impacts associated with the I-105 Freeway and the Metro Rail Green Line.

Policy N1-8 Continue to develop zoning, subdivision, and development controls to prevent future encroachment of noise-sensitive uses into present or planned industrial or transportation system noise-impacted zones where adverse effects cannot be adequately mitigated.

Policy N1-9 Require review of all new development projects in the City for conformance with California Airport Noise Regulations and California Noise Insulation Standards (CCR Title 24) to ensure interior noise will not exceed acceptable levels.

Policy N1-10	Continue to develop and implement City programs to incorporate noise reduction measures into existing residential development where interior noise levels exceed acceptable standards.
Objective N 1-2	It is the objective of the City of El Segundo to ensure that City residents are not exposed to stationary noise levels in excess of El Segundo's Noise Ordinance standards.
Policy N1-2.1	Require all new projects to meet the City's Noise Ordinance Standards as a condition of building permit approval.
Objective N 1-3	It is the objective of the City of El Segundo that the City maintain intergovernmental coordination and public information programs which are highly efficient in their noise abatement efforts.
Policy N1-3.1	Encourage site planning to be consistent with the existing and future noise environment and promote development standards in which noise-sensitive projects and residences are mitigated from major noise sources. Shon-term and long-term noise control measures should be formulated in a manner compatible with community needs and expectations.
Policy N1-3.2	Work to remove non-conforming land uses (mixed usage such as residential uses in commercial or industrial land use designations) which result in noise incompatibility.
Policy N1-3.3	Employ effective noise mitigation techniques through appropriate provisions in the building code, subdivision procedures, and zoning and noise ordinances.
Policy N1-3.4	Urge continued federal and state research into noise problems and recommend additional research programs as problems are identified.
Policy N1-3.5	Support a continuous effort to evaluate noise levels in the City of El Segundo and to reduce unacceptable noise levels through the planning process.

City of El Segundo Municipal Code

Chapter 2 Noise and Vibration of the City of El Segundo Municipal Code sets forth the noise standards and regulations for noise related sources within the City.

7-2-4 Noise Standards

No person shall, at any location within the City, create any noise, nor shall any person allow the creation of any noise within the person's control of public or private property, which causes the noise level when measured on any other property, to exceed the applicable noise standards, except as set forth in subsection C1 of this Section.

A. Residential Property: **Five (5) dBA above the ambient noise level**.

B. Commercial and Industrial Property: **Eight (8) dBA above the ambient noise level**.

C. Adjustments:

1. Increases to the noise standards as set forth in subsections A and B of this Section may be permitted in accordance with the following:

Noise Standards Adjustments	
Permitted Increase (dBA)	**Duration of Increased Minutes)[1]**
0	30
5	15
10	5
15	1
20	Less than 1

Note:
[1] Cumulative minute during any one hour
Source: City of El Segundo, 2020.

2. If the receptor property is located on a boundary between two (2) different noise zones, the lower noise level standard applicable to the quieter zone shall apply.

7-2-8 Special Prohibitions.

The following acts, and the causing therefor, are declared to be in violation of the Noise and Vibration Chapter of the Municipal Code if they occur in such a manner as to disturb the peace, quiet, and comfort of any reasonable person of normal sensitivity residing in the area; and occur:

A. Between the hours of 10:00 PM and 7:00 AM:

1. Operating, playing or permitting the operation or playing of any radio, television, phonograph, drum, musical instrument, sound amplifier, or similar device which produces, reproduces or amplifies sound.
2. Using or operating any loudspeaker, public address system or similar device.
3. Loading, unloading, opening, closing or other handling of boxes, crates, containers, building materials, garbage cans, or similar objects.

B. Between the hours of 8:00 PM and 7:00 AM:

1. Refuse collection vehicles:
    a. Collection of refuse with a collection vehicle in a residential area or within five hundred feet (500') thereof;
    b. Operation or permitting the operation of the compacting mechanism of any motor vehicle which compacts refuse in a residential area or within five hundred feet (500') thereof.
2. Loudspeakers/Public Address Systems: Using or operating for any commercial purpose any loudspeaker, public address system, or similar device on a public right of way or public space.
3. Powered Model: Operating or permitting the operation of powered models

7-2-9 Vibration.

Notwithstanding other sections of the Noise and Vibration Chapter of the Municipal Code, a person shall not create, maintain or cause any ground vibration which is perceptible, without the use of instructions, to any reasonable person of normal sensitivity at any point on any affected property.

7-2-10 Exemptions.

The following actives shall be exempted from the provisions of the Noise and Vibration Chapter of the Municipal Code:

A. School And Park Facilities: Authorized activities conducted on public school grounds and City park facilities, associated with normal operation of the facilities including, but not limited to, school and public athletic and entertainment events.

B. Mechanical Or Electronic Devices: Any mechanical or electronic device, apparatus or equipment used, related to or connected with emergency machinery, vehicle, work or warning alarm or bell, provided the sounding of any bell or alarm on any building or motor vehicle shall terminate its operation within fifteen (15) minutes of its activation.

C. Public Speaking Or Assemblies: Noncommercial public speaking and public assembly activities conducted on any public space or public right of way without the use of sound amplification equipment.

D. Construction Noise: Noise sources associated with or vibration created by construction, repair, or remodeling of any real property, provided said activities do not take place between the hours of six o'clock (6:00) P.M. and seven o'clock (7:00) A.M. Monday through Saturday, or at any time on Sunday or a Federal holiday, and provided the noise level created by such activities does not exceed the noise standard of **sixty five (65) dBA** plus the limits specified in subsection 7-2-4C of this Chapter as measured on the receptor residential property line and provided any vibration created does not endanger the public health, welfare and safety.

E. Real Property Maintenance: Noise sources associated with the maintenance of real property, provided said activities take place between the hours of seven o'clock (7:00) A.M. and eight o'clock (8:00) P.M. on any day except Sunday, or between the hours of nine o'clock (9:00) A.M. and eight o'clock (8:00) P.M. on Sunday.

F. Activities Preempted By State Or Federal Law: Any activity to the extent regulation thereof has been preempted by State or Federal law, including, but not limited to, aircraft, motor vehicles, railroads and other interstate carriers.

5.0 EXISTING NOISE CONDITIONS

To determine the existing noise levels, noise measurements have been taken in the vicinity of the project site. The field survey noted that noise within the proposed project area is generally characterized by vehicle traffic on Grand Avenue, which is located adjacent to the north side of the project site. The following describes the measurement procedures, measurement locations, noise measurement results, and the modeling of the existing noise environment.

5.1 Noise Measurement Equipment

The noise measurements were taken using three Larson Davis Model LXT1 Type 1 sound level meters programmed in "slow" mode to record the sound pressure level at 1-second intervals for 24 hours in "A" weighted form. In addition, the L_{eq} averaged over the entire measuring time and L_{max} were recorded with both sound level meters. The sound level meters and microphones were mounted on fences in the vicinity of the nearby homes west of the project site and on the project site. The noise meters were mounted on trees that were placed around six feet above the ground and were equipped with windscreens during all measurements. The noise meters were calibrated before and after the monitoring using a Larson Davis Cal200 calibrator. All noise level measurement equipment meets American National Standards Institute specifications for sound level meters (S1.4-1983 identified in Chapter 19.68.020.AA).

Noise Measurement Locations

The noise monitoring locations were selected in order to obtain the existing noise levels on the project site and at the nearest residential uses located to the west of the project site. Descriptions of the noise monitoring sites are provided below in Table B and Appendix A includes a photo index of the study area and noise level measurement locations.

Noise Measurement Timing and Climate

The noise measurements were recorded between 11:50 a.m. on Wednesday, July 21, 2021 and 12:02 p.m. on Thursday, July 22, 2021. At the start of the noise measurements, the sky was clear (no clouds), the temperature was 81 degrees Fahrenheit, the humidity was 57 percent, barometric pressure was 29.71 inches of mercury, and the wind was blowing around three miles per hour. Overnight, the temperature dropped to 65 degrees Fahrenheit and the humidity peaked at 94 percent. At the conclusion of the noise measurements, the sky was partly cloudy, the temperature was 80 degrees Fahrenheit, the humidity was 64 percent, barometric pressure was 29.79 inches of mercury, and the wind was blowing around two miles per hour.

5.2 Noise Measurement Results

The results of the noise level measurements are presented in Table B. The measured sound pressure levels in dBA have been used to calculate the minimum and maximum L_{eq} averaged over 1-hour intervals. Table B also shows the L_{eq}, L_{max}, and CNEL, based on the entire measurement time. The noise monitoring data printouts are included in Appendix B. Figure 3 shows a graph of the 24-hour noise measurements.

Table B – Existing (Ambient) Noise Level Measurements

Site No.	Site Description	Average (dBA L_{eq})		1-hr Average (dBA L_{eq}/Time)		Average (dBA CNEL)
		Daytime[1]	Nighttime[2]	Minimum	Maximum	
1	Located on a tree near the northwest corner of project site, approximately 80 feet south of Grand Avenue centerline.	60.4	53.6	47.1 3:58 a.m.	64.3 7:30 p.m.	62.8
2	Located on a tree approximately 30 feet west of the east property line and 440 feet south of Grand Avenue centerline.	55.0	51.0	49.5 3:28 a.m.	62.2 8:23 a.m.	58.5
3	Located on a tree approximately 5 feet north of the south property line, near the middle of the project site.	54.2	51.2	49.0 2:34 a.m.	57.4 5:31 p.m.	58.5

6.0 MODELING PARAMETERS AND ASSUMPTIONS

6.1 Construction Noise

The noise impacts from construction of the proposed project have been analyzed through use of the FHWA's Roadway Construction Noise Model (RCNM). The FHWA compiled noise measurement data regarding the noise generating characteristics of several different types of construction equipment used during the Central Artery/Tunnel project in Boston. Table C below provides a list of the construction equipment anticipated to be used for each phase of construction as detailed in *Air Quality, Energy, and Greenhouse Gas Emissions Impact Analysis 1950-1960 East Grand Avenue Project* (Air Quality Analysis), prepared by Vista Environmental, March 20, 2022.

Table C – Construction Equipment Noise Emissions and Usage Factors

Equipment Description	Number of Equipment	Acoustical Use Factor[1] (percent)	Spec 721.560 Lmax at 50 feet[2] (dBA, slow[3])	Actual Measured Lmax at 50 feet[4] (dBA, slow[3])
Demolition/Site Preparation				
Concrete/Industrial Saw	1	20	90	90
Excavator	3	40	85	81
Rubber Tired Dozer	2	40	85	83

Notes:
[1] Acoustical use factor is the percentage of time each piece of equipment is operational during a typical workday.
[2] Spec 721.560 is the equipment noise level utilized by the RCNM program.
[3] The "slow" response averages sound levels over 1-second increments. A "fast" response averages sound levels over 0.125-second increments.

[4] Actual Measured is the average noise level measured of each piece of equipment during the Central Artery/Tunnel project in Boston, Massachusetts primarily during the 1990s.
Source: Federal Highway Administration, 2006 and CalEEMod default equipment mix.

Table C also shows the associated measured noise emissions for each piece of equipment from the RCNM model and measured percentage of typical equipment use per day. Construction noise impacts to the nearest homes and hotel have been calculated according to the equipment noise levels and usage factors listed in Table C and through use of the RCNM. For each phase of construction, all construction equipment was analyzed based on being placed in the middle of the project site, which is based on the analysis methodology detailed in the *Transit Noise and Vibration Impact Assessment Manual* (FTA Manual), prepared by FTA, September 2018, for a General Assessment. The RCNM model printouts are provided in Appendix C.

6.2 Operational Noise

FHWA Roadway Noise Model Methodology

The proposed project would result in increases in traffic noise to the nearby roadways as well as introduce new sensitive receptors to the project site. The project impacts to the offsite roadways were analyzed through use of the FHWA Traffic Noise Prediction Model - FHWA-RD-77-108 (FHWA Model) as detailed in the *Technical Noise Supplement to the Traffic Noise Analysis Protocol,* prepared by Caltrans, September 2013. The FHWA Model arrives at a predicted noise level through a series of adjustments to the Reference Energy Mean Emission Level (REMEL). Adjustments are then made to the reference energy mean emission level to account for:

- The roadway active width (i.e., the distance between the center of the outermost travel lanes on each side of the roadway);
- The total average daily traffic (ADT) and the percentage of ADT which flows during the day, evening and night, the travel speed, the vehicle mix on the roadway, which is a percentage of the volume of automobiles, medium trucks and heavy trucks, the roadway grade, the angle of view of the observer exposed to the roadway; and
- Site conditions ("hard" or "soft" relates to the absorption of the ground, pavement or landscaping).

The following section provides a discussion of the software and modeling input parameters used in this analysis and a discussion of the resultant existing noise model.

FHWA Model Traffic Noise Prediction Model Inputs

The roadway parameters used for this study are presented in Table D. The roadway classifications are based on the City's General Plan Circulation Element. The roadway speeds are based on the posted speed limits. The distance to the nearest sensitive receptors were determined by measuring the distance from the roadway centerline to the closest edge of the sensitive receptor structure. Since the study area is located in an area where landscaping exists along the sides of most of the analyzed roadways, soft site conditions were modeled.

Table D – FHWA Model Roadway Parameters

Roadway	Segment	General Plan Classification	Vehicle Speed (MPH)	Distance to Nearest Sensitive Recptor[1] (feet)
Pacific Coast Highway	North of Grand Avenue	Major Arterial	40	340
Pacific Coast Highway	South of El Segundo Blvd	Major Arterial	40	340
Nash Street	North of Grand Avenue	Secondary Arterial	35	130
Nash Street	South of Grand Avenue	Secondary Arterial	35	190
Grand Avenue	West of Pacific Coast Highway	Secondary Arterial	35	35
Grand Avenue	West of Continental Boulevard	Secondary Arterial	35	80
El Segundo Boulevard	East of Continental Boulevard	Major Arterial	40	160
El Segundo Boulevard	East of Nash Street	Major Arterial	40	80

Notes:
[1] Distance measured from nearest sensitive receptor structure to centerline of roadway.
Source: Vista Environmental; and City of El Segundo, 1992.

The average daily traffic (ADT) volumes were obtained from the *1950-1960 East Grand Avenue Project, El Segundo Draft Transportation Impact Analysis* (Traffic Analysis), prepared by Fehr and Peers, January 2022. The ADT volumes were calculated by multiplying the PM peak hour intersection volumes by 12. Table E shows the ADT volumes for both without project and with project conditions for the existing year and opening year 2024 scenarios.

Table E – FHWA Model Average Daily Traffic Volumes

		Average Daily Traffic Volumes			
Roadway	Segment	Existing	Existing + Project	Year 2024	Year 2024 + Project
Pacific Coast Highway	North of Grand Avenue	54,260	54,460	61,850	62,050
Pacific Coast Highway	South of El Segundo Boulevard	63,520	63,620	70,250	70,350
Nash Street	North of Grand Avenue	13,360	13,520	14,090	14,250
Nash Street	South of Grand Avenue	9,770	9,880	10,120	10,230
Grand Avenue	West of Pacific Coast Highway	12,290	12,340	17,110	17,160
Grand Avenue	West of Continental Boulevard	14,560	15,400	16,780	17,620
El Segundo Boulevard	East of Continental Boulevard	28,740	28,950	35,950	36,160
El Segundo Boulevard	East of Nash Street	35,620	35,950	43,730	44,060

Source: Fehr and Peers, 2022.

The vehicle mixes used in the FHWA-RD-77-108 Model are presented in Table F. The vehicle mix for State Route 1 is based on Caltrans data and the other roadways are based on typical vehicle mixes observed in Southern California.

Table F – Roadway Vehicle Mixes

Vehicle Type	Traffic Flow Distributions			
	Day (7 a.m. to 7 p.m.)	Evening (7 p.m. to 10 p.m.)	Night (10 p.m. to 7 a.m.)	Overall
Secondary Roadways (Nash Street and Grand Avenue)				
Automobiles	73.6%	13.6%	10.2%	97.4%
Medium Trucks	0.9%	0.9%	0.0%	1.8%
Heavy Trucks	0.4%	0.0%	0.4%	0.7%
Major Roadways (El Segundo Boulevard)				
Automobiles	69.5%	12.9%	9.6%	92.0%
Medium Trucks	1.4%	0.1%	1.5%	3.0%
Heavy Trucks	2.4%	0.1%	2.5%	5.0%
State Route 1 (Pacific Coast Highway)				
Automobiles	67.1%	13.7%	16.1%	96.9%
Medium Trucks	1.3%	0.2%	0.6%	2.1%
Heavy Trucks	0.5%	0.1%	0.4%	1.0%

Source: Caltrans, 2019; Vista Environmental.

FHWA Model Source Assumptions

To assess the roadway noise generation in a uniform manner, all vehicles are analyzed at the single lane equivalent acoustic center of the roadway being analyzed. In order to determine the height above the road grade where the noise is being emitted from, each type of vehicle has been analyzed independently with autos at road grade, medium trucks at 2.3 feet above road grade, and heavy trucks at 8 feet above road grade. These elevations were determined through a noise-weighted average of the elevation of the exhaust pipe, tires and mechanical parts in the engine, which are the primary noise emitters from a vehicle.

6.3 Vibration

Construction activity can result in varying degrees of ground vibration, depending on the equipment used on the site. Operation of construction equipment causes ground vibrations that spread through the ground and diminish in strength with distance. Buildings in the vicinity of the project site respond to these vibrations with varying results ranging from no perceptible effects at the low levels to slight damage to the structures at the highest levels. Table G gives approximate vibration levels for particular construction equipment that is provided by the FTA, however it should be noted that not all of these equipment types would be used during construction of the proposed project. The data in Table G provides a reasonable estimate for a wide range of soil conditions.

Table G – Vibration Source Levels for Construction Equipment

Equipment		Peak Particle Velocity (inches/second)	Approximate Vibration Level (L_v)at 25 feet
Pile driver (impact)	Upper range	1.518	112
	typical	0.644	104
Pile driver (sonic)	Upper range	0.734	105
	typical	0.170	93
Clam shovel drop (slurry wall)		0.202	94
Vibratory Roller		0.210	94
Hoe Ram		0.089	87
Large bulldozer		0.089	87
Caisson drill		0.089	87
Loaded trucks		0.076	86
Jackhammer		0.035	79
Small bulldozer		0.003	58

Source: Federal Transit Administration, 2018.

The construction-related vibration impacts have been calculated through the vibration levels shown above in Table G and through typical vibration propagation rates. The equipment assumptions were based on the equipment lists provided above in Table C.

7.0 IMPACT ANALYSIS

7.1 CEQA Thresholds of Significance

Consistent with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, a significant impact related to noise would occur if a proposed project is determined to result in:

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies;
- Generation of excessive groundborne vibration or groundborne noise levels; or
- For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.

7.2 Generation of Noise Levels in Excess of Standards

The proposed project would not generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. The following section calculates the potential noise emissions associated with the temporary construction activities and long-term operations of the proposed project and compares the noise levels to the City standards.

Construction-Related Noise

The construction activities for the proposed project are anticipated to include demolition of an existing surface parking lot and passive open space area, grading of approximately 4 acres of the project site, building construction of the proposed office building, parking structure, surface parking lot and plaza, paving and site improvements, and application of architectural coatings. Noise impacts from construction activities associated with the proposed project would be a function of the noise generated by construction equipment, equipment location, sensitivity of nearby land uses, and the timing and duration of the construction activities. The nearest sensitive receptors to the project site are guests at the hotel located as near as 10 feet south of the project site. The nearest residents are at the multifamily homes at the northwest corner of Holly Avenue and Indiana Street that are located as near as 1,150 feet northwest of the project site.

Section 7-2-10(D) of the City's Municipal Code exempts construction noise from the City noise standards provided that construction activities occur between 7:00 a.m. and 6:00 p.m., except Sundays and Federal holidays and such activities do not exceed 65 dBA at the nearby residential properties. Since the City's construction noise standards do not provide any noise standards for impacts to the nearby commercial uses, that include the hotel to the south, the construction noise threshold of 85 dBA Leq for commercial uses from the FTA Manual, has been utilized in order to provide a conservative analysis.

Construction noise impacts to the nearby sensitive receptors have been calculated through use of the RCNM and the parameters and assumptions detailed in Section 6.1 of this report including Table C – Construction Equipment Noise Emissions and Usage Factors. The results are shown below in Table H and the RCNM printouts are provided in Appendix C.

Table H – Construction Noise Levels at the Nearby Sensitive Receptors

Construction Phase	Construction Noise Level (dBA Leq) at:	
	Hotel to South[1]	Nearest Homes to Northwest[2]
Demolition	72	58
Grading	71	57
Building Construction	72	58
Paving/Site Improvements	70	56
Architectural Coatings	59	45
Construction Noise Threshold[3]	**85**	**65**
Exceed Thresholds?	**No**	**No**

Notes:
[1] The hotel to the south is located as near as 270 feet from the center of the project site.
[2] The nearest homes to the northwest are located as near as 1,375 feet from the center of the project site.
[3] The construction noise threshold for the hotel to south obtained from the FTA Manual and for the nearest homes obtained from Section 7-2-10(D) of the Municipal Code.
Source: RCNM, Federal Highway Administration, 2006

Table H shows that greatest construction noise impacts would occur during the demolition and building construction phases, with a noise level as high as 72 dBA Leq at the hotel to the south and as high as 58 dBA Leq at the nearest homes to the northwest. The calculated construction noise levels shown in Table H for the hotel to the south are within the FTA daytime construction noise standard for of 85 dBA Leq for commercial uses and the nearest homes to the northwest are within the City's construction noise standard of 65 dBA. Therefore, through adherence to the limitation of allowable construction times provided in Section 7-2-10(D) of the Municipal Code, construction-related noise levels would not exceed any standards established in the General Plan or Noise Ordinance nor would construction activities create a substantial temporary increase in ambient noise levels from construction of the proposed project. Impacts would be less than significant.

Operational-Related Noise

The proposed project would consist of the development of an office building, parking structure, surface parking lot and plaza. Potential noise impacts associated with the operations of the proposed project would be from project-generated vehicular traffic on the nearby roadways and from onsite activities, which have been analyzed separately below.

Roadway Vehicular Noise

Vehicle noise is a combination of the noise produced by the engine, exhaust and tires. The level of traffic noise depends on three primary factors (1) the volume of traffic, (2) the speed of traffic, and (3) the number of trucks in the flow of traffic. The proposed project does not propose any uses that would require a substantial number of truck trips and the proposed project would not alter the speed limit on any existing roadway so the proposed project's potential offsite noise impacts have been focused on the noise impacts associated with the change of volume of traffic that would occur with development of the proposed project.

Since neither the General Plan nor the CEQA Guidelines define what constitutes a "substantial permanent increase to ambient noise levels", this impact analysis has utilized guidance from the Federal Transit Administration for a moderate impact that has been detailed above in Table A that shows that the project

contribution to the noise environment can range between 0 and 7 dB, which is dependent on the existing noise levels.

The potential offsite traffic noise impacts created by the on-going operations of the proposed project have been analyzed through utilization of the FHWA model and parameters described above in Section 6.2 and the FHWA model traffic noise calculation spreadsheets are provided in Appendix D. The proposed project's potential offsite traffic noise impacts have been analyzed for the existing year and opening year 2024 conditions, which are discussed below.

Existing Year Conditions

The proposed project's potential offsite roadway noise impacts have been calculated through a comparison of the existing scenario to the existing with project scenario. The results of this comparison are shown in Table I.

Table I – Project Traffic Noise Contributions for Existing Year Conditions

		dBA CNEL at Nearest Receptor[1]				
Roadway	Segment	Existing	Existing Plus Project	Project Contribution	Increase Threshold[2]	Significant Impact?
Pacific Coast Highway	North of Grand Avenue	60.1	60.1	0.0	+2 dBA	No
Pacific Coast Highway	South of El Segundo Blvd	60.8	60.8	0.0	+2 dBA	No
Nash Street	North of Grand Avenue	57.7	57.7	0.0	+3 dBA	No
Nash Street	South of Grand Avenue	53.8	53.9	0.1	+5 dBA	No
Grand Avenue	West of Pacific Coast Hwy	67.3	67.3	0.0	+1 dBA	No
Grand Avenue	West of Continental Blvd	61.4	61.6	0.2	+2 dBA	No
El Segundo Boulevard	East of Continental Blvd	61.8	61.8	0.0	+2 dBA	No
El Segundo Boulevard	East of Nash Street	68.3	68.3	0.0	+1 dBA	No

Notes:
[1] Distance to nearest residential use shown in Table D, does not take into account existing noise barriers.
[2] Increase Threshold obtained from the FTA's allowable noise impact exposures detailed above in Table A..
Source: FHWA Traffic Noise Prediction Model FHWA-RD-77-108.

Table I shows that for the existing conditions, the proposed project's permanent noise increases to the nearby homes from the generation of additional vehicular traffic would not exceed the traffic noise increase thresholds detailed above. Therefore, the proposed project would not result in a substantial permanent increase in ambient noise levels for the existing year conditions. Impacts would be less than significant.

Opening Year 2024 Conditions

The proposed project's potential offsite roadway noise impacts have been calculated through a comparison of the opening year 2024 scenario to the opening year 2024 with project scenario. The results of this comparison are shown in Table J.

Table J – Project Traffic Noise Contributions for Opening Year 2024 Conditions

Roadway	Segment	dBA CNEL at Nearest Receptor[1] Year 2024	Year 2024 Plus Project	Project Contribution	Increase Threshold[2]	Significant Impact?
Pacific Coast Highway	North of Grand Avenue	60.7	60.7	0.0	+2 dBA	No
Pacific Coast Highway	South of El Segundo Blvd	61.2	61.2	0.0	+2 dBA	No
Nash Street	North of Grand Avenue	57.9	58.0	0.1	+3 dBA	No
Nash Street	South of Grand Avenue	54.0	54.0	0.0	+5 dBA	No
Grand Avenue	West of Pacific Coast Hwy	68.7	68.7	0.0	+1 dBA	No
Grand Avenue	West of Continental Blvd	62.0	62.2	0.2	+2 dBA	No
El Segundo Boulevard	East of Continental Blvd	62.7	62.8	0.1	+2 dBA	No
El Segundo Boulevard	East of Nash Street	69.1	69.2	0.1	+1 dBA	No

Notes:
[1] Distance to nearest residential use shown in Table D, does not take into account existing noise barriers.
[2] Increase Threshold obtained from the FTA's allowable noise impact exposures detailed above in Table A..
Source: FHWA Traffic Noise Prediction Model FHWA-RD-77-108.

Table J shows that for the opening year 2024 conditions, the proposed project's permanent noise increases to the nearby homes from the generation of additional vehicular traffic would not exceed the traffic noise increase thresholds detailed above. Therefore, the proposed project would not result in a substantial permanent increase in ambient noise levels for the opening year 2024 conditions. Impacts would be less than significant.

Onsite Noise Sources

The operation of the proposed project may create an increase in onsite noise levels from noise impacts from rooftop mechanical equipment, parking lots, a backup generator and delivery trucks. The exact size of the backup generator has not yet been determined, however similar projects that Vista Environmental has worked on have utilized a 250 kW 389 horsepower backup generator for these power requirements. As such, this analysis has analyzed the emissions created from a 250 kW 389 horsepower diesel-powered backup generator.

Section 7-2-4(A) of the City's Municipal Code limits the noise created on the project site at the nearby residential properties to the ambient noise level plus 5 dBA and Section 7-2-4(B) of the City's Municipal Code limits the noise created on the project site at the nearby commercial and industrial properties to the ambient noise level plus 8 dBA. Section 7-2-10(B) of the City's Municipal Code exempts noise created from the backup generator when it is being used during power outages, however the weekly cycling of the generator would not be exempt from the City's noise standards.

The nearest sensitive receptors to the project site are guests at the hotel located as near as 10 feet south of the project site. The nearest residents are at the multifamily homes at the northwest corner of Holly Avenue and Indiana Street that are located as near as 1,150 feet northwest of the project site.

In order to determine the noise impacts from the operation of rooftop mechanical equipment, parking lots, backup generator and delivery trucks, reference noise measurements were taken of each noise source and are shown in Table K and the reference noise measurements are provided in Appendix E. The noise levels from each source were calculated through use of soft site geometric spreading of noise from

a point source with a drop-off rate of 7.5 dB for each doubling of the distance between the source and receiver.

Table K – Operational Noise Levels at the Nearby Land Uses

	Reference Measurements		Hotel to South		Nearest Homes to Northwest	
Noise Source	Distance - Source to Receptor (feet)	Noise Level[1] (dBA Leq)	Distance - Source to Hotel (feet)	Noise Level[1] (dBA Leq)	Distance - Source to Homes (feet)	Noise Level[1] (dBA Leq)
Rooftop Equipment[2]	10	66.6	360	21	1,200	8
Parking Lot	5	63.1	20	48	1,150	4
Truck Delivery	30	54.3	470	25	1,150	15
Backup Generator	27	74	430	44	1,350	32
Combined Noise Levels				**49**		**32**
Ambient Noise Levels (day/night)				**54/51**		**60/54**
City Noise Standard[2] (day/night)				**62/59**		**65/59**
Exceed City Noise Standard?				**No/No**		**No/No**

Notes:
[1] The noise levels were calculated through use of soft site geometric spreading of noise from a point source with a drop-off rate of 7.5 dB for each doubling of the distance between the source and receiver. Does not account for noise reduction features such as buildings and walls.
[2] City Noise Standards based on ambient noise level shown in Table B plus 5 dB at the residential uses and plus 8 dB for the commercial uses.

Table K shows that the proposed project's onsite operational noise from the anticipated onsite noise sources would not exceed the applicable noise standards at the hotel to the south or the nearest homes that are located 1,150 feet to the northwest of the project site. Therefore, operational onsite noise impacts would be less than significant.

Level of Significance

Less than significant impact.

7.3 Generation of Excessive Groundborne Vibration

The proposed project would not expose persons to or generation of excessive groundborne vibration or groundborne noise levels. The following section analyzes the potential vibration impacts associated with the construction and operations of the proposed project.

Construction-Related Vibration Impacts

The construction activities for the proposed project are anticipated to include demolition of an existing surface parking lot and passive open space area, grading of approximately 4 acres of the project site, building construction of the proposed office building, parking structure, surface parking lot and plaza, paving and site improvements, and application of architectural coatings. Vibration impacts from construction activities associated with the proposed project would typically be created from the operation of heavy off-road equipment. The nearest offsite structure where people may sit, which makes them much more susceptible to vibration, would be the hotel that is located as near as 20 feet south of the location of the proposed parking structure.

Section 7-2-9 of the City's Municipal Code restricts the creation of vibration which is perceptible without the use of instruments to any reasonable person on normal sensitivity. However, since neither the

Municipal Code nor the General Plan provides a quantifiable vibration threshold level, Caltrans guidance that is detailed above in Section 4.2 has been utilized, which defines the threshold of perception from transient sources at 0.25 inch per second PPV.

The primary source of vibration during construction would be from the operation of a bulldozer. From Table G above a large bulldozer would create a vibration level of 0.089 inch per second PPV at 25 feet. Based on typical propagation rates, the vibration level at the hotel (20 feet away) would be 0.11 inch per second PPV, which would be below the 0.25 inch per second PPV threshold detailed above. Impacts would be less than significant.

Operations-Related Vibration Impacts

The proposed project would consist of the development of an office building, parking structure, surface parking lot and plaza. The proposed project would result in the operation of delivery trucks on the project site, which are a known source of vibration. The project-related delivery trucks activities would be located on the northwestern portion of the project site, where there are no vibration sensitive land uses located in the nearby proximity of where the delivery trucks would operate. As such, operations-related vibration impacts would be less than significant.

Level of Significance

Less than significant impact.

7.4 Aircraft Noise

The proposed project would not expose people residing or working in the project area to excessive noise levels from aircraft. The nearest airport is Los Angeles International Airport that is located as near as one mile north of the project site, however it should be noted that the Airport's runways run in generally in an east-west direction and the project site is located approximately in the middle of the Airport, so take-offs and landings do not typically occur over the project site. As detailed in *3Q19 Los Angeles International Airport – California State Airport Noise Standards Quarterly Report,* prepared November 13, 2019 (found at: https://www.lawa.org/lawa-environment/noise-management/lawa-noise-management-lax/quarterly-noise-reports-and-contour-maps), the project site is located outside of the 65 dBA CNEL noise contours of Los Angeles International Airport. Therefore, aircraft noise impacts would be less than significant.

Level of Significance

Less than significant impact.

GENERAC® | INDUSTRIAL POWER

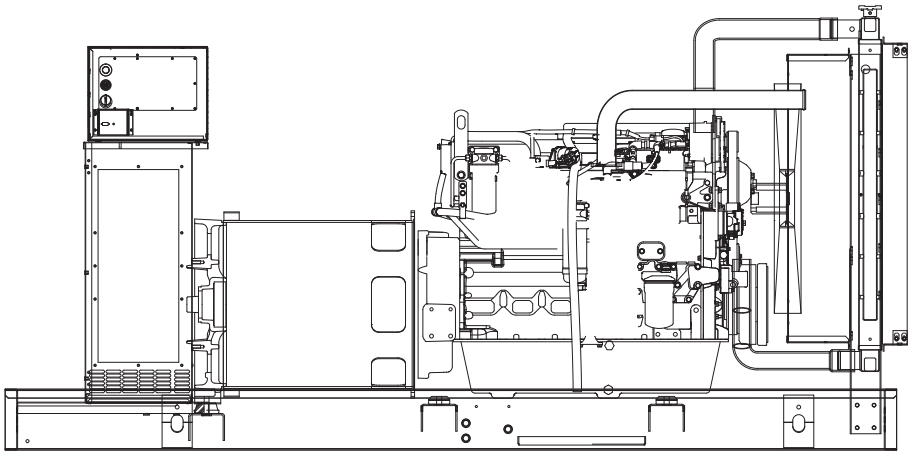
SD250

Industrial Diesel Generator Set

EPA Certified Stationary Emergency

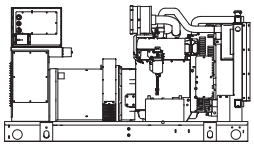
Standby Power Rating
313kVA 250kW 60Hz

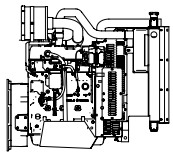
Prime Power Rating*
281kVA 225KW 60Hz

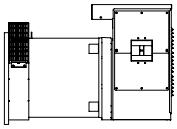


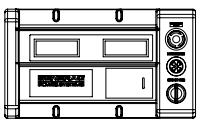
Generator image used for illustration purposes only

*EPA Certified Prime ratings are not available in the U.S. or its Territories for engine model year 2011 and beyond









features benefits

Generator Set	
• PROTOTYPE & TORSIONALLY TESTED	▸ PROVIDES A PROVEN UNIT
• UL2200 TESTED	▸ ENSURES A QUALITY PRODUCT
• RHINOCOAT PAINT SYSTEM	▸ IMPROVES RESISTANCE TO ELEMENTS
• WIDE RANGE OF ENCLOSURES AND TANKS	▸ PROVIDES A SINGLE SOURCE SOLUTION
Engine	
• EPA COMPLIANT	▸ ENVIRONMENTALLY FRIENDLY
• INDUSTRIAL TESTED, GENERAC APPROVED	▸ ENSURES INDUSTRIAL STANDARDS
• POWER-MATCHED OUTPUT	▸ ENGINEERED FOR PERFORMANCE
• INDUSTRIAL GRADE	▸ IMPROVES LONGEVITY AND RELIABILITY
Alternator	
• TWO-THIRDS PITCH	▸ ELIMINATES HARMFUL 3RD HARMONIC
• LAYER WOUND ROTOR & STATOR	▸ IMPROVES COOLING
• CLASS H MATERIALS	▸ HEAT TOLERANT DESIGN
• DIGITAL 3-PHASE VOLTAGE CONTROL	▸ FAST AND ACCURATE RESPONSE
Controls	
• ENCAPSULATED BOARD W/ SEALED HARNESS	▸ EASY, AFFORDABLE REPLACEMENT
• 4-20mA VOLTAGE-TO-CURRENT SENSORS	▸ NOISE RESISTANT 24/7 MONITORING
• SURFACE-MOUNT TECHNOLOGY	▸ PROVIDES VIBRATION RESISTANCE
• ADVANCED DIAGNOSTICS & COMMUNICATIONS	▸ HARDENED RELIABILITY

SD250 application and engineering data

ENGINE SPECIFICATIONS

General

Make	Iveco/FPT
EPA Emissions Compliance	Stationary Emergency
EPA Emissions Reference	See Emissions Data Sheet
Cylinder #	6
Type	In-Line
Displacement - L (cu. in.)	8.7
Bore - mm (in.)	117 (4.61)
Stroke - mm (in.)	135 (5.31)
Compression Ratio	16.5:1
Intake Air Method	Turbocharged/Aftercooled
Cylinder Head Type	4- Valve
Piston Type	Aluminum
Crankshaft Type	Dropped Forged Steel

Engine Governing

Governor	Electronic Isochronous
Frequency Regulation (Steady State)	± 0.25%

Lubrication System

Oil Pump Type	Gear
Oil Filter Type	Full-Flow
Crankcase Capacity - L (qts)	28 (29.57)

Cooling System

Cooling System Type	Closed Recovery
Water Pump Flow	Pre-Lubed, Self Sealing
Fan Type	Pusher
Fan Speed (rpm)	1854 rpm
Fan Diameter mm (in.)	762 (30.0)
Coolant Heater Wattage	2000
Coolant Heater Standard Voltage	240VAC

Fuel System

Fuel Type	Ultra Low Sulfur Diesel Fuel
Fuel Specifications	ASTM
Fuel Filtering (microns)	5
Fuel Inject Pump Make	Electronic
Fuel Pump Type	Engine Driven Gear
Injector Type	Common Rail
Engine Type	Direct Injection
Fuel Supply Line - mm (in.)	12.7(½")
Fuel Return Line - mm (in.)	12.7(½")

Engine Electrical System

System Voltage	24VDC
Battery Charging Alternator	Std
Battery Size (at 0ºC)	995 CCA
Battery Group	31
Battery Voltage	(2) - 12VDC
Ground Polarity	Negative

ALTERNATOR SPECIFICATIONS

Standard Model	520 mm Generac
Poles	4
Field Type	Revolving
Insulation Class - Rotor	H
Insulation Class - Stator	H
Total Harmonic Distortion	< 5%
Telephone Interference Factor (TIF)	< 50
Standard Excitation	Permanent Magnent
Bearings	Single Sealed Cartridge
Coupling	Direct, Flexible Disc
Load Capacity - Standby	100%
Prototype Short Circuit Test	Yes

Voltage Regulator Type	Digital
Number of Sensed Phases	All
Regulation Accuracy (Steady State)	± 0.25%

CODES AND STANDARDS COMPLIANCE (WHERE APPLICABLE)

NFPA 99	BS5514
NFPA 110	SAE J1349
ISO 8528-5	DIN6271
ISO 1708A.5	IEEE C62.41 TESTING
ISO 3046	NEMA ICS 1

Rating Definitions:
Standby – Applicable for a varying emergency load for the duration of a utility power outage with no overload capability. (Max. load factor = 70%)
Prime – Applicable for supplying power to a varying load in lieu of utility for an unlimited amount of running time. (Max. load factor = 80%) A 10% overload capacity is available for 1 out of every 12 hours.

1. INTRODUCTION

This report documents the assumptions, methodologies, and findings of a study conducted by Fehr & Peers to evaluate the potential transportation impacts of the 1950 Grand Avenue Project in the City of El Segundo (City). This study was conducted as part of an environmental document being prepared for the proposed Project.

PROJECT DESCRIPTION

The proposed 1950 Grand Avenue Project (the Project) involves the development of two adjacent parcels at 1950/1960 Grand Avenue. The Project proposes to construct a new four-story with mezzanine office building of 105,469 gross square feet (sf) and new 23-space surface parking lot on the west parcel, and a four-story parking structure with 258 spaces on the east parcel. An existing 12-story office building also exists on the east parcel and an 11-story parking structure exists on the west parcel. The Project will open in 2024.

The Project is on Grand Avenue between Pacific Coast Highway (PCH) and Continental Boulevard. The adjacent land uses are hotel and parking to the south, office uses to the east and west, and hotel and office uses to the north. The 405 Freeway, east of the Project site, and 105 Freeway, north of the Project site, provide regional access to the Project area. The Project is located approximately ½ mile from the Metro C (Green) Line El Segundo Station. Bus service provided by Metro, LADOT Commuter Express, and Torrance Transit also serve the Project site. **Figure 1** shows the site plan for the Project.

Vehicle access for the Project is to be provided via the two existing driveways to Grand Avenue. A passenger loading zone with a curb pull-out also already exists along the Grand Avenue frontage and will remain. The west driveway provides right-in/right-out access to the Project site. The east driveway provides full in/out access to the Project site. The existing and proposed parking structures are accessible via both driveways.

Figure 1

Site Plan

STUDY SCOPE

The scope of work for this study was determined in consultation with the City of El Segundo. The base assumptions and technical methodologies were discussed with El Segundo as part of the study approach and agreed to in a scoping memo dated May 17, 2021. The scoping memo is included as **Appendix A** to this document.

VEHICLE MILES TRAVELED ANALYSIS

On September 27, 2013, Governor Jerry Brown signed Senate Bill (SB) 743 into law and started a process that fundamentally changed transportation impact analysis conducted as part of California Environmental Quality Act (CEQA) compliance. The Governor's Office of Planning and Research (OPR) was charged with developing new guidelines for evaluating transportation impacts under CEQA using methods that no longer focus on measuring automobile delay and level of service (LOS). This change at the state level recognizes the unintended consequences of using LOS as an impact metric, which results in understating potential transportation impacts in greenfield areas and discouraging more sustainable infill projects and alternative transportation projects. SB 743 directed agencies to create new guidelines that develop a transportation performance metric promoting: the reduction of greenhouse gas emissions, the development of multimodal networks, and a more sustainable diversity of land uses.

OPR issued proposed updates to the CEQA guidelines in support of these goals in November 2017 and a supporting technical advisory in December 2018 (OPR Advisory).[1] The updates establish vehicle miles traveled (VMT) as the primary metric for evaluating a project's environmental impacts on the transportation system. The changes to CEQA guidelines Section 15064.3 to implement SB 743 were certified by the State in December of 2018. Draft environmental impact reports published after July 1, 2020, are required to implement these new requirements.

As the City of El Segundo has not yet adopted their own transportation impact study guidelines including the VMT metric and significance criteria in compliance with SB 743 guidelines, VMT impact thresholds used for this project are based on subparagraph (b)(1) of section 15064.3, which sets forth the criteria for analyzing the transportation impacts associated with land use projects. That section provides, in its entirety:

> (1) Land Use Projects. Vehicle miles traveled exceeding an applicable threshold of significance may indicate a significant impact. Generally, projects within one-half mile of either an existing major transit stop or a stop along an existing high quality transit corridor should be presumed to cause a less than significant transportation impact. Projects that decrease vehicle miles traveled in the project area compared to existing conditions should be presumed to have a less than significant transportation impact.

[1] State of California, Governor's Office of Planning and Research, *Technical Advisory on Evaluating Transportation Impacts in CEQA*, December 2018.

INTERSECTION ANALYSIS

This study includes intersection-level operational analysis under both the existing and future year traffic conditions for informational purposes and assumes that the Project would be completed by year 2024. The following traffic scenarios have been developed and analyzed as part of this study:

- Existing Conditions – The existing conditions analysis includes a description of the transportation system serving the Project site, existing traffic volumes, and an assessment of the operating conditions at the study analysis locations described below.
- Future Base (Year 2024) Conditions – Future traffic projections without the proposed Project were developed for the year 2024. The objective of this analysis was to project future traffic growth and operating conditions that could be expected to result from regional growth, related projects, and transportation network changes in the vicinity of the Project site by the year 2024.
- Future (Year 2024) plus Project Conditions – This traffic scenario provides projected traffic volumes and an assessment of operating conditions under future conditions with the addition of Project-generated traffic.

STUDY LOCATIONS

Six signalized intersections were selected for analysis in consultation with the City of El Segundo.

The following six signalized intersections, illustrated in **Figure 2**, were identified to be analyzed as part of the scope of work for this study:

1. Pacific Coast Highway & Grand Avenue
2. Continental Boulevard & Grand Avenue
3. Nash Street & Grand Avenue
4. Pacific Coast Highway & El Segundo Boulevard
5. Continental Boulevard & El Segundo Boulevard
6. Nash Street & El Segundo Boulevard

Lane configurations of the study intersections are illustrated in **Appendix B**.

ORGANIZATION OF REPORT

This report is divided into six chapters, including this introduction. Chapter 2 describes the existing conditions including an inventory of the streets, highways, and transit service in the study area. Chapter 3 describes the CEQA-required VMT impact analysis conducted for the Project. The non-CEQA-required intersection operational analysis is presented in Chapter 4, including the methodologies used to develop traffic forecasts. Chapter 5 provides an assessment of the proposed Project's access. Chapter 6 provides the summary and conclusions. Supporting analysis documents can be found in the Appendices.

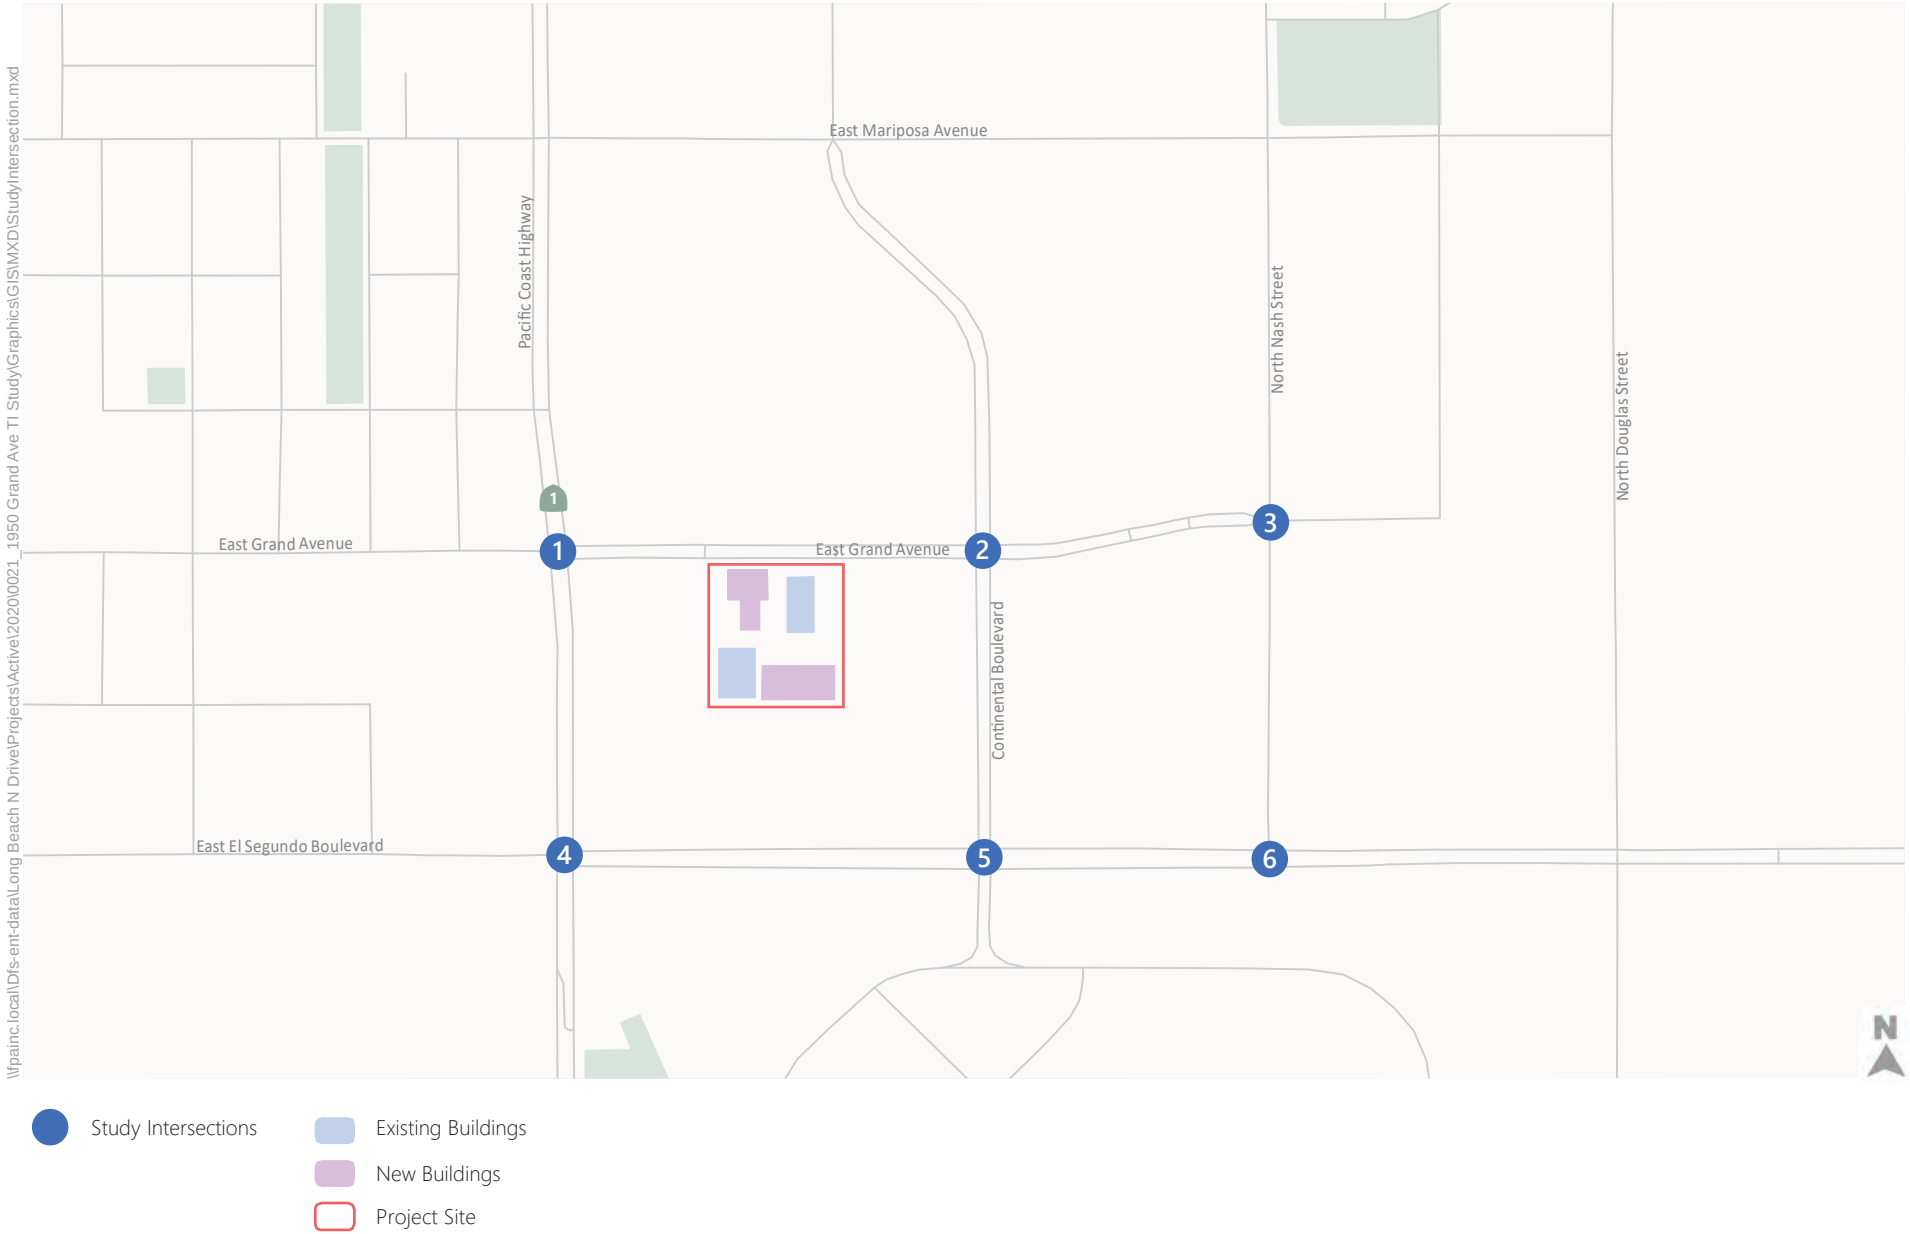

Figure 2

Study Area and Intersections

2. EXISTING CONDITIONS

A comprehensive data collection effort was undertaken to develop a detailed description of existing conditions in the study area. The assessment of conditions relevant to this study includes a description of the study area, an inventory of the local street system in the vicinity of the Project site, a summary of the current transit service, and bicycle and pedestrian facilities in the study area. A detailed description of these elements is presented in this chapter.

STUDY AREA

The study area selected for analysis extends to include the Pacific Coast Highway (PCH) to the west, Nash Street to the east, Grand Avenue to the north, and El Segundo Boulevard to the south. The streets in the study area are under the jurisdiction of the City of El Segundo with the exception of PCH, which is under the jurisdiction of Caltrans.

EXISTING STREET SYSTEM

Interstate 105 (I-105) lies less than a mile north of the site. This interstate provides regional access to and from the study area. The San Diego Freeway (I-405) located over a mile from the Project site to the east.

Major arterials serving the study area include PCH in the north/south direction and El Segundo Boulevard in the east/west direction. PCH and Nash Street provide access to I-105 and El Segundo Boulevard provides access to I-405 within the study area. The characteristics of the major roadways serving the study area are described below.

FREEWAYS

- **Interstate 105** runs in an east/west direction north of the project study area. In the vicinity of the study area, I-105 provides three to four lanes in each direction. Interchanges are provided at Nash Street and PCH in the study area.

- **Interstate 405** runs in a north/south direction east of the project study area. In the vicinity of the of the study area, I-405 provides four travel lanes and a carpool lane in each direction (a total of 10 lanes). Interchanges are provided via the I-105 and at El Segundo Boulevard in the study area.

EAST/WEST STREETS

- **Grand Avenue** is classified as a secondary arterial in the study area and runs along the north frontage of the Project site. It provides three lanes in both directions. Parking is not permitted along either side of the street in the study area.

- **El Segundo Boulevard** is classified as a major arterial east of PCH in the study area. It runs south of the Project site and provides two lanes west of PCH and three lanes east of PCH in both directions

with a raised median in the study area. Parking is not permitted along either side of the street in the study area.

NORTH/SOUTH STREETS

- **Pacific Coast Highway,** also known as State Route 1, is a major north/south state highway that runs along most of the Pacific coastline of California. It fronts the western side of the study area and provides four lanes in both directions with a center median within the study area. Parking is not permitted along either side of the road in the study area. Previously in the City of El Segundo, this major arterial was referred to as **Sepulveda Boulevard**.

- **Continental Boulevard** is classified as a secondary arterial in the study area and runs east of the Project site. It provides three lanes in both directions. Parking is not permitted along either side of the street in the study area.

- **Nash Street** is classified as a secondary arterial running east of the study area. It provides two lanes in both directions. Parking is not permitted along either side of the street in the study area.

EXISTING PUBLIC TRANSIT SERVICE

The Project site is served by both regional and local public transit. **Figure 3** shows the various bus and rail routes that provide service in the study area. Regional Transit includes the Metro C (Green) Line, Metro Local 232 and LADOT Commuter Express 574. Local Transit services include Torrance Transit Line 8, Beach Cities Transit Line 109, The El Segundo Lunchtime Shuttle, and Metro Micro's LAX/Inglewood Zone.

Details on the transit lines in the vicinity of the Project site include:

- Metro C (Green) Line – The Metro C (Green) Line is a light rail line running between Redondo Beach and Norwalk in Los Angeles County. This line runs north/southeast of the Project site along Nash Street. The Metro C (Green) Line has average headways of 12 minutes during the weekday peak periods. The El Segundo Station and the Mariposa Station are both less than a ½ mile from the Project site.

- Metro Line 232 – Line 232 provides local service between the City of El Segundo and downtown Long Beach. It runs along PCH east of the Project site in the study area. Line 232 has headways of approximately 15 minutes during the weekday peak periods. Line 232 provides a bus stop on Grand Avenue/ Continental Blvd in the westbound direction.

- LADOT Commuter Express 574 – Line 574 provides express service from Encino to the City of Hawthorne along PCH and El Segundo Boulevard, east and south of the Project site, respectively. Line 574 has headways of 30 to 60 minutes during weekday AM and PM peak periods. Line 574 provides the most direct connection to the Project site, providing a bus stop in both directions on Grand Avenue near Continental Blvd.

- Torrance Transit Line 8 – Line 8 provides service between the City of Torrance and Los Angeles International Airport (LAX). This line runs along Nash Street to the east of the Project site. Weekday headways during peak periods are approximately 30 minutes.

- Beach Cities Line 109 – Line 109 provides local service between the City of Redondo Beach and Los Angeles International Airport. This line runs east of the Project site along PCH. Line 109 has headways of 40 to 50 minutes during peak periods.

- El Segundo Lunchtime Shuttle – This shuttle connects El Segundo's business areas westward to Downtown El Segundo. The shuttle operates between 11:45AM-2:00PM on weekdays and passes along Grand Avenue directly in front of the Project site. Service is currently suspended due to the COVID-19 pandemic.

- Metro Micro LAX/Inglewood Zone – Metro Micro is a rideshare service meant to replace some local bus service for short trips and provide easier connections to other bus and rail service in the area. Service is provided by 10-passenger vans and are hailed using the Metro Micro App. The entire project study area is served by Metro Micro weekdays from 5AM-10AM and 2PM-7PM.

EXISTING BICYCLE AND PEDESTRIAN FACILITIES

Sidewalks are generally present throughout the study area, and marked crosswalks are provided at all major arterial intersections. Pedestrian access to the Project is provided along all the roadways in the vicinity of the Project.

A Class III bike route along Grand Avenue within the Project site study area is the only existing bicycle infrastructure available. In the project study area, the South Bay Bicycle Master Plan proposes installing a Class I bike path along El Segundo Boulevard, and a Class III bike route along Nash Street. **Figure 4** shows existing and proposed bicycle facilities in the study area.

EXISTING TRAFFIC VOLUMES

Due to the COVID-19 pandemic and the shelter-in-place orders from the Governor and County in April 2020, turning movements counts could not be collected at these intersections in 2020 or 2021 since they would not reflect typical conditions. Therefore, historical counts from 2016 and 2019 were used and an ambient growth factor of 0.2% per year was applied to adjust the traffic volumes to reflect baseline year 2020. The existing weekday morning and afternoon peak hour traffic volumes at the study intersections are provided in **Appendix B**. Count sheets for these intersections are contained in **Appendix C**.

3. VEHICLE MILES TRAVELED ANALYSIS

This chapter presents the VMT impact analysis conducted for the Project in accordance with the State's updated CEQA guidance.

VEHICLE MILES TRAVELED IMPACT SIGNIFICANCE THRESHOLD

As the City of El Segundo has not yet adopted their own transportation impact study guidelines including the VMT metric and significance in compliance with SB 743 guidelines, the VMT screening and impact thresholds below are based on the OPR Advisory, Section 15064.3 of the CEQA Guidelines, and discussion with City of El Segundo staff and are used only for the purposes of this study.

Effective December 28, 2018, Section 15064.3 was added to the CEQA Guidelines, establishing VMT as the most appropriate measure of transportation impacts. Subparagraph (b)(1) of section 15064.3 sets forth the criteria for analyzing the transportation impacts associated with land use projects. That section provides, in its entirety:

> (1) Land Use Projects. Vehicle miles traveled exceeding an applicable threshold of significance may indicate a significant impact. Generally, projects within one-half mile of either an existing major transit stop or a stop along an existing high quality transit corridor should be presumed to cause a less than significant transportation impact. Projects that decrease vehicle miles traveled in the project area compared to existing conditions should be presumed to have a less than significant transportation impact.

The Project's VMT were compared against the Southern California Association of Government (SCAG) region's daily work VMT per employee as the significance threshold. If the Project's daily work VMT per employee exceeds the SCAG region's existing daily work VMT per employee, this would indicate a significant transportation impact.

Table 1 summarizes the SCAG regional baseline VMT. The SCAG Regional Travel Demand Model (hereinafter, "SCAG model") is used for regional average VMT metrics and significance threshold (See **Appendix D** for detailed description of VMT calculations).[2] As shown in **Table 1**, per the Year 2016 SCAG model, the existing regional daily work VMT per employee for office land uses is 18.6 per employee, which is also the significance threshold for this Project.[3,4]

[2] Fehr & Peers has developed VMT post-processing tools to calculate VMT from the SCAG model.
[3] The SCAG 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) travel demand model was the most current RTP/SCS model available from SCAG at the time the modeling was prepared for the VMT analysis presented in this memo.
[4] Source: 2016 SCAG regional travel demand model as run by Fehr & Peers, March 2021.

TABLE 1

1950-1960 E GRAND AVENUE PROJECT

SCAG REGION DAILY VEHICLE MILES TRAVELED (VMT) SUMMARY [a]

VMT SUMMARY [b]	Home-Based Residential Productions	Home-Based Work Attractions
Population	18,859,864	N/A
Employment	N/A	7,971,327
Daily Vehicle Trips (VT)	26,655,458	9,618,629
Daily Vehicle Miles Traveled (VMT)	289,097,864	148,623,495
Average Trip Length (VMT/VT)	*23.7*	*15.5*
Capita Basis	Population	Employment
Daily VMT per Population	***15.3***	*N/A*
Daily VMT per Employee	*N/A*	***18.6***

Notes:

[a] The SCAG region consists of six counties (Los Angeles, Ventura, Orange, San Bernardino, Riverside, Imperial) in the southern California region.

[b] The Southern California Association of Governments (SCAG) Regional Travel Demand Model provides the ability to evaluate the transportation system in the SCAG region. The model forecasts AM and PM peak period and daily vehicle and transit flows on the transportation network in the region and calculates trip origins and destinations for those vehicle flows. The SCAG 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) travel demand model was the most current RTP/SCS model available from SCAG at the time the modeling was prepared for the VMT analysis presented in this memo. The Year 2016 model was used in this analysis. Fehr & Peers has developed VMT post-processing tools to calculate VMT from the SCAG model.

VEHICLE MILES TRAVELED SCREENING ANALYSIS

The OPR Advisory provide details on appropriate screening thresholds that can be used to identify when a proposed land use project is anticipated to result in a less than significant impact without conducting a more detailed analysis. OPR provided three screening thresholds: 1) Transit Proximity Screening, 2) Low VMT Area Screening, and 3) Small Project Screening. A land use project needs to only meet one of the following screening thresholds to be presumed to result in not significant impact under CEQA pursuant to SB 743.

1. Transit Proximity Screening

Projects located within a half mile of an existing major transit stop or within a half mile of an existing stop along a high-quality transit corridor can be screened out so long as the Project does not have a floor area ratio less than 0.75, does not include more parking than required by the jurisdiction, is not inconsistent with the applicable Sustainable Communities Strategy, and does not replace affordable residential units with a smaller number of moderate- or high-income residential units. A major transit stop is described as a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods. A high-quality transit corridor is described as a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

The Project is located within a half mile of an existing major transit stop, less than a half mile from the Metro C Line El Segundo and Mariposa Stations, as shown in **Figure 5**. Los Angeles Metro operates the C Line rail service on a scheduled 12-minute frequency in both the AM and PM frequency in both the AM and PM peak periods during weekdays.[5] While the Project meets the basic transit frequency and proximity criteria, OPR notes four additional conditions, described above, that must still be satisfied. The following paragraphs review the Project's applicability to those four conditions.

- The Project is proposed to have a Floor Area Ratio of 0.8, which is more than 0.75.[6]
- The Project proposes to construct a four-story with mezzanine office building of 105,469 square feet and new 23-space surface parking lot on the west parcel, and a four-story parking structure with 258 spaces on the east parcel. Pursuant to the City's Code of Ordinance, the Project is required to provide 263 parking spaces for the proposed new office building. The project proposes to provide 281 new parking stalls, which is more than required by the City. If taking into account the existing office building and parking space, the combined Project site will be provided with 1,103 parking spaces in total, which is more than 877 parking spaces as required by the City.[6] **Table 2** presents the land use information and applicable parking ratios to determine the number of spaces required.

[5] https://media.metro.net/documents/de1ed9d3-bc83-4bc5-af52-d7c4e87d8d30.pdf
[6] Source: Ware Malcomb, *Grand Avenue Planning Package,* December 2020.

- The Project is consistent with SCAG 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy, in which the Project site is designated as General Office Use in SCAG's General Plan land use. The Project is located in a Transit Priority Area according to SCAG's 2045 Plan.[7]

- The Project would not replace any affordable residential units.

Thus, the Project does not meet the transit proximity screening criteria, since it would provide more parking than required by the City.

2. Low VMT Area Screening

The OPR Advisory states that residential and office projects located within a low VMT generating area may be presumed to have a less than significant impact absent substantial evidence to the contrary. A low VMT generating area generally has higher density, a mix of land uses, and provides opportunities for people to walk to nearby uses instead of always driving. Low VMT areas for office projects are defined as areas that are currently generating daily work VMT per employee below the VMT threshold. As shown in **Figure 6**, the Project is not located in a low VMT TAZ. Therefore, the Project does not meet this screening criteria.

3. Small Project Screening

The OPR Advisory identifies local serving project types that may be presumed to have a less than significant impact absent substantial evidence to the contrary. These include uses such as resident and/or employee serving uses such as retail, daycare facilities, parks, gas stations, and the like. This screening criteria also allows for projects generating fewer than 110 daily trips to be screened out.

The Project consists of 105,469 square feet of new office space and is estimated to generate 976 daily trips. Therefore, the Project does not meet the small project screening criteria.

The Project is not screened out by any of the three criteria described above. Therefore, a VMT analysis would be required by the OPR Advisory.

Daily Work VMT per Employee Compared to SCAG Region Average

VEHICLE MILES TRAVELED IMPACT ANALYSIS

VMT Methodology

The Project's daily work VMT per employee was determined by using the Year 2016 SCAG model.[8] The SCAG model is a trip-based model that generates daily person trip-ends for each TAZ across various trip purposes (Home-based-work, home-based-other, and non-home-based for example) based on population, household, and employment variables. Production and attraction trip-ends are separately calculated for each zone, and generally: production trip-ends are generated by residential land uses and attraction trip-ends are generated by non-residential land uses. The average trip length and vehicle trips for home-based-work attractions are used to calculate the daily VMT per employee for office uses. **Appendix D** describes detailed methodology and steps of VMT calculations using the SCAG model for the Project.

Project VMT per Employee

Office is already an existing land use in the transportation analysis zone (TAZ) located in the City of El Segundo in which the Project is located so the model therefore includes home-based work attraction trips and average trip lengths. It is assumed that the Project's home-based work attraction trips will have similar characteristics as the existing home-based work attraction trips in the zone. The VMT per employee assumed for the Project site was therefore based on the vehicle trips and average trip lengths for the TAZ in which the Project is located from the SCAG model, which indicates a daily work VMT per employee of 19.30 for all home-based work attraction trips within the TAZ.[9]

Table 3 summarizes VMT of the TAZ in which the Project is located. **Table 4** summarizes the Project VMT impact analysis.

VMT per Employee Impact Analysis

As shown in **Table 1**, per the SCAG model, the existing regional daily work VMT per employee for office land uses is 18.6 per employee, which is also the significance threshold. The Project is estimated to generate 19.3 daily work VMT per employee, which is higher than the threshold. This indicates a significant VMT impact according to the threshold.

[8] The SCAG 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) travel demand model was the most current RTP/SCS model available from SCAG at the time the modeling was prepared for the VMT analysis presented in this traffic study.

Notes:

[a] The Project is located in TAZ 21138100.

[b] The Southern California Association of Governments (SCAG) Regional Travel Demand Model provides the ability to evaluate the transportation system in the SCAG region. The model forecasts AM and PM peak period and daily vehicle and transit flows on the transportation network in the region and calculates trip origins and destinations for those vehicle flows. The SCAG 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) travel demand model was the most current RTP/SCS model available from SCAG at the time the modeling was prepared for the VMT analysis presented in this memo. The Year 2016 model was used in this analysis. Fehr & Peers has developed VMT post-processing tools to calculate VMT from the SCAG model.

Notes:

[a] The Southern California Association of Governments (SCAG) Regional Travel Demand Model provides the ability to evaluate the transportation system in the SCAG region. The model forecasts AM and PM peak period and daily vehicle and transit flows on the transportation network in the region and calculates trip origins and destinations for those vehicle flows. Home-based work VMT per employee is based on the home-based work attraction trips from the Year 2016 SCAG model as run by Fehr & Peers, March 2021.

[b] Threshold based on Section 15064.3 of the CEQA Guidelines and discussion with City of El Segundo.

MITIGATION MEASURES

It is recommended that the Project develop and implement a transportation demand management (TDM) program as mitigation to reduce the trip generation and VMT impacts of the Project. A TDM program consists of strategies that are aimed at discouraging single-occupancy vehicle trips and encouraging alternative modes of transportation, such as carpooling, taking transit, walking, and biking.

The City of El Segundo has developed a list of potential TDM strategies appropriate for their jurisdiction and what magnitude of VMT reduction could be achieved. The selection process was guided by the California Air Pollution Control Officers Association (CAPCOA) recommendations found in the 2010 publication Quantifying Greenhouse Gas Mitigation Measures. The area context of the City of El Segundo also influenced the type of TDM strategies that were selected. CAPCOA has found strategies with the largest VMT reduction in rural areas include vanpools, telecommute or alternative work schedules, and master planned communities with design and land-use diversity to encourage intra-community travel. Based on empirical evidence, CAPCOA found the cross-category maximum for all transportation-related mitigation measures is 15% for suburban settings.[10]

TDM Program

A TDM program should be implemented for the proposed Project to offset the VMT impact.

The following potential TDM strategy would be applicable for employees working at the proposed Project:

- Workplace Parking Pricing - Separates parking from property costs, requiring office tenants who wish to lease parking spaces to do so at an additional cost to the office lease cost. Parking is priced separately from office leases and must include a mechanism for ensuring that the parking costs are passed through to the employees utilizing the parking spaces. Access to the garages will be controlled by a gate arm that can be accessed via an access card. Employees in the new building will be provided an access card to the garages if they opt to pay for a parking space.
- Transit Subsidies - Providing employees with free transit passes
- Promotions & Marketing - Involves the use of marketing and promotional tools to educate and inform travelers about site-specific transportation options and the effects of their travel choices with passive educational and promotional materials. Marketing and public information campaign to promote awareness of TDM program with an on-site coordinator to monitor the program
- Emergency Ride Home - Providing a taxi or transportation network company (TNC) voucher for employees to travel home in an emergency

[10] A cross-category maximum is provided for any combination of land use, neighborhood enhancements, parking, and transit strategies.

- Bike Share - Implementing bike share to allow people to have on-demand access to a bicycle
- Bicycle Amenities - Bicycle showers, repair stations, and secure bicycle parking
- Pedestrian Network Improvements - Implementing pedestrian network improvements throughout and around the Project site that encourage people to walk to nearby destinations and transit stops
- Carpool/Vanpool Incentives – Providing monetary assistance with fares, gas costs, or parking costs for carpool or vanpool users
- Ridematch Program – Assisting potential carpoolers in finding other individuals with similar travel routes in either closed or open systems
- Carshare Program – Providing carshare programs to employees

The TDM program should include the individual TDM measures and a monitoring program.

Effectiveness

In order to mitigate the work VMT per employee impacts to a level less than significant, the daily work VMT per employee would need to be reduced by 0.7 daily work VMT per employee or approximately 3.6%. In terms of commute trip reduction, this is equivalent to 36 daily trips (3.6% of 976 daily trips estimated for the Project).

The Fehr & Peers TDM+ tool was used to quantify the potential VMT reduction for the Project due to implementation of these TDM measures. The effectiveness of the TDM strategies included in the TDM+ tool is based primarily on research documented in the 2010 California Air Pollution Control Officers Association (CAPCOA) publication, *Quantifying Greenhouse Gas Mitigation Measures* – which is currently undergoing an update with more current research findings reflected in the latest version of the TDM+ tool. CAPCOA offers methodologies based on preferred literature, along with methodologies based on alternative literature, for each strategy. The TDM+ tool considers a variety of TDM strategies and the setting in which they may apply, estimates effectiveness for each, and applies caps when appropriate (for example, simply aggregating the effectiveness of individual TDM measures can sometimes yield a result that is overestimated since more than one measure may be targeting the same trip). The reductions are presented as a range from "Low/CEQA" (i.e. highly defensible and suitable for use in environmental analysis documents or to mitigate a VMT impact) to "High/Ambitious" (the highest reduction for a given program, suitable for use for planning purposes). For the purposes of this analysis, the "Low/CEQA" reductions (i.e., the low end of the range) were considered.

As shown in **Figure 7**, the tool estimates a VMT reduction of 9% for the TDM measures developed for the Project. As shown in **Table 5**, a VMT reduction of 9% applied to the Project's daily work VMT is 1.7, bringing the daily work VMT per employee to 17.6. A commute trip reduction of 9% applied to the Project's daily trips is 88 trips. The TDM measures developed for the Project would therefore mitigate the Project's VMT impact to less than significant levels.

TDM Reduction Summary Report: 1950 Grand Avenue Project - Proposed Project

Overall VMT Reduction: 9% to 40%

	VMT % Reduction by Land Use

Notes:

[a] The Southern California Association of Governments (SCAG) Regional Travel Demand Model provides the ability to evaluate the transportation system in the SCAG region. The model forecasts AM and PM peak period and daily vehicle and transit flows on the transportation network in the region and calculates trip origins and destinations for those vehicle flows. Home-based work VMT per employee is based on the home-based work attraction trips from the Year 2016 SCAG model as run by Fehr & Peers, March 2021.

[b] Threshold based on Section 15064.3 of the CEQA Guidelines and discussion with City of El Segundo.

[c] Daily trips were calculated using Institute of Transportation Engineers (ITE) *Trip Generation, 10th Edition* (2017) with a 5% walk/bike/transit credit due to the site's proximity to bus service on PCH, Grand Avenue, and Nash Street and Metro C (Green) Line El Segundo Station.

4. INTERSECTION LEVEL OF SERVICE ANALYSIS

This chapter presents the intersection operational analysis conducted as part of the transportation study. Since, as discussed in Chapter 1, intersection level of service is no longer a CEQA impact metric, this analysis is presented for informational purposes.

EXISTING TRAFFIC VOLUMES AND LEVEL OF SERVICE

This section presents existing base peak hour traffic volumes, describes the methodology used to assess the traffic conditions at each intersection, and analyzes the resulting operating conditions at each, indicating volume-to-capacity (V/C) ratios and levels of service.

LEVEL OF SERVICE METHODOLOGY

Analysis Methodology

LOS is a qualitative measure used to describe the condition of traffic flow on the street system, ranging from excellent conditions at LOS A to overloaded conditions at LOS F. A variety of methodologies are available to analyze LOS. Consistent with the requirements of the City of El Segundo, signalized intersections were analyzed using the Intersection Capacity Utilization (ICU) methodology. The ICU methodology is used to determine the intersection volume-to-capacity (V/C) ratio and corresponding LOS for the turning movements and intersection characteristics at the signalized intersections. "Capacity" represents the maximum volume of vehicles in the critical lanes that have a reasonable expectation of passing through an intersection in one hour under prevailing roadway and traffic conditions. The ICU ratios used in this study were calculated by dividing critical traffic movement volumes at an intersection by the capacity per number of lanes for the movement. AM and PM peak hour ICU ratios and LOS were calculated using Fehr & Peers' ICU spreadsheet tool. Lane capacity assumptions do not exceed 1,600 vehicles per lane per hour.

The six identified intersections in the study area are signalized intersections. For these signalized intersections, the V/C ratio used to find the corresponding LOS is based on the definitions in **Table 6A**.

For the two Project driveways, the *Highway Capacity Manual* (HCM) (Transportation Research Board, 2016) methodology was used to analyze the delay. Under HCM methodology, delay is calculated in seconds for the stop-controlled movements and given a LOS grade, as shown in **Table 6B**. The Project driveways (unsignalized intersections) were analyzed using the HCM 6th Edition Two-way Stop Control methodology. The Synchro software package was used to produce the HCM results.

TABLE 6A
LEVEL OF SERVICE DEFINITIONS FOR SIGNALIZED INTERSECTIONS

Level of Service	Volume/Capacity Ratio	Definition
A	0.000 - 0.600	EXCELLENT. No vehicle waits longer than one red light and no approach phase is fully used.
B	>0.600 - 0.700	VERY GOOD. An occasional approach phase is fully utilized; many drivers begin to feel somewhat what restricted within groups of vehicles.
C	>0.700 - 0.800	GOOD. Occasionally drivers may have to wait through more than one red light; backups may develop behind turning vehicles.
D	>0.800 - 0.900	FAIR. Delays may be substantial during portions of the rush hours, but enough lower volume periods occur to permit clearing of developing lines, preventing excessive backups.
E	>0.900 - 1.000	POOR. Represents the most vehicles intersection approaches can accommodate; may be long lines of waiting vehicles through several signal cycles.
F	> 1.000	FAILURE. Backups from nearby locations or on cross streets may restrict or prevent movement of vehicles out of the intersection approaches. Tremendous delays with continuously increasing queue lengths.

TABLE 6B
LEVEL OF SERVICE DEFINITIONS FOR UNSIGNALIZED INTERSECTIONS

Level of Service	Average Control Delay (seconds/vehicle)
A	$\leq$ 10.0
B	> 10.0 and $\leq$ 15.0
C	> 15.0 and $\leq$ 25.0
D	> 25.0 and $\leq$ 35.0
E	> 35.0 and $\leq$ 50.0
F	> 50.0

EXISTING LEVELS OF SERVICE

Existing year traffic volumes presented in **Appendix B** were analyzed using the ICU methodology described above to determine the existing operating conditions at the study intersections. **Table 7** summarizes the results of the analysis of the existing weekday morning and afternoon peak hour V/C ratio or delay and corresponding LOS at each of the analyzed signalized intersections. PCH & El Segundo Boulevard operates at LOS F during the PM peak period.

The rest of the study intersections currently operate at LOS D or better during both peak periods. Analysis sheets are provided in **Appendix E**.

PROJECT TRAFFIC

The development of trip generation estimates for the proposed Project involves the use of a 3-step process: trip generation, trip distribution, and traffic assignment.

PROJECT TRIP GENERATION

As discussed in Chapter 1, the Project proposes to construct:

- A four-story with mezzanine office building of 105,469 gross square feet on the west parcel
    - Including a new 23-space surface parking lot
- A four-story parking structure with 258 spaces on the east parcel

Trip generation rates from *Trip Generation, 10th Edition* (Institute of Transportation Engineers [ITE], 2017) were used to estimate the number of trips associated with the Project and are presented in Table 4. The total number of trips generated by the new development were adjusted to account for walk/bike/transit credit.

A 5% walk/bike/transit credit was applied to the proposed land use. This credit accounts for trips made to and from the Project site using modes other than automobiles. These include trips on rail and bus transit, bicycle, walking, etc. The site is located in close proximity to bus service on PCH, Grand Avenue, and Nash Street. The Project is also 1/2-mile distance to the Metro C (Green) Line El Segundo and Mariposa Stations.

As shown in **Table 8**, the Project is projected to generate an estimated net increase of 976 daily trips, including 116 trips (100 inbound/16 outbound) during the AM peak hour and 115 trips (18 inbound/97 outbound) during the PM peak hour.

Notes:

[a] Source: Institute of Transportation Engineers (ITE), *Trip Generation, 10th Edition,* 2017, unless otherwise noted.

[b] ITE code 710 General Office Building was used with the General Urban/Suburban setting rate.

[c] A transit adjustment was applied due to the Project's proximity to bus service on PCH, Grand Avenue, and Nash Street. The Project is also 1/2 mile distance to Metro C (Green) Line El Segundo Station.

PROJECT TRAFFIC DISTRIBUTION

The geographic distribution of trips generated by the proposed Project is dependent on characteristics of the street system serving the Project site; the level of accessibility of routes to and from the proposed Project site and locations of employment areas from which residents would be drawn. Similar projects in the study area were used to help inform the general distribution pattern for this study. The distribution of project trips is illustrated in **Figure 8**.

Consideration was given to project traffic distribution from the proposed development sites (east/west parcels). Two existing access points to the Project site are provided off Grand Avenue. The west driveway is limited to right-in/right-out movements. The east driveway provides full in/out access.

PROJECT TRAFFIC ASSIGNMENT

The traffic to be generated by the proposed Project was assigned to the street network using the distribution patterns described in **Figure 8. Figure 9** provides the assignment of the proposed Project-generated peak hour traffic volumes at the analyzed intersections during the AM and PM peak hours. The assignment of traffic volumes took into consideration the locations of the existing Project driveways on Grand Avenue.

PROJECT DRIVEWAYS

Vehicle access for the Project is to be provided via Grand Avenue with two existing driveways. The two driveways are connected on the Project site. The west driveway provides right-in/right-out access to the Project site. The east driveway provides full in/out access to the Project site. The existing and proposed parking structures are accessible via both driveways.

FUTURE YEAR 2024 TRAFFIC CONDITIONS

To evaluate the potential effects of the proposed Project on future (Year 2024, Project Opening Year) conditions, it was necessary to develop estimates of future traffic conditions in the area both without and with project traffic. First, estimates of traffic growth were developed for the study area to forecast future conditions without the Project. These forecasts included traffic increases as a result of both regional ambient traffic growth and traffic generated by specific developments in the vicinity of the Project (related projects).

These projected traffic volumes, identified herein as the Future Base conditions, represent the future conditions without the proposed Project. The traffic generated by the proposed Project was then estimated and assigned to the surrounding street system. Project traffic was added to the Future Base conditions to form Future (year 2024) plus Project traffic conditions.

The assumptions and analysis methodology used to develop each of the future year scenarios discussed above are described in more detail in the following sections.

BACKGROUND OR AMBIENT GROWTH

Based on the Los Angeles County 2010 Congestion Management Plan (CMP), an ambient growth factor of 0.2% per year was applied to adjust the existing base year traffic volumes to reflect the effects of regional growth and development by year 2024. This adjustment was applied to the existing (year 2020) traffic volume data to reflect the effect of ambient growth by the year 2024. In addition, substantial growth in traffic at LAX due to the Landside Access Modernization Program were included in projecting future background growth. Forecasts of projected growth in LAX-related trips were taken from the *LAX Landside Access Modernization Program Draft* EIR, September 2016.

RELATED PROJECT TRAFFIC GENERATION AND ASSIGNMENT

Future Base traffic forecasts include the effects of known specific projects, called related projects, expected to be implemented in the vicinity of the proposed Project prior to the buildout date of the proposed Project. The list of related projects was prepared based on data from Los Angeles County and the Cities of El Segundo, Manhattan Beach, and Hawthorne. Related projects traffic volumes are presented in **Appendix B**.

A total of 32 cumulative projects were identified in the study area; these projects are listed in **Table 9** and illustrated in **Figure 10**.

Trip Generation

Trip generation estimates for the related projects were calculated using a combination of previous study findings, publicly available environmental documentation, and trip generation rates contained in *Trip Generation, 10th Edition*. **Table 9** presents the resulting trip generation estimates for these related projects. These projections are conservative in that they do not in every case account for either the existing uses to be removed or the possible use of non-motorized travel modes (transit, walking, etc.).

Trip Distribution

The geographic distribution of the traffic generated by the related projects is dependent on several factors. These factors include the type and density of the proposed land uses, the geographic distribution of population from which employees and potential patrons of proposed commercial developments may be drawn, the locations of employment and commercial centers to which residents of residential projects may be drawn, and the location of the projects in relation to the surrounding street system. Additionally, if the traffic study or environmental document for a related project was available, the trip distribution from that study was used.

Traffic Assignment

Using the estimated trip generation and trip distribution patterns described above, traffic generated by the related projects was assigned to the street network.

TRANSPORTATION INFRASTRUCTURE PROJECTS

There are no known infrastructure changes in the study area planned for implementation by year 2024. Therefore, network changes were not included in the analysis.

FUTURE YEAR 2024 BASE TRAFFIC VOLUMES

Future year 2024 base weekday AM and PM peak hour traffic volumes and lane geometries for the analyzed intersections are provided in **Appendix B**. The Future Base traffic conditions represent an estimate of future conditions without the proposed Project inclusive of the ambient background growth and related projects traffic.

FUTURE PLUS PROJECT TRAFFIC PROJECTIONS

The proposed Project traffic volumes were added to the year 2024 Future Base traffic projections, resulting in Future (year 2024) plus Project AM and PM peak hour traffic volumes. As provided in **Appendix B**, the Future (year 2024) plus Project scenario presents future traffic conditions with the completion of the proposed Project.

FUTURE PLUS PROJECT ANALYSIS

FUTURE BASE TRAFFIC CONDITIONS

The year 2024 Future Base peak hour traffic volumes were analyzed to determine the projected V/C ratio and delay and LOS for each of the analyzed intersections. **Table 10** summarizes the future LOS for the signalized intersections. Two of the six study intersections analyzed are projected to operate at LOS E or worse during the AM or the PM peak period under year 2024 Future Base conditions. These intersections include:

1. Pacific Coast Highway & Grand Avenue (LOS F during PM)
4. Pacific Coast Highway & El Segundo Boulevard (LOS E during the AM and LOS F during PM)

FUTURE PLUS PROJECT TRAFFIC CONDITIONS

The resulting Future (year 2024) plus Project peak hour traffic volumes, provided in **Appendix B**, were analyzed to determine the projected future operating conditions with the addition of the proposed Project traffic. The results of the Future (year 2024) plus Project analysis are presented in **Table 10** with analysis sheets provided in **Appendix E**. The same two study intersections projected to operate at LOS E or worse during the AM or PM peak periods under Future Base conditions are also projected to operate at LOS E or worse during the AM or PM peak periods with the addition of Project traffic. These intersections are:

1. Pacific Coast Highway & Grand Avenue (LOS F during PM)
4. Pacific Coast Highway & El Segundo Boulevard (LOS E during the AM and LOS F during PM)

The addition of Project traffic at the study intersections does not change the projected Future Base LOS. The V/C change at the intersections projected to operate at LOS E/F is also less than 0.02. Project traffic is not expected to cause substantial traffic operational effects since it would not increase the intersection V/C ratio by 0.02 or more at any intersection operating at a poor LOS E/F.

5. SITE ACCESS

Vehicle access for the Project is to be provided via Grand Avenue with two existing driveways. The two driveways are connected on the Project site. The west driveway provides right-in/right-out access to the Project site. The east driveway provides full in/out access to the Project site. The existing and proposed parking structures are accessible via both driveways.

The new east parcel parking structure will have direct connection to the east driveway via the existing internal private drive aisle. The structure will have direct inbound and outbound access from the existing internal north/south drive aisle of the lot. The new west parcel surface parking lot (23 stalls) can be accessed via the new east parcel parking structure with an east/west drive aisle connection. Both the east and west buildings will have dedicated small truck loading areas via the existing internal drive aisles. The existing west parcel parking structure will still be accessible via the existing internal north/south drive aisle that connects to the west driveway. Driveway access and on-site circulation is illustrated in **Figure 11**.

Bicycle and pedestrian access to the Project site will not be affected as no new driveways are being added. Bicycle access to the Project site is available on Grand Avenue.

LEVEL OF SERVICE ANALYSIS FOR PROJECT DRIVEWAYS

A level of service analysis was conducted to evaluate the ability of the Project access plan to accommodate the anticipated traffic levels at the driveway access points. This analysis was conducted for the two project driveways on Grand Avenue. The 1950 Grand Avenue driveway allows for right in/right out movements only, while the 1960 Grand Avenue driveway allows for full in/out access.

The two existing project driveways on Grand Avenue are both unsignalized and were analyzed using the HCM 6th Edition two-way stop-controlled methodology. The HCM methodology determines the average vehicle delay for the stop-controlled approach to find the corresponding LOS based on the definitions presented in **Table 2B**. Driveway analysis LOS worksheets are included in **Appendix E**. **Table 11** shows the results of the peak hour LOS analysis at the unsignalized driveways, and **Table 12** shows the results of the peak hour queueing analysis at the unsignalized driveways.

As shown in **Table 11**, both project driveways are projected to operate at LOS B in the AM peak hour under the Future plus Project scenario. The west driveway is projected to operate at LOS C and the east driveway is projected to operate at LOS D in the PM peak hour under the Future plus Project scenario.

Based on the queue results shown in **Table 12**, the driveway approaches to Grand Avenue at both the west and east driveways are projected to experience a 95th percentile queue length of 25 feet (approximately one vehicle) in the AM peak hour under the Future plus Project scenario. The queue for the west driveway is projected to experience a 95th percentile queue length of 25 feet (approximately one vehicle) and the queue for the east driveway is projected to experience a 95th percentile queue length of 100 feet (approximately four vehicles) during the PM peak hour under Future plus Project scenario. A queue of four vehicles is not expected to cause problems to the internal circulation as the queues reported are 95th percentile results and would not extend back as far as the existing building's loading space.

6. SUMMARY AND CONCLUSIONS

This study was undertaken to analyze the potential transportation impacts of the proposed 1950 Grand Avenue Project. The following summarizes the results of this analysis:

- The Project involves the development of two adjacent parcels at 1950/1960 Grand Avenue. The Project proposes to construct a four-story with mezzanine office building of 105,469 gross square feet and new 23-space surface parking lot on the west parcel, and a four-story parking structure with 258 spaces on the east parcel. An existing 12-story office building and 11-story parking structure also exist on the site.

- Vehicle access for the Project is to be provided via two existing driveways on Grand Avenue. The two driveways are connected on the Project site. The west driveway provides right-in/right-out access to the Project site. The east driveway provides full in/out access to the Project site. The existing and proposed parking structures are accessible via both driveways.

- The Project is estimated to generate an average daily work VMT per employee of 19.3 miles. This indicates a significant VMT impact using the VMT significance thresholds developed for this study. With the development and implementation of a TDM plan as a mitigation applied to the Project, the Project's VMT impact would be mitigated to less than significant levels.

- The Project is projected to generate an estimated net increase of 976 daily trips, including 116 trips (100 inbound/16 outbound) during the AM peak hour and 115 trips (18 inbound/97 outbound) during the PM peak hour.

- A level of service analysis was conducted for six signalized intersections in the vicinity of the Project. The Project traffic is not expected to cause any cause substantial traffic operational effects at the study intersections.

- Driveway access was evaluated for the Project at the two existing project driveways on Grand Avenue. The driveways are projected to operate at acceptable levels under Future plus Project conditions.

APPENDIX A:
METHODOLOGIES AND ASSUMPTIONS SCOPING MEMO

FEHR PEERS

MEMORANDUM

Date: May 17, 2021

To: City of El Segundo

From: Dongyang Lin, Vivian Lee, and Tom Gaul

Subject: Methodologies and Assumptions for the 1950–1960 East Grand Avenue Project Transportation Impact Analysis

LB20-0021

The purpose of this memorandum is to document the methodologies and assumptions which will be used in the Transportation Impact Analysis (TIA) for the 1950 Grand Avenue Project. This memorandum will serve as the Applicant's request to approve the approach for the TIA prior to the completion of the transportation study.

The remainder of this memorandum is divided into the following sections: Project Description, VMT Analysis, and Local Transportation Assessment (which includes Trip Generation, Study Area, Trip Distribution, Data Collection, Analysis Scenarios, and Methodology and Evaluation).

Project Description

The Project involves the development of two adjacent parcels at 1950/1960 Grand Avenue. The Project proposes to construct a creative office building of 105,469 square feet (sf) and new 23-space surface parking lot on the west parcel, and a 258-space parking structure on the east parcel. An existing office building and parking structure also exist on site. The Project will open in 2024.

The Project is on Grand Avenue between Pacific Coast Highway (PCH) and Continental Boulevard. The adjacent land uses are hotel and parking to the south, office uses to the east and west, and hotel and office uses to the north. The 405 Freeway, east of the Project site, and 105 Freeway, north of the Project site, provide regional access to the Project area. Two primary access points to the project site are provided off of Grand Avenue. The Project is located approximately ½ mile from the Metro Green Line El Segundo Station. Bus service provided by Metro, LADOT Commuter Express, and Torrance Transit also serve the Project site. **Figure 1** shows the site plan for the Project.

VMT Analysis

On September 27, 2013, Governor Jerry Brown signed Senate Bill (SB) 743 into law and started a process that fundamentally changed transportation impact analysis conducted as part of California Environmental Quality Act (CEQA) compliance. The Governor's Office of Planning and Research (OPR) was charged with developing new guidelines for evaluating transportation impacts under CEQA using methods that no longer focus on measuring automobile delay and level of service (LOS). The changes to CEQA guidelines Section 15064.3 to implement SB 743 were certified by the State in December of 2018. The updates establish vehicle miles traveled (VMT) as the primary metric for evaluating a project's environmental impacts on the transportation system. Draft environmental impact reports published after July 1, 2020, are required to implement these new requirements.

Consistent with the State's updated CEQA guidance in response to SB 743, work VMT per employee for the Project will be calculated using data from the Southern California Association of Government's (SCAG) 2016 Regional Transportation Plan (RTP) travel demand model. The OPR VMT guidelines establish that a significant project impact may occur when a certain threshold is exceeded. For office projects, OPR recommends that a proposed project exceeding a level of 15% below existing daily work VMT per employee may indicate a significant transportation impact. While the City of El Segundo has not yet adopted VMT standards and thresholds, per direction from the City, the Project's VMT will be compared against the SCAG region's daily work VMT per employee as the significance threshold. VMT analysis will be conducted for both Existing and Cumulative conditions.

Based on the VMT analysis, potential VMT impacts will be identified. If the project creates VMT impacts (according to OPR's significance threshold), transportation demand management (TDM)/trip reduction strategies will be identified. Where empirical data is available, Fehr & Peers will quantitatively assess the benefits of the measures using our TDM+ tool, which allows developers and agencies to estimate how a TDM plan affects vehicle trip generation and corresponding VMT.

Local Transportation Assessment

From a CEQA impact analysis perspective, an intersection level analysis is not necessary to assess transportation impacts but could be used to contribute input data to the air-quality and noise sections of the environmental document, and for additional information to share with decision makers.

Project Trip Generation

Trip generation rates from *Trip Generation, 10th Edition* (Institute of Transportation Engineers [ITE], 2017) were used to estimate the number of trips for the Project. ITE trip generation rates for General Office (ITE Code 710) were used to estimate trips for the creative office use. **Table 1** presents the estimated trip generation for the Project. A 5% transit adjustment was applied due to the Project's proximity to bus stops served by Metro, LADOT, and Torrance Transit and the Metro Green Line El Segundo Station (approximately ½ mile from the Project site). As presented in **Table 1**, the Project is expected to generate an estimated 116 vehicle trips (100 inbound/16 outbound) during the AM peak hour and 115 vehicle trips (18 inbound/97 outbound) during the PM peak hour.

Study Area

This study will initially analyze the following signalized study intersections, also shown in **Figure 2**:

1. Pacific Coast Highway & Grand Avenue
2. Continental Boulevard & Grand Avenue
3. Nash Street & Grand Avenue
4. Pacific Coast Highway & El Segundo Boulevard
5. Continental Boulevard & El Segundo Boulevard
6. Nash Street & El Segundo Boulevard

Preliminary LOS results for the initial study intersections will be presented to the City of El Segundo. Upon review of the results, if the City determines that the LOS results are acceptable, no further study intersections will be analyzed. However, the City has indicated that they reserve the right to ask for analysis on additional intersections based on the review of the initial LOS results. The additional intersections to be analyzed will be determined in coordination with City staff.

Trip Distribution

The geographic distribution of trips generated by the Project is dependent on characteristics of the street system serving the Project site, the level of accessibility of routes to and from the proposed Project site, and the locations of employment and residential areas to which patrons of the Project would be drawn. The trip distribution will be finalized through conversations with City staff to ensure that the assumptions are realistic and vetted. The preliminary distribution of Project trips is illustrated in **Figure 3**.

Data Collection

Due to atypical current conditions caused by COVID-19, new counts will not be collected at the study intersections. Instead, recent historical counts from previous studies in the area and/or from count company databases will be used.

Fehr & Peers will collect the following information in a field visit to the study area:

- Lane configurations
- Signal phasing
- Land uses in the study area
- Existing pedestrian and bicycle facilities
- On-street parking conditions
- Transit service

Additionally, Fehr & Peers will request the following information from City of El Segundo, City of Manhattan Beach, City of Los Angeles, City of Hawthorne, and/or Los Angeles County staff:

- Pending and approved development projects that should be included in the forecasting effort
- Upcoming funded roadway improvement projects in the study area that should be considered for future analysis
- Upcoming funded bicycle/pedestrian/transit improvements in the study area that should be considered for future analysis

Analysis Scenarios

The following three scenarios will be analyzed:

- Existing Conditions
- Future Opening Year No Project
- Future Opening Year plus Project

A list of pending and approved development projects in the vicinity of the project that are expected to be completed by the buildout horizon will be included in the forecasting effort. Based on the Los Angeles County 2010 Congestion Management Plan (CMP), an ambient growth factor of 0.2% per year will be applied to the historical counts to interpolate existing and future traffic counts.

Methodology and Evaluation

Fehr & Peers will conduct capacity analysis at the study intersections during morning and evening peak hours. The Intersection Capacity Utilization (ICU) methodology will be used to evaluate potential traffic operational effects at the study intersections.

While no longer considered a CEQA impact threshold, the City's intersection impact criteria as outlined in Policy C3-1.3 of the General Plan Circulation Element will be used to evaluate potential traffic operational effects. A potential traffic operational effect has occurred where Project traffic causes an intersection to go from LOS A-D to LOS E or F, or if project traffic causes an increase in the volume-to-capacity (v/c) ratio of 0.02 or greater when the intersection is operating at LOS E or F in the baseline scenario.

Potential corrective actions will be investigated if substantial operational effects are found.

Next Steps

Once the proposed assumptions and methodology are approved by City staff, Fehr & Peers will begin the transportation analysis for this Project to identify potential significant impacts and potential traffic operational effects.

APPENDIX D:
DETAILED VMT ANALYSIS METHODOLOGY

Appendix C: VMT Analysis Methodology

This attachment describes the methodology used to develop VMT estimates from the Southern California Association of Governments (SCAG) regional travel demand model (hereinafter, "SCAG model").

Model Scenario

The SCAG 2016 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) travel demand model was the most current RTP/SCS model available from SCAG at the time of issuance of Notice of Preparation (NOP) and modeling prepared for the VMT analysis presented in this study. Therefore, the 2016 RTP/SCS Year 2016 model (hereinafter, "Year 2016 SCAG model") was used to estimate the existing VMT and VMT metrics for SCAG regional average and the Project.

Model Zone System

The SCAG Model is a 4-step, trip-based convergence model covering the entire SCAG 6-county region, including Los Angeles, Ventura, Orange, San Bernardino, Riverside, and Imperial Counties. The model is structured geographically into approximately 4,100 tier 1 Transportation Analysis Zones (TAZs) and 11,267 tier 2 TAZs. Socioeconomic data, highway network, and transit network are primary inputs to the SCAG model to estimate trip generation and assign vehicle trips. The TAZs contains socioeconomic data and other information for the model and are attached to the networks using centroid connectors that allow travelers (trips) to access the transportation system by simulating local and neighborhood streets. They provide the spatial unit (or geographical area) within which travel behavior and traffic generation are estimated[1].

Socioeconomic Data

Socioeconomic data, which describes both demographic and economic characteristics of the region by TAZ, is used as major input to SCAG model. A total of 65 socio-economic variables and 8 joint distributions of two or more variables are developed, including population, households, school enrollments, household income, workers, and employment, etc[1]. For the Year 2016 SCAG model used in this study, the SCAG region has 18,859,864 population and 7,971,327 employments in total.

Trip Generation

The SCAG model generates daily person trip-ends for each TAZ across 10 trip purposes[2], which can be grouped into home-based-work, home-based-other, and non-home-based, based on population, household, and employment variables. The trip production models estimate the number of person trips generated in each TAZ, using auto availability, household income,

---

[1] Southern California Association of Governments (SCAG), *SCAG Regional Travel Demand Model And 2012 Model Validation*, March 2016.

[2] The 10 trip purposes include: Home-Based Work Direct (HBWD), Home-Based Work Strategic (HBWS), Home-based school (HBSC), Home-based college and university (HBCU), Home-based shopping (HBSH), Home-based social-recreational (HBSR), Home-based serve passenger (HBSP), Home-based other (HBO), Work-based other (WBO), and Other-based other (OBO).

household size, number of workers and other variables to forecast trip production. The trip attraction models estimate the number of person trips attracted to each TAZ, which are a function of land use activity measures such as employment, residential households, and school enrollment[3].

Production and attraction trip-ends are separately calculated for each zone, and generally: production trip-ends are generated by residential land uses and attraction trip-ends are generated by non-residential land uses. Focusing on residential and employment land uses, the first step to forecasting VMT requires translating the land use into model terms, the closest approximations are:

- Residential: home-based production trips
- Employment: home-based work attraction trips

Mode Choice

The SCAG mode choice model is a nested logit model, which is the process of taking the zone-to-zone person trips by trip purpose from the trip distribution model and determining how many of those person-trips are made by the various travel modes, including non-motorized modes (walk and bike), auto modes (drive alone or carpool), and transit modes. The auto mode choice distinguishes four levels of occupancy (1,2,3 and 4 persons per vehicle) and includes a pre-route toll/no toll binary choice. Besides, the model includes a HOV/non-HOV path subnets for the shared-ride choices[3]. For the mode choice of 3+ carpool, the model uses separate vehicle occupancy rates by trip purposes in peak and off-peak periods to convert person trips to vehicle trips.

VMT Calculations

VMT is presented in numerous different forms depending on the analysis being conducted. OPR recommends that daily "Home-Based VMT" per capita is used for residential projects and daily "Home-Based Work VMT" per employee for office projects.

The following steps describe the process used to calculate VMT for residential or office projects using the SCAG model for a project, study area, citywide, or regional geography[4].

- For residential or employment VMT, only daily light-duty and medium-duty vehicle trips were included.
- Custom vehicle trip Production-Attraction (PA) matrices were calculated from peak and off-peak person trip matrices
    - PA matrices at Tier 2 TAZs were used
    - Trip purposes and modes were kept separate
    - Average vehicle occupancy rates for drive-alone and shared ride trips were used to convert person trips to vehicle trips

[3] Southern California Association of Governments (SCAG), *SCAG Regional Travel Demand Model And 2012 Model Validation*, March 2016.

[4] Fehr & Peers has developed VMT post-processing tools to calculate VMT from the SCAG model using these procedures.

- The final congested drive-alone peak and off-peak skim matrices were used to estimate trip length between zones
    - Skim matrices at Tier 2 TAZs were used
- The skim matrices were multiplied by vehicle trips to estimate VMT by peak and off-peak period
- The peak and off-peak results were summed to estimate daily VMT with mode trip purpose and mode aggregated
- Automobile VMT for individual TAZs were calculated using marginal totals:
    - Residential (home-based) - row total
    - Office (home-based work) - column total
- Daily VMT at Tier 2 TAZs were aggregated based on jurisdiction most covered geographic proportional by each TAZ
- Only internal land use TAZs were analyzed (no airport, seaport, or external gateways)
- All calculations used matrix multiplication as opposed to select zone analysis

Will Serve Letters

This page intentionally left blank

SOUTHERN CALIFORNIA EDISON
An *EDISON INTERNATIONAL* Company

DATE: 11/16/20

COMPANY: BURO HAPPOLD (ADEESH PARANJAPE)

SUBJECT: 1950 E GRAND AVE, EL SEGUNDO

Your project is located in Southern California Edison (SCE) service territory. SCE will serve the above subject project's electrical requirements per the California Public Utilities Commission and Federal Energy Regulatory Commission tariffs.

SCE may need to conduct utility studies, where applicable, to assess whether additions or modifications to the existing electric infrastructure are required to serve this project. Where applicable, SCE has attached Appendix (B) which not only describes the study, and permitting, but includes a Project Information Sheet that will need to be completed by you and submitted to SCE if your project is at a point where SCE has to determine the required electrical utility work. This Will-Serve letter does not imply that either: (i) these studies have been completed, or (ii) that any required California Environmental Quality Act (CEQA) analysis of project-related electric utility impacts has been conducted.

I am the SCE Design Representative currently assigned to this project. SCE or Applicant will design and construct all required electrical infrastructure to serve this project provided you enter into the applicable contractual agreements with SCE identify scope of electrical utility work required, and supply the following information:

- Site plans as required
- Required contracts and agreements (fully executed)
- Applicable fees
- Local permits
- Required easement documents

Your project will be scheduled for construction once SCE has all the necessary information for your project and you have submitted or agreed to the applicable requirements as stated above, and paid any necessary fees.

If your project will not require SCE services, please notify us so that we can update our records.

SCE appreciates your business. If you have any questions, please feel free to call me at (310) 738-6760.

Sincerely,

SCE Design Representative

Enclosure: Appendix B, where applicable

Subject: Will Serve - 1950 E. Grand Ave, El Segundo, CA

Thank you for inquiring about the availability of natural gas service for your project. We are pleased to inform you that Southern California Gas Company (SoCalGas) has facilities in the area where the above named project is being proposed. The service would be in accordance with SoCalGas' policies and extension rules on file with the California Public Utilities Commission (CPUC) at the time contractual arrangements are made.

This letter should not be considered a contractual commitment to serve the proposed project, and is only provided for informational purposes only. The availability of natural gas service is based upon natural gas supply conditions and is subject to changes in law or regulation. As a public utility, SoCalGas is under the jurisdiction of the Commission and certain federal regulatory agencies, and gas service will be provided in accordance with the rules and regulations in effect at the time service is provided. Natural gas service is also subject to environmental regulations, which could affect the construction of a main or service line extension (for example, if hazardous wastes were encountered in the process of installing the line). Applicable regulations will be determined once a contract with SoCalGas is executed.

If you need assistance choosing the appropriate gas equipment for your project, or would like to discuss the most effective applications of energy efficiency techniques, please contact our area Service Center at 800-427-2200.

Thank you again for choosing clean, reliable, and safe natural gas, your best energy value.

Sincerely,

Jason Sum

Appendix L
Draft Mitigation Monitoring Program

This page intentionally left blank

DRAFT MITIGATION MONITORING PROGRAM

Mitigation Measure	Timeframe of Mitigation	Monitoring, Enforcement, and Reporting Responsibility
CULTURAL RESOURCES		
Mitigation Measure CUL-1: Archaeological and Native American monitoring shall be conducted for any grading-related ground-disturbing activity with the potential to disturb native soils (i.e., non-engineered fill) within the Project site. Monitoring shall be performed under the direction of a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (National Park Service 1983). If cultural resources are encountered during ground-disturbing activities, work in the immediate area must halt and the find must be evaluated by the qualified archaeologist. Depending upon the nature of the find, if the discovery proves to be potentially significant under CEQA, as determined by the qualified archaeologist, additional work such as data recovery excavation, avoidance of the area of the find, documentation, testing, data recovery, reburial, archival review and/or transfer to the appropriate museum or educational institution, or other appropriate actions may be warranted at the discretion of the qualified archaeologist. The archaeologist shall complete a report of excavations and findings and submit the report to the Director of Development Services. After the find is appropriately mitigated, work in the area may resume.	Applicant shall submit a copy of the executed agreement with the contracted qualified archaeologist to the City prior to any ground-disturbing activity for the project, or the issuance of any permit necessary to commence a ground-disturbing activity, whichever is earlier.	El Segundo Development Services Department
GEOLOGY AND SOILS		
Mitigation Measure Paleo-1: The applicant shall retain a qualified paleontologist who meets the qualifications established by the Society of Vertebrate Paleontology (SVP) to develop a Worker Environmental Awareness Program (WEAP), which shall be in compliance with SVP guidelines. The paleontologist shall present the training to all construction staff to provide them with a basic understanding of the types of fossils that may be encountered and the laws protecting them, and the procedures to follow in the event the finds are encountered. In the event that paleontological resources are encountered during earth disturbance activities, all construction activities in the area of the find shall be temporarily halted and the paleontologist shall be notified to evaluate the find and determine the appropriate treatment in accordance with SVP guidelines for identification, evaluation, disclosure, avoidance, or recovery, and curation, as appropriate.	Applicant shall submit a copy of the executed agreement with the contracted qualified paleontologist to the City prior to any ground-disturbing activity for the project, or the issuance of any permit necessary to commence a ground-disturbing activity, whichever is earlier. WEAP training shall be administered prior to the start of earthwork activities and shall be administered to any new construction workers involved in excavation efforts associated with the Project.	El Segundo Development Services Department

Mitigation Measure	Timeframe of Mitigation	Monitoring, Enforcement, and Reporting Responsibility
TRANSPORTATION		
Mitigation Measure TRANS-1: The applicant shall prepare and implement a Project-specific TDM program. The TDM program shall consist of a list of approved strategies, guided by the California Air Pollution Control Officers Association (CAPCOA) recommendations. The following strategies would be applicable to both existing and proposed uses unless specified otherwise: ▪ Workplace Parking Pricing—Separates parking from property costs, requiring office tenants who wish to lease parking spaces to do so at an additional cost from the office lease cost. Parking is priced separately from office leases and must include a mechanism for ensuring that the parking costs are passed through to the employees utilizing the parking spaces. This strategy would only be applicable to the newly proposed uses. ▪ Transit Subsidies—Providing employees with free transit passes. ▪ Promotions & Marketing—Involves the use of marketing and promotional tools to educate and inform travelers about site-specific transportation options and the effects of their travel choices with passive educational and promotional materials. Marketing and public information campaign to promote awareness of TDM program with an on-site coordinator to monitor the program. ▪ Emergency Ride Home—Providing a taxi or transportation network company (TNC) voucher for employees to travel home in an emergency. ▪ Bike Share—Implementing bike share to allow people to have on-demand access to a bicycle. ▪ Bicycle Amenities—Bicycle showers, repair stations, and secure bicycle parking. ▪ Pedestrian Network Improvements—Implementing pedestrian network improvements throughout and around the Project site that encourage people to walk to nearby destinations and transit stops ▪ Carpool/Vanpool Incentives—Providing monetary assistance with fares, gas costs, or parking costs for carpool or vanpool users. ▪ Ridematch Program—Assisting potential carpoolers in finding other individuals with similar travel routes in either closed or open systems. ▪ Carshare Program—Providing carshare programs to employees.	Applicant to provide a TDM Program to the City for review, with approval completed prior to Building Permit Final or issuance of the first certificate of occupancy. The success of the program will be monitored and the tenant commute patterns will be reviewed, with updates of adjustments and changes to be provided in an annual monitoring report, or the TDM shall include a mechanism to report to the City on the progress.	El Segundo Development Services Department

Mitigation Measure	Timeframe of Mitigation	Monitoring, Enforcement, and Reporting Responsibility
TRIBAL CULTURAL RESOURCES		
Mitigation Measure TCR-1: Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities A. The Project applicant shall retain a Native American Monitor from a tribe that demonstrates ancestral affiliation with the project area. For purposed of this mitigation measure, the Gabrieleño Band of Mission Indians – Kizh Nation has demonstrated such ancestral affiliation. The Monitor shall be retained prior to the commencement of any ground-disturbing activity for the subject Project at all Project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). Ground-disturbing activity shall include, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching. B. A copy of the executed monitoring agreement shall be submitted to the lead agency either prior to the commencement of any ground-disturbing activity for the Project, or the issuance of any permit necessary to commence a ground-disturbing activity, whichever is earlier. C. The Monitor may attend the Worker Environmental Awareness Program (WEAP) training required by CUL-1 to provide sensitivity/educational training. The developer will provide the Monitor with a minimum of five working days' notice of when the WEAP training is to take place. D. The Monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the tribe. Monitor logs will identify and describe any discovered Tribal Cultural Resources ("TCRs") as defined in Public Resource Code Section 21074(A). Copies of monitor logs will be provided to the Project Applicant/Lead Agency upon written request to the Monitor. E. On-site tribal monitoring shall conclude upon the latter of the following (1) written confirmation to the Monitor from a designated point of contact for the Project Applicant that all ground-disturbing activities and phases that may involve ground-disturbing activities on the project site or in connection with the project are complete; or (2) a determination and written notification by the Monitor to the Project Applicant/Lead Agency that no future, planned construction activity and/or development/construction phase at the project site possesses the potential to impact TCRs.	Applicant to submit evidence of a contracted Native American Monitor to the City prior to issuance of building permits	El Segundo Development Services Department

Mitigation Measure	Timeframe of Mitigation	Monitoring, Enforcement, and Reporting Responsibility
Mitigation Measure TCR-2: Discovery of Tribal Cultural Resources Other than Human Remains and/or Grave Goods Upon the discovery of a TCR other than human remains and grave goods, Mitigation Measure CUL-2 shall be employed to ensure that any potential impacts remain less than significant.	Applicant to submit evidence of a contracted Native American Monitor to the City prior to issuance of building permits	El Segundo Development Services Department
Mitigation Measure TCR-3: Unanticipated Discovery of Human Remains and Associated Grave Goods A. Human remains and grave/burial goods shall be treated alike per California Public Resources Code Section 5097.98(d)(1) and (2). If Native American human remains and/or grave goods discovered or recognized on the Project site, then all construction activities shall immediately cease in the area. Native American human remains are defined in Public Resources Code 5097.98 (d)(1) as "an inhumation or cremation, and in any state of decomposition or skeletal completeness." Associated grave goods must also be treated in accordance with Public Resources Code Section 5097.98. B. Health and Safety Code Section 7050.5 dictates that any discoveries of human skeletal material shall be immediately reported to the County Coroner and all ground-disturbing activities on the site or any nearby, adjacent area reasonably suspected to overlie the presence of human remains and/or associated grave goods shall be halted until the coroner has determined the nature of the remains. If the coroner recognizes the human remains to be those of a Native American or has reason to believe they are Native American, he or she shall contact, within 24 hours, the Native American Heritage Commission (NAHC), and the protocols in Public Resources Code Section 5097.98 shall be followed. C. The NAHC will identify the most likely descendent (MLD). The MLD has 48 hours to make recommendations to the owner, or representative, for the treatment or disposition, with proper dignity, of the human remains and grave goods. If the MLD does not make recommendations within 48 hours, the owner shall reinter the remains in an area of the property secure from further disturbance. D. If the landowner does not accept the MLD recommendations, the owner or the descendent may request mediation by the NAHC. If mediation fails, the landowner shall reinter the human remains with appropriate dignity on the property in a location not subject to future subsurface disturbance.	Applicant to submit evidence of a contracted Native American Monitor to the City prior to issuance of building permits	El Segundo Development Services Department

Mitigation Measure	Timeframe of Mitigation	Monitoring, Enforcement, and Reporting Responsibility
E. If no MLD is identified, no recommendations are made, or the recommendation is rejected after mediation, the developer shall reinter the remains with appropriate dignity on the property in a location not subject to further, or anticipated future, subsurface disturbances. (Pub. Res. Code Section 5097.98[e]; CEQA Guidelines Section 15064.5(e).) F. Construction activities may resume in other parts of the Project site at a minimum of 100 feet away from discovered human remains and/or grave goods, unless the archaeologist and tribal monitor determines that resuming construction activities would likely disturb other human skeletal material, human remains, or grave goods. The tribal monitor and archaeologist shall provide the project manager express notice if the construction activities must be halted at a distance other than 100 feet, along with any other measures the archaeologist deems necessary. (14 Cal. Code Regs. Section 15064.5[f].) G. Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or grave goods. H. Any discovery of human remains/grave goods shall be kept confidential to prevent further disturbance.
